SOUTHERN BELL TELEPHONE AND TELEGRAPH COMPANY

DOCKETS NOS. 910163-TL AND 910727-TL

TESTIMONY OF ELTON HOWELL DIVISION OF COMMUNICATIONS

ON BEHALF OF THE FLORIDA PUBLIC SERVICE COMMISSION

DIVISION OF COMMUNICATIONS

FILED: MARCH 1, 1993

ACK _____ AFA _____ APP _____ CAF _____ CMU _____ CTR EAG EC. LIN OPC RCH . SEC _ WAS _____ OTH / la let

DOCUMENT NUMBER-DATE 02308 MAR-I S FPSC-RECORDS/REPORTING

DIRECT TESTIMONY - ELTON HOWELL 1 2 Please state your name and business address. 3 Q. 4 Elton Howell, 101 East Gaines Street, Tallahassee, 5 A. 6 Florida 32399-0866. 7 By whom are you employed and in what capacity? 8 0. 9 I am a staff engineer with the Florida Public Service 10 Α. Commission, Bureau of Service Evaluation. 11 describe your communications and regulatory Please 12 ο. experience. 13 14 I joined the commission staff in 1991 after twenty-one 15 Α. years of working as a contract employee and as an hourly 16 employee in various engineering and installation and repair 17 capacities for Pacific Bell, Southern Bell and various 18 General Telephone Companies. I was with GTE for 17 years 19 and held the positions of Senior Project Engineer, Project 20 21 Engineer and Planning Engineer. I was Senior Project 22 Engineer with Southern Bell for 8 months and spent 5 years 23 with Pacific Tel as Project Engineer and 24 Installer/Repairman. As an engineer and a planner I provided detailed telecommunication construction drawings 25

And the second second

1 for outside plant projects as well as developing budgets, 2 designing cable and conduit routes, cable sizing and 3 overall plans for the outside plant (OSP) engineers. In 4 addition I have designed and engineered fiber spans, T1 5 spans, remote carrier sites, and major cable and conduit 6 facilities. Some of the largest projects I engineered were 7 \$5.5 and \$14 million systems.

8

.

9 Q. What are your responsibilities in your present position?

As a staff engineer in the Bureau of Service Evaluation, I Α. 11 primarily perform service evaluations on the LECs and the 12 13 IXCs to ensure their quality of service. These evaluations include initiating and analyzing test call data, auditing 14 15 repair and business office records, making on-site 16 inspections and reporting the results of these tests and inspections. 17

18

19 Q. Have you previously testified before this Commission?
20
21 A. No.

- 22
- 23

1 Q. What is the purpose of your testimony?

A. The purpose is to address the problems that were discovered
when reviewing Southern Bell Telephone Company (SBT)
records for proper rebating of out-of-service (OOS)
troubles and Consumer Affairs complaints relating to repair
operations.

8

2

2

9 Q. What issues will your testimony address?

10

A. My testimony will directly address issues 301, 302, 306,
309 and 401 (b)(c) and indirectly address issues 307 and
310 that were originally established in Docket Nos. 910163TL and 910727-TL. These issues pertain to SET's proper
reporting and rebating of trouble reports.

16

17 Q. What analysis was preformed in the preparation of your18 testimony?

19

A. Members of the Bureau of Service Evaluation staff and I
have reviewed several trouble reports for August 1990,
April 1992 and Consumer Affairs complaints from February
1990 through December 1990 to see if the company properly
rebated customers. In addition, staff reviewed SBT's
repair and rebate operations to identify any major problems

1 that SBT may have experienced during these time periods. 2 Will you explain exactly what data was reviewed for August 3 Q. 1990? 4 5 Staff reviewed the Detailed Lengthy Extended Trouble 6 Α. History (DLETH) and billing records for customer direct 7 trouble reports that were out-of-service over 24 hours. 8 Our main goal in this review was to determine the accuracy 9 of SBT's out-of-service over 24 hour rebating procedures. 10 11 Did you participate in the review of the August 1990 data? 12 Q. 13 14 Α. No. 15 Do you agree with the findings in this review? Q. 16 17 18 A. Yes. 19 20 Q. What is a DLETH and how does SBT use it? 21 22 A DLETH is a record the company keeps to show the detailed Α. status of a trouble report from the time the trouble is 23 24 reported until the time the trouble is cleared and closed. 25 The DLETH can also be used to show the accumulated record

