> Re: Petition of Peoples Gas System, Inc. to resolve territorial dispute with Clearwater Gas System, a Division of the City of Clearwater Docket No. 94-0660-GU

Dear Ms. Bayo:

Enclosed for filing are an original and fifteen (15) copies of the Testimony of Charles S. Warrington, Jr., filed on behalf of Clearwater Gas System in the above-referenced docket.

Thank you for your assistance in this matter. ACK. Sincerely, ACA **BECEIVED & FILED** AOP CAF William J. Peebles EPSC-BUREAU OF RECORDS CMU. WJP:vm CTR cr\c?@arwat\bayo.ltr cc: All Parties of Record ΈΛG Brown **Ē**EG - 4 LIN OPC RCH _____ SEC 1 WAS ____ 014 DOCUMENT Nº MBER-DATE |||0| NOV-1 a

FPSC-RECCRUS/REPORTING

CERTIFICATE OF SERVICE

I HEREBY CERTIFY that the original and 15 copies of the foregoing **Testimony of Charles S. Warrington**, Jr. have been furnished by hand-delivery to Blanca S. Bayo, Director, Records and Reporting, Florida Public Service Commission, 101 E. Gaines Street, Tallahassee, Florida 32399-0854; and a true and correct copy furnished by hand-delivery to Martha Brown, Legal Services, Florida Public Service Commission, 101 E. Gaines Street, Tallahassee, Florida 32399-0854; and by U.S. Mail to Ansley Watson, Jr., Esg., MacFarlane Ausley Ferguson, & McMullen, Post Office Box 1531, Tampa, Florida 33601-1531, this _____ day of Nevember, 1994.

TESTIMONY OF CHARLES S. WARRINGTON, JR. ON BEHALF OF CLEARWATER GAS SYSTEM

DOCUMENT NUMBER-DATE

TESTIMONY OF CHARLES 8. WARRINGTON, JR. ON BEHALF OF CLEARWATER GAS SYSTEM

• 5

٠

| 1 | Q. | Please state your name and business address. |
|----|----|---|
| 2 | Α. | My names is Charles S. Warrington, Jr. My business |
| 3 | | address is 400 N. Myrtle Avenue, Clearwater, Florida. |
| 4 | | 34615. |
| 5 | | |
| 6 | Q. | By whom are your employed? |
| 7 | Α. | I am employed by the City of Clearwater, Florida |
| 8 | | ("Clearwater") as Managing Director & Executive Officer |
| 9 | | of the Clearwater Gas System ("CGS"). CGS is a |
| 10 | | municipally-owned natural and propane gas local |
| 11 | | distribution company, owned and operated by the City of |
| 12 | | Clearwater since 1923. |
| 13 | | |
| 14 | Q. | How long have you been employed by Clearwater? |
| 15 | Α. | I have been employed by Clearwater for approximately 2- |
| 16 | | 1/2 years in the capacity of Managing Director & |
| 17 | | Executive Officer. |
| 18 | | |
| 19 | Q. | Describe your previous employment. |
| 20 | Α. | Prior to joining the City of Clearwater on February 3, |
| 21 | | 1992, I served as Director of Customer Services for |
| 22 | | Florida Power & Light Company ("FPL"), the largest |
| 23 | | electric utility in the State of Florida. I was |
| | | |

1 responsible for corporate-wide customer services, 2 policies, procedures, systems, training and regulatory Prior to this position, I had served as a interface. 3 District General Manager for two of the largest FPL 4 Districts (Miami and Coral Gables). In total, I had 20 5 years with FPL, holding a number of positions of 6 7 increasing responsibility and gaining a great deal of public utility experience. 8

9

10 Q. What are your educational and professional 11 qualifications?

I received a Bachelor of Electrical Engineering Degree 12 Α. 13 from the Georgia Institute of Technology in 1971, and I am a 1982 graduate of the University of Michigan Public 14 15 Utility Executive Program. I have been a registered Professional Engineer in the State of Florida since 16 17 I currently serve on the Board of Directors of 1976. the Florida Natural Gas Association, serve on the Board 18 19 of Directors and as Secretary of the Municipal Gas Authority of Florida, serve on the Board of Directors 20 and as Vice President of the Florida Municipal Natural 21 22 Gas Association, and serve on the Board of Directors and as Vice President of the Florida Engineering Society -23 24 Pinellas Chapter.

Q. What are your responsibilities as Managing Director &
 Executive Officer of CGS?

I serve as Executive Officer of CGS and am responsible 3 A. to the City Manager for the overall management and 4 direction of CGS. This includes all aspects of 5 responsibility for planning, public relations, marketing 6 and sales, distribution and maintenance operations, 7 service and repair, housepiping installations, propane 8 operations, and gas supply and administration. 9

10

7

11 Q. Describe the Clearwater Gas System.

The CGS began operations in the mid-1920s with the 12 Α. production, distribution and sale of manufactured gas. 13 The system was converted to natural gas in 1959 when 14 Florida Gas Transmission Company ("FGT") extended 15 pipelines into Florida. We currently serve 12,035 16 customers and have installed nearly 500 miles of gas 17 18 main throughout northern Pinellas County. We also 19 provide propane ("LP") service in areas where natural gas mains have not yet been extended. In addition to 20 21 serving the City of Clearwater, CGS has franchise 22 agreements and/or has extended facilities into ten (10) other cities in northern Pinellas County as well as the 23 24 unincorporated areas between these cities. This

1 includes the cities of Belleair, Belleair Beach, 2 Belleair Bluffs, Belleair Shores, Dunedin, Indian Rocks, 3 Largo, Oldsmar, Safety Harbor and Tarpon Springs. According to the most recent surveys conducted by 4 5 Pipeline & Gas Journal, CGS ranks as the third largest (of 28) municipally-operated natural gas system in 6 7 Florida, the 39th largest (of approximately 950) 8 municipal system in the United States, and overall the 9 199th largest gas system in the United States (including 10 all of the investor-owned systems). The CGS is a full 11 service natural and propane gas utility, providing appliance sales and installation, housepiping, and 12 13 service and repair in addition to all other aspects of 14 providing metered gas service to our residential, commercial and industrial customers. 15

16

Describe CGS's existing service area and customer base. 17 Q. 18 Α. The current service area of CGS is approximately 135 square miles located throughout northern Pinellas 19 County. The current service area is generally bounded 20 by Ulmerton and Walsingham Roads on the south, the Gulf 21 22 of Mexico on the west, the Pasco/Pinellas County line on the north, and the Hillsborough/Pinellas County line and 23 Tampa Bay on the east. Exhibit (CSW-1) depicts 24

1 CGS's existing northern Pinellas County service area. 2 The CGS customers have grown in the past five years from 10,490 in September 1989 to 12,035 in September 1994, a 3 15% growth rate. This rate has been accelerating 4 5 rapidly in the last few years, with 744 customers 6 connected during fiscal year 1993-1994, over a 6% annual 7 growth rate. Within CGS's northern Pinellas County service area, CGS provides service to 9,914 residential 8 customers; 1,945 commercial/industrial firm service 9 10 customers; 11 interruptible customers; and 165 propane customers. Also, as of September 1994, CGS had 11 12 installed 491.29 miles of natural gas main (39.29 miles in just the past two years) and for the fiscal year 13 1993-1994, ending in September 1994, had annual sales of 14 15.5 million therms resulting in gas sales of \$12.1 15 million. In addition to these gas sales, other gas-16 17 related revenues for the year amounted to \$1.2 million.

18

3

19 Q. Describe CGS's service capabilities.

A. As stated earlier, the CGS is a full service natural and
propane gas distribution company with 82 full-time
employees as of September 1994. In addition, CGS
employs an average of 35 construction contract employees
on an on-going basis as well as utilizing the City of

Clearwater Utility Customer Service 1 and Billing personnel to handle telephone inquiries and render 2 bills, and a number of other City service personnel such 3 as Fleet Maintenance, Finance, Legal, etc. 4 Since Clearwater also operates water, waste water, and solid 5 waste utilities as well as a number of other enterprise 6 activities, we are able to provide our customers with a 7 8 highly trained and efficient customer service staff. 9 The CGS also provides 24-hour dispatch service for emergency operations of the gas system as well as the 10 11 other utility operations of the City and maintains call-12 out personnel who are available to respond to the customer at any hour of the day and night. 13 In total, 14 the combining of CGS personnel with the resources of the City of Clearwater allows us to provide an evan greater 15 16 level of service responsiveness than that which might normally be typical of other gas systems of similar 17 18 size.

19

Q. Describe the genesis of CGS's plans for future growth.
A. Between 1987 and 1990, Clearwater's City Commission
performed a thorough review and analysis of the
operation of CGS. This review included solicitation of
Request for Proposals from companies interested in

1 purchasing the System. After carefully analyzing CGS, its operations, and all bids received in response to the 2 Request for Proposals, the City Commission declined all 3 offers, including an offer by Peoples Gas to purchase 4 the System for \$14.1 million. Clearwater determined 5 instead to strengthen the utility management and 6 organization within the City and pursue a strategic 7 expansion plan. That effort culminated in my hiring and 8 the formulation of a document entitled "1993-2000 9 Strategic Plan and the 1993-94 Annual Operating and 10 Capital Budget". That Strategic Plan is attached as 11 12 Exhibit (CSW-2) to my testimony. This Plan was presented to the Clearwater City Commission and 13 14 unanimously approved by the Commission on August 10, 1993. 15

16

17 Q. Describe briefly the Clearwater Gas System Strategic18 Plan.

19 A. The Strategic Plan anticipates growth in two distinct
20 geographic areas, northern Pinellas County and western
21 Pasco County, as well as an expanded new gas markets
22 program for both Pinellas and Pasco Counties which will
23 include the introduction of natural gas vehicles and gas
24 air conditioning. Strategies #1 and #2 of the Strategic

1 Plan recommend an acceleration of the CGS growth in northern Pinellas County in order to provide service to 2 an additional 5,300 customers by the year 2000. It is 3 estimated that this will require a capital investment of 4 \$12.4 million and the addition of over 100 miles of gas 5 6 main within northern Pinellas County during the seven 7 year expansion period. In order to finance this, an 8 \$8.11 million Gas System Revenue Bond Series 1994A was 9 issued in September 1994 to fund this expansion effort 10 as well as the new gas markets program for the first Strategy #3 proposes to construct 91.6 11 three years. miles of natural gas main within western Pasco County to 12 13 serve approximately 1,900 customers by the year 2000. It was projected that this capital construction project 14 would require approximately \$10 million of investment. 15 attached Exhibit (CSW-3)depicts 16 The the 17 approximately 50 mile trunk main project which would be installed within approximately two years of the Florida 18 Public Service Commission's approval to proceed with 19 this project. 20

21

Francis & Salarda

Q. What efforts have you taken to implement this Strategic
Plan since its approval by the City Commission?
A. On September 1, 1994, we sought and obtained approval on

101 - C

1 second reading by the City Commission to file for bond 2 validation for an additional \$26.75 million of Gas System Revenue Bonding, which would include the Pasco 3 County expansion portion. This bond validation 4 proceeding is scheduled before the Pinellas Circuit 5 6 Court for November 1, 1994. Additionally, we are continuing to work on finalizing our intergovernmental 7 8 and franchise agreements with the cities of Port Richey and New Port Richey as well as Pasco County. We also 9 have done all the preliminary engineering work for the 10 11 initial construction segments on U.S. Highway 19, State Road 54 and State Road 52, and we have submitted and 12 13 obtained Florida Department of Transportation permits 14 for the first section to be built on U.S. Highway 19 from the Pasco/Pinellas County Line to State Road 54. 15 16 We also have negotiated a joint project agreement with 17 the Florida Department of Transportation for installation mains during 18 of gas an upcoming construction project on State Road 52 which is scheduled 19 20 to begin in early 1995. We have also had extensive discussions and are finalizing our plans with the City 21 22 of Port Richey which is in the process of reconstructing a number of their roadways in the next few months and 23 has asked us to work with them to install gas mains 24

during the construction project. We are currently preparing customer surveys to determine the feasibility for accomplishing this; however, it is critical that this be accomplished in a timely manner so that the gas mains may be installed during the roadway construction project which is scheduled to begin in early 1995.

