Re: St. Johns Service Company; PSC Docket No. 982002-WS
Amended Petition for Declaratory Statement
Our File No. 20912.02

Dear Ms. Bayo:

As a result of discussions between the Utility representatives and the Commission staff and subsequent renegotiation of the Developer Agreements underlying the Declaratory Statement, I am hereby submitting the original and fifteen (15) copies of St. Johns Service Company's Amended Petition for Declaratory Statement in this proceeding. I hereby request that the Commission staff review the Amended Petition and the attached revised Developer Agreements upon which that Petition is based, and let me know if there are any concerns or problems with the changes.

Sincerely,

ROSE, SUNDBSTROM & BENTLEY, LLP

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

IN RE: Petition of St. Johns Service)
Company for Declaratory Statement) Docket No. 982002-WS
_____)

ST. JOHNS SERVICE COMPANY'S
AMENDED PETITION FOR DECLARATORY STATEMENT

St. Johns Service Company ("St. Johns"), by and through its undersigned counsel and pursuant to Rule 25-22.020, Fla. Admin. Code, hereby files this Amended Petition For Declaratory Statement, and in support thereof would state and allege as follows:

1. Name and address of Petitioner:

St. Johns Service Company
200 North Laura Street
10th Floor, The Greenleaf Building
Jacksonville, FL 32201-2506

2. Name and address of Agency:

Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-0850

3. On December 29, 1998 St. Johns Service Company filed its initial Petition for Declaratory Statement with the Florida Public Service Commission. As a result of discussions with the Florida Public Service Commission staff and renegotiation of the Developer Agreements underlying the Petition for Declaratory Statement, the Utility is now filing this Amended Petition for Declaratory

DOCUMENT NUMBER-DATE

08210 JUL-98

FPSC-RECORDS/REPORTING

Statement in order to recognize the changes that have occurred in the arrangement for service upon which the Commission action and interpretation of law is based.

4. The statutory provision on which a declaratory statement is sought: The applicability and effect of § 367.171(7), Fla. Stat.

5. A description of how this rule, order or statute may or does affect the Petitioner in its particular set of circumstances only:

(A) St. Johns Service Company is a water and wastewater company incorporated to do business in the state of Florida whose utility activities are regulated by St. Johns County.

(B) Under the provisions of § 367.171(7), Fla. Stat., the Florida Public Service Commission has jurisdiction over "utility systems whose service transverses county boundaries ..."

(C) St. Johns Service Company seeks a declaratory statement as to the applicability of this specific statutory provision as it applies to St. Johns Service Company in its particular set of circumstances.

(D) St. Johns Service Company provides service exclusively to customers in St. Johns County. Two such customers (are proposed to be) Sawgrass Homeowners Association VII, Inc., a Florida not-

for-profit corporation (currently receiving service), and Sawgrass Homeowners Association VIII, Inc., a Florida not-for-profit corporation (proposed to receive service). Because the question posed for each customer herein is identical, both customers will be hereinafter referred to only as "SHA." SHA is the owner and operator of certain internal distribution and collection facilities in Duval County.

(E) St. Johns Service Company provides or proposes to provide bulk water and wastewater service to the SHA at a point of delivery located within St. Johns County, Florida. The only customer who receives service from St. Johns Service Company at that point of delivery is (or will be) SHA, and the water and wastewater services conveyed to SHA at that point of delivery are (or will be) conveyed at said point of delivery in St. Johns County.

(F) The internal water and wastewater facilities owned by SHA beyond the point of delivery in Duval County are (or will be) operated by a Contract Operator on behalf of SHA who will perform all maintenance, billings, collections, and turn on and turn offs. While the Contract Operator is a related party to St. Johns Service Company, the related party is a separate corporate entity and is exempt from Florida Public Service Commission jurisdiction under

the provisions of Subsections 367.022(6) and 367.022(8), Florida Administrative Code.

(G) SHA is not a regulated Utility subject to this Commission's jurisdiction, because of exemptions under Section 367.022(6); Section 367.022(7) and 367.022(8).

(H) St. Johns Service Company charges (or will charge) SHA a bulk service rate for such service at the point of delivery in St. Johns County. Said bulk service rate has been submitted for approval by St. Johns County. No action has been taken on that application to date.

(I) St. Johns Service Company will not provide, and does not propose to provide, any active connections to customers in Duval County as that term is defined in Rule 25-30.515(1), Fla. Admin. Code. No customer connection charges, customer installation fees, developer agreements or other contractual arrangements will exist between any customers in Duval County and St. Johns Service Company other than the delivery of bulk service, within the confines of St. Johns County, to SHA as described herein above.

(J) St. Johns Service Company will not own any lines or appurtenant facilities on SHA's side of the point of delivery as described herein above.

(K) Accordingly, it is apparent that the service provided by St. Johns Service Company in St. Johns County does not transverse county boundaries as provided in § 367.171(6), Fla. Stat.

(L) Websters Ninth New Collegiate Dictionary defines "transverse" as "acting, lying, or being across." The only lines which transverse that county line which separates St. Johns County from Duval County in this instance are the lines owned by SHA. St. Johns Service Company does not provide service through any lines or facilities which "transverse" that county boundary.

(M) The Fourth District Court of Appeals has issued a recent decision which sheds some light on such bulk service arrangements and the appropriate determination as to what such a point of delivery means with regard to the location of service. In the case of *Town of Jupiter v. Village of Tequesta*, 713 So.2d 429 (4th DCA 1998), the court was construing § 180.06, Fla. Stat., which provides that no municipality shall construct any system, work, project, if facilities of a similar character are being actually operated by a municipality in the territory immediately adjacent thereto. While this statute is admittedly different than any provision of Chapter 367, the holding of that case is illustrative.

In that case, Tequesta received a bulk water supply from the town of Jupiter. When Tequesta made known its intent to construct

a reverse osmosis water treatment facility which would allow it to create its own potable water and eventually end its reliance upon water from Jupiter's facility, Jupiter brought suit to enjoin Tequesta from the intended expansion saying that such would be a "duplication of such facilities within the same municipal service area."

