**RE:** DOCKET NO. 000121B-TP - INVESTIGATION INTO THE ESTABLISHMENT OF OPERATIONS SUPPORT SYSTEMS PERMANENT PERFORMANCE MEASURES FOR INCUMBENT LOCAL EXCHANGE TELECOMMUNICATIONS COMPANIES. (SPRINT-FLORIDA TRACK)

**AGENDA:** 12/2/02 <sup>03 14</sup> - REGULAR AGENDA - PROPOSED AGENCY ACTION - INTERESTED PERSONS MAY PARTICIPATE

**CRITICAL DATES:** NONE

**SPECIAL INSTRUCTIONS:** NONE

**FILE NAME AND LOCATION:** S:\PSC\CMP\WP\000121B.RCM

### CASE BACKGROUND

The Commission opened Docket No. 000121-TP to develop permanent performance metrics for the ongoing evaluation of operations support systems (OSS) provided for competitive local exchange carriers' (CLECs) use by incumbent local exchange carriers (ILECs). Associated with the performance metrics is a monitoring and enforcement program that is to ensure that CLECs receive nondiscriminatory access to the ILEC's OSS. Performance monitoring is necessary to ensure that ILECs are meeting their obligation to provide unbundled access, interconnection and resale to CLECs in a nondiscriminatory manner. Additionally, it establishes a standard against which CLECs and this Commission can measure performance over time to detect and correct any degradation of service provided to CLECs.

DOCUMENT NUMBER-DATE  
11730 NOV 20 8  
FPSC-COMMISSION CLERK

Docket No. 000121B-TP  
November 20, 2003

Docket No. 000121-TP consists of three phases. Phase I began with workshops conducted by staff with members of the CLEC and ILEC communities. These workshops were held on March 30, 2000, August 8, 2000, and December 13, 2000. The purpose of Phase I was to determine and resolve any policy and legal issues in this matter. Phase II involved establishing permanent metrics for BellSouth Telecommunications, Inc. (BellSouth), including a specific monitoring and enforcement program. By Order No. PSC-01-1819-FOF-TP (Final Order), issued September 10, 2001, the Commission established permanent performance measures and benchmarks as well as a voluntary self-executing enforcement mechanism (Performance Assessment Plan) for BellSouth. By Order No. PSC-02-0187-FOF-TP, issued February 12, 2002, as amended by Order No. PSC-01-0187A-FOF-TP, issued March 13, 2002, BellSouth's Performance Assessment Plan was approved.

Phase II of this docket entailed the establishment of performance metrics and a performance monitoring and evaluation program for the other Florida ILECs. By Order No. PSC-02-0503-PCO-TP, issued April 11, 2002, Docket No. 000121-TP was divided into three subdockets: (1) 000121A-TP, in which filings directed toward the BellSouth track would be placed; (2) 000121B-TP, in which filings directed toward the Sprint track would be placed; and (3) 000121C-TP, in which filings directed toward the Verizon track would be placed.

By Order No. PSC-03-0067-PAA-TP, issued January 9, 2003, the Commission adopted permanent performance measures for the Sprint Track, Docket Number 000121B-TP. Sprint's Florida Performance Measurement Plan includes the adoption of the August 2002 Sprint Nevada Performance Measurement Plan ("Cookbook") as well as administrative provisions and an associated compliance methodology. The Nevada Performance Measurement Plan has previously been approved by both the North Carolina and Indiana Utilities Commissions as Sprint's Performance Measurement Plan within those states.

This recommendation addresses proposed changes to Sprint's Florida Performance Measurement Plan per the Commission's six-month review process. The six-month review process, as outlined in Order No. PSC-03-0067-PAA-TP, consists of a collaborative review of Sprint's performance measures to determine if the current structure is effective. The collaborative work group consists of Sprint, interested CLECs, and Commission staff.

### **JURISDICTION**

The Commission is vested with jurisdiction over this matter pursuant to Sections 364.01(3) and (4)(g), Florida Statutes. Pursuant to Section 364.01 (3), Florida Statutes, the Florida legislature has found that regulatory oversight is necessary for the development of fair and effective competition in the telecommunications industry. To that end, Section 364.01 (4) (g), Florida Statutes, provides, in part, that the Commission shall exercise its exclusive jurisdiction in order to ensure that all providers of telecommunications service are treated fairly by preventing anticompetitive behavior. Furthermore, it is noted that the FCC has encouraged the states to implement performance metrics and oversight for purposes of evaluating the status of competition under the Telecommunications Act of 1996.

### **DISCUSSION OF ISSUES**

**ISSUE 1:** Should the Commission order Sprint to implement proposed revisions to the Performance Measurement Plan presented in Attachment 1?

**RECOMMENDATION:** Yes. Staff believes the Commission should approve the revisions to the Performance Measurement Plan for Sprint Florida as presented in Attachment 1. The implementation of the revisions to Sprint's Florida Performance Measurement Plan should become effective beginning with January 2004 data. (**Hallenstein**)

### **STAFF ANALYSIS:**

By Order No. PSC-03-0067-PAA-TP, issued January 9, 2003, the Commission adopted permanent performance measures for Sprint Florida. Sprint complied with the Order and implemented the Performance Measurement Plan on February 1, 2003. The Plan includes:

- Service Quality Measures
- Business Rules

- Reporting Requirements
- Auditing
- Statistical Methodology

The performance measures reported by Sprint Florida are the same as those provided in Sprint's August 2002 Performance Measurement Plan for the Nevada Public Utilities Commission. Sprint advocated a single, universally implemented plan at the national level rather than state-specific performance measurement plans. Sprint believes this accomplishes the dual goal of maximizing the value to CLECs and the Commission, while minimizing administrative costs to all parties. It should be noted that portions of Sprint's Florida Collocation performance measures were modified to reflect Florida standards of compliance in the provision of collocation services as specified in Order No. PSC-00-0941-FOF-TP.

On September 19, 2003, as part of the six-month review process outlined in Order No. PSC-03-0067-PAA-TP, Sprint filed with the Commission a request for revisions to the Sprint Florida Performance Measurement Plan. Sprint's requested revisions coincide with recent revisions to the Sprint Nevada Performance Measurement Plan. The Nevada Public Utilities Commission ordered the revisions to the performance measures on July 9, 2003.

In compliance with the six-month review process, Sprint allowed staff and CLECs an opportunity to review such changes brought before the Commission for adoption. On October 2, 2003, staff solicited comments from the CLECs for the six-month review of Sprint's Florida Performance Measurement Plan. In response to staff's request for comments, on October 31, 2003, the CLEC Coalition expressed some general concern regarding Sprint's Performance Measurement Plan, but requested that the Commission allow Sprint to implement the proposed revisions. The CLEC Coalition commented that an extensive review of Sprint's performance measures is not in their best interest at this time due to a current heavy workload of regulatory issues.

The CLEC Coalition's endorsement of Sprint's Performance Measurement Plan is predicated on the expectation of recurring six-month reviews. The next six-month review should allow the CLECs an additional opportunity to make necessary plan improvements and ensure that CLECs are correctly interpreting the plan. Staff anticipates more substantive changes.

The parties in Nevada agreed upon the revisions set forth in Sprint's Nevada Performance Measurement Plan. The stipulation was entered into on June 25, 2003. Sprint will revise its Nevada Performance Measurement Plan beginning with January 2004 data, which will be reported on February 20, 2004. It is Sprint's intention to ensure that approval from the Florida Commission would be received in the same time frame to enable simultaneous implementation of the changes.

Staff is amenable to both Sprint's and the CLEC Coalition's request. Staff believes that the changes approved in Nevada should be adopted in Florida. Attachment 1 is Sprint's proposed revisions to its Florida Performance Measurement Plan. The attachment incorporates all of the changes that were stipulated to in Nevada. The changes are primarily administrative in nature. For example, all references to "ALEC" are changed to "CLEC" and changes are made to the report layout and appearance. In addition, business rules have been clarified and standards have been added where there previously was none. At this time, staff believes that these changes provide an acceptable level of performance reporting for Sprint in Florida. Staff further contends that ongoing six-month reviews are warranted and anticipates greater participation on behalf of the CLECs at a future date.

## **II. CONCLUSION**

Staff recommends that the Commission approve the revisions to the Performance Measurement Plan for Sprint Florida as presented in Attachment 1. Staff further recommends that implementation of the revisions to Sprint's Florida Performance Measurement Plan become effective beginning with January 2004 data.

