DOCKET NO. 010001-EI FLORIDA POWER & LIGHT COMPANY

NOVEMBER 5, 2001

IN RE: LEVELIZED FUEL COST RECOVERY AND CAPACITY COST RECOVERY

PROJECTIONS JANUARY 2002 THROUGH DECEMBER 2002

TESTIMONY & EXHIBITS OF:

L. E. GREEN J. R. HARTZOG K. M. DUBIN

DOCUMENT NUMBER-DATE

13973 NOV-55

FPSC-COMMISSION CLERK

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DOCKET NO. 010001-EI FLORIDA POWER & LIGHT COMPANY

NOVEMBER 5, 2001

IN RE: LEVELIZED FUEL COST RECOVERY AND CAPACITY COST RECOVERY

PROJECTIONS JANUARY 2002 THROUGH DECEMBER 2002

TESTIMONY & EXHIBITS OF:

L. E. GREEN J. R. HARTZOG K. M. DUBIN

| 1 | | BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION |
|----|----|---|
| 2 | | FLORIDA POWER & LIGHT COMPANY |
| 3 | | TESTIMONY OF L. E. GREEN |
| 4 | | DOCKET NOS. 010001-EI, 010002-EI |
| 5 | | NOVEMBER 5, 2001 |
| 6 | | |
| 7 | | |
| 8 | Q. | Please state your name and address. |
| 9 | A. | My name is Leonardo E. Green. My business address is 9250 West Flagler |
| 10 | | Street, Miami, Florida 33174. |
| 11 | | |
| 12 | Q. | By whom are you employed and what is your position? |
| 13 | A. | I am employed by Florida Power & Light Company (FPL) as a Load Forecast |
| 14 | | Manager, in the Resource Assessment and Planning Business Unit. |
| 15 | | |
| 16 | Q. | Have you previously testified in this docket? |
| 17 | A. | No, I have not. |
| 18 | | |
| 19 | Q. | Please state your education and business experience. |
| 20 | А. | I received a Doctor of Philosophy Degree in Economics from the University of |
| 21 | | Missouri-Columbia, Missouri, in 1983. I joined FPL in April of 1986 and in July |
| 22 | | of 1991, I became Manager of Load Forecasting within the Resource Assessment |
| 23 | | and Planning Business Unit. I am responsible for coordinating the entire |

| 1 | | economics and load forecasting effort for FPL. Prior to joining FPL, I worked |
|----|----|--|
| 2 | | for Seminole Electric Cooperative as the Load Forecasting Supervisor in the |
| 3 | | Rates and Corporate Planning Department. I have held several Assistant |
| 4 | | Professorships of Economics and Statistics research and teaching positions with |
| 5 | | the University of Missouri, Florida International University, NOVA University, |
| 6 | | and the University of South Florida. |
| 7 | | |
| 8 | Q. | What is the purpose of your testimony? |
| 9 | А. | The purpose of my testimony is to present and explain revisions to FPL's load |
| 10 | | forecasts due to the events of September 11, 2001. The revised load forecast was |
| 11 | | an input to POWERSYM, a model used to calculate the fuel budget for the period |
| 12 | | January 2002 through December 2002. |
| 13 | | |
| 14 | Q. | Have you prepared an exhibit in this proceeding? |
| 15 | A. | Yes. I am sponsoring Exhibit(LEG-1) which consists of four documents |
| 16 | | included in Appendix I. |
| 17 | | |
| 18 | Q. | What is the outlook for the national economy for the rest of 2001 and for |
| 19 | | 2002? |
| 20 | A. | At the beginning of October, Data Resources Inc. of Standard and Poors (DRI- |
| 21 | | WEFA) stated that prior to September 11, 2001 the national economy was already |
| 22 | | in a downward slide, but the terrorist attack will probably cause the tumble to |
| 23 | | accelerate, likely pushing the U.S. economy into a recession. In its most recent |
| | | |