7

8 Q. Please explain the difference in CGS's and Peoples'
9 projections of customers in the disputed area.

10 A. In order to display the differences in the projected
11 customers more clearly, please reference the following
12 table:

| 13 | | NUMBER OF | PROJECTED CU | STOMERS |
|----|----------------------|-------------------|----------------|-------------------|
| 14 | Customer Type | <u>Clearwater</u> | <u>Peoples</u> | <u>Difference</u> |
| 15 | Commercial | 389 | 336 | +53 |
| 16 | Industrial | 1 | 2 | (1) |
| 17 | Residential-Existing | 500 | 0 | +500 |
| 18 | Subtotal-Existing | 890 | 338 | +552 |
| 19 | Residential-New | 400 | <u>1,192</u> | (792) |
| 20 | Total Projected | 1,290 | 1,530 | (240) |

Peoples projected 336 commercial and two (2) industrial customers as compared to Clearwater's projection of 389 commercial and one (1) industrial customer. While it is unclear how Peoples arrived at their projections, Clearwater did an extensive door-to-door potential

1 customer survey along the entire main trunk line route. Clearwater's higher commercial customer numbers seem to 2 3 arise predominantly from our plans to serve both U.S. Highway 19 and Seven Springs Boulevard between the 4 Pinellas/Pasco county line and State Road 54, our plans 5 to serve the more commercially populated State Road 52 6 east of U.S. Highway 19 as opposed to the rural Hudson 7 Road route selected by Peoples, and our inclusion of 160 8 potential commercial customers off of the main trunk 9 line route in existing commercial neighborhoods. While 10 Clearwater recognized that there are two (2) potential 11 industrial customers on State Road 54 near the Pasco 12 County Air Park, we conservatively only projected 13 serving one (2) of these as we understand that the other 14 potential industrial customer is currently burning very 15 low cost reprocessed oil which is priced below our 16 As for the residential 17 natural gas supply cost. customers, Clearwater very conservatively projected 18 serving 900, with only about 400 in new subdivisions and 19 the other 500 in existing residential neighborhoods. 20 Peoples has indicated that their projection of 1,192 21 residential customers is all based on projected new 22 subdivisions as they have indicated that they do not 23 plan to serve existing residential neighborhoods. 24 Be

assured that, if the residential subdivisions are built,
Clearwater would be at least as aggressive as Peoples in
serving them. Therefore, Clearwater actually projected
serving 890 total existing customers in Pasco, whereas
Peoples only projected 338. Peoples' projections are
driven by high estimates of new subdivision construction
which either company would naturally commit to serve.

8

. .

9 Q. Explain the difference in the CGS's and Peoples'
10 projected cost of serving the disputed area.

11 A. In order to analyze the difference in Clearwater and
12 Peoples' projected construction costs, please reference
13 the following table:

| 14 | | NUMBER OF PE | ROJECTED MII | LES OF MAIN | |
|----|----------------------------|-------------------|----------------|-------------|--|
| 15 | Type of Main Projected | <u>Clearwater</u> | <u>Peoples</u> | Difference | |
| 16 | Main Trunk Line | 47.6 | 43.0 | +4.6 | |
| 17 | Existing Neighborhood Main | 37.0 | | +37.0 | |
| 18 | Subtotal in Existing Areas | 84.6 | 43.0 | +51.6 | |
| 19 | New Subdivision Main | 7.0 | 21.5 | (14.5) | |
| 20 | Total Miles of Main | 91.6 | 64.5 | +27.1 | |
| 21 | Clearwater's \$10.0 milli | on constru | ction cos | st estimate | |

exceeds Peoples' \$6,431,000 estimate by 55% due to 4.6 miles more of main trunk line and an estimated 37.0 miles of main line extension into existing commercial and existing residential neighborhoods. Even though

Peoples projected 14.5 miles more of new subdivision main (which Clearwater would also install if its became a reality), Clearwater projected 27.1 more total miles of main line. This represents a 97% greater commitment by Clearwater to serve western Pasco County's existing neighborhoods, and a 42% greater overall construction program based on miles of main.

8

9 Q. What arrangements with Florida Gas Transmission have 10 been made?

FGT is constructing a new gas pipeline along the west 11 Α. 12 coast of Florida called FGT Phase III which will 13 increase the supplies of gas available in the area. The 14 CGS entered into Phase III Transportation Agreements in 15 1992 for an additional 1,781 MMBtus per day to be 16 delivered during the summer and 1,348 MMBtus per day to 17 be delivered during the winter. Phase III is projected to be in service in early 1995. 18 This contract will provide adequate entitlements to enable CGS to serve the 19 Pasco County area as well as the additional growth in 20 northern Pinellas County during the next few years. 21 In order to receive this service, CGS negotiated a Gate 22 23 Station Agreement with FGT to connect to the Phase III 24 line on State Road 52, approximately eight miles east of

1 U.S. Highway 19 near the proposed Serenova Development. 2 This gate station request was filed by FGT with the 3 Federal Energy Regulatory Commission; however, as a 4 result of a formal Peoples Gas System objection to this 5 gate station construction, this was recently stayed 6 pending the outcome of the FPSC territorial dispute.

7

8 Q. How does the Pasco County expansion fit into the overall9 Clearwater Gas System?

10 Α. CGS currently has three service points in northern 11 Pinellas County. Our last expansion northward into 12 Oldsmar and Tarpon Springs is north of our current gate 13 stations. The addition of a gate station service point 14 in Pasco County at State Road 52 will strengthen the northern end of Pinellas County by providing a service 15 16 from the north as well as provide a looped service system for increased reliability for Pasco County with 17 service along two main corridors out of Pinellas County 18 as well as two major corridors within Pasco County. We 19 believe that this is a critically important aspect of 20 the Florida Public Service Commission's consideration in 21 The CGS provides adjacent this territorial dispute. 22 23 service to the western Pasco area with two existing corridors out of Pinellas County as well as the new 24

service point in Pasco County in order to provide a
 secure and reliable level of service for all the
 customers in both Pasco and Pinellas Counties.

4

5 Q. Describe Clearwater's ability to provide service to the 6 proposed customers in Pasco.

7 Clearwater has proposed to expand all of its services Α. into the Pasco area including the construction of a 8 9 customer service and operations center facility and appliance showroom as well a providing construction, 10 11 service, and installation personnel necessary to serve the Pasco customers. CGS has committed to the cities of 12 New Port Richey and Port Richey as well as to Pasco 13 County to aggressively market service to the residential 14 customers in existing subdivisions along the main trunk 15 16 corridor and to utilize a seven year pay back 17 feasibility formula in order to maximize the extension into the existing residential neighborhoods. 18 This is a normal part of Clearwater's growth strategy as we are 19 20 currently adding approximately 400 customers a year in existing neighborhoods in northern Pinellas County by 21 aggressively marketing our services. 22

23

sat.

24 Q. Describe Clearwater's rates and rate structure.

A. The Clearwater City Commission has established a
 schedule of rates and charges by ordinance which
 includes a purchase gas cost adjustment provision
 allowing the City to pass through to its customer any
 increase or decrease in the purchased price of gas. We
 currently have a very simplified rate structure with two
 basic rate schedules:

| 8 | Rate Schedule | <u>Current Rates</u> |
|----|------------------------|-------------------------------|
| 9 | General (Firm) Service | \$1.00 Month/Account Charge |
| 10 | | \$3.00 Month/First 3 therms |
| 11 | | 80¢ for each additional therm |
| 12 | Interruptible Service | \$1.00 Month/Account Charge |
| 13 | | 58¢ per therm |

Additionally, in 1993 the Clearwater City Commission 14 approved a Discount Rate provision allowing CGS to flex 15 its rates downward in order to meet the competition of 16 17 other energy sources. The Clearwater City Commission has also authorized a new rate study in order to 18 19 modernize our rate structure. This is currently in process with Coopers & Lybrand and should be ready for 20 implementation in the second quarter of 1995. The CGS's 21 current residential rate is approximately 20% lower than 22 Peoples Gas at the 25 average therms per month level. 23 The small general service customers of CGS also enjoy a 24

lower rate than Peoples Gas. 1 Due to the current simplified rate structure, higher levels of service to 2 commercial customers are currently somewhat higher on 3 CGS than Peoples Gas; however, it should be pointed out 4 that it is Clearwater's philosophy to broadly serve the 5 6 neighborhoods, which increases the overall costs which 7 are inherent in rate making. This still produces rates which are typically considerably lower than competing 8 9 propane and electric for all classes of customers.

2. A

10

11 Q. Please explain the 3.5¢ per therm surcharge which is
12 levied on some CGS customers.

13 Α. This is a surcharge which was imposed by the Clearwater City Commission on all natural gas sales in "all areas 14 15 north of State Road 580 and all areas east of McMullen-16 Booth Road served by gas mains or connections made after October 1, 1983" when we issued gas revenue bonds to 17 expand service into northern Pinellas County. 18 The 19 purpose of this surcharge was to help offset the impact of the debt carrying costs on the existing customer 20 21 The ordinance further specifies that this base. surcharge is applicable "unless such a surcharge is 22 prevented by a franchise agreement with the city." We 23 have expressly excluded the surcharge application in 24

Pasco County by including language in the proposed Pasco County, Port Richey and New Port Richey franchises, insuring that the same rates would apply as those in the City of Clearwater. Additionally, the preliminary recommendation of the rate study in process by Coopers Lybrand is to drop the surcharge in favor of level system-wide rates.

8

9 Q. Please explain the CGS policy regarding the conversion
10 of LP customers to natural gas, how that policy differs
11 from Peoples', and why the CGS policy better serves the
12 public interest.

13 CGS regards LP (propane gas) service as a transitional Α. service until natural gas becomes available in the area. 14 As a result, CGS installs the permanent metered service 15 on LP accounts and renders the customer bills based on 16 the amount of gas used monthly as opposed to bulk 17 delivery billing. When natural gas becomes available, 18 it is only a matter of removing the LP tank and 19 converting the customer's burners. This is a vastly 20 different policy than that of Peoples as it is 21 Clearwater's policy to expand natural gas aggressively 22 into existing neighborhoods to give the customer the 23 advantage of more economical and environmentally 24

1 friendly natural gas. Peoples' representatives have repeatedly told the Pasco community that existing 2 neighborhoods will have to continue to be served by LP 3 gas as it is not economical for them to expand into 4 5 already developed areas. What this means is that the customers are held captive to higher, unregulated LP 6 7 pricing. Peoples has reported that they have already installed 1,500 or more LP services in western Pasco 8 County and are growing at a rate of 500 LP customers per 9 10 year. We are not surprised that Peoples is unwilling to 11 expand natural gas service to serve their existing LP 12 customers as they would then have to abandon their LP 13 capital investment with a resulting loss of overall 14 corporate revenue. It should be noted that the Peoples 15 Gas' St. Petersburg Division reports adding less than 300 natural gas residential customers in the last year 16 17 while adding 500 LP customers in western Pasco County 18 alone.