Docket No. 000121B-TP  
November 20, 2003

**ISSUE 2:** Should this docket be closed?

**RECOMMENDATION:** No. If no person whose substantial interests are affected files a protest within 21 days of the issuance date of the Order, the Order will become final upon the issuance of a Consummating Order. Any protest of the Commission's decision in this matter should identify with specificity the item or measure being protested, and any such protest should not prevent the remainder of the Order from becoming final and effective. Thereafter, this docket should remain open for the Commission to conduct periodic six-month reviews of Sprint's Performance Measurement Plan and to complete the initial third-party audit outlined in Order No. PSC-03-0067-PAA-TP. (**BANKS**)

**STAFF ANALYSIS:** If no person whose substantial interests are affected files a protest within 21 days of the issuance date of the Order, the Order will become final upon the issuance of a Consummating Order. Any protest of the Commission's decision in this matter should identify with specificity the item or measure being protested, and any such protest should not prevent the remainder of the Order from becoming final and effective. Thereafter, this docket should remain open for the Commission to conduct periodic six-month reviews of Sprint's Performance Measurement Plan and to complete the initial third-party audit outlined in Order No. PSC-03-0067-PAA-TP.

# Sprint Performance Measurement Plan

## I. INTRODUCTION

### Background

The Telecommunications Act of 1996 and the FCC's implementing rules require ILECs to provide CLECs with nondiscriminatory access to OSS. In the August 1996 Local Competition First Report and Order, the FCC commented, generally, that ILECs must provide CLECs with access to the pre-ordering, ordering, provisioning, billing, repair, and maintenance OSS sub-functions pursuant to the Act, such that CLECs are able to perform such OSS sub-functions in "substantially the same time and manner" as the ILECs can for themselves.<sup>1</sup> In August of 1997, the FCC's *Ameritech Opinion* analyzed the nondiscriminatory access requirements of §251(c) to a Bell Operating Company's (BOC's) §271 application, and clarified that for those OSS subfunctions with retail analogs, a BOC "must provide access to competing carriers that is equal to the level of access that the BOC provides to itself, its customers or its affiliates, in terms of quality, accuracy and timeliness."<sup>2</sup> The FCC further clarified in the *Ameritech Opinion* that for those OSS functions with no retail analog, a BOC must offer access sufficient to allow an efficient competitor "a meaningful opportunity to compete."<sup>3</sup>

In 2000 the Florida Public Service Commission opened Docket No. 000121-TP to develop permanent performance metrics for the ongoing evaluation of operations support systems (OSS) provided for alternative local exchange carriers' (CLECs) use by incumbent local exchange carriers (ILECs). Docket No. 000121-TP consisted of three phases. Phase I began with workshops conducted by Commission Staff with members of the CLEC and ILEC communities. The purpose of Phase I was to determine and resolve any policy and legal issues in this matter. Phase II involved establishing permanent metrics for BellSouth Telecommunications, Inc. (BellSouth), including a specific monitoring and enforcement program. In 2002 the Florida Public Service Commission began Phase III and opened Docket No. 000121B-TP (Sprint Track) and Docket No. 000121C-TP (Verizon Track) to establish performance metrics and a performance monitoring and evaluation program for the other Florida ILECs.

<sup>1</sup> See, Implementation of the Local Competition Provisions in the Telecommunications Act of 1996, CC Docket No. 96-98, First Report and Order, 11 FCC Rcd 15499, 15763-64 [¶518] (1996) ("Local Competition First Report and Order"), aff'd in part and vacated in part sub nom. Competitive Telecommunications Ass'n v. FCC, 117 F.3d 1068 (8th Cir. 1997) and Iowa Utilities Bd. v. FCC, 120 F.3d 753 (8th Cir. 1997), modified on reh'g, No. 96-3321 (Oct. 14, 1997) (Rehearing Order), petition for cert. granted, 118 S. Ct. 879 (1998).

<sup>2</sup> See, In the Matter of Application of Ameritech Michigan Pursuant to Section 271 of the Communications Act of 1934, as amended, To Provide In-Region, InterLATA Services In Michigan, Memorandum Opinion and Order, 12 FCC Rcd 20543, 20618-19 [¶139] (1997) (Ameritech Michigan Order), writ of mandamus issued sub nom Iowa Utils. Bd. v. FCC, No. 96-3321 (8th Cir. Jan. 22, 1998). ("Ameritech Opinion"); see also, In the Matter of Application of Bellsouth Corporation, et al., for Provision of In-Region, InterLATA services in Louisiana ("BellSouth (Louisiana II) Opinion") CC Docket No. 98-121, FCC 98-271 (10-13-98), paragraph 87 (citing, Ameritech Opinion at 12 FCC Rcd 20618-19). See also, Ameritech Opinion at ¶131, wherein the FCC makes the following statement regarding application of the §251(c) requirements to a BOC's §271 application:

"Because the duty to provide access to network elements under section 251(c)(3) and the duty to provide resale services under section 251(c)(4) include the duty to provide nondiscriminatory access to OSS functions, an examination of a BOC's OSS performance is necessary to evaluate compliance with section 271(c)(2)(B)(ii) and (xiv)."<sup>3</sup> See, Ameritech Opinion at 12 FCC Rcd at 20619 [¶141]; See also, BellSouth (Louisiana II) Opinion at ¶87 (citing Ameritech Opinion at 12 FCC Rcd at 20619).

## *Sprint Performance Measurement Plan*

On May 2, 2002, Sprint filed its initial response to Commission Staff's data request for proposed permanent performance measures in Florida in Docket No. 000121B-TP (Sprint Track). On June 30, 2002, initial comments on Sprint's proposal were filed by interested parties. Taking into consideration the information provided by Sprint and the comments provided by interested parties, Commission Staff developed an independent proposal for Sprint OSS permanent performance measurements and submitted it for comment on November 1, 2002. Comments on Commission Staff's proposal were filed November 15, 2002, and supplemental comments were filed with the Commission on November 25, 2002.

On January 9, 2003, the Florida Public Service Commission issued Order No. PSC-03-0067-PAA-TP. Order No. PSC-03-0067-PAA-TP addressed the proposed establishment and implementation of operations support systems permanent performance measures for the Sprint Track, Docket Number 000121B-TP.

Sprint complied with Order No. PSC-03-0067-PAA-TP and implemented this Performance Measurement Plan (PMP) on February 1, 2003. This Performance Measurement Plan includes:

- service quality measures
- business rules
- reporting requirements
- auditing
- statistical methodology

This Performance Measurement Plan includes performance measurements from the Sprint Nevada Plan, *August 2002 Cookbook*, and statistical methodology contained in the *Sprint Performance Measurement Plan Compliance Methodology* adopted, with modifications, by the FPSC to measure Sprint's performance in Florida.

### *Notes:*

These performance measures are not intended to create, modify, or otherwise affect parties' rights and obligations. The existence of any particular performance measure, or the language describing that measure, is not evidence that the CLECs are entitled to any particular manner of access, that these measures relate solely to access to OSS, nor is it evidence that the ILEC's obligations to such access are defined elsewhere, including the relevant laws, FCC, and state decisions/regulations, tariffs, and interconnection agreements.

# Sprint Performance Measurement Plan

## Major Categories

Measurements developed to help assess the provision of non-discriminatory access to OSS and other services, elements or functions were combined into the following broad categories:

### • Pre-Ordering

Pre-ordering activities relate to the exchange of information between the ILEC and the CLEC regarding current or proposed customer products and services, or any other information required to initiate ordering of service. Pre-ordering encompasses the critical information needed to submit a provisioning order from the CLEC to the ILEC. The pre-order measurement reports the timeliness with which pre-order inquiries are returned to CLECs by the ILEC. Pre-ordering query types include:

- Address Verification/Dispatch Required
- Request for Telephone Number
- Request for Customer Service Record
- Service Appointment Scheduling (due date)
- Rejected/Failed Queries
- Facility Availability
- Loop Pre-Qualification

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

### • Ordering

Ordering activities include the exchange of information between the ILEC and the CLEC regarding requests for service. Ordering includes: (1) the submittal of the service request from the CLEC, (2) rejection of any service request with errors and (3) confirmation that a valid service request has been received and a due date for the request assigned. Ordering performance measurements report on the timeliness with which these various activities are completed by the ILEC. Also captured within this category is reporting on the number of CLEC service requests that automatically generate a service order in the ILECs' service order creation system.

Deleted: Note: Service Availability information is available in Address Verification/Dispatch Required and Customer Service Record queries. §

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

### • Provisioning

Provisioning is the set of activities required to install, change or disconnect a customer's service. It includes the functions to establish or condition physical facilities as well as the completion of any required software translations to define the feature functionality of the service. Provisioning also involves communication between the CLEC and the ILEC on the status of a service order, including any delay in meeting the commitment date and the time at which actual completion of service installation has occurred. Measurements in this category evaluate the quality of service installations; the efficiency of the installation process and the timeliness of notifications to the CLEC that installation is completed or has been delayed.

Deleted:

Deleted: ALEC

Deleted: ALEC

Deleted: 3

Deleted: 3

Deleted: /1/03

### • Maintenance

# Sprint Performance Measurement Plan

Maintenance involves the repair and restoral of customer service. Maintenance functions include the exchange of information between the ILEC and CLEC related to service repair requests, the processing of trouble ticket requests by the ILEC, actual service restoral and tracking of maintenance history. Maintenance measures track the timeliness with which trouble requests are handled by the ILEC and the effectiveness and quality of the service restoral process.

