**Transmittal No. 21-02 VIA Electronic Filing** Mr. Cayce Hinton, Director Office of Industry Development & Market Analysis Florida Public Service Commission Attn: Tariff Section 2540 Shumard Oak Boulevard Tallahassee, FL 32399-0850

# Re: Verizon Access Services: Tariff No. 1 Name Change Filing

Dear Mr. Hinton,

Please find attached an original of revisions to MCImetro Access Transmission Services Corp. d/b/a Verizon Access Transmission Services ("Verizon Access") Access Services Tariff No. 1. Verizon Access respectfully requests an effective date of August 1, 2021

Included with this filing are the following revised tariff pages.

Page No.	Revision
1	3rd
2	26th
10	3 <sup>rd</sup>

With this filing, Verizon Access changes its name from MCImetro Access Transmission Services Corp. d/b/a Verizon Access Transmission Services to MCImetro Access Transmission Services LLC d/b/a Verizon Access Transmission Services as the result of its planned conversion from a corporation to a limited liability company. Only the name has been changed throughout this tariff. The planned conversion to a limited liability company will not result in any change to the rates, terms, and conditions of the services that Verizon Access offers to its customers. Verizon Access informed its customers of the name change via bill message in the May 2021 invoices.

If you have any questions regarding this filing, please do not hesitate to contact me at either (202) 515-2592 or edwin.reese@verizon.com.

Respectfully submitted,

Edwin Reese

#### ACCESS SERVICES

## 1. DEFINITIONS

Certain terms used generally throughout this price list for the Access Services of this Company are defined below.

(T)

Access Code: A uniform five or seven digit code assigned by the Company to an individual customer. The five digit code has the form 10XXX, and the seven digit code has the form 950-XXXX or 101XXXX.

Access Service: Switched Access to the network of an Interexchange Carrier for the purpose of originating or terminating communications.

Access Service Request (ASR): The industry service order format used by Access Service customers and access providers as agreed to by the Ordering and Billing Forum.

Access Tandem: An Exchange Carrier's switching system that provides a concentration and distribution function for originating or terminating traffic between local switching centers and customers' premises.

Advance Payment: Payment of all or part of a charge required before the start of service.

<u>Alternate Access</u>: Alternate Access has the same meaning as Local Access except that the provider of the service is an entity other than the local Exchange Carrier authorized or permitted to provide such service. The charges for Alternate Access may be specified in a private agreement rather than in a published or special price list if private agreements are permitted by applicable governmental rules.

Authorized User: A person, firm, corporation or other entity that either is authorized by the Customer to use Access Services or is placed in a position by the Customer, either through acts or omissions, to use Access Services.

Bit: The smallest unit of information in the binary system of notation.

Carrier or Common Carrier: See Interexchange Carrier or Exchange Carrier.

Channel(s): An electrical or, in the case of fiber optic-based transmission systems, a photonic communications path between two or more points of termination.

Common Channel Signaling (CCS): A high speed packet switched communications network which is separate (out of band) from the public packet switched and message networks. It is used to carry addressed signaling messages for individual trunk circuits and/or database related services between signaling points in the CCS network.

Company: MCImetro Access Transmission Services LLC d/b/a Verizon Access Transmission Services, a Delaware corporation, which is the (T) issuer of this price list.

Conventional Signaling: The inter-machine signaling system has been traditionally used in North America for the purpose of transmitting the called number's address digits from the originating Local Switching Center which terminates the call. In this system, all of the dialed digits are received by the originating switching machine, a path is selected, and the sequence of supervisory signals and outpulsed digits is initiated. No overlap outpulsing ten digit ANI, ANI information digits, or acknowledgment link are included in this signaling sequence.