19

20 Q. What sets CGS apart from Peoples?

A. It is our commitment to broadly serve the residential
neighborhoods through an aggressive marketing program.
This is the current way that we do business in northern
Pinellas County and we have made commitments to the

1 cities of Port Richey and New Port Richey, as well as 2 Pasco County, to aggressively pursue construction into 3 existing neighborhoods of Pasco similar to Pinellas 4 County. Peoples Gas has on numerous occasions stated to 5 Pasco County, the City of Port Richey and the west Pasco 6 Allied Council that they intend to serve only the main 7 highways and "new" residential subdivisions. The CGS's initial projection of customers in Pasco County was 8 9 based on a door-to-door survey of the commercial customers along the main corridors as well as a very 10 11 conservative estimate of the subdivision construction projected over the next few years. We have repeatedly 12 13 assured Pasco County that we would aggressively build 14 into any new subdivisions, if they are in fact built, as well as expand into the existing neighborhoods. Peoples 15 Gas provided a later version of a plan which projects a 16 17 higher number of residential customers as a result of a higher projection of subdivision growth over the next 18 few years. Of course, if this growth materializes, CGS 19 would also aggressively build into these subdivisions as 20 21 well, resulting in an even greater level of service to 22 residential the customers in Pasco County. 23 Additionally, CGS has pledged to work with the cities 24 and County as roadways are constructed and reconstructed

to install facilities during these projects in order to 1 grow with the County and avoid future disruption of the 2 roadways. Again, this is a normal "public works-minded" 3 philosophy of construction for CGS. On the contrary, 4 People's Gas has indicated that they have no interest in 5 6 building in the roadways of Port Richey and have not indicated that they normally build in parallel with 7 roadway construction but rather base their growth on 8 their own feasibility studies to meet their schedule. 9 In summary, CGS offers the citizens of Pasco the 10 benefits of natural gas service combined with a public 11 works-minded utility perspective designed to grow with 12 the County and maximize service to the existing 13 14 customers.

15

16 Q. What do you consider to be the disputed area in this 17 document?

18 A. In my opinion, the area in dispute between Peoples and
19 CGS can generally be described as that portion of
20 western Pasco County bordered on the west by the Gulf of
21 Mexico, on the south by State Road 54, on the east by
22 U.S. Highway 41 (including any services which would
23 extend off of U.S. Highway 41), and on the north by the
24 Pasco/Hernando County line. This definition differs

somewhat from that defined by Rich Firebaugh in his prefiled testimony in the following areas:

1

2

Southern Boundary - We do not believe that there 3 is any question that CGS should be allowed to 4 serve up to State Road 54 in southwestern Pasco 5 County. The Peoples Gas map showed the southern 6 extent of their expansion plans down to State Road 7 54, whereas CGS is immediately adjacent to this 8 area. Our plan includes this area, and it only 9 makes good sense to allow construction as soon as 10 possible into this area of the County. 11

Eastern Boundary - We believe that the more 12 logical consideration for the eastern boundary of 13 14 the territory is somewhere between U.S. Highway 41 and I-75, and we would propose that CGS be granted 15 the right to install facilities on U.S. Highway 16 41, including the serving of any loads which 17 18 logically will be served off of that main line. Peoples Gas should be allowed then to service 19 20 loads east of and along I-75.

Northern Boundary - Though neither CGS nor Peoples
 showed current plans for service north of State
 Road 52 or Hudson Road, respectively, it is felt
 that the most logical expansion of facilities in

1 this area is off of U.S. Highway 19, as this is the main growth corridor. We do not believe that 2 3 it is a prudent investment by Peoples Gas to extend 8 miles of gas main down Hudson, which is a 4 5 very rural and undeveloped country road, in order to get to U.S. Highway 19. We would propose that 6 7 the FPSC allow CGS to extend facilities northward up U.S. Highway 19 to the Hernando/Pasco County 8 line as those subdivisions and commercial loads 9 10 develop over the next few years.

In general, we believe that CGS is in a much better 11 12 position to serve all of western Pasco County through its existing facilities which are adjacent to the south 13 14 and extending up through the gate station service on State Road 52 in northern Pasco County. 15 We do not believe that it makes sense for Peoples Gas to initiate 16 17 a new Division with a single point of service in western 18 Pasco County.

19

20 Q. Please summarize CGS's key issues regarding service to
21 western Pasco County.

22 A. We believe that CGS is in a much stronger position to
23 serve this area from a reliability of service standpoint
24 by integrating this service into that which already

1 exists adjacent to the area in northern Pinellas County. We also believe that it is critical that CGS be allowed 2 to build a gate station at State Road 52 in order to 3 take service off the new FGT Phase III pipeline and to 4 strengthen our service grid for our customers 5 in 6 northern Pinellas County. We also believe that it is 7 important to the citizens of Pasco County to be served 8 by a company which is committed to serving the existing neighborhoods as well as the new growth areas. 9 This is 10 difficult from a feasibility standpoint and requires a 11 concerted effort on the part of the utility. The CGS is 12 committed to this effort and our public works-minded 13 project construction techniques will facilitate our 14 building of mains in concert with the roadway 15 construction plans in western Pasco County. Finally, 16 the CGS has the manpower and the expertise to accomplish 17 this construction project -- the trunk main line 18 facilities within the next two years and the extensions 19 off that main line over the following three years - and 20 has the bonding capacity to commit the resources to 21 accomplish this project and serve all loads that are 22 feasible. We believe that this will result in many more 23 customers being afforded the opportunity to be served by 24 clean, efficient and economical natural gas during the

24

next decade than the plan proposed by Peoples Gas
 System.

CLEARWATER GAS SYSTEM PLANS FOR FUTURE GROWTH

The Clearwater Gas System has released to the Clearwater City Commission an aggressive strategic plan which proposes to extend underground natural gas service pipelines into west Pasco County as well as nearly double the rate of growth of gas service in north Pinellas County. The city commission is scheduled to review this proposal at its budget hearing on Aug. 10, 1993.

The Clearwater gas system is a municipally owned, full-service natural and propane (LP) gas utility. It currently serves all of North Pinellas County from Ulmerton Road to the Pasco County line.

It began service in this area in 1923 and has grown to 11,700 customers today. The last major expansion was completed in 1987 and extended the gas service pipelines north from Curlew Road to Tarpon Springs and west into Oldsmar.

A gas service pipeline was also just completed on the beach extending service from Sand Key south through the cities of Belleair Beach, Belleair Shores and Indian Rocks Beach.

The gas system is currently adding about 450 new customers per year and has built 472 miles of underground gas main in the service area. The expansion plan proposes to increase the rate of growth to 930 new customers per year by building 46 miles of new lines in the next year in North Pinellas County and into West Pasco County as far north as New Port Richey.

Chuck Warrington, Managing Director and Executive Officer of the Clearwater Gas System, said, "We are excited at the prospect of

During 1994, the Clearwater Gas System plans to begin conversion of city vehicles, install a public natural gas filling station and assist local companies with fleets of vehicles to convert them from gasoline and diesel to natural gas. Florida Power Corp. and Neighborly Senior Services are already operating some vehicles on natural gas.

Additionally, gas air conditioning technology is now available and economical for office and other commercial buildings. Excellent residential gas air conditioning equipment is expected to become commercially available in 1994. This plan will enable the Clearwater Gas System to offer these services to customers in North Pinellas and West Pasco counties.

Warrington said, "This is an exciting time for the natural and propane gas industries as gas technology is improving rapidly. The prices are right and there are at least two new transmission pipelines scheduled to be built into West Florida which will make additional quantities of natural gas available for our customers.

"We look forward to aggressively expanding our services, improving our quality, and satisfying our customer's energy needs as we build together toward the 21st century", Warrington said.

Clearwater Gas System Chuck Warrington, Managing Director 813-462-6630

CLEARWATER GAS SYSTEM PLANS FOR FUTURE GROWTH

The Clearwater Gas System has released to the Clearwater City Commission an aggressive strategic plan which proposes to extend underground natural gas service pipelines into west Pasco County as well as nearly double the rate of growth of gas service in north Pinellas County. The city commission is scheduled to review this proposal at its budget hearing on Aug. 10, 1993.

The Clearwater gas system is a municipally owned, full-service natural and propane (LP) gas utility. It currently serves all of North Pinellas County from Ulmerton Road to the Pasco County line.

It began service in this area in 1923 and has grown to 11,700 customers today. The last major expansion was completed in 1987 and extended the gas service pipelines north from Curlew Road to Tarpon Springs and west into Oldsmar.

A gas service pipeline was also just completed on the beach extending service from Sand Key south through the cities of Belleair Beach, Belleair Shores and Indian Rocks Beach.

The gas system is currently adding about 450 new customers per year and has built 472 miles of underground gas main in the service area. The expansion plan proposes to increase the rate of growth to 930 new customers per year by building 46 miles of new lines in the next year in North Pinellas County and into West Pasco County as far north as New Port Richey.

Chuck Warrington, Managing Director and Executive Officer of the Clearwater Gas System, said, "We are excited at the prospect of

offering additional customers the opportunity of being served with economical, environmentally clean, natural and LP gas - America's fuels of choice. We also are looking forward to providing an increased level of service to our customers." The seven-year strategic plan proposes to add nearly 7,300 new customers and bury 230 miles of new pipeline by the year 2000.

City Manager Michael Wright, in his 1993-94 annual budget proposal to the city commission said, "I am recommending the City Commission take a bold step toward improving the long term profitability of the gas system."

He emphasized to the commission that the plan would nearly triple the income to the city from \$1.2 million this year to \$3.3 million by the year 2000. The Gas System's contribution to the city's budget offsets ad valorem taxes. It is one of the factors that has allowed the City to hold the ad valorem tax rate constant for the past two years.

In fiscal year 1993/94 the Clearwater Gas System has budgeted to provide nearly \$2.1 million of contributions to the city's general fund. This is an increase of almost \$900,000 from the current fiscal year and offsets 0.5637 mills, or about 11% of the proposed City of Clearwater ad valorem tax rate of 5.1158 mills. That means that a citizen in Clearwater, with a home assessed at \$75,000 and homestead exemption, saves nearly \$30 per year as a result of the city's ownership of the gas system.

The Clearwater Gas System's plan proposes a new \$12 million bond issue to fund the expansion over the next two years and nearly \$25 million in total bonding requirements by the year 2000. This compares to the current growth rate, which would have required only about \$11 million in capital construction expenses over this same seven-year period. The strategic plan accelerates capital requirements by about \$14 million over the next seven years.

The plan also would require 24 additional personnel and an increase in annual operating expenses of about \$1.5 million per year (net of fuel costs) in order to support this expansion and provide an increased level of service to the customers of North Pinellas and West Pasco counties.

The payback to the City of Clearwater would be a projected increase in the gas system's contributions to the general fund of \$2.1 million above current levels by the year 2000.

The Gas System's plan also provides funding for beginning a Natural Gas Vehicle Program in the service area in support of the 1992 National Energy Policy Act and the 1990 Federal Clean Air Act. Both the President and the Governor have taken aggressive action to convert the federal and state vehicle fleets over to this economical, clean-burning and domestically secure energy source. During 1994, the Clearwater Gas System plans to begin conversion of city vehicles, install a public natural gas filling station and assist local companies with fleets of vehicles to convert them from gasoline and diesel to natural gas. Florida Power Corp. and Neighborly Senior Services are already operating some vehicles on natural gas.

Additionally, gas air conditioning technology is now available and economical for office and other commercial buildings. Excellent residential gas air conditioning equipment is expected to become commercially available in 1994. This plan will enable the Clearwater Gas System to offer these services to customers in North Pinellas and West Pasco counties.

Warrington said, "This is an exciting time for the natural and propane gas industries as gas technology is improving rapidly. The prices are right and there are at least two new transmission pipelines scheduled to be built into West Florida which will make additional quantities of natural gas available for our customers.

