via Hand Delivery

Re: Resolution of Petition(s) to establish 1995 rates,
terms, and conditions for interconnection involving
local exchange companies and alternative local
exchange companies pursuant to Section 364.162,
Florida Statutes; Docket No. 950985A-TP

Dear Ms. Bayo:

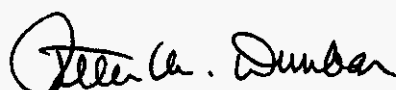

Enclosed for filing please find an original and fifteen copies
of the Direct Testimony of Joan McGrath on behalf of Time Warner
AxS of Florida, L.P. and Digital Media Partners for the above-
referenced docket.

You will also find a copy of this letter and a diskette in
Word Perfect 5.1 containing the same information enclosed. Please
date-stamp the copy of the letter to indicate that the original was
filed and return to me.

If you have any questions regarding this matter, please feel
free to contact me. Thank you for your assistance in processing
this filing.

Respectfully,

PENNINGTON & HABEN, P.A.

Peter M. Dunbar

1 **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**
2 **DOCKET NO. 950985A-TP**
3 **DIRECT TESTIMONY OF**
4 **JOAN McGRATH**
5 **ON BEHALF OF TIME WARNER AXS OF FLORIDA, L.P.**
6 **AND DIGITAL MEDIA PARTNERS**

7

8 **Q: PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

9 A: My name is Joan McGrath, and my business address is
10 160 Inverness Drive West, Englewood, Colorado,
11 80112.

12

13 **Q: PLEASE STATE YOUR CURRENT TITLE.**

14 A: I am the Manager for Interconnect Management at
15 Time Warner Communications.

16

17 **Q: PLEASE DESCRIBE YOUR CURRENT RESPONSIBILITIES.**

18 A: My current responsibilities include interconnection
19 negotiations with Regional Bell Operating Companies
20 (RBOCs) and independent local exchange companies
21 (ILECs) nationwide.

22

23 **Q: PLEASE DESCRIBE YOUR BACKGROUND AND EXPERIENCE.**

24 A: I received a Bachelor of Science degree in Business
25 Administration with emphasis in Marketing from the

1 University of Denver, Denver, Colorado.
2 Additionally, I have taken technical training
3 courses through AT&T on Electronic Switching System
4 Architecture and ISDN Overview. When my work
5 schedule permits, I also attend Master level
6 telecommunications classes at the University of
7 Denver.

8
9 My telecommunications experience includes
10 employment at U S West, an RBOC,
11 Telecommunications, Inc. (TCI), a major cable
12 company, and Teleport Communications Group (TCG),
13 an alternative access vendor (AAV).

14
15 At U S West, my responsibilities included
16 performing statistical and results analyses for the
17 small business and home personal service. At TCI,
18 my responsibilities included managing market
19 research projects for new AAV markets. At TCG my
20 responsibilities included managing the
21 interexchange company (IXC) interconnection
22 negotiations and the RBOC collocations. My resume
23 is attached as Exhibit JM-1.

1 Q: WHAT IS THE PURPOSE OF YOUR TESTIMONY?
2 A: I have been asked to present testimony on behalf of
3 Time Warner AxS of Florida, L.P. and Digital Media
4 Partners (collectively "TWC") to recommend the
5 approach the Florida Public Service Commission
6 (Commission) should take in addressing the
7 interconnection issues raised by Continental
8 Cablevision, Inc. (Continental) in its October 6,
9 1995 Petition and Direct Testimony filed by A.R.
10 (Dick) Schleiden. However, at this time the issues
11 to be addressed in this docket have not been
12 identified formally. It may be necessary to amend
13 or revise my testimony in response to new issues
14 raised.
15
16 Q: IN FILING THIS TESTIMONY, ARE YOU REQUESTING THAT
17 THE COMMISSION RESOLVE TWC'S INTERCONNECTION
18 DISPUTES WITH BELLSOUTH OR ANY OTHER LOCAL EXCHANGE
19 COMPANY (LEC)?
20 A: No. However, I am aware that the decisions the
21 Commission makes in this case may indicate the
22 Commission's expected approach if it is asked to
23 resolve similar issues for new entrants.