Deleted: ALEC

- **Network Performance**

Network performance involves the level at which the ILEC provides services and facilitates call processing within its network. The ILEC also has the responsibility to complete network upgrades efficiently. Network performance is evaluated on the quality of interconnection and the timeliness of network upgrades (code openings) the ILEC completes on behalf of the CLEC.

Deleted: ALEC

- **Billing**

Billing involves the exchange of information necessary for CLECs to bill their customers, to process the end user's claims and adjustments, to verify the ILEC's bill for services provided to the CLEC and to allow CLECs to bill for access. Billing measures have been designed to gauge the quality, timeliness and overall effectiveness of the ILEC billing processes associated with CLEC customers.

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

- **Database Updates**

Database updates for directory assistance/listings and E911 include the processes by which these systems are updated with customer information that has changed due to the service provisioning activity. Measurements in this category are designed to evaluate the timeliness and accuracy with which changes to customer information, as submitted to these databases, are completed by the ILEC.

Deleted: Data Base

Formatted: Bulleted + Level: 1 +  
Aligned at: 0.25" + Tab after: 0.5" +  
Indent at: 0.5"

- **Collocation**

ILECs are required to provide to CLECs available space as required by law to allow the installation of CLEC equipment. Performance measures in this category assess the timeliness with which the ILEC handles the CLEC's request for collocation as well as how timely the collocation arrangement is provided.

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

- **Interfaces**

ILECs provide the CLECs with choices for access to OSS pre-ordering, ordering, maintenance and repair systems. Availability of the interfaces is fundamental to the CLEC being able to effectively do business with the ILEC. Additionally, in many instances, CLEC personnel must work with the service personnel of the ILEC. Measurements in this category

Deleted: /1/03

## *Sprint Performance Measurement Plan*

assess the availability to the CLECs of systems and personnel at the ILEC work centers.

Deleted: ALEC

### **Auditing and Review Procedures**

The parties have agreed to most procedures for auditing and review. Descriptions of these procedures can be found in Sections IV and V.

### **Reservation of Rights**

These reservations of rights do not negate the parties' agreement regarding performance measures and standards as reflected in the Florida Plan.

Incorporating the performance measures into the interconnection agreements raises several complex issues that require further consideration by the parties. This remains an open issue.

### **Sprint**

By implementing these performance measurements, Sprint:

- does not make any admission regarding the propriety or reasonableness of establishing performance penalties;
- does not admit that an apparent less-than-parity condition reflects discriminatory treatment without further factual analysis.

### **CLECs**

- By implementing these performance measurements, CLECs do not agree with, endorse, or otherwise concur in the terms of Sprint's reservation of rights.
- CLECs reserve the right to contend that Sprint's compliance with the performance measures and standards in the Florida Plan does not conclusively demonstrate Sprint compliance with the Telecommunications Act of 1996.
- CLECs reserve the right to contend that Sprint's compliance with the performance measures and standards does not conclusively demonstrate the existence of an open competitive local market.

## Sprint Performance Measurement Plan

	Loop Pre-Qualification	Request for Loop Pre-Qualification	Diagnostic Only 95% within 3 business days
<b>Business Rules</b>	<ul style="list-style-type: none"> <li>Elapsed time is measured in seconds for electronic pre-order requests.</li> <li>Results for <u>CLECs</u> with 5 or fewer transactions will be compared with a benchmark of twice the applicable electronic submeasure to determine compliance.</li> <li>Elapsed time for fully electronic submeasures will be tracked during scheduled interface availability hours.</li> <li>Exclude transactions that occur during OSS outages.</li> </ul>		
<b>Notes</b>	<ul style="list-style-type: none"> <li>Sprint defines Simple CSR queries as a query on an account that has 4 or <u>fewer</u> lines.</li> <li>Implementation of systems to comply with Federal National Portability requirements will prevent the capability to query by NPA/NNX in 2002 to obtain Service Availability information as an independent query. Service Availability information is available in Address Verification/Dispatch Required and Customer Service Record queries.</li> <li>Submeasure Facility Availability provides switch verification information and Loop Pre-Qualification provides outside plant loop facility information.</li> <li>The benchmark for Service Appointment Scheduling is To Be Determined (TBD) because Sprint implemented a new process for this disaggregation in 2002. After 12 consecutive months of historical data is collected, Sprint will re-evaluate the benchmark.</li> <li>There is insufficient historical data to develop a valid benchmark for To Be Determined (TBD) disaggregation levels.</li> </ul>

## Measure 4

**Title:** Percent of Flow-Through Orders

Area	Requirement Description																																																																																																												
<b>Description</b>	Measures the percentage of mechanized service orders processed on a flow through basis. The definition of Flow-through for the intent of this measure is to reflect those orders that are able to get to the Firm Order Confirmation status without manual intervention.																																																																																																												
<b>Method of Calculation</b>	$\left[ \frac{\text{Number of valid electronically received orders that flow-through without manual intervention}}{\text{Total valid electronically received service orders}} \right] \times 100$																																																																																																												
<b>Report Period</b>	Monthly																																																																																																												
<b>Report Structure</b>	Individual CLECs, CLECs in the aggregate, and ILEC Affiliates																																																																																																												
<b>Reported By</b>	<ul style="list-style-type: none"> <li>• Orders that flow through as a percentage of                             <ol style="list-style-type: none"> <li>1) All electronically received orders programmed to flow-through</li> <li>2) All electronically received orders</li> </ol> </li> <li>• By Service Group Types</li> </ul>																																																																																																												
<b>Geographic Level</b>	Statewide																																																																																																												
<b>Measurable Standards</b>	The process to evaluate performance on this measure is under development. Issues, if any, are not yet finally defined. Final resolution depends on completed development of an agreed to Flow-Through Plan.																																																																																																												
	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Disaggregation Level</th> <th style="text-align: center;">CLEC</th> <th colspan="2" style="text-align: center;">Comparison Standard</th> </tr> <tr> <th style="text-align: center;">Resale</th> <th></th> <th style="text-align: center;">Parity</th> <th style="text-align: center;">Benchmark</th> </tr> </thead> <tbody> <tr><td>Res POTS</td><td>Res POTS</td><td></td><td>Diagnostic Only</td></tr> <tr><td>Bus POTS</td><td>Bus POTS</td><td></td><td>Diagnostic Only</td></tr> <tr><td>ISDN BRI</td><td>ISDN BRI</td><td></td><td>Diagnostic Only</td></tr> <tr><td>CENTREX</td><td>CENTREX</td><td></td><td>Diagnostic Only</td></tr> <tr><td>PBX</td><td>PBX</td><td></td><td>Diagnostic Only</td></tr> <tr><td>DDS</td><td>DDS</td><td></td><td>Diagnostic Only</td></tr> <tr><td>DS1/ISDN PRI</td><td>DS1/ISDN PRI</td><td></td><td>Diagnostic Only</td></tr> <tr><td>DS3</td><td>DS3</td><td></td><td>Diagnostic Only</td></tr> <tr><td>VGPL/DS0</td><td>VGPL/DS0</td><td></td><td>Diagnostic Only</td></tr> <tr><td><b>UNBUNDLED NETWORK ELEMENTS</b></td><td></td><td></td><td></td></tr> <tr><td><b>UNE Loops</b></td><td></td><td></td><td></td></tr> <tr><td>UNE Loops Non-Designed</td><td>UNE Loops - Non-Designed</td><td></td><td>Diagnostic Only</td></tr> <tr><td>UNE Loops Designed</td><td>UNE Loops Designed</td><td></td><td>Diagnostic Only</td></tr> <tr><td>UNE Loops xDSL Provisioned</td><td>UNE Loops xDSL Provisioned</td><td></td><td>Diagnostic Only</td></tr> <tr><td>Line Sharing</td><td>Line Sharing</td><td></td><td>Diagnostic Only</td></tr> <tr><td>UNE Subloops - Voice Grade</td><td>UNE Subloops - Voice Grade</td><td></td><td>Diagnostic Only</td></tr> <tr><td>UNE Subloops - Data</td><td>UNE Subloops - Data</td><td></td><td>Diagnostic Only</td></tr> <tr><td>Dark Fiber</td><td>Dark Fiber</td><td></td><td>Diagnostic Only</td></tr> <tr><td>UNE Ports</td><td>UNE Ports</td><td></td><td>Diagnostic Only</td></tr> <tr><td>EELS</td><td>EELS</td><td></td><td>Diagnostic Only</td></tr> <tr><td><b>UNE Dedicated Transport</b></td><td></td><td></td><td></td></tr> <tr><td>UNE DS1/ISDN PRI</td><td>UNE DS1/ISDN PRI</td><td></td><td>Diagnostic Only</td></tr> <tr><td>UNE DS3</td><td>UNE DS3</td><td></td><td>Diagnostic Only</td></tr> <tr><td>UNE Platform</td><td>UNE Platform</td><td></td><td>Diagnostic Only</td></tr> <tr><td>LNP</td><td>LNP</td><td></td><td>Diagnostic Only</td></tr> </tbody> </table>	Disaggregation Level	CLEC	Comparison Standard		Resale		Parity	Benchmark	Res POTS	Res POTS		Diagnostic Only	Bus POTS	Bus POTS		Diagnostic Only	ISDN BRI	ISDN BRI		Diagnostic Only	CENTREX	CENTREX		Diagnostic Only	PBX	PBX		Diagnostic Only	DDS	DDS		Diagnostic Only	DS1/ISDN PRI	DS1/ISDN PRI		Diagnostic Only	DS3	DS3		Diagnostic Only	VGPL/DS0	VGPL/DS0		Diagnostic Only	<b>UNBUNDLED NETWORK ELEMENTS</b>				<b>UNE Loops</b>				UNE Loops Non-Designed	UNE Loops - Non-Designed		Diagnostic Only	UNE Loops Designed	UNE Loops Designed		Diagnostic Only	UNE Loops xDSL Provisioned	UNE Loops xDSL Provisioned		Diagnostic Only	Line Sharing	Line Sharing		Diagnostic Only	UNE Subloops - Voice Grade	UNE Subloops - Voice Grade		Diagnostic Only	UNE Subloops - Data	UNE Subloops - Data		Diagnostic Only	Dark Fiber	Dark Fiber		Diagnostic Only	UNE Ports	UNE Ports		Diagnostic Only	EELS	EELS		Diagnostic Only	<b>UNE Dedicated Transport</b>				UNE DS1/ISDN PRI	UNE DS1/ISDN PRI		Diagnostic Only	UNE DS3	UNE DS3		Diagnostic Only	UNE Platform	UNE Platform		Diagnostic Only	LNP	LNP		Diagnostic Only

