RE: DOCKET NO. 960878-WS - Proposed rate reduction to reflect a decrease in purchased water and wastewater costs to FPSC-regulated utilities, by Pasco County.

Issue 1: Recommendation that the Commission should require the seven remaining FPSC regulated utilities that receive bulk water and/or wastewater from Pasco County to file for a rate adjustment to reflect the decrease in the rate for bulk water and/or wastewater approved by Pasco County within 30 days of the date of the Commission Conference. For purposes of calculating the decrease, each utility should be required to file the information required by Rule 25-30.425(1)(a) through (f), F.A.C., along with a calculation of the rate decrease and revised tariff sheets. Further, the utilities should be required to refund, by a credit to the customers' bills, the difference in the rates collected since April 1, 1996 within 60 days of the effective date of the order. In the event a timely protest is received, the utilities should be required to escrow the difference in the rates collected since April 1, 1996 as set in staff's August 8, 1996 memorandum. An account of all monies escrowed should be maintained by the utility. This account should specify by whom and on whose behalf such monies were paid. Each utility should provide evidence that the refunds have been made within 30 days of the date of the refund.