1

of the past trouble history for a specific telephone 1 2 number. 3 From the information you reviewed, did you find any 4 ο. problems with SBT's repair or rebate operations from the 5 1990 and 1992 data? 6 7 Yes, I found problems in both the August 1990 and April 8 Α. 1992 data. 9 10 What problems did you find in your review of the August 11 ο. 1990 data? 12 13 The staff reviewed 457 DLETHs and customer billing records 14 Α. 15 and found 337 of these troubles were eligible for rebates. 16 SBT did not rebate 117 of these trouble reports. 17 Approximately 35 percent of the August 1990 trouble reports 18 that were eligible did not receive a rebate. 19 20 Do you believe that 457 DLETHs is an appropriate number of Q. 21 reports to review? 22 23 A. Yes, the Division of Communications' (CMU) staff requested the Division of Auditing and Financial Analysis (AFAD) to 24 provide a sample of the trouble reports from the Mechanized 25

3

1 Trouble Analysis System's (MTAS) data provided by SBT that 2 were out-of-service over 24 hours. Based on a 95% factor 3 for the desired confidence level, a 5% expected error rate 4 and a 2% desired precision, the information provided CMU 5 staff with a statistically valid sample for this time 6 period.

- 8 Q. What is MTAS and the data associated with this system? 9
- 10 A. MTAS (Mechanized Trouble Analysis System) is a system used 11 by SBT to analyze trouble reports. The data in MTAS is a 12 summary of some of the data found on a DLETH such as 13 receipt time, close time, cause code and disposition code. 14
- 15 Q. Do you know why SBT failed to give these customers a rebate16 when they appear to be eligible for a rebate?
- 17

2

7

18 Α. The company states it does not believe it has to rebate 19 trouble reports that are out-of-service over 24 hours if it 20 is determined the trouble is related to the customer 21 premises equipment (CPE). However, I believe the intent of 22 the rule is clear, and SBT is required, at the very least, 23 to attempt to notify the customer within 24 hours that the trouble is related to their CPE. If the company does not 24 notify the customer, the customers would never know the 25

1 problem was related to their telephone equipment and therefore could be out-of-service indefinitely. 2 3 4 Do you believe SBT is required to rebate these CPE related 5 Q. 6 troubles? 7 Yes, it is my opinion that Rule 25-4.070 (1)(b) and (7) and 8 Α. Rule 25-4.110 (2), read in conjunction, requires SBT to 9 rebate troubles that are out-of-service longer than 24 10 hours. If the company identifies the troubles as customer 11 CPE problems, then the company must notify, or attempt to 12 13 notify, the customer within 24 hours that the problem is related to their CPE, otherwise the customer is due a 14 15 rebate. 16 17 Q. Is this rebating problem for CPE related trouble occurring statewide? 18 19 Yes, as you can see from the Exhibit EH-1 that the numbers 20 Α. 21 illustrate a company wide problem. 22 23

\$

Explain exactly what data was reviewed for April 1992? 1 Q. 2 The same type of information was reviewed for April 1992 as 3 Α. was reviewed in August 1990, DLETHs and billing records for 4 customer direct trouble reports that were out-of-service 5 However, staff broadened its scope to see 6 over 24 hours. 7 if there were other areas of concern that needed correcting. 8 9 What problems did you find in your review of the April 1992 10 Q. 11 data? 12 From my review of 438 DLETH's and the billing records 13 Α. 14 associated with those reports, it appears there were five major problems. 15 16 17 1. SBT did not rebate trouble reports that were out-of-18 service longer than 24 hours if the trouble was 19 determined to be associated with the customer's CPE. 20

21 2. SBT did not rebate 52 trouble reports for OOS over 24
22 hours even though the problem was with SBT's
23 equipment.

24

25

بر

3. SBT did not rebate for repeat reports even though

there were outages and the customer was OOS for the 1 full duration of the report's history. 2 3 SBT did not rebate an appropriate amount for some of 4 4. 5 the troubles which were OOS for several days. 6 SBT did not accurately identify the true cause of the 7 5. troubles in the initial trouble reports. 8 9 Can you show in a table the breakdown of your findings from 10 Q. your analysis of the April 1992 data? 11 12 Yes, Exhibit EH-2 shows the breakdown for the 5 areas I 13 Α. discussed above. 14 15 Was the sampling technique used for April 1992 similar to 16 Q. that which was used for the August 1990 review? 17 18 19 Α. Yes. 20 21 Q. Could you explain in more detail the problems you found in the April 1992 data? 22 23 24 Α. As found in both the 1990 and 1992 audits, SBT did not rebate subscribers for outages that were determined to be 25

2

related to CPE. Approximately 13 percent of the reports I
 reviewed were related to CPE. I also determined SBT does
 not rebate all out-of-service trouble reports even though
 they were linked to the company's own telephone plant.
 Exhibit EH-3 illustrates a trouble that falls into this
 category.

