Vote Sheet

Docket No. 961498-WU

May 6, 1997

Issue 2: Should the utility's tariff filing to modify its service availability charges be approved as filed?

Recommendation: No. The tariff sheets filed on December 18, 1996 should be denied as filed. The appropriate service availability charges should be \$793 for plant capacity and \$887 for main extension. If the utility files revised tariff sheets which are consistent with the Commission's vote within 30 days of the date of the order, staff should be given administrative authority to approve the revised tariff sheets upon staff's verification that the tariffs are consistent with the Commission's decision and the proposed customer notice is adequate. Pursuant to Rule 25-30.475, F.A.C., if revised tariff sheets are filed and approved, the service availability charges should become effective for connections made on or after the stamped approval date of the revised tariff sheets, provided customers have received notice and no protests are filed.

**APPROVED**

Issue 3: Should the docket be closed?

Recommendation: No. The docket should remain open for 30 days from the date of the order to allow the utility time to file revised tariff sheets, and if no protests are filed to the denial by a substantially affected person within 21 days of issuance of the order. If a protest is filed regarding the denial of the proposed tariff, the utility's proposed tariff may be implemented. If the utility's proposed tariff is implemented, then all charges collected under the proposed tariff should be held subject to refund pending resolution of the protest.
