RE: 001551-WS; Highlands Ridge Associates, Inc.
Audit Report; Certificate Transfer - as of December 31, 2000

Audit Control No. 00-299-3-2

Attached is the final audit report for the utility stated above. I am sending the utility a copy of this memo and the audit report. If the utility desires to file a response to the audit report, they should send it to the Division of Records and Reporting. There are no confidential work papers associated with this audit.

DIVISION OF REGULATORY OVERSIGHT AUDITOR'S REPORT

JANUARY 26, 2001

TO: FLORIDA PUBLIC SERVICE COMMISSION AND OTHER INTERESTED PARTIES

We have applied the procedures described later in this report to prepare and audit schedules of Water and Wastewater Rate Base as of December 31, 2000 for Highlands Ridge Associates, Inc.'s petition for transfer of Certificate Nos. 544-W and 474-S. These schedules were prepared by the auditor as part of the utility's petition for Certificate Transfer in Docket No. 001551-WS. There is no confidential information associated with this audit.

This is an internal accounting report prepared after performing a limited scope audit. Accordingly, this document must not be relied upon for any purpose except to assist the Commission staff in the performance of their duties. Substantial additional work would have to be performed to satisfy generally accepted auditing standards and produce audited financial statements for public use.

SUMMARY OF SIGNIFICANT FINDINGS:

The utility is not in compliance with Rule 25-30.115, F.A.C., requiring all water and wastewater utilities to maintain their accounts and records in conformity with the NARUC Uniform System of Accounts (USOA).

The company used a "preliminary draft" of staff recommended adjustments instead of the approved Commission adjustments in adjusting its books in response to a prior audit.

SUMMARY OF SIGNIFICANT PROCEDURES

Our audit was performed by examining, on a test basis, certain transactions and account balances which we believe are sufficient to base our opinion. Our examination did not entail a complete review of all financial transactions of the company. Our more important audit procedures are summarized below. The following definitions apply when used in this report:

Compiled - The exhibit amounts were reconciled with the general ledger, and accounts were scanned for error or inconsistency.

Verify - The item was tested for accuracy, and substantiating documentation was examined.

RATE BASE: Prepared a schedule and compiled account balances for Utility-Plant-in-Service (UPIS), Contributions-in-Aid-of-Construction (CIAC), accumulated depreciation, and accumulated amortization of CIAC for the utility. Reconciled rate base balances to previous PSC audit balances. Reviewed for CIAC additions. Examined invoices and supporting documentation for all major plant additions. Calculated accumulated depreciation. Computed amortization of CIAC using PSC authorized rates.

OTHER: Toured the Utility's service area and water and wastewater plants. Determined whether an acquisition adjustment might be justified and whether any assets of the utility are not being transferred.

EXCEPTIONS

Exception No. 1

Subject: Noncompliance with NARUC

Statement of Fact: Rule 25-30.115, F.A.C., requires all water and wastewater utilities to maintain their accounts and records in conformity with the NARUC Uniform System of Accounts (USoA).

The NARUC Uniform System of Accounts, Accounting Instruction 2, states that:

The books of accounts of all water utilities shall be kept monthly on an accrual basis and shall be closed at the end of each calendar year.

Each utility shall keep its books of accounts, and all other books, records and memoranda which support the entries in such books of accounts so as to be able to furnish readily full information as to any item included in any account. Each entry shall be supported by such detailed information as will permit a ready identification, analysis, and verification of all facts relevant thereto.

The company's books and records are not in conformity with NARUC's account numbering system and the Commission rules in the following areas.

- 1. The company's account names and numbers are not consistent NARUC.
- 2. The utility keeps only one set books for all of its operations (utility, builder, developer, restaurant, golf club and membership fees). Utility accounting information is co-mingled with the other operations of the company.
- 3. Utility books of accounts are not kept monthly on an accrual basis. Utility records are not compiled until the Annual Reports are prepared.
- 4. CIAC was not properly recorded and has not been collected from new customers.

Recommendation: The Commission should require the company to maintain its books and records in conformity with the NARUC Uniform System of Accounts as prescribed by Rule 25-30.115, F.A.C.

DISCLOSURES:

Disclosure No. 1

Subject: FPSC Order Adjustments

Statement of Fact: Order No. PSC-98-1623-FOF-WS, issued December 7, 1998, established Rate Base for Highlands Ridge Associates, Inc. as of December 31, 1997.

The company obtained a "preliminary draft" of staff recommended adjustments for the above order and used these amounts to adjust its December 31, 1997 balance sheet and 1998 Annual Report. These adjustment amounts differed from what was stated in the actual order.

In addition, the audit findings from the prior Overearnings Investigation audit were based on a preliminary trial balance. The company made adjustments to this trial balance before closing its books. Some of these adjustments were the same as those made to adjust to the preliminary staff report. These adjustments were therefore made twice by the company.

We also made one final adjustment to reorganize the utility's plant sub accounts to agree with the prior Commission Order.

Recommendation: Below are the auditor's computed Rate Base amounts. Detail for the adjustments is provided on the following pages (Schedules A,B,C,). The utility should adjust its books to reflect the auditor's computed amounts for Rate Base as of December 31, 2000.

| Water System | Utility Balance | Audit Balance | Difference |
|--------------------------|------------------|------------------|--------------|

⁽A) Audit adjustments based on company not using prescribed rates per Commission Rule 25-30.140 in prior audit and adjustments to plant as previously noted.

⁽B) Additionally, since the adjustments for Plant in Service from the Order were not properly made, the depreciation for the years 1998-2000 computed by the company were not correct.

⁽A) Audit adjustment is due to company adjusting to preliminary staff recommendations and not final order.

⁽B) Company also recorded 3 new customers too many for 1998 and computed amortization incorrectly for years 1998 and 1999.

Disclosure No. 2

Subject: Sales Agreement / Acquisition Adjustment

Statement of Fact: Highlands Ridge Associates, Inc. owned the Villages of Highlands Ridge development, which included among its assets, land, buildings, golf course, clubhouses and a water and wastewater utility. Substantially all of the assets of Highlands Ridge Associates, Inc, with the exception of the utility assets, were sold to Sebring Land Limited Partnership and others on July 28, 2000. The sale of the utility is awaiting Florida Public Service Commission approval. The sales price of the utility, per the Purchase and Sales Agreement, is \$750,000. This agreement also contains a provision in the event the PSC requires the utility to refund excess charges that may have been collected from customers.

After the sales agreement was prepared, utility improvements have been made to the development in the "Phase VI, Carter Creek" expansion. These improvements consisted of water and wastewater lines and a reclaimed water line. The improvements were paid for by Sebring Land Ltd. and are not recorded on the books of Highlands Ridge Associates, Inc. The improvements cost is \$104,433.

Highlands Ridge Utilities LLC will be the new utility company once the sale is finalized and it plans to record these assets on its books. In a discussion with an employee of Sebring Land Ltd. it is not certain at this time if an adjustment will be made to the purchase price for the above improvements.

Recommendation: The audit did not reveal evidence of any extraordinary circumstances permitting an acquisition adjustment to be included in rate base. The net audited rate base, not including the above improvements, of the utility systems is \$142,371 (\$69,636 for water and \$72,735 for wastewater). When this amount is compared to the sale price of \$750,000, a difference of \$607,629 remains. Whatever the final sales price is determined to be, we do not believe an acquisition adjustment should be allowed in rate base.
