May 31, 2000

Mrs. Blanca S. Bayo Director, Division of Records and Reporting Florida Public Service Commission 2540 Shumard Oak Boulevard Tallahassee. Florida 32399

Re: Approval of an Amendment to the Interconnection Agreement Negotiated by BellSouth Telecommunications, Inc. ("BellSouth") and UniversalCom, Inc. pursuant to Sections 251, 252 and 271 of the Telecommunications Act of 1996

Dear Mrs. Bayo:

Pursuant to section 252(e) of the Telecommunications Act of 1996, BellSouth and UniversalCom, Inc. are submitting to the Florida Public Service Commission an amendment to their negotiated agreement for the interconnection of their networks, the unbundling of specific network elements offered by BellSouth and the resale of BellSouth's telecommunications services to UniversalCom, Inc. The Commission approved the initial agreement between the companies in Order No. 99-1444-FOF-TP issued July 26, 1999 in Docket 990741-TP.

Pursuant to section 252(e) of the Act, the Commission is charged with approving or rejecting the negotiated agreement between BellSouth and UniversalCom, Inc. within 90 days of its submission. The Act provides that the Commission may only reject such an agreement if it finds that the agreement or any portion of the agreement discriminates against a telecommunications carrier not a party to the agreement or the implementation of the agreement or any portion of the agreement is not consistent with the public interest, convenience and necessity. Both parties aver that neither of these reasons exist as to the agreement they have negotiated and therefore, are very hopeful that the Commission shall approve their agreement.

Very truly yours,

Regulatory Vice President

# AMENDMENT TO THE AGREEMENT BETWEEN UNIVERSALCOM, INC. BELLSOUTH TELECOMMUNICATIONS, INC. DATED May 25, 1999

Pursuant to this Agreement, (the "Amendment"), UniversalCom, Inc. ("UniversalCom"), and BellSouth Telecommunications, Inc. ("BellSouth"), hereinafter referred to collectively as the "Parties," hereby agree to amend that certain Interconnection Agreement between the Parties dated May 25, 1999 ("Agreement").

WHEREAS, BellSouth and UniversalCom entered into an Interconnection Agreement on May 25, 1999, and;

NOW THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby covenant and agree as follows:

#### 1. Enhanced Extended Link

Where facilities permit and where necessary to comply with an effective FCC and/or State Commission order, BellSouth shall offer access to the Enhanced Extended Link ("EEL") as defined in Section 1.3 below.

#### 1.2 Definitions

- 1.2.1 For purposes of this Amendment, references to "Currently Combined" network elements shall mean that such network elements are in fact already combined by BellSouth in the BellSouth network to provide service to a particular end user at a particular location.
- 1.2.2 BellSouth will provide access to the Enhanced Extended Link ("EEL") in the combinations set forth in 1.3 following. This offering is intended to provide connectivity from an end user's location through that end user's SWC and then connected to the UniversalCom's POP serving wire center. The circuit must be connected to the UniversalCom's circuit switch for the purpose of provisioning circuit switched telephone exchange service to the UniversalCom's end-user customers. This can be done either in the collocation space at the POP SWC, or by using BellSouth's access facilities between the UniversalCom's POP and UniversalCom's collocation space at the POP SWC.
- 1.2.3 BellSouth shall provide combinations of loops and transport to UniversalCom in Georgia regardless of whether or not such combinations of loops and transport are

Currently Combined. Other combinations of network elements that are not Currently Combined but that BellSouth ordinarily combines in its network shall be made available to UniversalCom in Georgia in accordance with Section 1.5.1.3 below. In all other states, BellSouth shall make available to UniversalCom those EEL combinations and transport described in Section 1.3 below only to the extent such combinations of loop and transport network elements are Currently Combined. BellSouth will make available combinations of loops and transport network elements in Density Zone 1, as defined in 47 C.F.R 69.123 as of January 1, 1999, of the Miami, Orlando, Fort Lauderdale, Charlotte, New Orleans, Greensboro and Nashville MSAs to UniversalCom. Except as stated above, other combinations of network elements will be provided to UniversalCom only to the extent such network elements are Currently Combined.

1.2.4 Additionally, there may be instances wherein UniversalCom will require multiplexing functionality. BellSouth will provide access to multiplexing within the central office pursuant to the terms, conditions and rates set forth in its Access Services Tariffs when the customer utilizes special access interoffice facilities. Multiplexing will be provided pursuant to the Agreement when unbundled network elements are used for interoffice transport.