7

5.5

It also appears that SBT did not rebate what appears to be 8 Rule 25-4.070 (7) states, "A repeat repeat reports. 9 trouble report is another report involving the same item of 10 plant within thirty days of the initial report." Exhibit 11 EH-3, EH-4, EH-5 and EH-7 shows multiple trouble reports 12 which appear to be repeat reports. It appears the company 13 may have attempted to circumvent the rule by identifying 14 different pieces of plant as the cause so that these 15 reports would not be classified as repeat reports. 16 In my opinion these reports were repeat reports and deserve a 17 18 rebate. However, SBT has statused these reports as ordinary trouble reports which basically will either limit 19 the amount of rebate given or exclude the report from a 20 21 rebate since each individual trouble report may not have 22 exceeded 24 hours. For example, Exhibit EH-3, shows that the customer was out-of-service for 13 days. During this 23 time the customer called in five (5) out-of-service 24 25 Three times the complaint was "can't call - no reports.

1 dial tone" and once as "can't call out"; the last report 2 was "can't be called". In effect, out-of-service. Α 3 repairman was dispatched out four times before the problem 4 was finally solved. I determined from the narrative of the 5 DLETH that the subscriber's service was connected to the 6 wrong cable pair in the central office; it was this final 7 action that stopped the trouble reports. The company categorized each trouble that was dispatched as a different 8 9 item of plant; therefore, excluding it from a rebate since it was not considered a repeat report. It is my opinion 10 the subscriber deserved a rebate for all thirteen days. I 11 12 could find no evidence where a rebate was given. Exhibits 13 EH-4, EH-5 and EH-7 show examples of similar repeat 14 reports.

15

e*,

In addition, it appears that SBT rebated some customers a partial amount owed for being out-of-service; that is where one day was rebated but three days should have been rebated. The non-rebating of these reports appear to be due to SBT's statusing of these reports as ordinary trouble reports instead of repeat reports. See Exhibit EH-6.

22

23

Why do you think the customer shown in Exhibit EH-6 should 1 Q. have been given a rebate for three days? 2 3 The reports which were analyzed involved similar out-of-4 Α. service trouble conditions but were coded by SBT as 5 6 different causes thereby circumventing what staff believes 7 should be a repeat report and rebated pursuant to Rule 25-4.070 (1) (b) and (7) and 25-4.110 (2). 8 9 What should be done to expedite the repair of these 10 Q. troubles? 11 12 The company should verify the service is actually working 13 Α. 14 correctly all the way from the customer's premises back to 15 the central office. This procedure, in my opinion, would stop the main causes of repeat reports, multiple reports, 16 17 or subsequent reports. See Exhibits EH-3, EH-4, EH-5, EH-6 18 and EH-7. 19 Do you have any information, other than CPE, showing that 20 Q. 21 SBT has failed to provide proper rebates? 22 23 Staff found in its recent audit of the April 1992 DLETH's Α. that 30% of the total trouble reports, which were out-of-24 service over 24 hours, were not properly rebated. Of this 25

<u>د ب</u>د

total, 43.9% were CPE related reports and 56.1% were from the regulated side of the market; that is, from the central office to the point of demarcation, such as the protector or the network interface. Furthermore, 12% of the trouble reports not rebated were service order related. See Exhibits EH-8 and EH-9.

7

8 Q. What do you mean by service order related?

9

10 A. This means the telephone was not working after the service 11 order was completed by the company and generally relates to 12 a bad plant condition. Exhibit EH-9 shows in the DLETH 13 narrative a defective cable pair was assigned because there 14 were no other cable pairs available.

15

16 Q. How many multiple reports were found in the April 1992 17 study?

18

19 Staff found 40 customers that had multiple reports related Α. to their out-of-service complaints. Exhibit EH-10 shows a 20 21 subscriber had called 26 times within a 6 day period before 22 the trouble was cleared. For this circumstance Exhibits EH-11, EH-12 and EH-13 23 demonstrate how, through the 24 existing system now being used in the Loop Maintenance 25 Operational System (LMOS) and MTAS, the rebate rules are

being circumvented by classifying the reported troubles to different causes; meanwhile the subscriber is out-ofservice. Each time they called in a report, LMOS would treat it as an unrelated trouble which would be classified as a multiple or subsequent report, not of the same origin or cause, thus not deserving a rebate.