"We look forward to aggressively expanding our services, improving our quality, and satisfying our customer's energy needs as we build together toward the 21st century", Warrington said.

-30-

EXECUTIVE SUMMARY

The Clearwater Gas System is well positioned for growth, both within our northern Pinellas County existing territory and northward expanding into western Pasco County. Increasing natural gas supply into West Florida, enhancements in natural gas technology, and governmental environmental regulations are all external forces which will support this growth opportunity.

We have analyzed our current situation, focused our mission and vision, studied the business climate including our strengths and weaknesses and developed four (4) very aggressive strategic opportunities that we recommend simultaneously implementing as our road map toward the year 2000. We are requesting the City of Clearwater Commission's support in adopting these as follows:

Strategy #1: Continue the Existing Level of Gas Service Operations in Pinellas County (Base Plan)

This will allow us to continue our current growth rate which will add 2,800 new customers by the year 2000.

Strategy #2: Accelerate Existing Gas Services in Pinellas County

This will allow us to add 2,500 additional customers by the year 2000 and provide a level of services and installation work commensurate with our customers' demand.

Strategy #3: Expand Existing Gas Services into Pasco County

This will allow us to add 1,900 additional customers by the year 2000.

Strategy #4: Develop New Gas Markets for Pinellas and Pasco Counties

This will allow us to expand our services into new market opportunities like Natural Gas Vehicles and Gas Air Conditioning.

The bottom line from the City's perspective is to allow the Clearwater Gas System to grow by 60% to approximately 19,000 customers and expand the annual dividend to the City from \$1.0 Million per year to a projected \$2.2 Million by the year 2000.

In total, Clearwater Gas System currently contributes \$1.2 Million in total revenues to the City including Dividends, Payment in Lieu of Taxes and Administrative Interfund Transfer. Implementation of this Strategic Plan should allow our total interfund contributions to grow to \$3.3 Million by the year 2000.

CLEARWATER GAS SYSTEM STRATEGIC PLAN 1993 - 2000.

Business Scope and Ownership

The Clearwater Gas System (CGS) is a municipally-owned natural gas and liquid petroleum (LP) distribution utility owned by and operating under the Charter of the City of Clearwater, Florida. CGS also operates an appliance showroom and sells gas appliances, installs customer gas house-piping, and services domestic and commercial gas equipment.

History

The Clearwater Gas System has been serving customers in the Clearwater area since 1923 when we first began with a manufactured gas operation from coal. In 1959 we discontinued the manufacturing of gas and began receiving piped natural gas from the Florida Gas Transmission pipeline.

Market Area and Growth Potential

Clearwater Gas System serves nearly 12,000 customers in eleven (11) municipalities as well as the unincorporated areas of northern Pinellas County as follows:

| Municipalities Served | | Pinellas County Areas Served | | | |
|---|---|---|---|--|--|
| Belleair Belleair Beach Belleair Bluffs Belleair Shores Clearwater Dunedin | Indian Rocks Beach Largo Oldsmar Safety Harbor Tarpon Springs | Crystal Beach East Lake Harbor Bluffs Harbor Hills | Highpoint Ozona Palm Harbor Top of the World | | |

Our service territory generally extends from Ulmerton/Walsingham Road on the South to the Pasco County line on the North and from the Gulf of Mexico on the West to the Hillsborough County line on the East.

We are bordered on the south and east by Peoples Gas System, Inc., an investor-owned gas utility. Within our current service boundaries, we have significant opportunity to grow as we already have over 450 miles of gas main installed in our current service area but have less than a 5% customer saturation. We also have significant opportunity to expand northward to the developing areas of western Pasco and Hernando Counties and even potentially into Citrus County as these areas are not currently served by natural gas utilities.

OUR MISSION

The foundation of the Strategic Plan is provided by the <u>Mission Statement</u>. The Mission Statement defines CGS's fundamental reason for being and establishes an appropriate scope for our activities.

CGS MISSION STATEMENT

To serve the natural and LP gas needs of the customers in the Clearwater and surrounding Florida SunCoast area in the most safe, reliable and economical manner possible while maximizing load growth, customer satisfaction, financial return to the City of Clearwater and the equity value of the Clearwater Gas System.

From our Mission Statement flows Key Result Areas upon which we can focus our objectives and measure our success.

KEY RESULTS AREAS

Financial Performance - Defined as budget performance, growth in dividend returns to the City of Clearwater and growth in the equity value of the CGS.

<u>Safety</u> - Defined as conducting our work in compliance with Federal, State and local regulations to insure the safety of both the public and our employees.

<u>Municipal/Community Relations</u> - Defined as conducting our work with a high regard for community improvement and a sensitivity for community social needs to foster a spirit of cooperation and pride between CGS, our employees and the communities we serve.

<u>Price</u> - Defined as insuring competitively priced products and service costs as compared to the industry, alternate energy sources and surrounding utilities.

<u>Reliability</u> - Defined as insuring adequate and dependable supply from our pipeline supplier(s) and excellence in the delivery of gas to our ultimate consumer.

Load Growth - Defined as customer and load retention, additions and increased gas usage to improve system utilization and enhance profitability.

Customer Satisfaction - Defined as:

- Customer Service the speed, accuracy, dependability and overall quality of execution of our construction, maintenance, service, installation, sales and customer support functions.
- New Customer Programs and Services the ongoing identification of external customer needs and the development of new programs and services to meet these needs and build profitability.
- Organizational Effectiveness The maximizing of organizational responsiveness and the minimizing of operational and regulatory barriers to efficient and effective customer service execution.
- Employee Quality the development of service quality through work force training, education and attitudes.

OUR VISION

An important responsibility of executive leadership is to provide a <u>Vision</u> for the future of the Clearwater Gas System to clarify management's picture of what CGS should look like when we reach the 21st century. The Vision portrays the character and spirit of the organization and provides a foundation for growth.

DIRECTOR'S VISION

- * The Clearwater Gas System (CGS) will be a highly competitive, market-oriented and profitmotivated gas utility and will be recognized for our professional service and responsiveness by our customers, the City, and the communities we serve.
- * Our employees will be highly trained, motivated and empowered in their jobs and will view themselves as team players and stakeholders in the success of the CGS.
- * The CGS management team will be assertive and willing to take risks commensurate with good business practices to achieve aggressive business objectives.
- * The City will view us as an enterprise activity or profit center operation and afford us as much autonomy as possible in order to operate as a free-market business entity.
- * Our customers will be our most important asset, and we will take extraordinary steps to satisfy their needs. We will "go the extra mile" to meet their every reasonable request and to find opportunities to exceed their expectations by identifying proactive services and solutions to their energy and service needs and delivering these in a professional and personable manner so as to achieve "excited satisfaction" with our product, our services and the CGS.

C. S. Warrington Managing Director & Executive Officer

KEY CUSTOMERS/COMMITMENT AREAS

A clear understanding of all of our <u>Key Customers</u> and a balanced commitment to serve the needs of each of these constituencies is vital to our long term health. Each customer group depends on the others and their bond is clear and ongoing communications between all Key Customer groups. To this end, we recognize the following as our Key Customers and Commitment Areas.

KEY CUSTOMERS/COMMITMENT AREAS

- 1. The External Customer is our daily service focus. It is our objective to meet and exceed all the reasonable needs of our external customers and to continuously expand so as to lower the incremental cost of our services and make possible expanded/enhanced services through a bigger, more professional, and more cost effective system.
- 2. Our Employees are the key to our success. It is our objective to select the best personnel, compensate them fairly, provide the best training, communicate our business philosophy and objectives, and build them into a cohesive team who are capable and empowered to serve our external customers' needs and to build our System to meet their future needs and challenges.
- 3. The Citizens of the City of Clearwater are our owners and the body we answer to ultimately. The City Commission, serves as their trustees and as our Board of Directors. It is our objective to provide safe, dependable and competitively-priced gas service in a manner which our citizens can be proud to own and which provides a public return to offset the tax structure of the City of Clearwater to the benefit of its citizens.
- 4. Our Internal Customers are vital elements in the successful execution of our mission for our external customers. Other City departments, vendors, suppliers, industry associations, etc., play important roles in assuring our daily and long term success. It is our objective to effectively communicate our needs, build healthy relationships, and demand excellence in all products and services which our internal customers provide which ultimately impacts the quality of our products and services which we provide our external customers.
- 5. Communications is the linkage between these key customer groups. Adequate communications is the key to understanding and successful execution of our business objectives. Only when all customer groups understand the differing viewpoints and reasonable needs of the others can a balance be reached which meets the objectives of all involved. Communications tools include bill messages and inserts, surveys, focus groups, workshops, interviews, benchmarking, etc.
- 6. Quality It will be the fundamental commitment of the Clearwater Gas System to provide quality in our external services, excellence in our internal execution and engender a positive community pride and spirit for our utility.

ENVIRONMENTAL SCAN

The following trends and issues which will impact our industry were recently developed by the Southern Gas Association through an environmental scan analysis.

TRENDS AND ISSUES IMPACTING THE NATURAL GAS INDUSTRY

- 1. Restructuring of the gas industry will continue. The process of refining the traditional roles of producers, transporters, and distributors will continue as will efforts to bridge the understanding gap and bring about industry unity.
- 2. Management emphasis on cost control, efficiency, automation and productivity will intensify.
- FERC will diligently pursue policies designed to foster a market responsive environment. The scope of state regulations will expand at an increasing rate.
- 4. The level and volatility of gas prices will have a significant impact on member companies.
- An adequate natural gas resource base is available. Seasonal and peak requirements will increasingly be met by storage service.
- 6. Increasing competition for gas supply will cause changes in relationships.
- 7. Capitalizing on research and development results, particularly end-use technology, will require significant financial resources.
- 8. The effect on the natural gas industry of growing environmental concerns will be positive, and complying with environmental laws will have a broad impact on industry operations.
- 9. Soft economy with 1-2% GNP growth rate; inflation 2-3%; interest rates stable to +3%. Taxes likely to increase. Globalization will add competitive pressures to U.S. business and industry.
- 10. Social issues will include health care, the disabled, AIDS, substance abuse, crime, the homeless, child care, education, continuing decline of the nuclear family, aging and economic stratification of the population.
- 11. To retain a qualified work force, training and re-training programs will increase.
- 12. Different work ethic and value system of younger employees will produce changes in the workplace.
- 13. Global change will give added prominence to natural gas as a domestic energy source.
- 14. Gas consumption will be impacted by continued emphasis on conservation, high efficiency equipment, improved building construction techniques and codes and standards issues.
- 15. Competition among energy sources will intensify.

BUSINESS CLIMATE

The Clearwater Gas System's business climate is influenced by Federal and State issues as well as regional and City forces. We recognize these as follows:

Federal

- 1. The 1992 Energy Policy Act and the 1990 Clean Air Act provide impetus to increase the use of natural gas American's clean burning, environmentally friendly, and domestically secure "fuel of choice". These also provide Federal leadership and mandates for Natural Gas Vehicles (NGVs).
- 2. The Federal Energy Regulatory Commission (FERC) has issued Order 636 restructuring our industry and, in particular, imposing major changes for our provider, the Florida Gas Transmission Company (FGT). This will require us to purchase and manage our own supply gas. This will increase our fuel costs as will several other aspects of the Order; namely: straight fixed variable (SFV) rate design, transition cost recovery (TCR), and a basic shift in the industry to tighter supply balance in line with demand.
- 3. Federal elections have shifted party control of the Executive Branch and created even more change and uncertainty. A major Energy or BTU tax appears likely to pass which could increase our fuel costs even more.
- 4. The Department of Energy (DOE) is mandating more testing programs and job proficiency requirements which will require formal training and documentation. Alcohol intoxication testing may become a requirement.
- 5. Competitive Natural Gas Air Conditioning is already available for the commercial market and the technology will be ready for the residential market by 1994. Desiccant cooling is also becoming commercially available for dehumidification to offset A/C needs.

