3. DESCRIPTION OF SERVICE

3.1. Timing of Calls

3.1.1. Billing for calls placed over the Company's underlying carrier's network is based on the duration of the call. Timing begins when the Called Station is answered (i.e., when two-way communication is possible), as determined by standard industry methods generally in use for ascertaining answers, including answer supervision hardware by which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. Timing ends when either party hangs up. The Company shall not charge for incompleting calls.

3.2. Distance Sensitivity

3.2.1. The Company's charges are based on the airline distance between Rate Centers located within the State.

3.3. Calculation of Distance

3.3.1. Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with originating and terminating points of call.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved.

FORMULA:

$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$
