Director,

I have lived at the above address for 5 years. I have paid for the maintenance and repair of my own water & sewer systems. I have just replaced the water pump. My systems are in great shape and I have no interest at all in connecting to any water or sewer system at my cost or any other provided method. I most strongly believe all homes in the area with water & sewer systems in good condition should be "grand-fathered" and not required to hook up to systems which are not needed or desired. If forced to connect to these systems, it may cost so much that my family and I could be forced to sell our home and move.