U.S. Economic Review of October 2001, DRI-WEFA pronounced, "It no longer 1 seems possible for the U.S. economy to escape a recession...the question of 2 whether the U.S. economy escapes a recession appears to have been settled by the 3 4 September 11 terrorist attacks." DRI-WEFA now expects both the third and fourth quarters of 2001 to register declines in Gross Domestic Product (GDP), a 5 measure of total domestic output, and they project only a 1% real overall growth 6 for the entire year. Their forecast of a decline in third quarter GDP has recently 7 been proved correct with the announcement of a 0.4% decline for the quarter. 8 Their outlook for year 2002 has the economy growing at a real rate of 1.3 %, 9 starting out weak and then picking up strength in the latter part of the year in 10 response primarily to federal programs stimulus. Prior to September 11, 2001 the 11 forecasted real growth in GDP for 2001 was 1.6 % and 2.6 % for 2002. 12

13

14 Q. Will Florida's economy be impacted by the national economy?

Yes. The terrorist attacks of September 11, 2001 strike at the heart of the state's 15 A. economy. The combined effects of the slowing US economy and the perceived 16 risks of air travel will adversely affect Florida's economy. DRI-WEFA expects 17 international visitation to Florida from September to December of this year to be 18 50% lower than the same period last year, a result of the weakening global 19 20 economy and security fears. Domestic travel is also forecasted to be 30% less than the same period last year, as fewer Americans will be willing to travel in the 21 coming months, both because of anxiety about flying and because of concern 22 about employment security and declining income. 23

| 1 | | The revision to the forecast for Florida made by DRI-WEFA shows that the |
|----|----|--|
| 2 | | annual nominal growth rate in gross state product (GSP), the total output of the |
| 3 | | state, will be lower in 2002 by approximately \$3.8 billion, or a loss of about 0.5% |
| 4 | | of the total GSP. |
| 5 | | |
| 6 | | Florida state revenue forecasters apparently share this view of Florida's economy |
| 7 | | in 2002. They have estimated that the state's tax revenue will be \$1.3 billion less |
| 8 | | than the originally estimated \$50 billion. Announced job cuts, the number of lay- |
| 9 | | offs, the rise in the number of unemployment claims, low hotel occupancy rates, |
| 10 | | and the reduced number of flights and tourist visitors are further evidence of the |
| 11 | | contraction in the Florida's economy. |
| 12 | | |
| 13 | Q. | Will FPL's service territory experience a similar downturn in economy as the |
| 14 | | rest of the state? |
| 15 | A. | In all probability, it will be more severe than the state's downturn. It has been |
| 16 | | observed historically that the three largest counties in FPL service territory have |
| 17 | | experienced a larger impact of economic slowdowns relative to other major |
| 18 | | counties in the state. For example, in past recessions unemployment rates have |
| 19 | | been higher in Miami-Dade, Broward and Palm Beach Counties compared to |
| 20 | | Duval, Hillsborough and Pinellas Counties, as shown in Appendix I, Page 1 of 4. |
| 21 | | In addition, per capita income, another key economic indicator, has also declined |
| 22 | | significantly during recessions in the counties served by FPL relative to other |
| 23 | | Florida counties as shown in Appendix I, Page 2 of 4. Therefore, I believe that |

this recent slowdown will have a greater impact on FPL's service territory relative to non- FPL service areas.

3

4 Q. Is the projected economic slowdown the basis for the revision to the FPL 5 sales forecast?

Yes. The expected and actual effects of the attacks of September 11, 2001 are 6 A. compelling enough to warrant a revision to the near term outlook of the state's 7 economy and the corresponding impact on the demand for electricity. The 8 original sales forecast used for the fuel, capacity and conservation clause filings in 9 10 August and September of 2001 was produced under the assumption that Florida's economy was experiencing a mild slowdown in the year 2001, but then it would 11 rebound with good economic growth in the year 2002. Prior to September 11, 12 Florida had been spared the worst of the national economic slowdown. Its lesser 13 reliance on manufacturing, higher reliance on tourism and a somewhat greater 14 reliance on international markets cushioned the effects of a weakening U.S. 15 economy. Even though Florida's employment growth had slowed, it was still 16 fairly strong compared to the rest of the nation, and Florida boasted of a low 17 unemployment rate of 4.2%. 18

19

The economic outlook has changed significantly since September 11, 2001. From an auspicious position, Florida's economy has become more vulnerable because the most impacted industries are relatively more vital to the Florida economy than most other states. These heavily impacted industries are tourism, air travel,

merchandise trade, airline services, and the cruise industry. Of course, the downturn in these industries will have spillover employment and income effects on the rest of sectors that encompass the Florida economy.