Noting that "under the Bulk Agreement, Jupiter merely supplies Tequesta with bulk potable water at a point of delivery," the Court of Appeal held,

All the fresh water sold by Jupiter to Tequesta is in bulk which is then sold by Tequesta to consumers within the service area. Providing Tequesta with bulk potable water at a point of delivery does not, in our opinion, constitute actual operation by Jupiter within Tequesta's consumer service area. The record establishes without contradiction that Jupiter is therefore not actually operating within the area serviced by Tequesta.

It is interesting to note that in the *Town of Jupiter* case, the point of delivery was actually apparently over the "line" of the Village of Tequesta's "service area." Despite this fact, the Court of Appeal held that because "Jupiter merely supplies Tequesta with bulk potable water at a point of delivery," the same did not constitute service in Tequesta's service area and the same did not

mean Jupiter was "actually operating" within Tequesta's service area.

In this case, the principle is even more clear because, unlike in the *Town of Jupiter*, the point of delivery is actually within St. Johns County. Thus, under the physical location of the point of delivery and under the principles enunciated in the *Town of Jupiter* case, St. Johns Service Company's provision of bulk service to a point of delivery in St. Johns County does not and cannot "constitute actual operation" by St. Johns Service Company in Duval County nor can the same be construed as St. Johns Service Company "actually operating" within Duval County.

(N) Counsel to the St. Johns Water and Sewer Authority has recommended and will continue to recommend to the Authority that it not take action on any matter currently pending or to be filed by St. Johns Service Company until St. Johns Service Company obtains from the Public Service Commission some determination of whether or not the particular arrangement described herein invokes the jurisdiction of the Public Service Commission.

(O) St. Johns Service Company wishes to remain regulated under the jurisdiction of the St. Johns County Water and Sewer Authority at present. The Utility believes that its continued

regulation by St. Johns County and its Water and Sewer Authority is in the public interest for the following reasons:

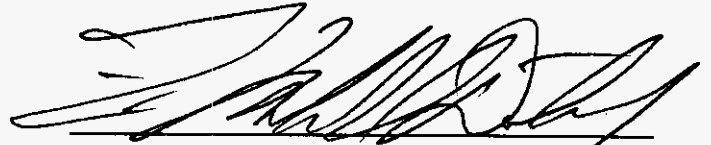

- (1) Regulation within St. Johns County has been relatively uncomplicated with no significant new regulatory requirements imposed on St. Johns Service Company since the Utility came under the jurisdiction of St. Johns County.
- (2) St. Johns County, while being authorized to charge a regulatory assessment fee of 4.5%, has suspended collection of any such charge for several years now, and as such, the Utility has been able to forego otherwise needed rate increases to its customers because of St. Johns County's continuing regulation. To the extent the Florida Public Service Commission asserts jurisdiction over this Utility, it will immediately have to begin paying regulatory assessment fees and will have to seek recovery of this additional cost through a rate increase of approximately 5%.

(P) An expeditious rendering of a declaratory statement on these facts is necessary such that St. Johns Service Company may proceed under the jurisdiction of the St. Johns County Water and

Sewer Authority so as to render the most efficient and effective service to its customers within St. Johns County as possible.

WHEREFORE, and in consideration of the above, St. Johns Service Company respectfully requests that this Commission declare that the service arrangement described herein does not render St. Johns Service Company subject to the jurisdiction of the Florida Public Service Commission, and that the provisions of § 367.171(7), Fla. Stat., are not applicable to the above-referenced service arrangement because St. Johns Service Company provides no utility system whose service transverses the boundary of St. Johns and Duval County.

DATED this 9th day of July, 1999.

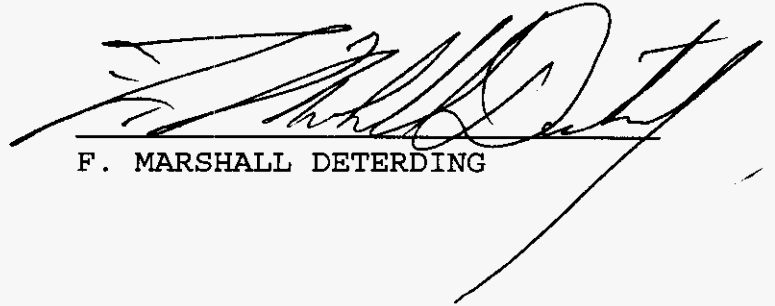

F. Marshall Deterding, Esq.

F. MARSHALL DETERDING

DEVELOPER AGREEMENT - UNIT 31

This Agreement, made and entered into this 17th day of May, 1999, by and among ML Partnership, a Florida general partnership having as its principal place of business at 4400 Marsh Landing Boulevard, Suite 3, Ponte Vedra Beach, FL 32082, hereinafter referred to as "Developer;" ST. JOHNS SERVICE COMPANY, a Florida corporation, 200 North Laura Street, Tenth Floor, The Greenleaf Building, Jacksonville, FL 32201-2506, hereinafter referred to as "Service Company"; Coastal Operating Services, Inc., a Florida Corporation, 200 North Laura Street, Tenth Floor, The Greenleaf Building, Jacksonville, FL 32201-2506, hereinafter referred to as "Contract Operator" and Marsh Landing at Sawgrass Homeowners Association VII, Inc. a Florida not-for-profit corporation, whose address is 4400 Marsh Landing Boulevard, Suite 3, Ponte Vedra Beach, FL 32082 ("Association").

