RE: 980696-TP Special Agenda

Currently, the recommendation for Docket 980696-TL is scheduled to be filed on December 8, 1998, with the Special Agenda scheduled for December 18, 1998. I am asking for your approval to modify this schedule on two counts. First, because of its length, I would like to request a one-day extension for filing the recommendation, until Wednesday December 9. Second, one of the appendices to the recommendation will consist of the results of proxy model runs, by wire center. Because of the time required to process the cost model to generate these results, I am requesting your approval to file this appendix to the recommendation no later than noon on December 14, 1998.