#### 1.3 <u>EEL Combinations</u>

- 2-wire voice grade extended loop with DS1 Dedicated Interoffice Transport;
- 4-wire voice grade extended loop with DS1 Dedicated Interoffice Transport;
- 4-wire 56 or 64 kbps extended digital loop with Dedicated DS1 Interoffice Transport;
- Extended 2-wire VG Dedicated Local Channel with Dedicated DS1 Interoffice Transport;
- Extended 4-wire VG Dedicated Local Channel with Dedicated DS1 Interoffice Transport;
- Extended 4-wire DS1 Digital Loop with Dedicated DS1 Interoffice Transport
- Extended 4-wire DS1 Digital Loop with Dedicated DS3 Interoffice Transport; and
- Extended DS1 Dedicated Local Channel with Dedicated DS3 Interoffice Transport.

## 1.4 Special Access Service Conversions

UniversalCom may not convert special access services to combinations of loop and transport network elements, whether or not UniversalCom self-provides its entrance facilities (or obtains entrance facilities from a third party), unless UniversalCom uses the combination to provide a significant amount of local exchange service, in addition to exchange access service, to a particular customer. To the extent UniversalCom converts its special access services to combinations of loop and transport network elements at UNE prices, UniversalCom, hereby, certifies that it is

providing a significant amount of local exchange service over such combinations. BellSouth may at its sole discretion audit UniversalCom records in order to verify the type of traffic being transmitted over combinations of loop and transport network elements. If, based on its audits, BellSouth concludes that UniversalCom is not providing a significant amount of local exchange traffic over the combinations of loop and transport network elements, BellSouth may file a complaint with the appropriate Commission, pursuant to the dispute resolution process as set forth in the Interconnection Agreement. In the event that BellSouth prevails, BellSouth may convert such combinations of loop and transport network elements to special access services and may seek appropriate retroactive reimbursement from UniversalCom.

- 1.4.1 EEL combinations for DS1 level and above will be available only when UniversalCom provides and handles at least one third of the end user's local traffic over the facility provided. In addition, on the DS1 loop portion of the combination, at least fifty (50) percent of the activated channels must have at least five (5) percent local voice traffic individually and, for the entire DS1 facility, at least ten (10) percent of the traffic must be local voice traffic.
- 1.4.2 When combinations of loop and transport network elements include multiplexing, each of the individual DS1 circuits must meet the above criteria.
- 1.5 Rates
- 1.5.1 Georgia
- 1.5.1.1 The non-recurring and recurring rates for the EEL Combinations of network elements set forth in 1.3, whether Currently Combined or new, are as set forth in Attachment 1 of this Amendment.
- 1.5.1.2 On an interim basis, for combinations of loop and transport network facilities not set forth in Section 1.3, where the elements are not Currently Combined but are ordinarily combined in BellSouth's network, the non-recurring and recurring charges for such UNE combinations shall be the sum of the stand-alone non-recurring and recurring charges of the network elements which make up the combination. These interim rates shall be subject to true-up based on the Commission's review of BellSouth's cost studies.
- 1.5.1.3 To the extent that UniversalCom seeks to obtain other combinations of loop and transport network elements that BellSouth ordinarily combines in its network which have not been specifically priced by the Commission when purchased in combined form, UniversalCom, at its option, can request that such rates be determined pursuant to the Bona Fide Request/New Business Request (NBR) process set forth in the Interconnection Agreement.

### 1.5.2 All Other States

- 1.5.2.1 Subject to Section 1.2.3 preceding, for all other states, the non-recurring and recurring rates for the Currently Combined EEL combinations set forth in Section 1.3 and other Currently Combined loop and transport network elements will be the sum of the non-recurring and recurring rates for the individual network elements unless otherwise negotiated by the parties.
- 2. All of the other provisions of the Agreement, dated May 25, 1999, shall remain in full force and effect.
- 3. Either or both of the Parties is authorized to submit this Amendment to the respective state regulatory authorities for approval subject to Section 252(e) of the Federal Telecommunications Act of 1996.

IN WITNESS WHEREOF, the Parties hereto have caused this Amendment to be executed by their respective duly authorized representatives on the date indicated below.