4

3

5

Q. How does an economic recession affect the usage of electricity?

The growth in usage of electricity comes from the overall growth in per capita use 6 A. of electricity by all customers and the growth in the number of new customers. 7 Both per capita usage of electricity and growth of new customers are linked 8 directly to the performance of the local and national economy. When the 9 economy is booming, usage of electricity is up in all sectors: residential, 10 commercial, industrial and others. Furthermore, if the economy is strong there 11 will be new jobs that attract new customers, new households develop, and retirees 12 coming from other states increase in numbers. The reverse also holds, if the 13 economy is performing poorly, customers are more apprehensive as to how their 14 reduced income is spent, restricting their level of consumption of goods and 15 services. Electricity demand and sales begin to slacken when income falls. Job 16 17 contractions reduce the number of new customers coming to the state seeking employment opportunities. New household formations are postponed. 18

19

Appendix I, Page 3 of 4 shows the effect of the last three national recessions on Florida's Per Capita Income, the customer growth in FPL's service territory, and the changes in electricity use per customer. The recession years are highlighted and they correspond to the years of 1974-1975, 1982, and 1990-1992. In all three

recessions, Florida's Real Per Capita Income growth and growth in electricity use 1 per customer in FPL's service area are negative. This data supports my earlier 2 observation that as customers' personal incomes decline, the use of electricity per 3 customer also declines. This does not imply that growth in total use of electricity 4 will decline, since there is still growth in customers, even in recession years. In 5 Appendix I, Page 3 of 4, it can also be seen that with each recession year, the 6 absolute growth in the number of customers drops significantly from the year 7 prior to the recession to the year following the recession. The smaller growth in 8 the number of customers results in a lower growth in sales of electricity than 9 would be expected if there was no contraction in the economy. 10

11

12 **O.** What is the impact of a recession on FPL's outlook on electricity sales?

Appendix I, Page 4 of 4 shows FPL's revisions in the level of projected sales and 13 Α. customers for 2001 and 2002. FPL produced a new outlook for energy sales by 14 changing the economic assumptions utilized in its forecasting models. FPL made 15 use of the more recent economic outlook for the State of Florida produced by 16 DRI-WEFA that incorporated the revision resulting from the events of September 17 11. The new projected use of electricity per customer was slightly higher than the 18 2001 estimated value, but it was 2.5 % lower that the forecast produced with 19 economic assumptions prior to September 11. So even DRI-WEFA's economic 20 forecast resulting in slightly higher per customer usage appears conservative 21 given the actual declines in usage experienced in prior recessions. 22

23

Customer growth outlook has changed from 85,643 to 65,000 new customers in 1 2002. The recession outlook has resulted in a reduction in forecasted growth of 2 approximately 20,000 less new customers in 2002. In order to forecast customer 3 growth, FPL models depend on population projections obtained from the Bureau 4 5 of Economic and Business Research of the University of Florida (BEBR). However, BEBR has not updated the population projections as a result of the 6 terrorist attacks of September 11. Therefore, FPL's projection of customer 7 growth is based upon growth in customers during prior recessions. 8

9

The decline in the growth of the number of customers from the year prior to a 10 recession to the year following a recession can be seen on Appendix I, Page 3 of 11 4. In the three recessions since 1972, FPL has seen a significant decline in the 12 growth of customers from the year prior to the recession to the year following the 13 14 recession. In the 1974/75 recession, FPL experienced a decline in the growth of customers of almost 64 thousand (1973 versus 1976). In the 1982 recession, FPL 15 experienced a decline in the growth of customers of roughly 29 thousand (1981 16 versus 1983). In the 1990/91/92 recession, FPL experienced a decline in the 17 growth of customers of approximately 36 thousand (1989 versus 1993). A simple 18 19 average of the decline in growth from those three prior recessions would suggests that FPL might anticipate a reduction in the growth of customers due to recession 20 of 43 thousand. However, two of those three recessions were longer term, and 21 this recession is forecast to be relatively shorter. In addition, assuming a 22 23 customer growth reduction of 43,000 would have reduced FPL's customer growth