1 Q: WHAT IS THE CONTEXT IN WHICH CONTINENTAL'S DISPUTE
2 WITH BELLSOUTH ARISES? WHAT KIND OF ENVIRONMENT
3 ARE ALTERNATIVE LOCAL EXCHANGE COMPANIES (ALECS)
4 FACING AS THEY ENTER THE LOCAL EXCHANGE
5 TELECOMMUNICATIONS MARKET?
6 A: Alternative local exchange companies (ALECs) are
7 entering an environment characterized by the
8 overwhelming dominance of one monopoly LEC, the
9 incumbent. In each local exchange one company has
10 nearly 100% of the market, a ubiquitous network,
11 brand identity and loyalty, and control over
12 essential facilities that ALECs need in order to
13 begin competing. To begin to provide service,
14 ALECs must make large investments in their own
15 networks, and must also connect those networks with
16 that of the ubiquitous incumbent LEC, which stands
17 to lose market share (although not necessarily
18 revenues) by such interconnection. Thus, the
19 incumbent LECs will have little incentive to enter
20 into interconnection arrangements that are
21 economically viable or technically efficient for
22 the new entrant. As untested newcomers, ALECs must
23 overcome brand loyalty by providing better service
24 at lower prices in order to gain market share. If
25 consumers perceive the service ALECs provide to be

1 in any way inferior to that of the incumbent LEC,
2 the effect on new entry could be deadly. Because
3 of the effects of technical issues such as a
4 technologically inferior number portability
5 mechanism, the ALEC faces the very real risk of
6 being placed at a significant competitive
7 disadvantage from the very start.

8

9 **Q: IN DECIDING INTERCONNECTION ISSUES, SPECIFICALLY**
10 **THE RATES, WHAT FACTORS SHOULD THE COMMISSION TAKE**
11 **INTO ACCOUNT TO RENDER A POLICY DECISION THAT**
12 **PROMOTES COMPETITION FOR CONSUMERS?**

13 **A:** There are several factors:

14 • First, the Commission should consider that
15 interconnection is a monopoly service. Only the
16 LECs today have a ubiquitous network, which is of
17 great value to them. Although the LECs argue
18 that having to serve everyone everywhere is a
19 burden, the ability to do so is certainly one
20 which confers positive effects from a marketing
21 perspective. AT&T exploited a similar
22 circumstance in its advertising during the early
23 years of toll competition. Because of LEC
24 ubiquity, every entrant that wants to do business
25 must interconnect with the LEC.

- 1 • Second, the Commission should consider the impact
2 of various rate structures and levels on the
3 development of competition and promotion of
4 customer choice and innovative technology.
5 Without competition, the LECs are provided an
6 enormous windfall. It is my understanding that
7 the Commission is to encourage competition to
8 ensure the availability of the widest range of
9 consumer choice in the provision of all
10 telecommunications services. Consistent with
11 this mandate, as the Commission works its way
12 through the transition to a competitive market,
13 it must keep in mind that the absolute best way
14 to provide consumers with superior, innovative
15 local exchange service is to provide consumers
16 with choices.
- 17 • Third, the interconnection arrangements should
18 create incentives for competitive infrastructure
19 development. The only way for sustainable
20 competition to develop is if competitors do not
21 have to rely exclusively on the LEC for the
22 provision of service. Interconnection
23 arrangements should encourage companies to invest
24 in plant.

- 1 • Fourth, interconnection arrangements should
2 promote technological innovation. The Commission
3 has been directed to exercise its jurisdiction to
4 encourage not only consumer choice of new
5 providers, but also to encourage the introduction
6 of new services. Thus, as discussed by Dick
7 Schleiden in his direct testimony on behalf of
8 Continental, the price structure for
9 interconnection should not be tied to existing
10 price structures which force new market entrants
11 to replicate existing LEC pricing structures, or
12 to require ALECs to duplicate the pricing
13 structures that the LECs want them to have.
- 14 • Fifth, interconnection rates should not include
15 a contribution to universal service. These
16 concepts are very different, and should not be
17 treated together.
- 18 • In addition, remote call forwarding, the only
19 currently available option for temporary number
20 portability, is an inferior technology. As a
21 result of some of the shortcomings of remote call
22 forwarding, ALECs experience longer call set-up
23 times, loss of the availability of some custom
24 calling features, and lost terminating access
25 charge revenue to ported numbers due to the loss

1 of identity of those calls when they arrive at
2 the ALEC switch. This is a significant barrier
3 to entry in terms of availability of service
4 offerings and service quality for the ALECs.
5 Having true number portability is essential to
6 ALECs being able to do business. The Commission
7 should consider the limitations of remote call
8 forwarding when it establishes interconnection
9 rates and rate structures.