State of Florida

- 1. The State Energy Office is increasingly imposing new Energy Standards and Building Codes which we must stay abreast of and participate actively to influence.
- 2. The Florida Public Service Commission (FPSC) is requiring more safety regulations and the Florida Department of Insurance/LP Division is requiring more testing and employee competency requirements for propane.
- 3. The Governor has issued an Executive Order encouraging NGVs and requiring State agencies to take the lead in converting the State Fleet. He is chairing a Southern Governors Alliance which will encourage NGVs and other energy conversions in support of Federal legislation.
- 4. The Municipal Gas Authority of Florida (MGAF) has been created with much support from Clearwater to provide capacity management and supply acquisition services for the anticipated FERC restructured world under Order 636. Fifteen (15) municipals have joined in this interlocal group.

BUSINESS CLIMATE (continued)

West Florida Regional

- 1. New transmission gas pipelines are being built into our area, namely: Florida Gas Transmission (FGT) Company's Phase III and the SunShine Pipeline (owned by Coastal, Florida Power Corporation (FPC) and TransCanada).
- 2. Pasco County is an obvious growth opportunity for us, but the window of opportunity will probably end when the new pipelines are completed in 1995-96. Unless we are established in our expansion area by then it is likely that competition will provide natural gas service in that area.
- 3. Peoples Gas System has already opened a Pasco LP office and operations and is actively seeking natural gas franchises in Pasco, Hernando and Citrus Counties. They are aggressively positioning themselves for the availability of the new transmission lines.
- 4. Traffic remains the area's #1 problem which will result in a continued high level of road work and relocation requirements. A new major expressway is proposed for mid Pasco County which could bring expanded growth to this less populated mid-county area.

City of Clearwater

- 1. The CGS has recently been reorganized after a 1991 decision by the City Commission to not sell the Gas Department. An outside Managing Director was brought into CGS in 1992 and given the charge to run CGS like a business and maximize profitability and return to the City. FY 91/92 Net Income before Dividends was \$2.0 Million as compared to \$450,000 for FY 90/91.
- 2. Two (2) of the five (5) Commissioners have since changed providing some uncertainty on our part as we request final approval to implement our Strategic Business Plan.
- 3. A City-wide hiring freeze was imposed in June producing further uncertainty and complexity in obtaining approval and implementing a growth plan.
- 4. There is increased competition between energy sources in our area namely electric, propane (other providers), and fuel oil. A "discounting" provision approved by the City Commission in February, 1993, has provided a "bandaid" solution. A full rate study was authorized by the Commission in March, 1993, and is in process with Coopers & Lybrand. This should provide the longer term rate tools to insure our rate competitiveness.

CGS STRENGTHS

- 1. We are the third largest municipally-owned natural gas system in Florida and one of the few municipal "full service" gas utilities, also providing propane (LP) gas, appliance sales and service, and house-piping installation services.
- 2. We have over 472 miles of existing natural gas mains plus three (3) 30,000 gallon storage tanks for LP gas. Our personnel are well trained to provide the full range of gas services and our staff is motivated.
- 3. We have only about a 5% saturation in our Northern Pinellas County service area and an obvious significant growth potential in our existing territory.
- 4. The western portion of Pasco County immediately north of our service territory has no natural gas service. No natural gas service exists even north of this into Hernando and Citrus Counties. Hence, we have obvious growth potential northward.
- 5. The City is financially sound and has bonding ability to support a major system expansion.
- 6. We have an excellent track record with gas buying, code enforcement and system safety.
- 7. We are in the process of a Rate Study which should allow us to be more competitive and our City Commission recently gave us a discounting provision which allows us to compete with alternative fuels.
- 8. The area economy is heavily supported by northern immigration predominantly from the midwestern states and international tourism, in particular from Canada, England, Japan, Germany and Greece. Natural gas is well received as a source of energy by these people as it has been more historically dominant in the northern climates.
- 9. Our largest users of gas are hospitals, health care facilities, hotels, motels, restaurants, and laundries. These are growth industries in our service area.

CGS WEAKNESSES/THREATS

ł

- 1. Our current service area is fairly built-up requiring costly expansion opportunities in many cases.
- 2. Our area is predominantly residential and service industry dominated. We have little local industrial load opportunity.
- 3. We have Peoples Gas on both our southern and eastern borders and the Gulf of Mexico on our west. We have only northward to grow or become blocked on all sides.
- 4. There are numerous LP competitors in our area; namely: Peoples, Suburban, Empire, True Gas, Ferrell Gas, Synergy, Bay City, and others.
- 5. We have two (2) aggressive electric companies in our area; namely: Florida Power Corporation (FPC) and Tampa Electric (TECO).
- 6. We have a number of aggressive fuel oil providers in our area; namely: McMullen, Jet Age, and others.
- 7. We have only one (1) pipeline supplier (FGT) with a second in the planning stage (SunShine).
- 8. Our window of growth opportunity because of these two (2) pipeline's plans to the north is short. We must establish our expansion territory by late 1994/early 1995.
- 9. We have no marketing staff and virtually no technical expertise in-house to develop the new Natural Gas Vehicle (NGV) and Natural Gas Cooling markets.
- 10. Our weather pattern, while excellent to live in, provides little opportunity for heating load (ten year average heating degree days = 532) while we have high cooling opportunity (ten year average cooling degree days = 3,613) but the cooling technology particularly in the residential sector has not allowed us to exploit this as of yet.

As a result of our preceding assessment, we simultaneously propose the following four (4) strategies designed to accomplish our Key Result Areas and better fulfill our Mission.

Strategy #1: Continue the Existing Level of Gas Service Operations in Pinellas County (Base Plan)

This strategy will allow us to continue our current growth rate of 450 new customers/year and allow us to generate \$800,000 in FY 93/94 annual dividends to the City which should grow to \$1.1 Million by the year 2000.

Strategy #2: Accelerate Existing Gas Services in Pinellas County

(2)

18° an

This strategy recognizes that we have only a 5% saturation in Pinellas County and have the potential to grow to at least 10 - 15%, from about 11,800 customers today to ultimately at least 20,000 - 30,000 customers. This strategy will require 14 additional personnel and \$570,000 in first year operating expense to add 400 additional customers/year. This will increase FY 93/94 revenues by \$390,000 and generate added annual dividends of \$200,000 by the year 2000. This strategy also includes monies for the relocation of the Sales Section to a "shopping center" environment to provide an adequate appliance showroom to support this growth.

Strategy #3: Expand Existing Gas Services into Pasco County

This strategy will require a very aggressive three (3) year growth schedule to build the 48 mile trunkline, \$10 Million in capital bond issues and 7 added employees to build a total of 91.6 miles of new main and connect nearly 1,300 new customers within the first five (5) years. This should generate added annual net revenues of \$3.2 Million and annual dividends of \$500,000 by the year 2000 and preserve our growth opportunities to the north. This strategy includes the opening of a Pasco field office to support the operations, sales and customer service needs of Pasco County and requires a FY 93/94 operating budget of \$398,130.

Strategy #4: Develop New Gas Markets for Pinellas and Pasco Counties

This strategy recognizes the powerful opportunities available in the emerging Natural Gas Vehicle and Gas Air Conditioning markets and would provide a minimum staff of 3 to begin developing programs to exploit this opportunity. This will require a FY 93/94 operating budget of \$192,960 but is projected to produce annual net revenues of \$1.6 Million and added annual dividends of \$400,000 by the year 2000.

Adoption of all four (4) of the above strategies will require 24 additional employees, allow us to grow to nearly 19,000 customers by the year 2000 and increase our annual dividend to the City from a current level of \$1.0 Million to a projected \$2.2 Million by the year 2000. This will require additional FY 93/94 net operating expense outlay of just over \$1.5 Million and the sale of approximately \$25 Million in Bonds over the next seven (7) years. A \$12 Million initial bond issue is needed for the first two (2) years expansion requirements. This will produce first year added Net Revenues of \$1.7 Million which are projected to grow to nearly \$8.7 Million above current levels by the year 2000.

KEY APPROVAL ISSUES FOR THE CITY COMMISSION

1. Approve an overall Clearwater Gas System budget for FY 93/94 as follows:

| | <u>FY 93/94</u> | Increase from FY 92/93 |
|------------------|-----------------|---------------------------|
| Revenue Budget* | \$16,335,000 | \$3,587,460 |
| Operating Budget | \$15,008,480 | \$3,223,330 |
| Employees | 91.7 FTE | 24 FTE |

- *Note: Coopers & Lybraid is currently engaged in doing a Rate Study for the Clearwater Gas System which should be completed by late August/early September. For the purposes of this Budget Plan we have assumed that Gas Sales Revenues in total will not change; however, we do expect some shifts between the classes. We did project in this Budget Plan an increase of \$500,000 in Installation and Service Charges to reflect expected increases in labor rates since our current rates were set in the early 1980's.
- Approve in concept \$25 Million in Bonding requirements over the next seven (7) years and, in specific, a Bond Issue to Net \$12 Million for FY 93/94 which is designed to cover the first two (2) years of capital expansion requirements. Future year bond issues will be supported by revisions to the Strategic Plan.
- 3. Approve in concept a levelized interfund contribution plan such that the Gas Fund will contribute to the City's General Fund as follows:

| | FY 93/94 | Future Years# |
|-----------------------------------|----------------|----------------|
| Dividend from Net Income | \$1,010,000 | \$1,000,000 |
| Payment in Lieu of Taxes | 508,720 | 508,720 |
| Administrative Interfund Transfer | <u>572.520</u> | <u>572.520</u> |
| Total Interfund Transfer | \$2,091,240 | \$2,081,240 |

#Note: Future years to be planned at this level until one-half of the Net Income catches up with the \$1.0 Million Dividend level. At this point the City Commission should reconsider the transfer formulas applicable to the Clearwater Gas System.

GAS SYSTEM

MISSION STATEMENT

To serve the natural and LP gas needs of the customers in the Clearwater and surrounding Florida Suncoast area in the most safe, reliable and economical manner possible while maximizing load growth, customer satisfaction, financial return to the City of Clearwater and the equity value of the Clearwater Gas System (CGS).

The Gas System Department budget consists of seven programs as indicated below. There are currently 67.7 employees (full time equivalent) in the department, and this budget request proposes the addition of 24 employees to accomplish four very aggressive strategic proposals.

DEPARTMENT REVENUES AND EXPENDITURES:

| REVENUES: | Actual | Budget | Adjusted | and the second second | Estimated | Percent |
|--|------------|------------|------------|--|-------------|---------|
| | 91/92 | 92/93 | 92/93 | State State State State | | Change |

GAS SYSTEM DEPARTMENTAL

KEY RESULT AREAS TO MEASURE CLEARWATER GAS SYSTEM'S SUCCESS

FINANCIAL PERFORMANCE

Defined as: Budget performance, growth in dividend returns to the City of Clearwater and growth in the equity value of the Clearwater Gas System (CGS).

Goal:

ł

1. To produce net income before dividends of at least \$1.26 million in FY 93/94 in order to insure at least a \$1.01 million dividend to the City for FY 95/96. Total Revenues paid to the City General Fund including Payment in Lieu of Taxes and Administrative Interfund Transfer are projected to be \$2.09 million for FY 93/94.

Measures: Monthly CGS financial statements.

SAFETY

Defined as: Conducting our work in compliance with Federal, State and local regulations to insure the safety of both the public and our employees.