WHEREAS, Developer is the Developer of the land located in Duval County, Florida, and described in **Exhibit "A,"** attached hereto and made a part hereof as if fully set out in this paragraph, and hereinafter referred to as the "Property," and Developer intends to develop the Property for residential single family lots; and

WHEREAS, Developer requires central water distribution and sewage collection service and desires to provide such bulk water distribution and sewage collection service for the Property; and

WHEREAS, the Association is the not-for-profit corporation responsible for the ongoing operation and management of the Property; and

WHEREAS, Service Company is willing to provide, in accordance with the provisions of this Agreement and the Service Company's approved water and sewer tariffs and water and sewer service availability policies, bulk service to Property such that Association may provide central

water distribution and sewage collection service to the Property and thereafter operate applicable facilities so that the occupants of the improvements on the Property will receive adequate water supply and sewer collection services; and

WHEREAS, Contract Operator is willing to provide contract operation, maintenance, meter reading, billing, collection and all other services necessary to ensure the continued provision of water and wastewater services to the individual homeowners within the property;

NOW, THEREFORE, in consideration of the premises, the mutual undertakings and agreements herein contained and assumed, Developer, Association, Contract Operator, and Service Company hereby covenant and agree as follows:

1. The foregoing statements are true and correct.
2. The following definitions and references are given for the purpose of interpreting the terms as used in this Agreement and apply unless the context indicates a different meaning:

(a). "Point of Delivery." The point where the pipes or meter of Service Company are connected with the pipes constructed by Developer. Service Company shall, according to the terms and conditions hereof, own all pipes and appurtenances to the point of delivery unless otherwise agreed. The pipes and appurtenances inside the point of delivery shall belong to the Association, and all such facilities inside the point of delivery shall be operated and maintained by Contract Operator as an agent of the Association.

(b). "Property." The area or parcel of land described in Exhibit "A" by legal description and sketch.

(c). "Service." The readiness and ability on the part of the Service Company to furnish and maintain bulk water and bulk sewer service to the point of delivery (pursuant to applicable rules and regulations of applicable regulatory agencies).

3. Bulk Service. Service Company agrees to furnish water and sewer services to the Property at the point of delivery which is located as follows:

a) Water point of delivery - At a location to be mutually agreed by the parties which location shall be at or near the Duval County line but located in St. Johns County.

b) Sewer point of delivery - At a location to be mutually agreed by the parties which location shall be at or near the Duval County line but located in St. Johns County (collectively referred to herein as "Points of Delivery").

Developer, has, at its sole cost and expense, extended such lines and constructed such facilities as necessary to connect the water distribution and sewer collection systems to the existing water and sewer system of Service Company at the Points of Delivery. Immediately upon execution of this Agreement, the Company shall purchase the bulk meter and Developer shall install the bulk meter at said Points of Delivery, the size and make of which is to be determined by Service Company in its sole discretion, based on industry standards.

4. Construction of On-Site System. In order to induce Service Company to provide to the Property as contemplated herein, bulk water and bulk sewer service, Developer has agreed to pay for the construction of any on-site water distribution and sewage collection systems (also referred to as "On-Site System" or "facilities") on its Property, and all facilities necessary to extend its internal on-site water distribution and sewage collection systems to the existing facilities of Service Company.

Developer constructed the water distribution and sewage collection system on the Property for the purpose of serving lots therein. The construction was in accordance with drawings, plans and specifications prepared at Developer's sole cost and expense and has been approved by Service Company. Developer was and is solely responsible for obtaining the necessary permits to construct the water distribution and sewage collection system.

5. Conveyance of Duval County Portion of the On-Site System from Service Company to the Association.

Service Company shall convey to Association, all facilities within the Property (and previously transferred to Service Company by Developer) including all water and sewer lines, services, laterals, meters, mains, lift-stations, and appurtenant facilities lying within the Property as defined hereunder to the Point of Delivery. The Association shall remain owner and operator of the internal distribution and collection facilities within the Property past the Points of Delivery unless Service Company, its successors, or assigns, demands transfer of all such on-site facilities under paragraph 6 herein. Service Company shall provide to the Association appropriate Bill of Sale for the facilities. Service Company shall transfer any and all easements, rights-of-way, or other property rights free and clear of any encumbrances to Contract Operator, as necessary for Contract Operator to operate the on-site systems, Service Company shall be entitled to reconveyance from Contract Operator and conveyance from the Association of such further property rights necessary to operate these on-site systems at the time of any future reconveyance of those facilities to Service Company upon demand for reconveyance under this Agreement.

6. Association to be Owner and Operator of On-Site Systems. Because the Service Company is providing the Association with bulk water and wastewater service under the terms of

this Agreement, the Association shall remain owner and operator of record of the internal distribution and collection facilities on Association's side of the Points of Delivery. However, Association, Contract Operator, and Service Company agree that Service Company, its successors, or assigns may at any time demand transfer of all such on-site facilities described herein and located within the Property. Upon such demand, Association will be obligated to provide Service Company, its successors, or assigns, with appropriate Bills of Sale within sixty (60) days of the date of such written demand for conveyance. Prior to the date of this Agreement the Developer has delivered to Service Company all original invoices evidencing the cost of the on-site system, release of liens for all such invoices, as-built plans and shop drawings. At the time of such conveyance, the Association and Contract Operator shall release their interests in all O & M Manuals to Service Company. Association, and/or Contract Operators, their successors, or assigns shall further convey to Service Company any and all easements, rights-of-way, or other property rights free and clear of any encumbrances, which may be reasonably necessary to own and operate the on-site system, upon demand for conveyance under this sub-section.

Association shall record a notice of the requirements of this sub-section in the public records of St. Johns County, Florida. Such notice shall include language to inform any and all future owners that the requirements of this subsection are to run with any transfer of the underlying facilities and shall be prepared by Service Company.

Upon demand for transfer, Association shall convey to Service Company all on-site water and sewer lines, services, laterals, meters, mains, lift stations, and appurtenant facilities from the current point of delivery as defined hereunder to the point of delivery at each individual lot

(collectively referred to as "components" or "on-site system") on the property with any contractual guarantees relating thereto, which are in the possession of the Association.