10

11 **Q: WHAT IS THE MOST APPROPRIATE ARRANGEMENT FOR AN**
12 **INTERCONNECTION RATE AND RATE STRUCTURE BETWEEN A**
13 **LEC AND AN ALEC?**

14 **A:** The most appropriate arrangement is a bill and keep
15 arrangement.

16

17 **Q: WHAT IS BILL AND KEEP?**

18 **A:** I understand that bill and keep is the method most
19 often used as a local interconnecting arrangement
20 by LECs with each other today in Florida. With
21 bill and keep the two networks connect at some
22 agreed-upon point, and each company bears the cost
23 of its network, keeping the revenues it generates,
24 and not charging the other company to use its
25 network.

1 Q: WHY DO YOU RECOMMEND A BILL AND KEEP ARRANGEMENT?

2 A: There are a number of reasons why I recommend a
3 bill and keep arrangement.

- 4 • First, a bill and keep arrangement is
5 reciprocal, thus acknowledging that all
6 participants are co-carriers. Competing local
7 exchange carriers should be treated as co-
8 carriers in light of the fact that the
9 necessity for interconnection is mutual once
10 an entrant signs up its first customer. Once
11 an entrant gains that first customer, both the
12 LEC and the ALEC have a mutual need for
13 services from the other if each is to offer
14 its customers the ability to reach all other
15 telephone subscribers in the local exchange.
- 16 • Second, bill and keep is certainly the least
17 cost method of compensation for terminating
18 traffic, and thus, is the approach most likely
19 to help drive local exchange rates as low as
20 possible for customers.
- 21 • Third, bill and keep offers the least
22 possibility that the incumbent LECs can use
23 the compensation mechanism to try to impose
24 unnecessary and anti-competitive costs upon
25 the ALECs. Thus, it is the method least

1 likely to result in new, unnecessary barriers
2 to entry.
3 • Fourth, bill and keep is neutral in terms of
4 both the technology and architecture that
5 ALECs might choose to adopt. One of the major
6 benefits from opening the local exchange to
7 entry and the development of effective local
8 exchange competition, is that the residents of
9 Florida can benefit from competition between
10 different technologies and involving different
11 architectures of service. If the compensation
12 arrangements for terminating traffic skew the
13 technology or architecture choices of the
14 entrant, then this benefit of entry will be
15 reduced or eliminated. This would not be in
16 the public interest.

17

18 **Q: HOW DOES BILL AND KEEP ELIMINATE COSTS THAT ACT AS**
19 **A BARRIER TO ENTRY?**

20 **A:** Once the conditions for effective competition have
21 been met, it is certain that the amount of
22 compensation owed to one network would be offset by
23 the amount owed to the other. Unless there are
24 significant distortions between networks, the
25 traffic between networks tends to be in balance

1 over time. This means that it is inefficient for
2 companies to develop measurement and billing
3 arrangements that can significantly increase the
4 cost of doing business when the amounts to be paid
5 are going to cancel out over relatively short
6 periods of time.

7
8 Developing and implementing such a measurement and
9 billing system could greatly increase the
10 incremental cost of the switching function for
11 terminating traffic. This is a significant and
12 unnecessary burden to add to local exchange
13 service, when it can only be justified at best for
14 a brief period of time.

15
16 It also imposes other costs on local exchange
17 service, costs that fall more heavily on entrants
18 than on the incumbent LECs. There are at least two
19 additional sets of costs that would be imposed if
20 compensation for terminating local traffic were
21 charged for on a per minute or per message basis.
22 The first is the cost of measuring equipment and
23 the establishment of a billing system for use by
24 the entrants. The second is the cost to audit and
25 verify bills.

1 Q: WHY DID YOU REFER TO THE DEVELOPMENT OF MEASUREMENT
2 AND BILLING SYSTEMS FOR THE INCUMBENT LECS?
3 INCUMBENT LECS NOW MEASURE AND BILL FOR LOCAL
4 CALLS. WHY WOULD THEY HAVE TO DEVELOP ANY NEW
5 MEASUREMENT AND BILLING SYSTEMS?

