Metered Use Service may involve, at the customer's option, a monthly recurring minimum charge or an initiation of service fee for Interexchange facility usage. A monthly listing of each call and its duration is available as a standard feature. At additional cost, certain Metered Use Service options offers a customer the ability to: (1) identify the users and allocate the cost of his long distance service through the use of accounting codes, (2) reduce the amount of dialed digits through the use of speed numbers, and (3) receive his call records on magnetic tape.

Under each of the above service options, the individual customer's total monthly charges for use of the Interexchange communication facilities are based upon the total time the customer (account) utilizes such facilities. In that regard, individual Interexchange facilities usage charges, as well as other specific charges, discounts and/or features are applicable to each individual service option. When a metered use service call is established in one time-of-day rate application period and ends in another, the rate in effect in each rate application period applies to the portion of the call occurring within that rate application period. A specific description of each of the Metered Use Service options follows in this section. Recurring and non-recurring charges, features, and applicable discounts for all service options are located in Section 4. Metered Use Service is available as set forth in the various Service Availability Tables listed in this tariff.

^{1/} Customers reselling or rebilling the above service options must obtain a Certificate of Public Convenience and Necessity as an interexchange carrier from the Florida Public Service Commission.

N

MCI 900 Service is an inbound, long distance, voice-grade telecommunications service that permits callers to place long distance calls to Customer's stations in one location from stations in diverse geographical service areas. It is the customer's responsibility to provide answer supervision back to the MCI point of connection even when the MCI 900 Service is connected to switching equipment or a Customer-provided communications system. Subscribers to Commercial Dial 1 Service may originate calls only in the city or cities in which they maintain an active account. All Option M calls are rounded to the next higher full minute. If the computed charge includes a fraction of a cent the fraction is rounded to the nearest whole cent for all intrastate Commercial Dial 1 calls.

By subscribing to this service, Customer understands that use of this service is restricted in the following manner: Customer may not resell the services in any manner, including but not limited to as a wholesaler or aggregator.
