REPORT ON THE EFFORTS OF THE

Florida Public Service Commission to Reduce the Regulatory Assessment Fee for Telecommunications Companies

AS OF DECEMBER 2013

Florida Public Service Commission
Office of Telecommunications
REPORT ON THE EFFORTS OF THE FLORIDA PUBLIC SERVICE COMMISSION TO REDUCE THE REGULATORY ASSESSMENT FEE FOR TELECOMMUNICATIONS COMPANIES

As of December 2013

Florida Public Service Commission
Office of Telecommunications
Introduction

During the 2011 legislative session House Bill CS/CS/HB 1231, the “Regulatory Reform Act” (Act), was passed and signed into law by the Governor, effective July 1, 2011. Under the Act, the Legislature eliminated most of the Florida Public Service Commission’s (PSC’s or Commission’s) retail oversight authority for the telecommunications wireline companies, yet maintained the PSC’s authority over wholesale intercarrier issues. The PSC was required to reduce its regulatory assessment fees charged to wireline telecommunications companies to reflect the concurrent reduction in PSC workload. Section 364.336(3), Florida Statutes, requires:

By January 15, 2012, and annually thereafter, the commission must report to the Governor, the President of the Senate, and the Speaker of the House of Representatives, providing a detailed description of its efforts to reduce the regulatory assessment fee for telecommunications companies, including a detailed description of the regulatory activities that are no longer required; the commensurate reduction in costs associated with this reduction in regulation; the regulatory activities that continue to be required under this chapter; and the costs associated with those regulatory activities.

As a result of this Act, the PSC reduced its telecommunications regulatory assessment fees (RAFs) 20%, from 0.0020 to 0.0016 of companies’ gross operating revenues derived from intrastate business. This change became retroactively effective July 1, 2011. Florida telecommunications statutes remained essentially unchanged in 2012 and 2013; the agency continues to streamline remaining responsibilities.

Regulatory Activities That Are No Longer Required

The 2011 Act eliminated most of the retail regulation of local exchange telecommunications services by the PSC, including the elimination of rate caps on all retail telecommunications services, elimination of telecommunications-related consumer protection and assistance duties of the PSC, and elimination of the PSC’s remaining oversight of telecommunications service quality. The bill also reformed the PSC’s certification processes, authority over intercarrier matters, and other general revisions.

Consistent with the reduced authority of the PSC from the Act, the PSC has ceased the following activities over the past several years:
• The PSC no longer resolves non-basic retail consumer billing complaints.

• The PSC no longer addresses slamming or cramming complaints from consumers. The PSC continues to address slamming complaints that are reported by carriers under the Commission’s wholesale authority.

• The PSC no longer publishes and distributes materials informing consumers on billing related matters or informative materials relating to the competitive telecommunications market.

• The PSC no longer designates wireless eligible telecommunications carriers (ETCs) in Florida for the federal universal service fund. Any wireless carrier seeking ETC status in Florida must petition the Federal Communications Commission (FCC) for that authority.

• The PSC no longer performs service evaluations on carriers, with the exception of payphones and telephone relay service, nor does it investigate and resolve service related consumer complaints except as they may relate to Lifeline service, Telephone Relay Service, and payphones.

• ILECs can no longer petition the PSC for recovery of storm damage related costs and expenses.

• The PSC no longer reviews non-access service tariff filings for content, form, or format. It is the carrier’s choice whether to file its rate schedules with the PSC or publicly publish the schedules elsewhere, such as the companies’ websites.

There were no statutory changes in 2013 resulting in additional activities that are no longer required.

Savings
The PSC has been seeking cost savings and efforts to streamline regulatory processes for at least 12 years. The origin of these streamlining efforts is not limited to the emergence and evolution of competition in the telecommunications industry. In fiscal year 1999/2000, the PSC had 401 full time
positions. Through several reductions over a period of years, that number was reduced to 296 in the 2011/2012 fiscal year, a total reduction of 26.2 percent. For fiscal year 2012/2013, three additional PSC positions were eliminated. For 2014/2015, the PSC has proposed to reduce its workforce by another 10 positions. Over the years, many of these reductions came as a result of projected workload reductions in the telecommunications area.

