These numbers are used to indicate the most current page version on file with the Commission. For example, 4th Revised Sheet 13 cancels 3rd Revised Sheet 13. Consult the Check Sheet for the sheets currently in effect.

All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on Commission file.

SECTION 3 - DESCRIPTION OF SERVICE

3.1 Computation of Charges

- 3.1.1 The total charge for each completed call may be a variable measured charge dependent on the duration, distance and time of day of the call. The total charge for each completed call may also be dependent only on the duration of the call, i.e. a statewide flat rate per minute charge. The variable measured charge is specified as a rate per minute which is applied to each minute. All calls are measured in increments as set forth in the Rates Section of this tariff. All calls are rounded up to the next whole increment.
- 3.1.2 Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call. The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers that are produced by Bell Communications Research in the NPA-NXX V&H Coordinates Tape and Bell's NECA Tariff No. 4.

Formula:

(V1-V2)² + (H1-H2)²

- 3.1.3 Timing begins when the called party answers and two way communication is possible, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. Timing for each call ends when either party hangs up.
- 3.1.4 Total Call will not bill for uncompleted calls.

3.2 <u>Customer Complaints and/or Billing Disputes</u>

Customer inquiries or complaints regarding service or accounting may be made in writing or by telephone to the Company at:

345 S. Figueroa Street, Suite M01 Los Angeles, CA 90071 (800) 211-8096

3.2 Continued

Any objection to billed charges should be reported promptly to Total Call or its billing agent. Adjustments to Customers' bills shall be made to the extent that records are available and/or circumstances exist which reasonably indicate that such charges are not in accordance with approved rates or that an adjustment may otherwise be appropriate. A Customer who is unable to resolve a billing dispute with the Company may contact the Commission by telephone at 1-800-342-3552 to intervene in the billing dispute.

3.3 Level of Service

A Customer can expect end to end network availability of not less than 99% at all times for all services.

3.4 Billing Entity Conditions

When billing functions on behalf of Total Call or its intermediary are performed by local exchange telephone companies or others, the payment of charge conditions and regulations of such companies and any regulations imposed upon these companies by regulatory bodies having jurisdiction apply. This service permits use of Prepaid Calling Cards for placing long distance calls. Customers may purchase Total Call Prepaid Calling Cards at a variety of retail outlets or through other distribution channels. Total Call Prepaid Calling Cards are available at a variety of face values. Call Prepaid Calling Card service is accessed using the Total Call toll-free number printed The caller is prompted by an on the card. automated voice response system to enter his/her Authorization Code, and then to enter the terminating telephone number. Total Call's processor tracks the call duration on a real time basis to determine the number of Telecom Units consumed. The total consumed Telecom Units for each call is deducted from the remaining Telecom Unit balance on the Customer's Total Call Prepaid Calling Card.

All calls must be charged against Prepaid Calling Card that has a sufficient Telecom Unit balance. A Customer's call will be interrupted with an announcement when the balance is about to be depleted.

In order to continue the call, the Customer can either call the toll-free number on the back of the Total Call Prepaid Calling Card and "recharge" the balance on the card using a nationally recognized credit card, or the Customer can throw the card away and purchase a new one. Calls in progress will be terminated by the Company if the balance on the Total Call Prepaid Calling Card is insufficient to continue the call and the Customer fails to enter the number of another valid Total Call Prepaid Calling Card prior to termination.