## Measure 12

**Title:** Percent of Due Dates Missed Due to Lack of Facilities

Area	Requirement Description
<b>Description</b>	Measures the percent of new, move and change orders missed due to lack of facilities.  Note: Results also included in Measure "Percent Missed Due Dates"
<b>Method of Calculation</b>	$\left[ \frac{\text{Total New, Move and Change Orders Missed Due Dates Due to Lack of Facilities}}{\text{Total Number of New, Move and Change Orders}} \right] \times 100$
<b>Report Period</b>	Monthly
<b>Report Structure</b>	Individual CLEC, CLECs in the aggregate, by ILEC, and ILEC Affiliates
<b>Reported By</b>	By service group type
<b>Geographic Level</b>	Statewide
<b>Measurable Standards</b>	Sprint is required to provide a retail analog for this measurement.
<b>Disaggregation Level</b>	<b>CLEC</b> <b>Comparison Standard</b>
<b>Resale</b>	<b>Parity</b> <b>Benchmark</b>

## Billing

## Measure 28

**Title:** Usage Timeliness

Area	Requirement Description																				
<b>Description</b>	This measure captures the elapsed time between the recording of usage data generated either by CLEC retail customers or access usage associated with CLEC customers and the time when the data set, in a compliant format, is available for transmission to the CLEC.																				
<b>Method of Calculation</b>	$\frac{\downarrow \text{(Count of all messages available within 5 days)}}{\text{(Count of all messages available for transmission in reporting period)}} \times 100$																				
<b>Report Period</b>	Monthly																				
<b>Report Structure</b>	Individual CLECs, CLECs in the aggregate, by ILEC (if analog applies) and by ILEC Affiliates																				
<b>Reported By</b>	<ul style="list-style-type: none"> <li>• Resale</li> <li>• UNE</li> <li>• Jointly provided switched access (associated with meet point billing)</li> </ul>																				
<b>Geographic Level</b>	Statewide																				
<b>Measurable Standards</b>	<p>Sprint is required to provide a retail analog for certain levels of disaggregation for this measurement.</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 30%;">Disaggregation Level</th> <th style="width: 20%;">CLEC</th> <th colspan="2" style="width: 50%;">Comparison Standard</th> </tr> <tr> <td></td> <td></td> <th style="width: 25%;">Parity</th> <th style="width: 25%;">Benchmark</th> </tr> </thead> <tbody> <tr> <td>Resale</td> <td>CLEC End user messages</td> <td>Sprint End user messages</td> <td></td> </tr> <tr> <td>UNE – Unbundled Network Element</td> <td>CLEC billing messages</td> <td>Sprint End user messages</td> <td></td> </tr> <tr> <td>Access (Associated with Meet Point Billing Only)</td> <td>CLEC access billing messages</td> <td></td> <td>95% within 5 days</td> </tr> </tbody> </table>	Disaggregation Level	CLEC	Comparison Standard				Parity	Benchmark	Resale	CLEC End user messages	Sprint End user messages		UNE – Unbundled Network Element	CLEC billing messages	Sprint End user messages		Access (Associated with Meet Point Billing Only)	CLEC access billing messages		95% within 5 days
Disaggregation Level	CLEC	Comparison Standard																			
		Parity	Benchmark																		
Resale	CLEC End user messages	Sprint End user messages																			
UNE – Unbundled Network Element	CLEC billing messages	Sprint End user messages																			
Access (Associated with Meet Point Billing Only)	CLEC access billing messages		95% within 5 days																		
<b>Business Rules</b>	<ul style="list-style-type: none"> <li>• The reporting period used will be calendar month (based upon the message process date).</li> <li>• Only Automated Message Accuracy (AMA) messages recorded by Sprint LTD are included. Alternate Billed Message and Connecting Company messages recorded by other companies are excluded.</li> <li>• Long duration calls are excluded because the message date does not accurately reflect the date on which the message was recorded. Long duration calls are defined as calls that remain connected through two successive midnights.</li> </ul>																				
<b>Notes</b>	<ul style="list-style-type: none"> <li>• This measurement assumes a daily transmission of usage to the CLECs. If the CLECs do not request daily transmissions, the measurement still applies based upon transmission availability date, however the actual timeliness of the usage received by the CLEC will vary depending upon their requirements for frequency of transmissions (e.g. weekly). This measure only applies for CLECs who receive copies of their messages.</li> </ul>

## Measure 42

**Title:** Percentage of Time Interface is Available

Area	Requirement Description		
<b>Description</b>	Measures percent of time OSS interface is available compared to scheduled availability.		
<b>Method of Calculation</b>	$\left[ \frac{((\text{Number of Scheduled Interface Available Hours}) - (\text{Number of Unscheduled Interface Unavailable Hours}))}{(\text{Scheduled Interface Available Hours})} \right] \times 100$		
<b>Report Period</b>	Monthly		
<b>Report Structure</b>	CLECs in the aggregate		
<b>Reported By</b>	By interface type accessed by CLECs		
<b>Geographic Level</b>	Statewide		
<b>Measurable Standards</b>	Disaggregation Level	CLEC	Comparison Standard
	Ordering	IRES Availability	Parity Benchmark 98.5% of scheduled hours
<b>Business Rules</b>	<ul style="list-style-type: none"> <li>• Outage hours are obtained from outage reports.</li> <li>• Any change requests for extended availability during the reporting period are added to the scheduled hours.</li> <li>• Scheduled interface availability hours:                             <ul style="list-style-type: none"> <li>• 8AM - 8PM Eastern (Monday-Friday).</li> <li>• Excludes non-business days and ILEC published holidays.</li> <li>• CLECs are notified via e-mail in advance of changes to the published availability schedule.</li> </ul> </li> </ul>		
<b>Notes</b>	<ul style="list-style-type: none"> <li>• Sprint has one interface for pre-ordering and ordering; therefore, both of these functions are reported under ordering.</li> <li>• Any outage in a source system that inhibits the system from performing pre-ordering or ordering functions is considered an outage.</li> </ul>

# Sprint Performance Measurement Plan

## REPORTING PROCESS

Performance reports will be provided by the twentieth calendar day of the month succeeding the reporting period, unless otherwise approved by the Commission. The reporting period is the calendar month, unless otherwise noted. Positive reporting will be done for all measures, even those reported on an exception only basis.

Sprint will publish results for all CLECs who have ordered one or more CLEC products and have one or more CLEC access lines (e.g., Measure 19 denominator is 1 or more). If the CLEC announces they will discontinue service to all of their end users, performance reporting for the CLEC will cease on the last day of the month of the discontinuation month.

Deleted: ALEC

Deleted: ALEC

When reporting begins on a new measure or for a new CLEC, Sprint is only required to report results after a full calendar month of data is available. CLEC failure to provide an Operating Company Number (OCN) on orders will result in those orders being excluded from the CLEC Service Performance Measurements. Exclusions based on application of business rules apply to both the numerator and denominator of the Method of Calculation with the exception of Measure 2.

