**TARIFF FORMAT**

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the FPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the FPSC follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff pages in effect. Consult the check sheet for sheet currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

  - 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.A.
  - 2.1.1.A.1.
  - 2.1.1.A.1.(a).
  - 2.1.1.A.1.(a).I.
- D. Check Sheets** - When a tariff filing is made with the FPSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the FPSC.

**SECTION 3 - DESCRIPTION OF SERVICE, (Cont'd)**

**3.2 Calculation of Distance**

Usage charges for all mileage sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call.

The serving wire centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between the Wire Center of the Customer's equipment and that of the destination point is calculated by using the "V" and "H" coordinates found in BellCore's V&H Tape and NECA FCC Tariff No. 4.

- Step 1 - Obtain the "V" and "H" coordinates for the Wire Centers serving the Customer and the destination point.
- Step 2 - Obtain the difference between the "V" coordinates of each of the Wire Centers. Obtain the Difference between the "H" coordinates.
- Step 3 - Square the differences obtained in Step 2.
- Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Wire Centers.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

**SECTION 3 - DESCRIPTION OF SERVICE, (Cont'd)**

**3.5 Service Offerings, cont'd.**

**3.5.16 Debit Card Services**

Retail Debit Service allows Customers to place direct dialed calls between locations within the State of Florida. Customers access the Company's network by dialing an 800/888 number or other access dialing sequence and entering a Personal Account Code. The Company's system informs the Customer of the Available Usage Balance remaining in his/her Debit Account and prompts the Customer to place a call by entering a destination telephone number. Network usage for calls placed is deducted from the Available Usage Balance in the Customer's account on a real time basis as the call progresses.

**3.5 Service Offerings, (Cont'd)**

**3.5.17 Bell Program**

The Bell Program is a 1+ outbound and toll-free inbound calling service provided over switched access facilities. To be eligible for this program, a UniDial long distance customer must be a local customer of one of the following local exchange carriers:

- A. Regional Bell Operating Companies (RBOCs)
- B. Alternative Local Exchange Carriers (ALECs) who provide service via resale of RBOC services.

For purposes of this Program, the Company considers the following local exchange carriers to be RBOCs: Bell Atlantic, NYNEX, BellSouth, Ameritech, US West, Southwestern Bell (SBC), and Pacific Bell.

The Bell Program has two rate plans available:

Rate Plan A is available to UniDial long distance customers who are local customers of RBOCs or local customers of ALECs who provide service via resale of RBOC services.

Rate Plan B is available to UniDial long distance customers who are local customers of RBOCs or local customers of ALECs who provide service via resale of RBOC services, and who commit to total monthly usage of \$250. If, in a given month, the customer's total monthly usage falls below \$250 (calculated at the lower rate), UniDial reserves the right to bill the customer the rates applicable to Rate Plan A.