7. Inspection and Approval of On-Site Facilities. The On-Site System has been constructed in compliance with all regulatory requirements and the specifications and requirements of Service Company. Service Company has inspected the On-Site System constructed by Developer prior to date of this Agreement. Service Company has specified and Developer has corrected those facilities in order to meet industry standards or to make those facilities compatible with those of Service Company, as a precondition of allowing the connection of On-Site System to Service Company. Service Company has reviewed all plans and specifications for construction of facilities necessary for interconnection of On-Site System to those of Service Company prior to their construction and has approved such design specifications as well as inspected those facilities during construction. Service Company has approved On-Site System, including design, construction, sizing and materials utilized in piping, meters, valves, etc., prior to the execution of this Agreement and in connection with allowing connection of those facilities constructed by Developer to the facilities of the Service Company.

8. Agreement to Serve. Upon the completion of construction of the On-Site System by Developer, or an appropriate phase thereof, in compliance with the terms and conditions of this Agreement, Service Company will allow connection or oversee the connection of water distribution and sewer collection facilities installed by Developer to the Points of Delivery in accordance with the terms and intent of this Agreement. Such connection shall at all times be in accordance with rules, regulations, and orders of the applicable governmental authorities. Service Company agrees that once it provides bulk water and bulk sewer service to the point of

delivery and Developer or others have connected water and sewer installations to its system, thereafter Service Company will continuously provide, at its cost and expense, but in accordance with the other provisions of this Agreement, including rules and regulations and rate schedules, bulk water and bulk sewer service to the Association in a manner to conform with all the requirements of the applicable governmental authority having jurisdiction over the operations of Service Company.

9. Application for Service. Service Company will be providing bulk service, and as such, the internal facilities of On-Site System will be owned by Association, its successors or assigns. Contract Operator agrees to operate and maintain the internal facilities of the On-Site System on behalf of the Association. In order to ensure the continued integrity of the Service Company's system and to allow Service Company to properly operate and maintain the water and sewer systems, Association, its successors, or assigns (including Contract Operator) shall not approve service for any owner of any parcel of property or any occupant of any residence, building, or unit located on Association's side of the bulk meter nor approve connection to any customer installation to the facilities of Association, until Service Company receives and approves the standard application described below.

A standard application for service must be provided to and approved by Service Company, by any customer wishing to connect to the system owned by Association as a precondition of service to any such customer. The Contract Operator shall provide the billing and collection services of the individual customers on behalf of the Association and shall apply Service Company's standard rates and charges to the individuals receiving service from Service Company and through Association's system. Contract Operator and Service Company shall, in all

respects, treat all customers on Association's system in the same manner as customers receiving service directly through Service Company owned facilities. All such customers receiving service through Association's system shall also be subject to all the rules and regulations to which all other customers are subject.

Association recognizes that service may be discontinued to either Association or individual customers receiving service through Association's system if applicable rates, fees and charges as assessed by Service Company are not paid by the customer in a timely manner after written assessment of such rates, fees or charges by Service Company or Contract Operator. Contract Operator agrees to undertake in any such turn off or reconnection of such individual customers in accordance with Service Company's standard policies and applicable rules directed by Service Company. Service Company recognizes and agrees that Service Company will be responsible for payment for and installation of the bulk meters to be located at the Points of Delivery as described herein in accordance with specifications and requirements as determined by the Service Company.

10. Bulk Service Rate. It is acknowledged that upon execution of this Agreement the Service Company will file a request to amend its tariff to provide a rate for bulk service. It is further agreed that such bulk service rate shall be based upon multiples of the standard base facility charges and gallonage charges currently reflected in the Utility's general service tariff, the derivation of which is outlined as follows:

(a) Base Charge - The base charge imposed each month for both water and sewer service shall be the applicable base facility charge for one equivalent residential connection times the number of equivalent residential connections that exist during that month, or any portion of that month, behind the bulk service meter. The calculation of the number of ERCs in the appropriate base charge shall be in

accordance with standard Utility practice and regulatory approval as interpreted by Service Company.

(b) Gallage Charge - The gallage charge imposed shall be based upon application of the residential service charge per thousand gallons as contained in the Utility's residential service tariff multiplied by the number of gallons of water which have passed through the bulk service meter during any given month for both water and sewer service. If the gallons recorded at the bulk meter in any given billing cycle exceed the sum of the residential sewer gallage caps for the individuals receiving service behind the bulk meter, then the sum of those caps shall be applied to the bulk service charge, such that no gallage charges for sewer are imposed above the sum of those caps.

Service Company shall be responsible for filing an Application with St. John's County for approval of this bulk rate and for processing that Application through to approval, all at its cost and expense. All parties agree to support that Application in its entirety including the proposed rate and all aspects of this bulk service arrangement. Service Company shall be responsible for obtaining and shall obtain all necessary regulatory approvals for such rate. Upon receipt of such approvals, Service Company shall operate the Utility System in accordance with all such governmental approvals.

11. Agreement to Operate and Maintain On-Site System. In order to insure that the individuals receiving service through the Association-owned lines located within the Property receive the same service as those served through lines owned by Service Company, Contract Operator shall be responsible for operation and maintenance of Association's On-Site Systems and for reading individual meters on those lots located within the Property for billing and collection related to the individual customers and providing that information to Service Company. Contract Operator shall be responsible for billing said customers for monthly or periodic service based on the Service Company's standard tariff rates, and for collection from such

customers. Contract Operator shall pay Service Company for bulk service received from Service Company from the funds collected by Contract Operator for included service. Should those monies billed to said individual customers located within the Property over any calendar year period fail to be sufficient to compensate Service Company for charges for bulk water and bulk sewer service delivered to Association during that same calendar year period, then Service Company shall bill Association, on an annual basis, for said deficit and Association shall pay the same within thirty days. Should those monies billed to said individual customers over any calendar year period be in excess of the amount that Service Company has accrued for the provision of bulk water and bulk sewer service to Association for that same calendar year period, then Contract Operator shall retain said excess as further compensation for its agreement to operate and maintain Developer's and/or Association's system as outlined herein. To the extent any such excess charges to Association for bulk service (over individual charges) result from either line flushing, line breaks, line leaks or another reason which is not within the control of the Association, the Service Company will provide appropriate credits so that the Association is never charged for water metered and/or lost as a result of these factors beyond its control.