| 1 | | to 49,000, a lower level than FPL has experienced in any year since 1972, |
|----|----|--|
| 2 | | including the low year of growth in 1992 following Hurricane Andrew. So, it was |
| 3 | | considered prudent to take a more conservative approach. FPL projected that it |
| 4 | | would lose approximately 27,000 customers from the year prior to the recession |
| 5 | | (2000) to the year following the recession (2002). This is close to but lower than |
| 6 | | the decline in customer growth experienced during the 1982 recession, and it |
| 7 | | leaves 2002 customer growth at 65,000 customers, which is about the average |
| 8 | | new customer growth seen for most of the decade of the 1990s. |
| 9 | | |
| 10 | | The combination of the revised use per customer multiplied by the new projection |
| 11 | | of customers results in a projected level of sales of 100,158 gWh in 2002, a 1.7 % |
| 12 | | growth over 2001 as shown on Page 4 of Appendix I. This level of sales is 2.9% |
| 13 | | lower than the forecast used in the fuel, capacity, and conservation clause filings |
| 14 | | in August and September of 2001. |
| 15 | | |
| 16 | Q. | Please summarize your testimony. |
| 17 | A. | The change in Florida's economic look for 2002, brought on by the events of |
| 18 | | September 11, 2001, warrants a revision to FPL's sales forecast. The |
| 19 | | performance of Florida's economy determines electricity usage per customer and |
| 20 | | the level of customer growth. The growth of both of these factors is forecast to |
| 21 | | decline from the levels forecast prior to September 11, 2001, resulting in lower |
| 22 | | forecast electricity sales in FPL's service territory. The revision in the sales and |
| 23 | | customer forecast is in line with but more conservative than the observed |

| 1 | | outcomes from previous recessions. FPL's revised sales forecast is well founded |
|---|----|---|
| 2 | | and reasonable. Furthermore, it is consistent with the most recent projections by |
| 3 | | the State of Florida legislative revenue estimating conference. |
| 4 | | |
| 5 | Q. | Does this conclude your testimony? |
| 6 | A. | Yes, it does. |

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

FLORIDA POWER & LIGHT COMPANY

SUPPLEMENTAL TESTIMONY OF J. R. HARTZOG

DOCKET NO. 010001 - EI

NOVEMBER 5, 2001

Please state your name and address. 1 Q. My name is John R. Hartzoq. My business address is 2 A. 700 Universe Boulevard, Juno Beach, Florida 33408. 3 4 By whom are you employed and what Q. is your 5 position? б I am employed by Florida Power & Light Company 7 Α. (FPL) as Manager, Nuclear Financial & Information 8 Services in the Nuclear Business Unit. 9 10 Have you previously filed testimony in this 11 Q. docket? 12 Α. Yes. 13 14 What is the purpose of your testimony? Q. 15 Α. The purpose of my testimony is to present and 16 explain FPL's incremental security costs 17

associated with the events of September 11, 2001
to be included in the proposed fuel cost recovery
factors. The recovery of these costs is discussed
in the supplemental Testimony of FPL witness K. M.
Dubin.

6

7 Q. What is the basis for the additional security 8 costs?

Α. 9 FPL's nuclear plants rely on a "defense in depth" 10 approach to security. Essentially, multiple barriers of increasing restrictions for access to 11 12 plant components and systems are utilized. Historically, FPL has 13 had a highly effective security program 14as demonstrated by Nuclear Regulatory Commission "force on force" inspections 15 16 utilizing military Special Forces as mock adversaries. Both Turkey Point and 17 St. Lucie 18 successfully passed such inspections within the 19 last few years. As a result of the September 11th events, FPL has deepened the security defense in 20 depth, requiring additional manpower. 21 This is consistent with new expectations regarding nuclear 22 23 plant security and NRC Advisories. FPL is in

NRC, NRC 1 frequent contact with the and implemented as made. recommendations are The 2 incremental cost of this additional manpower is 3 being captured in accounts established for that 4 purpose. In the past, FPL's fossil units have had 5 6 security based on fences, qates and limited In light of the events of 7 personnel access. September 11, 2001 especially at Turkey Point and 8 9 its close proximity to the nuclear units, FPL has also enhanced the security at selected fossil 10 units. 11

12

Q. How much are the incremental security costs in response to the September 11, 2001 events?

15 Α. FPL expects to expend approximately \$1.5 Million 16 for additional security at its nuclear facilities, and \$300,000 at its fossil facilities in 2002. 17 significant uncertainties in There these 18 are costs, since it is vital that FPL respond to 19 changing threat levels in a proactive manner. 20 In addition, various assistance levels from 21 governmental organizations will be required, 22 including, as a minimum, local law enforcement and 23

the Florida National Guard. FPL anticipates that some of these governmental organizations will seek reimbursement of associated costs for providing assistance.