6 A: While it is true the incumbent LECs can and do
7 measure and bill for at least some of their local
8 exchange traffic, the measurement systems they use
9 for that purpose cannot be used to measure
10 terminating local exchange traffic. The current
11 measurement systems cannot distinguish today
12 between local and toll calls.

13

14 Q: HAVE ANY OTHER STATES ADOPTED BILL AND KEEP?

15 A: Yes, bill and keep is gaining approval in key
16 states concerning this issue. The California PUC
17 recently adopted interim local competition rules
18 that included bill and keep. See, *Initial Rules*
19 *for Local Exchange Service Competition in*
20 *California*, California Public Utilities Commission,
21 Docket No. R 95-04-043/I 95-04-044, Section 7:
22 Interconnection of LEC and CLEC Networks for
23 Termination of Local Traffic, page 10 (July 24,
24 1995). A Michigan Public Service Commission
25 decision also adopts bill and keep if the traffic

1 is in balance within five percent. See, *Opinion*
2 *and Order, In the matter of the application of City*
3 *Signal, Inc., Case No. U-10647, pages 19-30*
4 *(February 27, 1995). Recently, the Connecticut*
5 *Commission also adopted bill and keep. See, DPUC*
6 *Investigation into the Unbundling of the Southern*
7 *New England Telephone Company's Local*
8 *Telecommunications Network, State of Connecticut*
9 *Department of Public Utility Control, Docket No.*
10 *94-10-02, pages 63, 70, 71 (September 22, 1995).*
11 *Also, the Washington Utilities and Transportation*
12 *Commission recently issued an order linking*
13 *charging for interconnection to the development of*
14 *a true number portability solution. See, Fourth*
15 *Supplemental Order Rejecting Tariff Filings and*
16 *Ordering Refiling; Granting Complaints, in Part,*
17 *Washington Utilities and Transportation Commission;*
18 *Docket Nos. UT-941464, UT-941465, UT-950146, UT-*
19 *950265, pages 29-33 (October 31, 1995). Also, the*
20 *Texas Public Utility Regulatory Act of 1995, Title*
21 *III, Subtitle J, Section 3.458 requires that in the*
22 *absence of a mutually agreed compensation rate,*
23 *bill and keep shall apply. Finally, although it is*
24 *not a final action, the Tennessee PUC staff has*
25 *recently proposed rules requiring bill and keep.*

1 Q: WHAT METHOD OF INTERCONNECTION HAVE MOST LECS
2 OFFERED THUS FAR?

3 A: Most LECs have offered a per minute of use, access
4 charge-based scenario. Further, they have
5 differentiated the price of interconnection
6 depending on where the ALEC interconnects. If the
7 ALEC interconnects at the tandem, the price is
8 higher than if the LEC interconnects at the end
9 office.

10

11 Q: WHAT IS WRONG WITH THIS APPROACH?

12 A: There are several problems with it:

- 13 • First, switched access charge levels in Florida
14 today are loaded with contribution. This is
15 inconsistent with local interconnection rates
16 being separated from universal service.
- 17 • Second, a usage sensitive interconnection rate
18 measurement is administratively burdensome and
19 expensive, and makes no sense in light of
20 information from other states that the traffic
21 flow back and forth between LEC and ALEC networks
22 tends to even out over a relatively short time.
23 Based on EAS traffic studies, the same tends to
24 be true in LEC local interconnection arrangements
25 today.

1 • Third, tying ALECs to the LECs' offered pricing
2 scenario may limit innovative product offerings
3 by the ALECs.

4

5 **Q: SHOULD INTERCONNECTION RATES BE TARIFFED?**

6 **A:** Yes, tariffing implies a generally available
7 offering which can be purchased by like customers
8 under the same circumstances. Tariffs are
9 appropriate for monopoly services such as
10 interconnection.

11

12 **Q: PLEASE SUMMARIZE YOUR TESTIMONY.**

13 **A:** I have recommended factors that the Commission
14 should consider in establishing interconnection
15 arrangements. Consistent with these factors, I
16 have recommended that the Commission adopt a bill
17 and keep approach for local interconnection. Bill
18 and keep is the most appropriate compensation
19 method to promote the development of competition,
20 consumer choice, and technological innovation.
21 Bill and keep has begun to be adopted by key
22 states, and eliminates unnecessary measuring costs
23 which can only be justified for a brief period, at
24 best.

25

1 Q: DOES THIS COMPLETE YOUR TESTIMONY?

2 A: Yes, it does.