Association, Contract Operator, and Service Company recognize that jurisdiction over the rates and charges of Service Company is currently held by St. Johns County and may at some time be transferred to some other regulatory agency. In recognition of this fact, Service Company and Association agree that the rates and charges of the Service Company may, from time to time, be changed by such regulatory agency, and that the charges then in effect, at the time of connection of each lot, in accordance with the provisions of the regulatory agency's authority, rules, statutes and orders, and the Service Company's approved tariff and service availability

policy, will be applied to Association and the customers within the Property as required or allowed by law.

12. Operation, Maintenance, and Correction of Problems Within Association's On-Site System. Service Company shall have the right at all times to inspect the Association's On-Site System to insure that proper construction, operation, and maintenance of such Association's system is being conducted by the Contract Operator. Contract Operator shall operate and maintain Association's on-site system to the extent Service Company, in its sole discretion, deems necessary and advisable. Service Company requires this type of oversight of Contract Operator's operation and maintenance of the system, because of the potential impact of operation and maintenance or lack thereof may have on Service Company and its other customers. Contract Operator shall prepare and maintain all necessary O & M Manuals. Association, its successors, or assigns, shall provide to Contract Operator any such rights of ingress, egress, or such easements as are necessary so that Contract Operator will have access to the Association's on-site system for such operation and maintenance.

As further consideration for Contract Operator's agreement to operate and maintain the onsite system and read meters and remit this information to Service Company, all on behalf of the Association, the Association shall pay to Contract Operator the sum of \$1 per year for such services. All parties hereto acknowledge and agree that Contract Operator has received \$25 upon execution of this Agreement as compensation for the first 25 years of such operation and maintenance.

13. Exempt Status of Association and Contract Operator. It is the intention of this arrangement to insure that Association's ownership of, and Contract Operator's agreement to

operate the facilities on the Property and located in Duval County does not constitute operation of a Utility under the jurisdiction of Section 367, Florida Statutes, but instead falls within several of the exemptions outlined under Section 367.022, Florida Statutes. It is the parties' intention that ownership of the system by Association or its successors shall be exempt from regulation under Section 367, Florida Statutes based upon its compliance with the provisions of subsections 367.022(6) and (8), and Section 367.022(7), Florida Statutes (1997). All parties will cooperate to insure that the Association or its successor continues to operate at a minimum under one of these exemptions. To the extent modifications to the arrangement are necessary in order to maintain one of the exemptions, the parties agree to make such changes to the extent practicable. To the extent the only exemption applicable is under subsection 367.022(8), Florida Statutes, the Service Company agrees under the terms of this as a part of its responsibilities hereunder to file the annual information with the County to demonstrate such continuing qualification for exemption.

14. Costs and Attorney's Fees. In the event the Service Company, Developer, or Association is required to enforce this Agreement by court proceedings or otherwise, by instituting suit or otherwise, then the prevailing party shall be entitled to recover from the other party all costs incurred, including reasonable attorney's fees, before at trial, on appeal, in bankruptcy, or in post judgment collection.

15. Force Majeure. In the event that performance of this Agreement by any party to this Agreement is prevented or interrupted in consequence of any cause beyond the control of any party, including but not limited to acts of God or of the public enemy, war, national emergency, allocation or of other governmental restrictions upon the use or availability of materials,

rationing, civil insurrection, riot, racial or civil rights disorder or demonstration, strike, embargo, flood, tidal wave, fire, explosion, bomb detonation, nuclear fallout, windstorm, hurricane, earthquake or other casualty, disaster or catastrophe, unforeseeable failure or breakdown of pumping transmission or other facilities, governmental rules or acts or orders or restrictions or regulations or requirements, acts or action of any government or public or governmental authority or commission or board or agency or agent or official or officer, the enactment of any statute or ordinance or resolution or regulation or rule or ruling or order, order or decree of judgment or restraining order or injunction of any court, said party shall not be liable for such non-performance.

16. Venue and Jury Trial. In the event that the Service Company, Developer or Association is required to enforce this Agreement by court proceedings or instituting suit with regard to matters other than those regulated by St. Johns County, the parties agree that the appropriate venue for such suit shall be the courts of St. Johns County, Florida. In the event of such court proceedings or suit, both parties also agree to waive their right to a jury trial in settlement of any such disputes.

17. No Option. The submission of this Developer Agreement for examination by Developer and Association does not constitute an offer but becomes effective only upon execution thereof by Service Company.

MISCELLANEOUS PROVISIONS

18. This Agreement supersedes all previous Agreements or representations, either verbal or written, heretofore in effect between Developer, Association, Service Company and Contract Operator, made with respect to the matters herein contained, and when duly executed,

constitutes the Developer Agreement with Service Company. No additions, alterations or variations of the terms of this Agreement shall be valid, nor can provisions of this Agreement be waived by the party, unless such additions, alterations, variations or waivers are expressed in writing and duly signed.

IN WITNESS WHEREOF, the Developer, Association and Service Company have executed or have caused this Agreement to be duly executed in counterparts, each of which counterpart shall be considered as an original executed copy of this Agreement.

DEVELOPER AGREEMENT - UNIT 32

This Agreement, made and entered into this 17th day of May, 1999, by and among ML Partnership, a Florida general partnership having as its principal place of business at 4400 Marsh Landing Boulevard, Suite 3, Ponte Vedra Beach, FL 32082, hereinafter referred to as "Developer;" ST. JOHNS SERVICE COMPANY, a Florida corporation, 200 North Laura Street, Tenth Floor, The Greenleaf Building, Jacksonville, FL 32201-2506, hereinafter referred to as "Service Company"; Coastal Operating Services, Inc., a Florida Corporation, 200 North Laura Street, Tenth Floor, The Greenleaf Building, Jacksonville, FL 32201-2506, hereinafter referred to as "Contract Operator" and Marsh Landing at Sawgrass Homeowners Association VII, Inc. a Florida not-for-profit corporation, whose address is 4400 Marsh Landing Boulevard, Suite 3, Ponte Vedra Beach, FL 32082 ("Association").