6 Q. Does this conclude your testimony?

7 A. Yes, it does.

| 1 | | BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION |
|----|----|---|
| 2 | | FLORIDA POWER & LIGHT COMPANY |
| 3 | | SUPPLEMENTAL TESTIMONY OF KOREL M. DUBIN |
| 4 | | DOCKET NO. 010001-EI |
| 5 | | November 5, 2001 |
| 6 | | |
| 7 | Q. | Please state your name and address. |
| 8 | Α. | My name is Korel M. Dubin and my business address is 9250 West |
| 9 | | Flagler Street, Miami, Florida 33174. |
| 10 | | |
| 11 | Q. | By whom are you employed and in what capacity? |
| 12 | Α. | I am employed by Florida Power & Light Company (FPL) as Manager |
| 13 | | of Regulatory Issues in the Regulatory Affairs Department. |
| 14 | | |
| 15 | Q. | Have you previously testified in this docket? |
| 16 | Α. | Yes, I have. |
| 17 | | |
| 18 | Q. | What is the purpose of your supplemental testimony? |
| 19 | Α. | The purpose of my supplemental testimony is to present for |
| 20 | | Commission review and approval revised fuel cost recovery factors |
| 21 | | (FCR) and revised capacity cost recovery factors (CCR) for FPL's |
| 22 | | rate schedules for the period January 2002 through December 2002. |
| 23 | | This revision is due to a reduced sales forecast, from 94,729,311 |
| 24 | | retail MWH to 91,929,691 retail MWH as discussed in the testimony |

| 1 | | of FPL Witness Leo Green, and incremental costs for increased |
|----|----|--|
| 2 | | security at FPL's plants as discussed in the testimony of FPL Witness |
| 3 | | John Hartzog. |
| 4 | | |
| 5 | Q. | Have you prepared or caused to be prepared under your |
| 6 | | direction, supervision or control an exhibit in this proceeding? |
| 7 | A. | Yes, I have. It consists of various schedules included in Appendices |
| 8 | | II and III. Appendix II contains the FCR related schedules and |
| 9 | | Appendix III contains the CCR related schedules. |
| 10 | | |
| 11 | | |
| 12 | | FUEL COST RECOVERY CLAUSE |
| 13 | | |
| 14 | Q. | What is the proposed revised levelized fuel factor for which the |
| 15 | | Company requests approval? |
| 16 | A. | 2.860¢ per kWh. Schedule EI, Page 1 of Appendix II shows the |
| 17 | | calculation of this revised twelve-month levelized fuel factor. As |
| 18 | | shown on Line 30, the Total Jurisdictional Fuel Cost is |
| 19 | | \$2,578,571,684, a reduction of \$106,970,864 from the August 31, |
| 20 | | 2001 filing due to the decrease in Net Energy for Load. Schedule E2, |
| 21 | | Pages 4 and 5 of Appendix II indicates the revised monthly fuel |
| 22 | | factors for January 2002 through December 2002 and also the |
| 23 | | revised twelve-month levelized fuel factor for the period. The fuel |
| 24 | | factor has been revised from the August 31, 2001 filing to reflect the |

.

