Dear Ms. Marsh:

Enclosed please find a diskette and one hard copy of the executive overview that Frontier Communications of the South, Inc. filed with the cost data required in Special Project No. 980000A-SP: Fair and Reasonable Rates.

Frontier Communications of the South, Inc. has provided the overview in Microsoft Word for Windows 95, Version 7.0a.

If you should have any questions concerning this, please feel free to contact me at (716) 777-7793.

Sincerely,

Kelly M. Goodnight

DIVISION OF RECORDS AND REPORTING

Executive Overview
for
Frontier Communications of the South, Inc.

Florida Public Service Commission
980000A-SP: Undocketed Special Project : Fair and Reasonable Rates

Frontier Communications of the South, Inc. has received two sets of data requests in the above referenced Florida Public Service Commission ("FPSC") undocketed special project. One was from the Division of Auditing & Financial Analysis ("AFAD") and another was from the Division of Communications.

The data request from AFAD sought information on an embedded cost basis. Pursuant to a request from the FPSC staff and to comply with Chapter 98-277, Laws of Florida, Frontier Communications of the South, Inc. has made this information available to the public.

The Division of Communications' data request required total service long-run incremental cost ("TSLRIC") study. Frontier Communications of the South, Inc. has not previously been required to produce a TSLRIC study and did not have a TSLRIC study available for the services identified in the Division of Communications' data request. Without the company specific TSLRIC study, Frontier Communications of the South, Inc. could not provide a meaningful contribution analysis as requested by the Division of Communications. Some information was provided; however, it was for the most part made confidential. Confidential information and other financial data have been filed in Special Project No. 980000A-SP at the Florida Public Service Commission.