Goals:

2. To replace at least 1.0 mile of old cast iron, xtrube or galvanized main in FY 93/94, above and beyond a budgeted 2.0 miles of highway relocation and main replacement work.

Measures: Butler reports.

3. To repair at least 95% of all outside gas leaks within one (1) work day of discovery in FY 93/94.

Measures: Leak reports.

MUNICIPAL/COMMUNITY RELATIONS

Defined as: Conducting work with a high regard for community improvement and a sensitivity for community social needs to foster a spirit of cooperation and pride between CGS, our employees and the communities we serve.

Goals:

- 4. To enhance the City's economic vitality by beginning the cost effective focus of CGS resources to maximize gas utilization versus alternative energy sources by providing gas to new structures and installing gas appliances to replace other fuel sources in the North Greenwood community as follows:
 - o CGS performance reports to the City Manager and
 - o Develop opportunities for the focusing of resources by February 1, 1994.
 - o Begin implementing cost effective programs and services by April 1, 1994.

Measures: CGS performance reports to the City Manager and indicator tracking report.

- 5. To conduct a CGS awareness program for at least eight (8) city/county commission or major public forum meetings (outside of the City of Clearwater) during FY 93/94 and work with local media to obtain favorable coverage of same to showcase CGS programs and services and build community awareness.
 - Measures: CGS performance reports to the City Manager on outside Commission/major public presentations, newspaper articles, and TV appearances.

PRICE

Defined as: Insuring competitively priced products and service costs as compared to the industry, alternate energy sources and surrounding utilities.

Goals:

6. To develop a quarterly update of per therm prices for natural gas, per gallon prices for LP and customer/service charges vs. competitive fuels by November 1, 1993, and initiate in a timely manner ongoing rate enhancements to maintain an appropriate competitive advantage. To update same by February 1, 1994; May 1, 1994; and August 1, 1994.

Measures: Rate reports.

RELIABILITY

Defined as: Insuring adequate and dependable supply from our pipeline supplier(s) and excellence in the delivery of gas to our ultimate consumer.

Goals:

7. To implement the Federal Energy Regulatory Commission (FERC) Order 636 by the Florida Gas Transmission (FGT) effective date of October 1, 1993, in as smooth and cost effective a manner as possible while taking a leadership role in the Municipal Gas Authority of Florida (MGAF).

Measures: FERC report and MGAF minutes.

8. To develop a customer main line outage indicator by January 1, 1994; begin recording outage data by April 1, 1994; and developing improvement objectives for the remainder of FY 93/94 as well as FY 94/95 by July 1, 1994.

Measures: Indicator tracking report.

LOAD GROWTH

Defined as: Customer and load retention, additions and increased gas usage to improve system utilization and enhance profitability.

Goals:

9. To increase customer saturation in Pinellas County by connecting at least 850 new customers (150 commercial and 700 residential) and installing at least 15 miles of new main in Pinellas County in FY 93/94.

Measures: Sales commission reports, Butler reports.

10. To expand CGS gas mains into Pasco County by installing at least 20 miles of new main and connecting at least 225 new customers (200 commercial and 25 residential) in Pasco County in FY 93/94.

Measures: Sales commission reports, Butler reports.

CUSTOMER SATISFACTION

Defined as: <u>Customer Service</u>: The speed, accuracy, dependability and overall quality of execution of our construction, maintenance, service, installation, sales and customer support functions.

<u>New Customer Programs and Services:</u> The ongoing identification of external customer needs and the development of new programs and services to meet these needs and build profitability.

<u>Organizational Effectiveness:</u> The maximizing of organizational responsiveness and the minimizing of operational and regulatory barriers to efficient and effective customer service execution.

Employee Ouality: The development of service quality through work force training, education and attitudes.

Goals:

11. To develop internal departmental service measures and begin measurement of same by no later than October 1, 1993, and work with Utility Customer Support to identify and develop improved cross-functional processes and external gas customer service indicators with improvement targets for the remainder of FY 93/94 as well as FY 94/95 by June 1, 1994.

Measures: Indicator tracking report.

12. To complete at least 95% of customer connect requests taken by 3:00 p.m. daily within one (1) working day of the customer's request or by a later date as requested by the customer during FY 93/94.

Measures: Service order reports.

13. To identify our largest 25 customers as well as all of our customers who consume a total of 18,000 therms annually. Make personalized management contacts at least semi annually for the first group and personalized employee contacts at least annually with the rest followed up by management correspondence in FY 93/94. The purpose of these contacts will be to express gratitude for our business relationship and to obtain customer feedback on our level of service and any customer needs which we might be able to serve better.

Measures: Indicator tracking report.

14. To train at least eight (8) team leaders and initiate at least four (4) employee problem solving quality teams by September 30, 1994.

Measures: Team reports.

1

GAS SYSTEM Administration and Supply

DESCRIPTION:

Gas Administration and Supply responsibilities include: overall general management and clerical support for the Clearwater Gas System; long range planning of gas supplies and securing and transporting these supplies of both natural and LP gas to our bulk transfer points; financial planning and tracking; and storeroom operations to insure the availability of adequate operating, construction and sales materials. Functions of this program include budgeting, payroll, computer systems, facilities/equipment control, environmental, safety training, regulatory contact, legal/risk issues management, contracting and licensing control.

The Gas Administration and Supply Program includes no additional cost centers.

PERSONNEL:

| Position Title | Actual 91/92 | Budgeted 92/93 | Adjusted 92/93 | Requested 93/94 | Recommended 93/94 |

GAS SYSTEM ADMINISTRATION and SUPPLY

FINANCIAL PERFORMANCE

Goals:

1. To continually manage a department budget which is realistic, adequately funded, done on time and maintained within expenditure limits while insuring a high level of service to our customers. Authorized departmental budget levels for FY 93/94 are:

| 0 | Total Revenues | \$14.14 Million |
|---|----------------------|-----------------|
| 0 | Operating Budget | \$ 9.94 Million |
| 0 | Authorized Employees | 9 FTE |

Measures:

Monthly CGS financial statement.

SAFETY

Goals:

2. To review our compliance requirements and develop a comprehensive CGS safety plan by April 1, 1994, to insure our ongoing compliance with all federal, state and local regulatory requirements for the safety of the public and our employees.

Measures: Safety plan progress report - technical specialist.

MUNICIPAL/COMMUNITY RELATIONS

Goals:

- 3. To enhance the City's economic vitality by beginning the cost effective focus of CGS resources in the North Greenwood community by April 1, 1994, as follows:
 - o Identify the current level of effort and coverage by December 1, 1993
 - o Develop opportunities for the focusing of resources by February 1, 1994
 - o Begin implementing cost effective programs and services by April 1, 1994

Measures: North Greenwood indicator report – controller.

PRICE

Goals:

4. To submit a monthly report by the 10th of the following month to the managing director which compares the FERC index for natural and LP gas prices with CGS's purchase price during FY 93/94.

Measures: Natural gas month report – superintendent.

and the second s

21

RELIABILITY

Goals:

1

5. To implement the Federal Energy Regulatory Commission (FERC) Order 636 by the Florida Gas Transmission (FGT) effective date of October 1, 1993, in a smooth and cost effective manner while taking a leadership role in the Municipal Gas Authority of Florida (MGAF).

Measures: Progress report – superintendent or managing director.

6. To develop a long-range supply plan by April 1, 1994, to insure the cost effective availability of pipeline through-put capacity to serve the long-range load project of the CGS.

Measures: Develop a supply report – superintendent.

7. To insure adequate supplies of natural and LP gas by monitoring daily gas consumptions and submitting a monthly report by the 20th of the following month to the managing director during FY 93/94.

Measures: Monthly gas report - superintendent.

CUSTOMER SATISFACTION

Goals:

8. To develop internal departmental service measures and begin measurement of same by no later than October 1, 1993, and work with utility customer support to identify and develop improved cross-functional processes and external gas customer service indicators by June 1, 1994.

Measures: Monthly indicator report - assistant superintendent.

9. To develop a more effective employee suggestion motivation and resolution process which ties to the City Suggestion Program by February 1, 1994, and identify and improve at least two (2) processes which will significantly improve CGS organizational effectiveness and customer service in FY 93/94.

Measures: Monthly progress report – superintendent.

10. To develop an employee survey and needs assessment mechanism and initiate same by March 1, 1994, and develop improvement opportunities by June 1, 1994, to build identified needs in the FY 94/95 planning process.

Measures: Monthly progress report – assistant superintendent.

11. To train at least eight (8) team leaders and initiate at least four (4) employee problem solving teams by September 30, 1994.

Measures: Monthly progress report – assistant superintendent.

DESCRIPTION:

Gas Dispatch is responsible for monitoring the gas and water telemetry system, and the control and coordination of all communications on the City's utilities radio network. The Service Dispatchers are responsible for: the handling of all emergency calls on a 24 hour basis and the handling of all other City emergency calls except police, fire, and traffic signals after normal hours; dispatching all gas service orders and some water, sewer, and stormwater orders; and securing the gas system facilities after working hours.

The Gas Dispetch Program includes no additional cost centers.

PERSONNEL:

PROGRAM BUDGET HIGHLIGHTS:

A Radio Dispatch costs reflect a 14% overall increase due to converting two part-time Property Guard positions to full-time to provide adequate shift coverage. Also the fixed charges for Radio and Computer Information Services have increased \$8,740.

GAS SYSTEM DISPATCH

FINANCIAL PERFORMANCE

Goals:

1. To continually manage a department budget which is realistic, adequately funded, done on time and maintained within expenditure limits while insuring a high level of service to our customers. Authorized dispatch budget levels for FY 93/94 are:

| 0 | Total Revenues | \$ 92,000 |
|---|----------------------|-----------|
| 0 | Operating Budget | \$154,700 |
| 0 | Authorized Employees | 4.7 FTE |

Measures: Monthly financial statements.

CUSTOMER SATISFACTION

Goals:

2. To identify dispatch related problems by developing a tracking system by December 1, 1993, and to provide appropriate user training by June 1, 1994, in order to eliminate any identified problem areas.

Measures: Monthly tracking report.

GAS SYSTEM Distribution

DESCRIPTION:

Gas Distribution is responsible for the delivery of natural and LP gas to the end users in Northern Pinellas County; the construction of all gas mains and service lines; the design and engineering of all gas mains and services; the securing of construction permits and attending construction meetings for gas mains and services; the maintenance of all gas main and service lines and setting of all LP tanks and services; system cathodic protection; repairing gas meters and regulators; purchasing and inventorying of all gas parts and fittings; and assuring compliance with Federal and Florida Public Service Commission and Florids State Natural Gas and LP regulations.

The costs centers in this program are:

- Gas Construction
- Gas Maintenance

۸

PROGRAM BUDGET HIGHLIGHTS:

- A Maintenance Personal Services costs have increased due to the addition of one Pipefitter Helper, which will complete a two-person crew for LP tank installation. Annual increase in LP revenues are projected to be \$160,000.
- A Other Operating Expenses Contractual Services costs have increased by \$78,180 to perform a required cathodic protection survey, a gas leak survey and gas line locating services by outside contractors.
- Computer Information Services fixed costs have increased \$31,070 over the FY 92/93 budget. This charge is for the maintenance of computer equipment.

- Construction Personal Services costs reflect the increased cost of one additional Drafting Technician and two Pipefitter Helpers to support customer demands for new gas services. Projected increases in Natural Gas Sales and Capitalized Labor & Materials Revenues are \$380,000.
- Construction Capital items include purchase of a Drafting AutoCad Station to support the additional Drafting Technician. This is in the Computerization Long Range Plan for FY 94/95, which we propose to move to FY 93/94.