WHEREAS, Developer is the Developer of the land located in Duval County, Florida, and described in **Exhibit "A,"** attached hereto and made a part hereof as if fully set out in this paragraph, and hereinafter referred to as the "Property," and Developer intends to develop the Property for residential single family lots; and

WHEREAS, Developer requires central water distribution and sewage collection service and desires to provide such bulk water distribution and sewage collection service for the Property; and

WHEREAS, the Association is the not-for-profit corporation responsible for the ongoing operation and management of the Property; and

WHEREAS, Service Company is willing to provide, in accordance with the provisions of this Agreement and the Service Company's approved water and sewer tariffs and water and sewer service availability policies, bulk service to Property such that Association may provide central

water distribution and sewage collection service to the Property and thereafter operate applicable facilities so that the occupants of the improvements on the Property will receive adequate water supply and sewer collection services; and

WHEREAS, Contract Operator is willing to provide contract operation, maintenance, meter reading, billing, collection and all other services necessary to ensure the continued provision of water and wastewater services to the individual homeowners within the property;

NOW, THEREFORE, in consideration of the premises, the mutual undertakings and agreements herein contained and assumed, Developer, Association, Contract Operator, and Service Company hereby covenant and agree as follows:

1. The foregoing statements are true and correct.
2. The following definitions and references are given for the purpose of interpreting

the terms as used in this Agreement and apply unless the context indicates a different meaning:

(a). "Point of Delivery." The point where the pipes or meter of Service Company are connected with the pipes constructed by Developer. Service Company shall, according to the terms and conditions hereof, own all pipes and appurtenances to the point of delivery unless otherwise agreed. The pipes and appurtenances inside the point of delivery shall belong to the Association, and all such facilities inside the point of delivery shall be operated and maintained by Contract Operator as an agent of the Association.

(b). "Property." The area or parcel of land described in Exhibit "A" by legal description and sketch.

(c). "Service." The readiness and ability on the part of the Service Company to furnish and maintain bulk water and bulk sewer service to the point of delivery (pursuant to applicable rules and regulations of applicable regulatory agencies).

3. Bulk Service. Service Company agrees to furnish water and sewer services to the Property at the point of delivery which is located as follows:

a) Water point of delivery - At a location to be mutually agreed by the parties which location shall be at or near the Duval County line but located in St. Johns County.

b) Sewer point of delivery - At a location to be mutually agreed by the parties which location shall be at or near the Duval County line but located in St. Johns County (collectively referred to herein as "Points of Delivery").

Developer, has, at its sole cost and expense, extended such lines and constructed such facilities as necessary to connect the water distribution and sewer collection systems to the existing water and sewer system of Service Company at the Points of Delivery. Immediately upon execution of this Agreement, the Company shall purchase the bulk meter and Developer shall install the bulk meter at said Points of Delivery, the size and make of which is to be determined by Service Company in its sole discretion, based on industry standards.

4. Construction of On-Site System. In order to induce Service Company to provide to the Property as contemplated herein, bulk water and bulk sewer service, Developer has agreed to pay for the construction of any on-site water distribution and sewage collection systems (also referred to as "On-Site System" or "facilities") on its Property, and all facilities necessary to extend its internal on-site water distribution and sewage collection systems to the existing facilities of Service Company.

Developer constructed the water distribution and sewage collection system on the Property for the purpose of serving lots therein. The construction was in accordance with drawings, plans and specifications prepared at Developer's sole cost and expense and has been approved by Service Company. Developer was and is solely responsible for obtaining the necessary permits to construct the water distribution and sewage collection system.

5. Conveyance of Duval County Portion of the On-Site System. By this Agreement, Developer transfers all facilities located within the Property to the Association. The Association shall remain owner and operator of the on-site internal distribution and collection facilities within the Property past the Points of Delivery unless Service Company, its successors, or assigns, demands transfer of all such on-site facilities under paragraph 6 herein. The Association shall transfer to Contract Operator and Service Company any and all easements, rights-of-way, or other property rights free and clear of any encumbrances, which may be necessary to operate the on-site systems, and Service Company shall be entitled to conveyance of such further property rights necessary to operate these on-site systems at the time of any future conveyance of those facilities to Service Company upon demand for conveyance under this Agreement.

6. Association to be Owner and Operator of On-Site Systems. Because the Service Company is providing the Association with bulk water and wastewater service under the terms of this Agreement, the Association shall remain owner and operator of record of the internal distribution and collection facilities on Association's side of the Points of Delivery. However, Association, Contract Operator, and Service Company agree that Service Company, its successors, or assigns may at any time demand transfer of all such on-site facilities described herein and located within the Property. Upon such demand, Association will be obligated to provide

Service Company, its successors, or assigns, with appropriate Bills of Sale within sixty (60) days of the date of such written demand for conveyance. Prior to the date of this Agreement the Developer has delivered to Service Company all original invoices evidencing the cost of the on-site system, release of liens for all such invoices, as-built plans and shop drawings. At the time of such conveyance, the Association and Contract Operator shall release their interests in all O & M Manuals to Service Company. Association, and/or Contract Operators, their successors, or assigns shall further convey to Service Company any and all easements, rights-of-way, or other property rights free and clear of any encumbrances, which may be reasonably necessary to own and operate the on-site system, upon demand for conveyance under this sub-section.

Association shall record a notice of the requirements of this sub-section in the public records of St. Johns County, Florida. Such notice shall include language to inform any and all future owners that the requirements of this subsection are to run with any transfer of the underlying facilities and shall be prepared by Service Company.