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

For those measures where results appear to be statistically less than parity or not meeting the benchmark level, Sprint will perform analysis of the data upon CLEC request. This analysis will detail the underlying causes contributing to the reported performance results. Within 90 days of the web-site publication of monthly results, a report recipient may request an analysis of a measurement that is less than parity or not meeting the benchmark. Sprint will provide the analysis within 45 days of the request.

Deleted: ALEC

Authorized users will have access to monthly reports through an interactive website. Each CLEC will have access to its own data, aggregate CLEC data, and Sprint Retail data. The Public Service Commission will have access to reports for all entities, including Sprint Affiliate data. Sprint Affiliate data will not be included in CLEC aggregate data.

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

In addition to the performance measure results themselves, upon request Sprint will provide data which comprise the results and which are readily available from the systems that provides the reportable data. Raw data will be archived for a period of 24 months to provide an adequate audit trail and will be retained with sufficient detail so that CLECs can reasonably reconcile the data captured by Sprint (for the CLEC) with its own internal data. Furthermore, data that relates to Sprint's own performance will be retained, at a consistent level of disaggregation comparable to that reported for the CLECs.

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

If revisions to the reports are required after the reporting due date, Sprint will repost results (if accurate data can be reconstructed) and publish a notification of the repost, along with the reason for reposting on the web site. Sprint will archive the repost notifications and make them available on the reporting web site for 12 calendar months and in archive an additional 12 months.

Deleted: 3

Deleted: 3

Deleted: /1/03

## *Sprint Performance Measurement Plan*

If there is noncompliance at the aggregate level in three consecutive months for a given level of disaggregation, Sprint shall provide to the Commission a report of root cause analysis on a monthly basis. Sprint's root-cause analysis shall include a plan for corrective action with key activities and critical completion dates for implementation.

Sprint will report affiliate results to the Commission, Bureau of Consumer Protection and CLECs under proprietary information provisions.

### General Exclusions

Published results will not include the following:

- Queries, orders, or maintenance tickets initiated by Sprint for administrative purposes.
- Data impacted by customer-caused reasons.
- Data impacted by Sprint dependence on a third party (not including Sprint affiliates or agents within Sprint's control).

#### Sprint dependence on a third party

If Sprint dependence on a third party is not specifically noted in this document, Sprint will contact parties of record from Docket No. 000121B-TP (SPRINT-FLORIDA TRACK) to discuss implementation of the data exclusion. Sprint will request a meeting within 30 days and propose 5 potential meeting times to occur during business hours. If any party does not respond within 10 days, the meetings will be scheduled without their input.

Sprint will propose two meeting dates/times based on maximum availability of parties and request attendance at both. Any party who cannot make one or both meetings and wishes to request an alternate date/time must contact Sprint within 5 days. Contingent upon the willingness of parties to schedule meetings in a timely manner, Sprint will make every attempt to schedule meeting dates/times that are amenable to all parties.

At least 10 days prior to the first scheduled meeting, Sprint will distribute relevant documentation/information to parties.

During the first meeting, Sprint will describe the situation and answer questions from parties. If parties agree this constitutes a valid case of dependence on a third party, Sprint will implement this exclusion in the reporting system and communicate the intended implementation date.

If parties are not in agreement at the end of the first meeting, the second meeting will be utilized to resolve open issues. Additional meetings may be scheduled if parties are willing.

If parties cannot reach agreement, and Sprint wishes to pursue the exclusion, Sprint will initiate an expedited hearing process in accordance with the Commission's rules.

At least 30 days prior to implementation of a new exclusion, Sprint will publish a notification on the reporting website.

Deleted: 3

Deleted: 3

Deleted: /1/03

## *Sprint Performance Measurement Plan*

For this purpose, Sprint will provide the excluded data within 15 days upon request by any affected party and Commission Staff, for the first three reporting dates following implementation of a new exclusion.

**INTERCONNECTION TRUNKS** will be included in measures: 2, 7, 8, 11, 12, 13, 14, 19, 20, 21, 23, 25, 30, 31, 32, 33, 34.

LNP is considered a facilities based service group type. LNP will be a level of disaggregation for the following measures: 2, 4, 9, 15, 17a, 19, 20, 21, and 23. Service orders with multiple service group types will be categorized according to the service group type of the first access line entered on the order.

**PROJECTS** are defined as follows.

Deleted: 3

Deleted: 3

Deleted: //1/03

## *Sprint Performance Measurement Plan*

“Project is a planned event where terms and conditions in which work is performed is agreed to by both the FLEC, Sprint and any other party engaged in the provisioning process. To allow for successful turn-up of facilities or conversion of facilities, each party must negotiate, in good faith, the timelines that allow required activities to be met, equipment ordered, placed and tested to meet the overall objectives of the project. The timeline must meet the rule of reasonable and prudent business practices. If the activity is not agreed to be a project, the transaction will be reported in the appropriate service group type.”

# Sprint Performance Measurement Plan

## IV. AUDITING

Deleted:

The Florida Public Service Commission (FPSC) ordered at least one annual independent third-party comprehensive audit. Based on the results of the initial independent comprehensive audit and any future reviews outlined in the Review Procedures, FPSC staff shall determine whether the interval for additional comprehensive third-party audits should be modified during the first five years after initial implementation.

The cost for a comprehensive annual audit shall be borne by Sprint within the first five years after implementation of the Florida Plan. During this time period, Sprint reserves the right to seek a waiver if it deems a comprehensive annual audit unnecessary.

Independent third-party auditors and audit scope shall be jointly selected by Sprint and the CLECs prior to initiating any third-party audit. If the parties cannot agree on the independent auditor, FPSC staff shall have final approval.

Deleted: ALEC

In addition to an audit, Sprint and the CLECs agree that the CLECs would have the right to mini-audits of individual performance measures during the year. When a CLEC has reason to believe the data collected for a measure is flawed or the reporting criteria for the measure is not being adhered to, it has the right to have a mini-audit performed on the specific measure upon written request (including e-mail), which will include the designation of a CLEC representative to engage in discussions with Sprint about the requested mini-audit. If, 45 days after the CLEC's written request, the CLEC believes that the issue has not been resolved to its satisfaction, the CLEC will commence the mini-audit upon providing Sprint with 5 business days advance written notice. Each CLEC would be limited to auditing five single measures during the year. The CLEC would pay for the mini-audit, including Sprint's reasonable associated costs and expenses, unless Sprint is found to be misreporting or misrepresenting data or to have non-compliant procedures, in which case, Sprint would pay for the mini-audit, including the CLECs' reasonable associated costs and expenses. If, during a mini-audit of individual measures, more than 50% of the measures in a major service category are found to have flawed data or reporting problems, the entire service category will be re-audited at the expense of Sprint. The major service categories for this purpose are:

Deleted: 3

Deleted: /1/03

## V. REVIEW PROCEDURES

For the first two years after this Florida Plan is implemented, collaborative reviews between Sprint and the CLECs are scheduled to be conducted every six months by FPSC staff. Based on input from the participants at each review and the need determined therein, FPSC staff will determine whether the interval for the next review should be adjusted.

# Sprint Performance Measurement Plan

## VI. DEFINITION OF TERMS

TERM	DEFINITION
Automatic Location Identifier (ALI)	The feature of E911 that displays at the Public Safety Answering Point (PSAP) the street address of the calling telephone number. This feature requires a data storage and retrieval system for translating telephone numbers to the associated address. ALI may include Emergency Service Number (ESN), street address, room or floor, and names of the enforcement, fire and medical agencies with jurisdictional responsibility for the address. The Management System (E911) database is used to update the Automatic E911 Location Identifier databases.
Affiliate	An entity that (directly or indirectly) owns or controls, is owned or controlled by, or is under common ownership or control with another entity. The Telecommunications Act defines "Own" as owning an equity interest (or equivalent thereof) of more than 10 percent, or as defined by state commissions."
Benchmark Measurable Standards	Benchmark measures have an agreed upon standard to determine compliance due the lack of a meaningful retail analog comparison.
Call Blocking	A condition on a telecommunications network where, due to a maintenance problem or an over capacity situation in a part of the network, some or all originating or terminating calls cannot reach their final destinations. Depending on the condition and the part of the network affected, the network may make subsequent attempts to complete the call or the call may be completely blocked. If the call is completely blocked, the calling party will have to re-initiate the call attempt.
Centralized Data Collection	Centralized Data Collection system collects hourly operational measurement data from switches/trunks groups for the LTD, and provides a direct feed to CIRAS. The information is used for traffic forecasting by trunk capacity planners.
Code Opening	Process by which new NPA/NXXs (area code/prefix) are defined, through software translations to network databases and switches, in telephone networks. Code openings allow for new groups of telephone numbers (usually in blocks of 10,000 or less with number pooling) to be made available for assignment to an ILEC's or CLEC's customers, and for calls to those numbers to be passed between carriers.
Common Channel Signaling System 7 (CCSS7)	A network architecture used to for the exchange of signaling information between telecommunications nodes and networks on an out-of-band basis. Information exchanged provides for call set-up and supports services and features such as CLASS and database query and response.
Common Transport	Trunk groups between tandem and end office switches that are shared by more than one carrier, often including the traffic of both the ILEC and several CLECs.
Completion	The time in the order process when the service has been provisioned and service has been deployed.
Completion Notice	A notice the ILEC provides to the CLEC to inform the CLEC that the requested service order activity is complete.
Coordinated Hot Cut	Coordinated Customer Conversion of Orders that have a due date negotiated between the ILEC, the CLEC, and the customer so that work activities can be performed on a coordinated basis under the direction of the receiving carrier
Customer Requested Due Date	A specific due date requested by the customer which is either shorter or longer than the standard interval or the interval offered by the ILEC.
Customer Trouble Reports	A report that the carrier providing the underlying service opens when notified that a customer has a problem with their service. Once resolved, the status of the trouble is changed to closed
Dedicated Transport	A network facility reserved to the exclusive use of a single customer, carrier or pair of carriers used to exchange switched or special, local exchange, or exchange access traffic.