GAS SYSTEM DISTRIBUTION

FINANCIAL PERFORMANCE

Goals:

1. To continually manage a division budget which is realistic, adequately funded, done on time and maintained within expenditure limits while insuring a high level of service to our customers. Authorized division budget levels for FY 93/94 are:

| 0 | Total Revenues | \$653,000 |
|---|----------------------|----------------|
| 0 | Operating Budget | \$2.32 Million |
| 0 | Authorized Employees | 36 FTE |

Measures: Monthly budget printouts.

- 2. To change-out, rebuild and test 1,200 gas meters (a 10-year program of 10% per year) in FY 93/94 in order to maintain unaccountable gas losses at less than 1% as measured on our annual U.S. Department of Energy Report and Supplemental Gas Supply and Disposition report for the calendar year 1993 and future years. This report will be done by April 1, 1994.
 - o To change out 1,000 resident gas meters.
 - o To change out 200 commercial gas meters.
 - o To rebuild 1,000 residential gas meters (500 in-house and 500 outside contract).
 - o To rebuild 60 commercial regulators.
 - o To test 1,000 residential gas meters.
 - o To test 200 commercial gas meters.
 - o To maintain and test 2 BPI/Emcorrectors bimonthly (20% of the total 10).
 - o To maintain and test or change 2 rotary meters bimonthly (4% of the total 50).

Measures: Performance reports.

SAFETY

Goals:

3. To replace at least 1.0 miles of old cast iron, xtrube or galvanized main in FY 93/94, above and beyond a budgeted 2.0 miles of highway relocation and main replacement work.

Measures: Butler reports.

4. To repair at least 95% of all outside gas leaks within one (1) work day of discovery in FY 93/94 and to monitor and recheck 98% of the repaired gas leaks within 35 days to assure permanent repair has been achieved.

Measures: Leak reports.

5. To complete 214 miles of business section leak survey (100% of total) and 47 miles of residential leak survey (20% of total 233 miles) during FY 93/94.

Measures: Indicator tracking report.

RELIABILITY

6. To assist in developing a customer main line outage indicator by January 1, 1994; begin recording outage data by April 1, 1994; and assist in developing improvement objectives for FY 94/95 by July 1, 1994.

Measures: Indicator tracking report.

CUSTOMER SATISFACTION

Goals:

7. To install 95% of LP tanks within one week of receipt of tap order and to track LP outages due to lack of delivery, then improve 25% annually on failure rate of total LP accounts.

Measures: Indicator tracking report.

- 8. To complete new constructions 95% of the time as follows:
 - o On line service, no permit 10 working days after receipt of tap order.
 - On line service, with permit 30 working days after receipt of tap order.
 - o Main extension under 2,000 feet, no permit 10 working days after receipt of tap order.
 - Main extension under 2,000 feet, with permit 30 working days after receipt of tap order.

(Note: Mains over 2,000 feet will require these measures plus additional time for construction of the footage over the standard.)

Measures: Indicator tracking report.

9. To create a one-year data base of construction complaints and make a 10% improvement in the last half of the year below the first half of the year and then improve 10% annually.

Measures: Indicator tracking report.

- 10. To prepare construction permits 95% of the time as follows:
 - Service lines 3 working days.
 - Gas mains under 1,000 6 working days.
 (Note: Mains over 1,000 feet will require these measures plus additional time for footage over the standards.)

Measures: Indicator tracking report.

11. To keep interruptible billing errors to 2% or less of interruptible bills rendered annually.

Measures: Indicator tracking report.

12. To complete demolition cut and caps within one working day and standard cut and caps within 10 working days after the receipt of service order, or on date requested if later 95%.

• •

PROGRAM BUDGET HIGHLIGHTS:

- Commercial & Domestic Repair Personal Services costs reflect the increase of one Utility Service Technician to perform commercial and domestic repair services. Projected increase in revenue by hiring this person is \$42,000.
- Radio Service fixed costs have increased \$23,320 over the FY 92/93 budget.
- Building and Maintenance fixed costs for Commercial and Domestic Repair have increased \$16,140 over the FY 92/93 budget. Last year, the Water Department funded part of these costs which are now fully charged to this cost center.

- Installation Personal Services costs are up due to the addition of an Installation Clerk and four Utility Service Technicians. Anticipated increase in Installation Sales in FY 93/94 is \$166,000 as a result of the additional Utility Service Technicians.
- Installation and Service revenues have been increased by \$500,000 based on preliminary rate case projections of the increase in labor hour charges.
- Capital items include a PC Workstation and Software for the Installation Clerk.

GAS SYSTEM SERVICE

FINANCIAL PERFORMANCE

Goals:

1. To continually manage a division budget which is realistic, adequately funded, done on time and maintained within expenditure limits while insuring a high level or service to our customers. Authorized division budget levels for FY 93/94 are:

| 0 | Total Revenues | \$1.19 Million |
|---|----------------------|----------------|
| 0 | Operating Budget | \$1.19 Million |
| 0 | Authorized Employees | 25 FTE |

Measures:

Monthly budget printouts.

- To support the departmental goal of producing net income before dividends of at least \$2.0 million in FY 93/94 in order to insure at least a \$1.0 million dividend to the City for FY 94/95 by the following:
 - o To increase installation revenues 116% over the previous year to \$366,000.
 - To provide installation estimates to 75% of new service line connections sold by gas sales.
 - o To secure installation work on 70% of the estimates provided to new service line connections sold by gas sales.
 - o To install 50% of the water heaters provided in the marketing program.
 - o To install 50% of the water heaters sold by gas sales.
 - o To increase overall service revenues by 37% over the previous year to \$242,000, to be broken down as: \$70,000, Code #212; \$10,000, Code #214; and \$162,000 Code #221.

Measures:

Monthly CGS financial statements.

CUSTOMER SATISFACTION

Goals:

3. To limit service callbacks on all commercial and domestic repairs to 5% or less during FY 93/94.

Measures: Indicator tracking report.

4. To complete at least 95% of all appliance repairs within three (3) working days of the customer's request or by a later date as requested by the customer during FY 93/94.

Measures: Indicator tracking report.

5. To complete at least 95% of customer connect requests taken by 3:00 p.m. daily within one (1) working day of the customer's request or by a later date as requested by the customer during FY 93/94.

Measures: Indicator tracking report.

6. To complete 95% of domestic conversions, propane to natural, within 15 working days after the meter has been set, with customer approval and to complete 95% of commercial conversions, propane to natural, within 20 working days after the meter has been set, with customer approval.

Measures: Indicator tracking report.

| | |

PROGRAM BUDGET HIGHLIGHTS:

- A Personal Services costs are anticipated to increase due to the addition of one Sales Assistant and two Sales Representatives. Projected increase in Appliance and Parts Sales is \$115,051. Natural and LP Gas Sales revenue increases are projected to be \$340,000 annually.
- Other Operating Inventory purchases have increased \$90,000 over FY 92/93 to cover the anticipated increases in customer demand in FY 93/94.
- Advertising and Other Promotions have increased \$117,000 to cover anticipated radio, newspaper and TV commercials and the Water Heater Sales Program.

- Additional funds of \$35,400 were included in the Sales Budget for the opening of a sales appliance showroom within our gas service area. This is over and above what we currently pay for space and maintenance at the Utility Customer Support Building.
- Internal Services costs have increased \$6,500 due to higher Computer Information Services and Radio Services fixed charges.
- Capital items include a PC Workstation to process Sales billing and inventory, speeding up customer billings and reducing time required to receive payment.

GAS SYSTEM SALES

FINANCIAL PERFORMANCE

Goals:

1. To continually manage a sales division budget which is realistic, adequately funded, done on time, and maintained within expenditure limits while insuring a high level of service to our customers. Authorized sales budget levels for FY 93/94 are:

| 0 | Total Revenues | \$260,000 |
|---|----------------------|-----------|
| 0 | Operating Budget | \$805,150 |
| 0 | Authorized Employees | 7 FTE |

Measures: Monthly CGS financial statements.

MUNICIPAL/COMMUNITY RELATIONS

Goals:

- 2. To support enhancement of the city's economic vitality by beginning the cost effective focus of CGS resources in the North Greenwood community by April 1, 1994, as follows:
 - o Identify the current level of effort and coverage by December 1, 1993.
 - o Develop opportunities for focusing resources and replacing other energy sources by February 1, 1994.
 - o Assist implementing cost effective programs and services by April 1, 1994.

Measures: Performance reports.

LOAD GROWTH

Goals:

3. To increase customer saturation in Pinellas County by connecting at least 850 new customers and adding 1.5 million commercial/industrial annual therm sales (CATS) in FY 93/94.

Measures: Sales commission reports and indicator tracking report.

4. To install at least 500 new water heaters (475 in Pinellas and 25 in Pasco) for new home builders and electric conversions in FY 93/94.

Measures: Sales commission reports and indicator tracking report.

5. To maintain inventories and sales programs to sell at least \$250,000 of new appliance and parts while maintaining an average gross sales profit of 30% in FY 93/94.

Measures: Sales commission reports and indicator tracking report.

6. To install at least 200 new gas lights in Pinellas County in FY 93/94.

Measures: Sales commission reports and indicator tracking report.

GAS SYSTEM Pasco Gas Expansion

DESCRIPTION:

The Pasco Gas Expansion Program will be responsible for capturing all of the costs and revenues associated with the extension of the Clearwater Gas System into Pasco County. A strategic plan is being concluded which recommends system expansion to the north. This program will enable the manpower and operating budget to accomplish same. The overall goal of this expansion is long range growth and profitability.

The Pasco Gas Expansion includes no additional cost centers.

PROGRAM BUDGET HIGHLIGHTS:

A This is a new program to expand natural gas services to Pasco County. The anticipated impact to the Gas Department budget is \$398,130. Projected first year natural gas revenues are \$400,000. Net revenues of \$3.2 Million annually are projected once the project is fully complete.

GAS SYSTEM PASCO GAS EXPANSION

FINANCIAL PERFORMANCE

Goals:

1. To continually manage a Pasco Gas Expansion program budget which is realistic, adequately funded, done on time and maintained within expenditure limits while insuring a high level of service to our customers. Authorized division budget levels for FY 93/94 are:

| 0 | Operating Budget | \$398,130 |
|---|----------------------|-----------|
| 0 | Authorized Employees | 7 FTE |

Measures: Monthly budget printouts.

2. To support the department's objectives by developing a proactive Pasco Gas Expansion Program contribution to the CGS business plan for FY 94/95 by July 1, 1994.

Measures: Clearwater Gas System business plan.

MUNICIPAL/COMMUNITY RELATIONS

Goals:

3. To conduct a CGS awareness program for at least four city/county commission meetings during FY 93/94 and to work with local media to obtain favorable coverage of same to showcase CGS programs and services and to build community awareness within Pasco County.

Measures: Commission presentations, newspaper articles, and TV appearances.

LOAD GROWTH

Goals:

4. To expand CGS gas mains into Pasco County by installing at least 20 miles of new main and connecting at least 225 new customers in Pasco County in FY 93/94.

Measures: Indicator tracking report.

5. To install at least 25 new water heaters in Pasco County for new home builders and electric conversions in FY 93/94.

Measures: Indicator tracking report.

6. To support the department's objectives by being a sales conduit for Pasco County developers and customers to make them aware of new appliances and parts availability through CGS in FY 93/94.

Measures: Indicator tracking report.

CUSTOMER SATISFACTION

Goals:

7. To support the department's objectives by identifying those customers in Pasco County who fail among our largest 25 customers as well as all customers who consume a total of 18,000 therms annually. Take the lead for making the personalized management contacts for the Pasco County customers at least semi-annually for the first group and personalized employee contacts at least annually with the rest followed up by management correspondence in FY 93/94. The purpose of these contacts will be to express gratitude for our business relationship and to obtain customer feedback on our level of service and any customer needs which we might be able to service better.

