7. AT&T LOCAL EXCHANGE SERVICES

7.15 INTEGRATED NETWORK CONNECTION SERVICE (AT&T LOCAL SERVICE ON INCS)

AT&T Local Service on INCS provides one of the following services: DS-1 Digital Facilities, ISDN PRI, Business Lines or Digital Trunks over an Integrated Network Connection Service (INCS) access arrangement. Each individual customer location must be in an area where AT&T has the necessary facilities.

D
|
D

A. Provisioning

The INCS access arrangement will connect to the customer's premises via a T1 line. The customer must provide compatible customer premise equipment (CPE), and interfaces to support the local voice line and trunk applications.

B. Types of Service

Types of service delivery of INCS with ABN Local services are as follows:

- 1) DS-1 Digital Facilities - delivered as 24 (twenty-four) voice grade digital Channels.
- 2) ISDN PRI - delivers current functionality, excluding the delivery of Switched Digital Service with 64 Kbps End-To-End through the network. D
D
- 3) Digital Trunks - delivered as 8-23 voice grade digital channels. If 24 digital channels are required, a DS-1 Digital facility must be used. C
|
C
- 4) Business Lines - Delivers switched local exchange service for customers with 8-24 analog DSO Business Line needs. N
N

C. Features

All standard requirements, capabilities and feature functionality that are available for use with DS-1 Digital Facilities, ISDN PRI, Business Lines and Digital Trunks are available for use with ABN on INCS at the rates and charges specified in the RATE SCHEDULE.