.

| 1 | | reduction in the sales forecast as described in the testimony of FPL |
|--|------------------------|--|
| 2 | | Witness Leo Green. Additionally, the fuel factor has been revised to |
| 3 | | include the additional plant security costs as described in the |
| 4 | | testimony of FPL Witness John Hartzog. |
| 5 | | |
| 6 | Q. | Has the Company developed a revised twelve-month levelized |
| 7 | | fuel factor for its Time of Use rates? |
| 8 | A. | Yes. Schedule E1-D, Page 2 of Appendix II, provides a revised |
| 9 | | twelve-month levelized fuel factor of 3.138¢ per kWh on-peak and |
| 10 | | 2.735¢ per kWh off-peak for our Time of Use rate schedules. |
| 11 | | |
| 12 | Q. | Were these calculations made in accordance with the |
| | | |
| 13 | | procedures previously approved in this Docket? |
| 13 14 | A. | procedures previously approved in this Docket? Yes, they were. |
| 13 14 . 15 | A. | procedures previously approved in this Docket? Yes, they were. |
| 13 14 . 15 16 | А. Q. | procedures previously approved in this Docket? Yes, they were. |
| 13 14 . 15 16 17 | А. Q. | procedures previously approved in this Docket?Yes, they were.Is FPL proposing to include any additional costs in thecalculation of the revised fuel cost recovery factors? |
| 13 14 . 15 16 17 18 | А. Q . А. | procedures previously approved in this Docket? Yes, they were. Is FPL proposing to include any additional costs in the calculation of the revised fuel cost recovery factors? Yes. FPL requests that it be allowed to recover incremental costs for |
| 13 14 . 15 16 17 18 19 | А. Q. А. | procedures previously approved in this Docket? Yes, they were. Is FPL proposing to include any additional costs in the calculation of the revised fuel cost recovery factors? Yes. FPL requests that it be allowed to recover incremental costs for increased security at FPL's plants as a result of the events of |
| 13 14 . 15 16 17 18 19 20 | А. Q. А. | procedures previously approved in this Docket? Yes, they were. | 13 14 . 15 16 17 18 19 20 21 | А. Q . А. | procedures previously approved in this Docket? Yes, they were. Is FPL proposing to include any additional costs in the calculation of the revised fuel cost recovery factors? Yes. FPL requests that it be allowed to recover incremental costs for increased security at FPL's plants as a result of the events of September 11, 2001, as described in the testimony of FPL Witness John Hartzog. For 2002 these costs are projected to be \$1,860,000 |
| 13 14 . 15 16 17 18 19 20 21 22 | А. Q. А. | procedures previously approved in this Docket? Yes, they were. Is FPL proposing to include any additional costs in the calculation of the revised fuel cost recovery factors? Yes. FPL requests that it be allowed to recover incremental costs for increased security at FPL's plants as a result of the events of September 11, 2001, as described in the testimony of FPL Witness John Hartzog. For 2002 these costs are projected to be \$1,860,000 and are reflected on Schedule E1, Page 1, Line 3a of Appendix II. |
| 13 14 . 15 16 17 18 19 20 21 22 23 | А. Q . А. | procedures previously approved in this Docket? Yes, they were. Is FPL proposing to include any additional costs in the calculation of the revised fuel cost recovery factors? Yes. FPL requests that it be allowed to recover incremental costs for increased security at FPL's plants as a result of the events of September 11, 2001, as described in the testimony of FPL Witness John Hartzog. For 2002 these costs are projected to be \$1,860,000 and are reflected on Schedule E1, Page 1, Line 3a of Appendix II. |

.

through the FCR consistent with the Federal Energy Regulatory
 Commission's (FERC) Statement of Policy issued on September 14,
 2001 which states:

"In light of tragic events that have taken place in our country 4 this week and the high state of alert the country is now 5 6 experiencing, the Commission believes it is appropriate to 7 provide regulatory guidance on certain energy infrastructure 8 reliability and security matters that may be affected by this 9 Commission's rate jurisdiction. The Commission understands 10 that electric, gas, and oil companies may need to adopt new procedures, update existing procedures, and install facilities 11 12 to further safeguard their electric power transmission grid and gas and oil pipeline systems. The Commission is aware that 13 there may be uncertainty about companies' ability to recover 14 the expenses necessary to further safeguard our energy 15 16 infrastructure, especially if they are operating under frozen or indexed rates. In order to alleviate this uncertainty, the 17 Commission wants to assure the companies we regulate that 18 19 we will approve applications to recover prudently incurred 20 costs necessary to further safeguard the reliability and 21 security of our energy supply infrastructure in response to the 22 heightened state of alert. Companies may propose a 23 separate rate recovery mechanism, such as a surcharge to currently existing rates or some other cost recovery method. 24