Measures: Indicator tracking reports.

GAS SYSTEM Marketing & Planning

DESCRIPTION:

Gas Marketing & Planning is responsible for planning, feasibility assessment and development of marketing programs to build load and improve system profitability; designing new systems to make the gas system more effective and responsive to customer needs; advertising strategy to improve the marketing of sales programs; building better governmental relations; measurement of customer satisfaction levels and the design of programs to increase service levels to meet customer expectations; and the applications engineering and sale of large commercial and industrial end use projects to build load and improve load factor.

The Gas Marketing & Planning Program includes no additional cost centers.

PROGRAM BUDGET HIGHLIGHTS:

This is a new program to market new technologies such as Natural Gas Vehicles, Cogeneration and Gas Air Conditioning. The initial impact to the Gas Department is \$192,960. Additional net revenues of \$1.6 Million are projected by FY 99/00.

6.24

GAS SYSTEM MARKETING AND PLANNING

FINANCIAL PERFORMANCE

Goels:

1. To continually manage a gas marketing and planning program budget which is realistic, adequately funded, done on time and maintained within expenditure limits while insuring a high level of service to our customers. Authorized program budget levels for FY 93/94 are:

| 0 | Operating Budget | \$192,960 |
|---|----------------------|-----------|
| 0 | Authorized Employees | 3 FTE |

Measures: Monthly budget report.

MUNICIPAL/COMMUNITY RELATIONS

Goals:

- 2. To support the department's objectives to enhance the city's economic vitality by considering how to cost effectively focus gas marketing resources in the North Greenwood community by April 1, 1994, as follows:
 - o Identify the current level of effort and coverage by December 1, 1993.
 - o be Develop opportunities for the focusing of resources by February 1, 1994.
 - o Begin implementing cost effective programs and services by April 1, 1994.

Measures: Performance reports.

3. To conduct a CGS awareness program for at least ten city commission meetings during FY 93/94 and to work with local media to obtain favorable coverage of same to showcase CGS programs and services and build community awareness.

Measures: Commission presentations, newspaper articles, and TV appearances.

PRICE

Goals:

4. To support the department's price objectives by pro-actively seeking out how other utilities price their products and building these findings into new and enhanced marketing programs during FY 93/94.

Measures: Rate reports.

Goals:

5. To take the leadership role in developing an external customer service survey and needs assessment mechanism and administer same by February 1, 1994. Develop improvement opportunities by May 1, 1994, to build identified needs into the FY 94/95 planning process.

Measures: Performance reports.

6. To take the leadership role in identifying our largest 25 customers and all of our customers who consume a total of 18,000 therms annually. Take the lead in scheduling personalized management contacts at least semi-annually for the first group and personalized employee contacts at least annually with the rest followed up by management correspondence in FY 93/94. the purpose of these contacts will be to express gratitude for our business relationship and to obtain customer feedback on our level of service and any customer needs which we might be able to serve better.

Measures: Performance reports.

7. To develop and implement at least two (2) new and innovative programs during FY 93/94 - a natural gas vehicle program by March 1, 1994, and another by July 1, 1994.

Measures: New programs and associated budget reports.

NOTES

.

* Future year revenues (after FY93/94) are increased by net margin only as added fuel/appliance costs are not included in operating cost budget projections.

No increases shown in future year revenues (after FY93/94) due to pass thru nature of franchise fee billing and no increase shown in operating cost budget projections correspondingly.

PROJECT DESCRIPTION

Estimated Estimated Starting Completion Date Date

GAS SYSTEM

Oct. 1993 New Mains - Gas Main Extension Sept. 1999 This is an on-going project which extends the natural gas mains to new residential and commercial customers throughout the gas service area. Funds for this project for FY 1994/95 through 1998/99 are included in the Pasco and Pinellas expansion bond issue. The \$300,000 of gas revenue funding in FY 1993/94 is for start up costs of constructing new mains while waiting for the bond to be sold. Annual Operating Costs: No significant increase of existing operating costs. Comprehensive Plan Objective: To provide utility service in the coastal zone consistent with consumer demand and sound principles of environmental management. Additional Service Lines

In order to meet increasing demands for gas service, additional service lines are extended to new customers. Funds for this project for the next seven years are included in the Pasco and Pinellas expansion bond issue.

Annual Operating Costs: No significant increase of existing operating costs. Comprehensive Plan Objective: To provide utility service in the coastal zone consistent with consumer demand and sound principles of environmental management.

Line Relocation - Maintenance

This project is used for the removal of gas mains as required by State Department of Transportation. When gas lines are relocated and the system is not upgraded, it is considered maintenance, and falls under this project. Funds for this project for the next seven years are included in the Pinellas and Pasco expansion bond issue.

Annual Operating Costs: No significant increase of existing operating costs. Comprehensive Plan Objective: Where local improvements are proposed, the City shall, where applicable, coordinate these improvements with the County and neighboring jurisdictions.

.

| | Starting Date | Completion Date |
|---|------------------|--------------------|
| GAS SYSTEM | | |
| (Continued): | | |
| Line Relocation - Capitalized | Oct. 1996 | Nov. 1999 |
| This project is for the relocation of gas mains for local, County, State, and Federal public works projects. Funds for this project for the next seven years are included in the Pinellas and Pasco expansion bond issue. | | |
| Annual Operating Costs: No significant increase of existing operating costs. Comprehensive Plan Objective: Where local improvements are proposed, the City shall, where spplicable, coordinate these improvements with the County and neighboring jurisdictions. | | |
| System Renewal and Replacement - Maintenance | Continuous | Annual Funding |
| This is a continuing project to maintain gas system, such as conducting cathodic protection and leak surveys, as required by State and Federal specifications. The maintenance portion of this project involves work that is not capitalized. | | |
| Annual Operating Costs: No increase of existing operating costs. Comprehensive Plan Objective: To provide for a safe and efficient gas system that meets State and Federal regulations. | | |
| System Renewal and Replacement - Capitalized | Continuous | Annual Funding |
| This is a continuing project to maintain the gas system, including replacement of original cast iron pipes with plastic pipe, to State and Federal specifications. This portion of the project involves work that adds to the value of the gas system and is therefore capitalized. Additional funding, replacing gas revenue funds, for this project for the next seven years are included in the Finellas and Pasco expansion bond issue. | | |
| Annual Operating Costs: No increase of existing operating costs. Comprehensive Plan Objective: To provide for a safe and efficient gas system that meets State and Federal regulations. | | |
| Gas Meier Change-Out | Oct. 1996 | Nov. 1999 |
| This is a continuing project to maintain accurate gas meters to maximize gas revenues. Funds for this project for the next seven years are included in the Pinellas and Pasco expansion bond issue. | | |
| Annual Operating Costs: No increase of existing operating costs. | | |

Comprehensive Plan Objective: To provide for the systematic improvement of the City's physical plant and to increase efficiency in governmental operations.

PROJECT DESCRIPTION

61

Estimated Estimated Starting Completion Date Date

GAS SYSTEM

(Continued):

Liquid Propane Gas Service

This project will provide tanks, regulators and appurtenances which will be used to provide L.P. Gas Service to new customers where existing natural gas mains are not present. This will be an ongoing project to meet the increasing demands for gas service and to increase new customer load. Funds for this project for the next seven years are included in the Finellas and Pasco expansion bond issue.

Annual Operating Costs: No increase in existing operating costs. Comprehensive Plan Objective: To provide utility service in the coastal zone consistent with consumer demand and sound principles of environmental management.

Gas Inventory Control System

The Gas Inventory Control System will insure accurate inventory control of all gas parts, fitting, and appliances. Presently Clearwater Gas System inventory is valued at approximately \$500,000. This system will interface with the Ross Financial system currently being used by the City. All parts when received will be entered into inventory using a scanner and a bar code type system. The system will be more accurate and provide timely information. This is included in the CIS Long Range Plan #9342. Annual Operating Costs: Yearly debt service, plus the software costs estimated at \$5,000.

Pasco & Pinellas Expansion Project

This project will provide funding for the extension of gas mains and services within Upper Pinellas and West Pasco Counties. It will also fund various activities such as gas main relocation for road construction, capital replacement of obsolete cast iron mains, L.P. services and gas meter change outs.

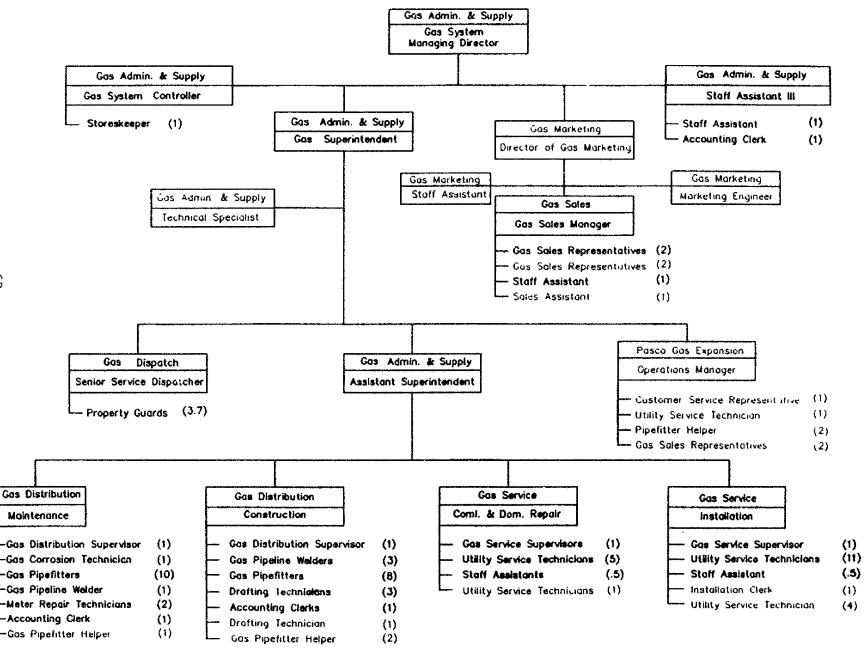

Annual Operating Costs: \$402,020 plus annual debt service. Comprehensive Plan Objective: To provide utility service in the coastal zone consistent with consumer demand and sound environmental management.

ACCOUNTING TREATMENT

Please note that the City Budget is done on a "Cash Basis" which includes Capital Improvement Expenditures and Debt Principal Repayment. We also include a revenue item to offset the Dividend Payment as this is paid from Prior Year Working Capital.

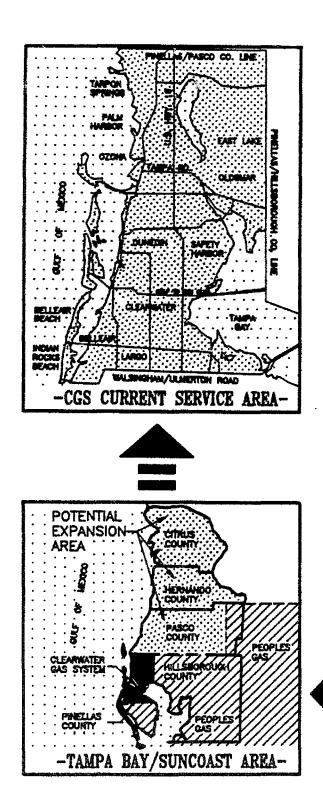

The Financial Income Statements are done on an "Accrual Basis" which does not include the above listed items but includes Depreciation expense on capital assets instead. This is consistent with the City's "Proforma" fund statements and typical business accounting. This provides the basis for the Gas System's Net Income, one-half of which currently is paid as a Dividend to the City in the second fiscal year after it is earned.