Upon demand for transfer, Association shall convey to Service Company all on-site water and sewer lines, services, laterals, meters, mains, lift stations, and appurtenant facilities from the current point of delivery as defined hereunder to the point of delivery at each individual lot (collectively referred to as "components" or "on-site system") on the property with any contractual guarantees relating thereto, which are in the possession of the Association.

7. Inspection and Approval of On-Site Facilities. The On-Site System has been constructed in compliance with all regulatory requirements and the specifications and requirements of Service Company. Service Company has inspected the On-Site System constructed by Developer prior to date of this Agreement. Service Company has specified and Developer has

corrected those facilities in order to meet industry standards or to make those facilities compatible with those of Service Company, as a precondition of allowing the connection of On-Site System to Service Company. Service Company has reviewed all plans and specifications for construction of facilities necessary for interconnection of On-Site System to those of Service Company prior to their construction and has approved such design specifications as well as inspected those facilities during construction. Service Company has approved On-Site System, including design, construction, sizing and materials utilized in piping, meters, valves, etc., prior to the execution of this Agreement and in connection with allowing connection of those facilities constructed by Developer to the facilities of the Service Company.

8. Agreement to Serve. Upon the completion of construction of the On-Site System by Developer, or an appropriate phase thereof, in compliance with the terms and conditions of this Agreement, Service Company will allow connection or oversee the connection of water distribution and sewer collection facilities installed by Developer to the Points of Delivery in accordance with the terms and intent of this Agreement. Such connection shall at all times be in accordance with rules, regulations, and orders of the applicable governmental authorities. Service Company agrees that once it provides bulk water and bulk sewer service to the point of delivery and Developer or others have connected water and sewer installations to its system, thereafter Service Company will continuously provide, at its cost and expense, but in accordance with the other provisions of this Agreement, including rules and regulations and rate schedules, bulk water and bulk sewer service to the Association in a manner to conform with all the requirements of the applicable governmental authority having jurisdiction over the operations of Service Company.

9. Application for Service. Service Company will be providing bulk service, and as such, the internal facilities of On-Site System will be owned by Association, its successors or assigns. Contract Operator agrees to operate and maintain the internal facilities of the On-Site System on behalf of the Association. In order to ensure the continued integrity of the Service Company's system and to allow Service Company to properly operate and maintain the water and sewer systems, Association, its successors, or assigns (including Contract Operator) shall not approve service for any owner of any parcel of property or any occupant of any residence, building, or unit located on Association's side of the bulk meter nor approve connection to any customer installation to the facilities of Association, until Service Company receives and approves the standard application described below.

A standard application for service must be provided to and approved by Service Company, by any customer wishing to connect to the system owned by Association as a precondition of service to any such customer. The Contract Operator shall provide the billing and collection services of the individual customers on behalf of the Association and shall apply Service Company's standard rates and charges to the individuals receiving service from Service Company and through Association's system. Contract Operator and Service Company shall, in all respects, treat all customers on Association's system in the same manner as customers receiving service directly through Service Company owned facilities. All such customers receiving service through Association's system shall also be subject to all the rules and regulations to which all other customers are subject.

Association recognizes that service may be discontinued to either Association or individual customers receiving service through Association's system if applicable rates, fees and

charges as assessed by Service Company are not paid by the customer in a timely manner after written assessment of such rates, fees or charges by Service Company or Contract Operator. Contract Operator agrees to undertake in any such turn off or reconnection of such individual customers in accordance with Service Company's standard policies and applicable rules directed by Service Company. Service Company recognizes and agrees that Service Company will be responsible for payment for and installation of the bulk meters to be located at the Points of Delivery as described herein in accordance with specifications and requirements as determined by the Service Company.

10. Bulk Service Rate. It is acknowledged that upon execution of this Agreement the Service Company will file a request to amend its tariff to provide a rate for bulk service. It is further agreed that such bulk service rate shall be based upon multiples of the standard base facility charges and gallonage charges currently reflected in the Utility's general service tariff, the derivation of which is outlined as follows:

(a) Base Charge - The base charge imposed each month for both water and sewer service shall be the applicable base facility charge for one equivalent residential connection times the number of equivalent residential connections that exist during that month, or any portion of that month, behind the bulk service meter. The calculation of the number of ERCs in the appropriate base charge shall be in accordance with standard Utility practice and regulatory approval as interpreted by Service Company.

(b) Gallonage Charge - The gallonage charge imposed shall be based upon application of the residential service charge per thousand gallons as contained in the Utility's residential service tariff multiplied by the number of gallons of water which have passed through the bulk service meter during any given month for both water and sewer service. If the gallons recorded at the bulk meter in any given billing cycle exceed the sum of the residential sewer gallonage caps for the individuals receiving service behind the bulk meter, then the sum of those caps shall be applied to the bulk service charge, such that no gallonage charges for sewer are imposed above the sum of those caps.

Service Company shall be responsible for filing an Application with St. John's County for approval of this bulk rate and for processing that Application through to approval, all at its cost and expense. All parties agree to support that Application in its entirety including the proposed rate and all aspects of this bulk service arrangement. Service Company shall be responsible for obtaining and shall obtain all necessary regulatory approvals for such rate. Upon receipt of such approvals, Service Company shall operate the Utility System in accordance with all such governmental approvals.