## Sprint Performance Measurement Plan

TERM	DEFINITION
Delayed Order	An order which has been completed after the scheduled due date and/or time
Diagnostic Measurable Standards	This indicates that the results per the measurement will be reported for analysis purposes only and are not subject to determination of compliance or non-compliance.
Directory Assistance Database	A database that contains subscriber records used to provide live or automated operator-assisted directory assistance Including 411, 555-1212, NPA-555-1212
Directory Listings	Subscriber information used for DA and/or telephone directory publishing, including name and telephone number, and optionally, the customer's address.
DS-0	Digital Service Level 0. Service provided at a digital signal speed commonly at 64 kbps, but occasionally at 56 kbps
DS-1	Digital Service Level 1. Service provided at a digital signal speed of 1.544 Mbps.
DS-3	Digital Service Level 3. Service provided at a digital signal speed of 44 736 Mbps.
Due Date	The date provided on the FOC the ILEC sends the <u>CLEC</u> identifying the planned completion date for the order.
End Office Switch	A switch from which an end users' exchange services are directly connected and offered.
Firm Order Confirmation (FOC)	Notice the ILEC sends to the <u>CLEC</u> to notify the <u>CLEC</u> that it has received the <u>CLEC</u> 's service order, created a service request, and assigned it a due date.
Flow-Through	The term used to describe whether a LSR electronically is passed from the OSS interface system to the ILEC legacy system to automatically create a service order. LSRs that do not flow through require manual intervention for the service order to be created in the ILEC legacy system
Held Order	An order for which the ILEC has issued a FOC, but whose due date has passed without it being completed
Installation	The installation activity required to activate a service request.
Installation Troubles	A trouble, which is identified after service order activity and installation have been completed, on a customer's line. It is likely attributable to the service activity (within a defined time period).
Inside Wiring	The telecommunications wiring located at a customer's premises that extends beyond the demarcation point.
Interconnection Trunks	A network facility that is used to interconnect two switches generally of different local exchange carriers
Interface Outage	A planned or unplanned failure resulting in the unavailability or access degradation of a system
Jeopardy	A failure in the service provisioning process which results potentially in the inability of a carrier to meet the committed due date on a service order
Jeopardy Notice	The actual notice that the ILEC sends to the <u>CLEC</u> when a jeopardy condition has been identified
Lack of Facilities	A shortage of cable facilities identified after a due date has been committed to a customer, including the <u>CLEC</u> . The facilities shortage may be identified during the inventory assignment process, or during the service installation process. If no facilities are available, the ILEC will issue a jeopardy.

Deleted: 3

Deleted: 3

Deleted: /1/03

## Sprint Performance Measurement Plan

TERM	DEFINITION
Line Sharing	Unbundling of the local loop to make the high-frequency portion of the local loop available to CLECs, while the physical line and low-frequency voice path continues to be provided by the ILEC. Line Sharing allows customers to receive both services (voice and data) on the same line, eliminating the need for consumers to procure a second line.
Local Exchange Routing Guide (LERG)	A Telcordia master file that is used by the telecom industry to identify NPA-NXX routing and homing information, as well as network element and equipment designations. The file also includes scheduled network changes associated with activity within the North American Numbering Plan (NANP).
Local Exchange Traffic	Traffic originated on the network of a LEC in a local calling area that terminates to another LEC in a local calling area.
Local Number Portability	A network technology that allows end user customers to retain their telephone number when moving their service between local service providers. This technology does not employ remote call forwarding, but actually allows the customer's telephone number to be moved and redefined in the network of the new service provider. The activity to move the telephone number is called "porting".
Local Service Confirmation	OBF term for a FOC
Mechanized Bill	A bill that is delivered via electronic transmission.
Meet Point Billing	A billing arrangement used when two or more LECs jointly provide access to and from an interexchange carrier (IXC) for inter LATA traffic. This arrangement can be Single Bill, where one LEC bills the IXC on behalf of both LECs and remits payment to the other LEC or Multiple Bill, where each LEC bills their portion directly to the IXC.
Missed Commitment Notification	A notice from ILEC to inform CLEC that the committed due date on an order has been missed.
Non-Recurring Charge	A rate charged for a product or a service that is assessed on a one-time basis.
NXX, NXX Code or Central Office Code	The three digit switch entity indicator that is defined by the "D", "E", and "F" digits of a 10-digit telephone number within the NANP. Each NXX Code contains 10,000 station numbers.
Ordering and Billing Forum (OBF)	Industry forum that works to develop national ordering and billing standards.
Other Charges and Credits	Partial month recurring and non-recurring charges, installation, and other charges other than basic monthly charges appearing on a bill.
Parity Measurable Standards	Indicates a retail analog process or system exists and can report the ILEC and ILEC Affiliate results to be compared to the CLEC results.
Parity by Design	Parity by Design occurs where the same process or system is used for both CLEC and ILEC and does not allow the opportunity to discriminate or to recognize differences between CLEC activity and ILEC activity. As such, the results calculated will apply for all CLECs and ILEC measurable standards.
Permanent Number Portability (also known as Local or Long Term Number Portability)	A network technology that allows end user customers to retain their telephone number when moving their service between local service providers. This technology does not employ remote call forwarding, but actually allows the customer's telephone number to be moved and redefined in the network of the new service provider. The activity to move the telephone number is called "porting".

## Sprint Performance Measurement Plan

TERM	DEFINITION
Physical Collocation	Shall have the meaning set forth in 47 C.F.R. Section 51.5.
Plain Old Telephone Service (POTS)	Refers to basic 2 wire analog residential and business services. Can include feature capabilities (e.g., CLASS features).
Projects	Service requests that exceed the line size and/or level of complexity that would allow for the use of standard ordering and provisioning processes. Generally, due dates for projects are negotiated, coordination of service installations/changes is required and automated provisioning may not be practical.
Provisioning Troubles	A trouble report that is opened for a customer's existing or new service for a trouble identified between the time of the service order creation to the time of order completion. Provisioning troubles that are associated with a CLEC's customers include troubles that occur and are reported during the conversion of an ILEC customer to a CLEC.
Query Types	Pre-ordering information that is available to a CLEC that is categorized according to standards issued by OBF, the FCC and/or the Florida PSC.
Recurring Charge	A rate charged for a product or service that is assessed each successive billing period.
Reject	A status that can occur to a CLEC submitted local service request (LSR) when it does not meet certain criteria. There are two types of rejects: syntax, which occurs if required fields are not included in the LSR and content, which occur if invalid data is provided in a field. A rejected service request must be corrected and re-submitted before provisioning can begin.
Repeat Report	Any trouble report that is a second (or greater) report on the same telephone number/circuit ID and at the same premise address within 30 days. The original report can be any category, including excluded reports, and can carry any disposition code.
Service Group Type	The designation used to identify a category of similar services, e.g., UNE loops.
Service Order	The work order created and distributed in ILECs systems and to ILEC work groups in response to a complete, valid service request.
Service Order Type	The designation used to identify the major types of provisioning activities associated with a service request.
Service Request	The transaction sent from the CLEC to the ILEC to order services or to request a change(s) be made to existing services.
Standard Interval	The interval that the ILEC quotes to its customers with respect to how long it will take to provision a service request. These intervals are standardized by specific service type and type of service modification requested. ILECs publish these standard intervals in documents used by their own service representatives as well as ordering instructions provided to CLECs. POTS services do not have standard intervals; their installation intervals are based on force available and workload. They may change as frequently as twice a day.
Subsequent Reports	A trouble report that is taken on a previously reported trouble prior to the date and time the initial report has a status of "cleared".
Summarized Charges	Billing charges that are aggregated on the bill, rather than individually itemized, e.g., local usage minutes on resale or retail calls, which are listed on the bill as "xx" minutes with no call detail.