- 8 Q. What information did you review in your analysis of9 Consumer Affairs complaints?
- 10

7

J.

11 A. Staff and I reviewed all complaints whether classed as 12 justified or not filed with the Commission's Division of 13 Consumer Affairs for the time period of February 1990 14 through December 1990. This information was compared to 15 the MTAS trouble information for each telephone number for 16 the same period.

17

18 Q. What problems did you find in your review of the Consumer19 Affairs complaints?

20

A. Five major problems appeared from the review of the
Consumer Affairs Complaints and the MTAS data. The
problems are as follows:

24

25 1. Discrepancies between the Consumer Affairs complaints

1		and the MTAS data.
2		
3		2. Excessive delay in repairing a cable trouble.
4		
5		3. Service Orders not properly installed.
6		
7		4. Numerous reports that were delayed due to heavy
8		workload.
9		
10		5. Inaccurate information filed with the Division of
11		Consumer Affairs by SBT.
12		
13	Q.	Describe the type of discrepancies between the Consumer
14		Affairs complaints and the MTAS data that you referenced
15		above?
16		
17	А.	It was apparent what the customer reported to SBT was not
18		what staff found on the MTAS data. For example, a customer
19		may have reported that their service was out of order.
20		However, upon reviewing the company's records of the
21		reported trouble the initial status of the trouble report
22		was "service affecting" instead of "out-of-service".
23		
24		

Q. What do you mean by excessive delay in repairing a cable
 trouble?

3

From review of the complaints, it appears the company has 4 Α. a practice of dispatching a service technician to repair a 5 trouble report unless it is initially reported as a cable 6 When a service technician discovers the trouble trouble. 7 is related to a cable trouble the service technician does 8 not fix the trouble since it is a cable trouble. The 9 service technician will inform the maintenance center the 10 problem is in the cable. The company will put the trouble 11 report back in the dispatch pool until an available cable 12 repairman can respond to the trouble report. At that time, 13 the maintenance center will dispatch a cable repairman. 14 Staff believes the delay of possibly several days is 15 inappropriate. SBT should attempt to get a cable repairman 16 17 dispatched sooner in order to repair the trouble instead of 18 waiting several days.

19

20 Q. What do you mean when you say a service order was 21 improperly installed?

22

A. This is the same problem that appeared in the review of the
April 1992 data which showed a service order had multiple
trouble reports filed shortly after the initial

installation of the service order. This should not happen
 if the service order is installed properly and checked to
 the customer's premises.

4

5 Q. Could you explain what you mean when you state numerous
6 reports are delayed due to a heavy workload?

7

From this review as well as the April 1992 data it Yes. 8 Α. appears that in some of the trouble reports SBT stated the 9 trouble was not fixed due to a heavy workload. In some 10 SBT attributed this excessive workload to instances 11 inclement weather. However, there were some instances when 12 the company stated the reason for not completing the repair 13 was due to the workload and did not specify that it was 14 weather related. From this it appears that SBT may have 15 some staffing problems in the repair operations as it 16 17 relates to repair of cable trouble reports.

18

19 Q. Could you explain what you mean by inaccurate information20 filed with the Division of Consumer Affairs.

21

A. In some cases it was apparent the company did not inform
the Consumer Affairs' staff of possible troubles related to
the specific report filed by the customer. For example,
the customer reported to the Commission he had been out-of-

service starting August 11th, and on that specific date he
 reported the outage to the company. SBT usually did not
 report any related trouble the customer may have had prior
 to his claim with the Commission.

5

6 Q. As a result of your investigation, should Southern Bell be
7 required by the Commission to rebate those customers not
8 properly rebated?

9

10 A. Yes.

11

12 Q. Should Southern Bell be required to file a report with the 13 commission for these rebates? If so, what should be 14 contained in the report?

15

16 A. Southern Bell should provide evidence that all the missed
17 rebates, beginning in February 1990, including those
18 contained in my exhibits, to the conclusion of these
19 hearings have been properly rebated.

20

21 Q. Does this complete your testimony?

22

23 A. Yes it does.