11. Agreement to Operate and Maintain On-Site System. In order to insure that the individuals receiving service through the Association-owned lines located within the Property receive the same service as those served through lines owned by Service Company, Contract Operator shall be responsible for operation and maintenance of Association's On-Site Systems and for reading individual meters on those lots located within the Property for billing and collection related to the individual customers and providing that information to Service Company. Contract Operator shall be responsible for billing said customers for monthly or periodic service based on the Service Company's standard tariff rates, and for collection from such customers. Contract Operator shall pay Service Company for bulk service received from Service Company from the funds collected by Contract Operator for included service. Should those monies billed to said individual customers located within the Property over any calendar year period fail to be sufficient to compensate Service Company for charges for bulk water and bulk sewer service delivered to Association during that same calendar year period, then Service Company shall bill Association, on an annual basis, for said deficit and Association shall pay the same within thirty days. Should those monies billed to said individual customers over any

calendar year period be in excess of the amount that Service Company has accrued for the provision of bulk water and bulk sewer service to Association for that same calendar year period, then Contract Operator shall retain said excess as further compensation for its agreement to operate and maintain Developer's and/or Association's system as outlined herein. To the extent any such excess charges to Association for bulk service (over individual charges) result from either line flushing, line breaks, line leaks or another reason which is not within the control of the Association, the Service Company will provide appropriate credits so that the Association is never charged for water metered and/or lost as a result of these factors beyond its control.

Association, Contract Operator, and Service Company recognize that jurisdiction over the rates and charges of Service Company is currently held by St. Johns County and may at some time be transferred to some other regulatory agency. In recognition of this fact, Service Company and Association agree that the rates and charges of the Service Company may, from time to time, be changed by such regulatory agency, and that the charges then in effect, at the time of connection of each lot, in accordance with the provisions of the regulatory agency's authority, rules, statutes and orders, and the Service Company's approved tariff and service availability policy, will be applied to Association and the customers within the Property as required or allowed by law.

12. Operation, Maintenance, and Correction of Problems Within Association's On-Site System. Service Company shall have the right at all times to inspect the Association's On-Site System to insure that proper construction, operation, and maintenance of such Association's system is being conducted by the Contract Operator. Contract Operator shall operate and maintain Association's on-site system to the extent Service Company, in its sole discretion,

deems necessary and advisable. Service Company requires this type of oversight of Contract Operator's operation and maintenance of the system, because of the potential impact of operation and maintenance or lack thereof may have on Service Company and its other customers. Contract Operator shall prepare and maintain all necessary O & M Manuals. Association, its successors, or assigns, shall provide to Contract Operator such rights of ingress, egress, or such easements as are necessary so that Contract Operator will have access to the Association's on-site system for such operation and maintenance.

As further consideration for Contract Operator's agreement to operate and maintain the onsite system and read meters and remit this information to Service Company, all on behalf of the Association, the Association shall pay to Contract Operator the sum of \$1 per year for such services. All parties hereto acknowledge and agree that Contract Operator has received \$25 upon execution of this Agreement as compensation for the first 25 years of such operation and maintenance.

13. Exempt Status of Association and Contract Operator. It is the intention of this arrangement to insure that Association's ownership of, and Contract Operator's agreement to operate the facilities on the Property and located in Duval County does not constitute operation of a Utility under the jurisdiction of Section 367, Florida Statutes, but instead falls within several of the exemptions outlined under Section 367.022, Florida Statutes. It is the parties' intention that ownership of the system by Association or its successors shall be exempt from regulation under Section 367, Florida Statutes based upon its compliance with the provisions of subsections 367.022(6) and (8), and Section 367.022(7), Florida Statutes (1997). All parties will cooperate to insure that the Association or its successor continues to operate at a minimum under one of these

exemptions. To the extent modifications to the arrangement are necessary in order to maintain one of the exemptions, the parties agree to make such changes to the extent practicable. To the extent the only exemption applicable is under subsection 367.022(8), Florida Statutes, the Service Company agrees under the terms of this as a part of its responsibilities hereunder to file the annual information with the County to demonstrate such continuing qualification for exemption.

14. Costs and Attorney's Fees. In the event the Service Company, Developer, or Association is required to enforce this Agreement by court proceedings or otherwise, by instituting suit or otherwise, then the prevailing party shall be entitled to recover from the other party all costs incurred, including reasonable attorney's fees, before at trial, on appeal, in bankruptcy, or in post judgment collection.

15. Force Majeure. In the event that performance of this Agreement by any party to this Agreement is prevented or interrupted in consequence of any cause beyond the control of any party, including but not limited to acts of God or of the public enemy, war, national emergency, allocation or of other governmental restrictions upon the use or availability of materials, rationing, civil insurrection, riot, racial or civil rights disorder or demonstration, strike, embargo, flood, tidal wave, fire, explosion, bomb detonation, nuclear fallout, windstorm, hurricane, earthquake or other casualty, disaster or catastrophe, unforeseeable failure or breakdown of pumping transmission or other facilities, governmental rules or acts or orders or restrictions or regulations or requirements, acts or action of any government or public or governmental authority or commission or board or agency or agent or official or officer, the enactment of any statute or ordinance or resolution or regulation or rule or ruling or order, order or decree of

judgment or restraining order or injunction of any court, said party shall not be liable for such non-performance.

16. Venue and Jury Trial. In the event that the Service Company, Developer or Association is required to enforce this Agreement by court proceedings or instituting suit with regard to matters other than those regulated by St. Johns County, the parties agree that the appropriate venue for such suit shall be the courts of St. Johns County, Florida. In the event of such court proceedings or suit, both parties also agree to waive their right to a jury trial in settlement of any such disputes.

17. No Option. The submission of this Developer Agreement for examination by Developer and Association does not constitute an offer but becomes effective only upon execution thereof by Service Company.

MISCELLANEOUS PROVISIONS

18. This Agreement supersedes all previous Agreements or representations, either verbal or written, heretofore in effect between Developer, Association, and Service Company and Contract Operator, made with respect to the matters herein contained, and when duly executed, constitutes the Developer Agreement with Service Company. No additions, alterations or variations of the terms of this Agreement shall be valid, nor can provisions of this Agreement be waived by the party, unless such additions, alterations, variations or waivers are expressed in writing and duly signed.

IN WITNESS WHEREOF, the Developer, Association and Service Company have executed or have caused this Agreement to be duly executed in counterparts, each of which counterpart shall be considered as an original executed copy of this Agreement.