## Sprint Performance Measurement Plan

TERM	DEFINITION
Tandem Switch	Switch used to connect and switch trunk circuits between and among Central Office switches.
Time to Restore	The time interval from the receipt, by the ILEC, of a trouble report on a customer's service to the time service is fully restored to the customer.
Transport	A carrier facility medium in which transmission takes place. Transport carries voice and data from point A to point B, usually between two offices. Transport medium includes copper wire, fiber optics, microwave and satellite.
Trouble Cause Code	A code identifying the known or suspected cause of a trouble condition
Trouble Disposition	A code identifying the end result of diagnostic and/or repair activities on a customer trouble report.
Usage Data	Data generated in network nodes to identify switched call data on a detailed or summarized basis. Usage data is used to create customer invoices for the calls.
Usage Records	The individual call records created in a switch to report the date, time, duration, calling and called numbers associated with a given call
Virtual Collocation	Shall have the meaning set forth in 47 C F R Section 51.5.

## VI. GLOSSARY OF ACRONYMS

ACRONYM	DESCRIPTION
ALEC	Alternative Local Exchange Carrier (term equivalent to CLEC)
ALI	Automatic Location Identifier (for E911 systems)
AS	Affecting Service (type of trouble condition)
BDT	Billing Data Tape
BRI	Basic Rate Interface (type of ISDN service)
CHC	Coordinated "Hot" Cut
CKT	Circuit
CLEC	Competitive Local Exchange Carrier (term equivalent to ALEC)
CO	Central Office
CPE	Customer Premises Equipment
CSR	Customer Service Record
DA	Directory Assistance
dB	Decibel
DDS	Digital Data Service
DID	Direct Inward Dialing
DS0	Digital Service 0
DS1	Digital Service 1
DS3	Digital Service 3
E911 MS	E911 Management System
EAS	Equal Access Service
EDI	Electronic Data Interchange
FOC	Firm Order Confirmation
GUI	Graphical User Interface
HDSL	High-bit-rate Digital Subscriber Line
HICAP	High Capacity Digital Service
IEC/XC	Inter-exchange Carrier
ILEC	Incumbent Local Exchange Carrier
IRES	Integrated Request Entry System
N, T, C	Service Order Types - N(new), T(to or transfer), and C(change)
ISDN	Integrated Services Digital Network
IW	Inside Wire
LATA	Local Access Transport Area
LERG	Local Exchange Routing Guide
LNP	Local (or Long Term) Number Portability

Deleted: 3  
 Deleted: 3  
 Deleted: //03

## Sprint Performance Measurement Plan

ACRONYM	DESCRIPTION
LSMS	Local Service Management System
LSR	Local Service Request
MRC	Missed Appointment Reason Code
NANP	North American Numbering Plan
NDM	Network Data Mover
NPAC	Number Portability Administration Center
NXX	Telephone number prefix
OBF	Ordering and Billing Forum
OOS	Out of service (type of trouble condition)
OSS	Operations Support System
PBX	Private Branch Exchange
PON	Purchase Order Number
POTS	Plain Old Telephone Service
PRI	Primary Rate Interface (type of ISDN service)
PSC	Public Service Commission (term equivalent to PUC)
PUC	Public Utilities Commission (term equivalent to PSC)
SCP	Service Control Point
SGT	Service Group Type
SOT	Service Order Type
SS7	Signaling System 7
STP	Signaling Transfer Point
TN	Telephone Number
UNE	Unbundled Network Element
VGPL	Voice Grade Private Line
xDSL	(x) Digital Subscriber Line

**B. MISSED APPOINTMENT REASON CODES**  
**Sprint - Retail**

Code	Customer Reasons - Description
AB	This code will indicate working service was found at the time of installation and delayed the original due date installation.
CL	The due date was not met due to inaccurate or incomplete information received from the customer to work the service order.
RD	The customer called and requested a different date prior to the appointed due date.
SA	Plant employee attempted to complete order on appointed date but could not gain access to the customer's premise.
SO	The installation was delayed because customer requested an instrument that is not normally offered and it had to be special ordered.
SR	The customer indicated he was not ready for completion of the request on the original due date or provided incomplete or incorrect information which prohibited completion of the request on the original due date (trip was made).

**MISSED APPOINTMENT REASON CODES**  
**Sprint - Retail**

Code	Company Reasons - Description
PL	Unanticipated plant workload precluded the completion of the order on the original due date.
SE	Request was delayed because there was a temporary lack of standard station equipment.
PF	Lack of plant facilities delayed the completion of the order.
PB	Bad cable pair or cable plant exists.
IW	Inclement weather delayed installation.
CE	Commercial provided incomplete or inaccurate information.
ME	Marketing provided incomplete or inaccurate information.
CO	Any other Company Reason.

## C. DISPOSITION CODES Sprint

Code	Description
CAN	Cancellation of ticket at customer request
CC	Came Clear
CO	Central Office – The trouble was found in central office equipment. This includes concentrators, remotes, OPMs.
CPE	Customer Provided Equipment – Trouble found in the end user's equipment or wiring. This also includes extended demarc. If the problem was customer action, XCC is used.
FAC	Facility – Anything from the local distribution frame protector to the protector on the end user site.
INF	Ticket created for informational purposes only
HSD	High Speed Data
OTH	Other – Sprint LTD Network
<b>ND</b>	Natural Disaster – Hurricane, Earthquake, Tornado, Volcano, Typhoon
STN	Station – Network Interface Devices (NIDs), loopback devices, jacks, up to the demarc
TOK	Test Okay/No Trouble Found – Could not identify the problem the customer reported either through remote or field testing.
TRN	Transport – Troubles isolated to an outage caused by a transport issue in the Sprint network. These outages are generally isolated to DS3 or higher service types.
<b>XCC</b>	<b>IXC/CLEC/CLFC</b>
CCO	Connecting Company – The problem was identified in connecting company network or equipment, referrals to connecting company.
TT	Translations Trouble
UNK	Unknown
PRV	Provisioning Trouble

Deleted: /1/03

# Sprint Performance Measurement Plan

## Overview

The Telecommunications Act of 1996 ("the Act"), and the FCC's associated rules, require incumbent local exchange carriers ("ILECs") to provide competitive local exchange carriers ("CLECs") with nondiscriminatory access to operations support systems ("OSS"). In the August 1996 Local Competition First Report and Order, the FCC commented generally that ILECs must provide CLECs with access to the pre-ordering, ordering, provisioning, billing, repair, and maintenance OSS sub-functions pursuant to the Act, such that CLECs are able to perform such OSS sub-functions in "substantially the same time and manner" as the ILECs can for themselves. In August of 1997, the FCC's *Ameritech Opinion* analyzed the nondiscriminatory access requirements of §251(c) to a Regional Bell Operating Company's ("RBOC's") §271 application, and clarified that for those OSS sub-functions with retail analogs, a RBOC "must provide access to competing carriers that is equal to the level of access that the RBOC provides to itself, its customers or its affiliates, in terms of quality, accuracy and timeliness." The FCC further clarified in the *Ameritech Opinion* that for those OSS functions with no retail analog, a BOC must offer access sufficient to allow an efficient competitor "a meaningful opportunity to compete."

This document describes the method used to determine parity and benchmark compliance for measures in the Sprint Performance Measurement Plan (PMP). Also described are the associated provisions that are necessary counterparts to the parity methodology (e.g., forgiveness and materiality) and benchmark methodology (e.g., small sample adjustments), and provisions that are associated with determination of compliance. This methodology is appropriate for Sprint and yields actionable compliance information regarding Sprint's service to CLEC customers.

# Sprint Performance Measurement Plan

## 1. General Principles

1.1 The Compliance Methodology described herein is to be associated with the Commission approved Sprint Performance Measurement Plan (the "PMP").

Deleted: state c

1.2 The Compliance Methodology describes the method for determining compliance for parity measures (those measurements where the level of service that Sprint provides to CLECs can be compared to the level of service Sprint provides to its retail customers), and for benchmark measures (those measurements for which there is no comparable level of service between the service Sprint provides to CLECs and the service Sprint provides to its retail customers).

Deleted: ALEC

Deleted: ALEC

1.3 Sprint will calculate compliance on a submeasure basis under the provisions of this methodology. A submeasure is the individual, disaggregated reported result for each measurement defined in Sprint's PMP.

Deleted: for each reportable

Deleted: ALEC

Deleted: CLEC

Inserted: CLEC

1.4 For parity measurements, Sprint will use statistical testing to determine whether any submeasure differences between Sprint's retail results and Sprint's results for the individual CLEC, are statistically significant. Various statistical testing methodologies will be used for measures reported as means (averages), proportions (percentages) and rates.

Deleted: ALEC

1.4.1 For parity measurements, where a submeasurement difference between Sprint's retail results and the results for the individual CLEC is found to be statistically significant, a measure of severity (see Attachment B) will be calculated.