The Commission will give its highest priority to processing any 2 filing made for the recovery of extraordinary expenditures to 3 safeguard the reliability of our energy transportation systems 4 and energy supply infrastructure. The Commission views the 5 reliability of our Nation's energy transportation systems and 6 7 energy supply infrastructure as critical to meeting the energy 8 requirements essential to the American people. The 9 Commission calls for the cooperation of the energy industry, customers, and state and local governments to provide any 10 additional safeguards necessary to protect the country's vital 11 transportation systems and energy supply 12 energy infrastructure." 13

14

1

Additionally, NARUC will be introducing a resolution on "Supporting 15 Recovery in State Regulated Rates of Extraordinary Expenditures 16 Necessary to Safeguard National Energy Suppliers" at the Electricity 17 and Gas Committees on November 12, 2001. The resolution states: 18 "Resolved, that States should approve applications by gas 19 and electric companies subject to their jurisdiction to recover 20 prudently incurred costs necessary to further safeguard the 21 reliability and security of our energy supply infrastructure and 22 23 should allow companies to propose separate rate recovery mechanisms, such as a surcharge to existing rates or 24

deferred accounting treatment."

FPL believes it is essential to increase security to protect and 2 maintain its fuel supply so that we can continue to provide 3 economical nuclear and fossil generation. Clearly, the inability to 4 operate one or more of our generating units, particularly our nuclear 5 generating units, will have a significant adverse impact on our fuel 6 7 costs. Additionally, FPL believes it is appropriate to recover the incremental security costs through the fuel cost recovery clause. 8 There are significant uncertainties in these costs. Moreover, it is vital 9 10 that FPL respond to changing threat levels in a proactive manner. For example, as described in the testimony of FPL Witness John 11 Hartzog, these costs may include the cost of additional security from 12 13 the national guard. For these reasons FPL believes it is appropriate to bring this issue to the Commission for their consideration and 14 approval. Even if the Commission is concerned about whether the 15 16 use of the fuel clause is the most appropriate continuing method of recovery, FPL suggests that the clause should be used as an interim 17 recovery method. 18

19

20 CAPACITY PAYMENT RECOVERY CLAUSE

21

22 Q. Please describe the revisions made to the CCR.

A. Projected retail sales for 2002 were revised downward from
94,729,311 MWH to 91,929,691 MWH as discussed in the testimony

| 1 | | of FPL Witness Leo Green. Page 2 of Appendix III presents the |
|----|----|---|
| 2 | | calculation of the revised Capacity Payment Recovery Clause (CCR) |
| 3 | | factors by rate class due to this decreased sales forecast. |
| 4 | | |
| 5 | Q. | What effective date is FPL requesting for the new factors? |
| 6 | A. | FPL is requesting that the revised FCR and CCR factors become |
| 7 | | effective with customer bills for January 2002 through December |
| 8 | | 2002. This will provide for 12 months of billing on the FCR and CCR |
| 9 | | factors for all our customers. |
| 10 | | |
| 11 | Q. | What will be the revised charge for a Residential customer using |
| 12 | | 1,000 kWh effective January 2002? |
| 13 | A. | The total residential bill, excluding taxes and franchise fees, for 1,000 |
| 14 | | kWh will be \$81.63. The base bill for 1,000 Residential kWh is |
| 15 | | \$43.26. The fuel cost recovery charge for a residential customer is |
| 16 | | \$28.66, a reduction of \$0.30 from the fuel charge filed on August 31, |
| 17 | | 2001 and a reduction of \$1.75 from the current fuel charge. The |
| 18 | | conservation charge is \$1.87, an increase of \$0.06 from the |
| 19 | | conservation charge filed on September 20, 2001. The Capacity |
| 20 | | Cost Recovery charge is \$7.01, an increase of \$0.21 from the |
| 21 | | capacity charge filed on August 31, 2001 and an increase of \$1.74 |
| 22 | | from the current capacity charge. The environmental cost recovery |
| 23 | | charge is \$0.00 and the Gross Receipts Tax is \$0.83. A 1,000 kWh |
| 24 | | residential bill comparing this revision to the originally filed charges |

- and a comparison to current charges is presented in Schedule E10,
- 2 Page 14 of Appendix II.
- 3
- 4 Q. Does this conclude your testimony.
- 5 A. Yes, it does.