Effective July 2011, the PSC reduced the telecommunications RAF from 0.0020 to 0.0016 of the gross operating revenues derived from intrastate business. In addition, all local telephone service providers now pay $600 as the minimum fee instead of varying rates based upon the service offered.¹ At the current 0.0016 rate, carriers will pay this minimum fee up to $375,000 in gross intrastate operating revenues. The reduced RAF rate was determined assuming reduced responsibilities, projecting staff hours on continuing telecommunications workload, and projecting telecommunications company revenues. Taking into account the continuing decline in revenues from the telecommunications companies regulated by the PSC, the smaller number of regulated companies, the reduction in PSC workload, and the positions eliminated, the agency does not plan to further reduce the telecommunications RAF rate at this time.

**Regulatory Activities That Continue To Be Required**

There were 382 telecommunications companies regulated in some way by the PSC as of October 31, 2013. The Commission continues to retain authority and responsibility in the following areas for telecommunications companies:

- The PSC resolves intercarrier disputes involving interpretations and implementation of sections of the intercarrier agreements.

- The PSC processes arbitrations of intercarrier agreements when the companies cannot negotiate all the terms of the agreement and request the PSC to resolve issues the companies define.

¹ Previously, the minimum fee ranged from $600 to $1000, depending on the type of service offered. Payphone operators continue to pay a minimum fee of $100.
• The PSC reviews interconnection agreements filed with the PSC in accordance with federal requirements.

• The PSC resolves cases involving area code relief, number conservation plans, number resource reclamation, local number portability, and other numbering issues.

• The PSC maintains oversight of the Florida Relay Service.

• The PSC maintains oversight of Florida’s Lifeline Program including establishing eligibility criteria, automatic enrollment, and monitoring ETCs.

• The PSC issues certificates of authority for telecommunications companies to operate in Florida, evaluating the applicant’s technical, financial, and managerial capability to provide service.

• The PSC resolves consumer complaints relating to Lifeline, Telephone Relay, and payphones.

• The PSC publishes network access tariff and company rate schedule information.

• The PSC publishes and distributes informative materials relating to the Lifeline program and conducts related consumer outreach.
Efforts to Reduce Costs

The PSC continues to find ways to reduce the costs of performing its continuing duties. In 2013, the PSC implemented agency-wide electronic filing and submission policies that will substantially reduce the number of paper documents at the agency.

The PSC retained the National Regulatory Research Institute (NRRI) in May 2011 to review the PSC’s organization structure and work flow processes to determine if any additional changes were needed in the telecommunications area. NRRI concluded that the structure of the PSC’s telecommunications group compares favorably to those in other states. In addition, NRRI made several recommendations for further efficiencies the PSC could implement over time. The PSC has fully implemented NRRI’s recommendations.

The PSC has also revised or repealed all substantive rules resulting from the Act, resulting in cost savings to both the agency and its regulated telecommunications companies. Additionally, the telecommunications staff continues to conduct periodic internal cross training on its remaining responsibilities and has developed comprehensive written Standard Operating Procedures for its functions. As staff become familiar with each other’s duties, the requisite training time will be reduced should the need arise to further consolidate or transfer functions.

Summary

The PSC has proactively responded to the changes in its statutory authority as a result of the Act. The agency has assessed the appropriate staffing levels for the telecommunications staff, and will continue to monitor the workload and staffing needs. The PSC hired NRRI in 2011 to audit the PSC’s telecommunications program to determine if additional changes needed to be made. While the audit results reflected favorably upon the current program, it also suggested additional streamlining measures. The PSC has completed implementation of NRRI’s plan. The PSC has reviewed its telecommunications rules and eliminated unnecessary or obsolete regulations. The agency continues to seek ways to economize its resources while maintaining a high quality work product for all industries under the PSC’s authority, including telecommunications.