Deleted: ALEC

1.5 For benchmark measurements, Sprint's performance results for each CLEC will be compared to the benchmark defined in the PMP, without the use of statistical testing for significance. If Sprint's performance results for the CLEC are observed to be at a level of service that does not meet the benchmark, the result will be considered noncompliant,

Deleted: ALEC

Deleted: ALEC

Deleted:

1.5.1 For benchmark measurements, if the result is found to be noncompliant, a measure of severity (see Attachment B) will be calculated.

1.6 The determination of compliance is further subject to certain Compliance Accuracy Provisions as described in this document.

1.7 Compliance will not be calculated for specific (sub)measurements per the PMP:

1.7.1 For any measurement or submeasurement classified in the PMP as "Diagnostic Only", "Parity by Design" or with benchmark level "TBD".

1.7.2 For any result that contains 4 or fewer Sprint or CLEC transactions. These results will be reported but no compliance will be assessed.

Deleted: ALEC

Deleted: 3

Deleted: 3

Deleted: /1/03

# Sprint Performance Measurement Plan

## 2. Compliance Methodology for Benchmark Measurements

2.1 Sprint service performance levels that do not achieve the benchmarks will be considered noncompliant. No statistical evaluation is performed for benchmark submeasures to determine compliance.

2.2 A measure of severity,  $D_B$  (called "D sub B", see Attachment B), will be calculated for each noncompliant benchmark submeasure, based upon the difference between the service performance levels Sprint provides to each individual CLEC, and the benchmark standard.

Deleted: ALEC

2.2.1 The following table sets forth the severity level for benchmark *proportion* measures, per affected CLEC per submeasure, when service does not meet the benchmark:

Deleted: ALEC

BENCHMARK PROPORTION MEASURES	
Performance Level	Severity Level
$0 < D_B < 5$	Minor
$5 \leq D_B < 15$	Moderate
$D_B \geq 15$	Severe

2.2.2 A different performance level is appropriate for benchmark *mean* measures. The following table sets forth the severity level for benchmark *mean* measures, per affected CLEC per submeasure, when service does not meet the benchmark:

Deleted: ALEC

BENCHMARK MEAN MEASURES	
Performance Level	Severity Level
$0 < D_B < 25$	Minor
$25 \leq D_B < 50$	Moderate
$D_B \geq 50$	Severe

## 3. Statistical Testing Methodology for Parity Measurements

3.1 Statistical testing will be conducted when the CLEC result is "worse" than the Sprint result and there are at least 5 transactions each for Sprint retail and individual CLEC. Results for 4 or fewer transactions will be reported for diagnostic purposes.

Formatted: Font: (Default) Times New Roman, 12 pt

Deleted: Statistical testing will be conducted when

3.2 The general statistical testing methodology is to conduct a hypothesis test with  
 $H_0$  : CLEC performance is "better than or equal to" Sprint performance.  
 $H_1$  : CLEC performance is "worse than" Sprint performance.

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

Deleted: 3

3.2.1 Calculations are made under the assumption that larger performance measurement values indicate worse service. For measures where this assumption does not hold

Deleted: 3

Deleted: /1/03

## Sprint Performance Measurement Plan

true (i.e. larger values indicate better service), the calculation of a test statistic will be reversed. In other words, a difference between Sprint and CLEC service will always be shown as a numerically negative difference when CLEC service is worse.

Deleted: ALEC

Deleted: ALEC

3.3 Any statistical test yielding a p-value will be converted to a z-score for purposes of reporting consistency, and to enable calculation of the severity value.

3.4 A significance level, or Type I error rate, of 10% will be used for testing purposes.

3.4.1 This results in a critical value of  $-1.2817$  for z-scores. Any z-score less than or equal to  $-1.2817$  will result in a rejection of  $H_0$ .

3.4.2 Modifications are made to the traditional t-statistic typically used for testing the difference between two means (due to sensitivity to testing assumptions). The "adjusted, asymmetric two-sample t-test" is designed to test the difference between means, without sensitivity to a larger CLEC variance, while adjusting for bias caused by population skewness. Instead of pooling the variances from both Sprint retail and CLEC observations, only using Sprint variance increases the ability of the test statistic to identify a difference in means should the CLEC have a greater variation. A modified z-score is calculated at the cell level by converting the adjusted, asymmetric t-test statistic via the respective probability density function.

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

3.5 All statistical tests will be performed at the submeasure level, per CLEC.

Deleted: ALEC

3.5.1 Statistical comparisons made at the cell-level, when applicable, will be aggregated into a single test statistic at the submeasure level.

3.5.2 Attachment A outlines all statistical techniques utilized for any cell-level comparisons, as well as all test statistics.

3.6 When approved by the Commission on a measurement/submeasurement basis, Sprint's retail data and CLEC data will be compared at levels that provide the most accurate parity comparisons (i.e., wire center, etc...).

Deleted: ALEC

3.6.1 For statistical validity, the parity comparison between CLEC and Sprint retail data will be made with data generated from similar processes and conditions. Since the performance data are collected from daily operations, they are "observed" results. These observed results, or observational data, may not be produced under similar procedures and conditions.

Deleted: ALEC

3.6.1.1 This level of comparison is to ensure a "like-to-like" comparison, and is referred to as the "cell level". The like-to-like comparison is a necessary condition for achieving correct statistical testing results for both Sprint retail and CLEC data.

Deleted: ALEC

Deleted: 3

Deleted: 3

Deleted: /1/03

## Sprint Performance Measurement Plan

3.6.1.1.1 For example, suppose a new CLEC starts operations around a single wire center. For some period of time, a large percentage of the CLEC's service orders are 'N' (New) orders. When compared to Sprint's retail service orders that included 'N', 'C' and 'T' (New, Change, and Transfer) orders, Sprint may be called out of parity erroneously because 'N' orders typically take longer than 'C' or 'T' orders. By comparing only the Sprint 'N' orders to CLEC 'N' orders, a true result can be obtained.

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

3.6.1.1.2 Cell-level comparisons are for statistical accuracy, and do not necessitate additional detail in the reported submeasure level as defined in the PMP.

3.6.2 Cell level comparisons will be proposed by Sprint and submitted for approval by the Commission on a per-submeasure or per-measure basis.

3.6.2.1 Measurement/submeasurements with Commission-approved cell-level comparisons are listed in Attachment C.

3.6.2.2 When like-to-like comparisons are approved for a specific measure or submeasure, results will be calculated using various statistical techniques appropriate for cell level comparisons (see Attachment A for detailed methodology).

3.6.2.3 When there is more than one cell for a submeasure, the z-scores at the cell level will be aggregated into one overall test statistic, called the "truncated z-score" (see Attachment A), which is used to determine whether a statistically significant difference exists at the submeasure level. A submeasure with a single cell will not be aggregated into the truncated z-score, but will simply use the z-score as calculated for the cell.

3.6.2.4 If entries in comparison cells are exactly proportional over a covariate, the aggregated index should be very nearly the same as if comparisons on the covariate had not been done. In other words, if relative performance between Sprint retail and CLEC service at the cell level is equivalent (for all cells) to relative performance at the reporting level, then the aggregated z-score should be roughly the same as a modified z-score applied at the reporting level.

Deleted: ALEC

3.6.2.5 The contribution of each comparison cell should depend on the number of observations in the cell.

3.6.2.6 Cancellation between comparison cells will be limited. In other words, positive outcomes should not be allowed to cancel negative ones.

Deleted: 3

Deleted: 3

Deleted: /1/03

## *Sprint Performance Measurement Plan*

3.7 A measure of severity,  $D_p$  (called “D sub P”, see Attachment B) will be associated with a difference between the service performance levels Sprint provides to each individual CLEC and the service performance levels Sprint provides to its retail customers when service is determined to be out of parity.

Deleted: ALEC

3.7.1 The following table sets forth the parity severity levels, per affected CLEC per submeasure, when the result is found to be noncompliant:

Deleted: ALEC

PARITY MEASUREMENTS	
Measure of severity	Severity Level
$0 <  D_p  < .5$	Minor
$.5 \leq  D_p  < 2$	Moderate
$ D_p  \geq 2$	Severe

### 4. Compliance Accuracy Provisions

4.1 The use of statistical testing for parity measures helps to mitigate the risk of noncompliance due simply to random variation in processes. However, due to the nature of the statistical tests, the expectation is that noncompliance will periodically be assessed even when a state of consistent parity exists (called a Type I error). To compensate for the impact of Type I errors, Sprint will utilize the following forgiveness plan to improve the accuracy of compliance assessment. This forgiveness plan is applied separately for each submeasure and each CLEC as follows:

Deleted: ALEC

4.2 Sprint’s noncompliance will be forgiven on a submeasure basis only when certain criteria are met. These criteria are:

4.2.1 For every submeasure, per CLEC, the first accrued forgiveness will occur upon the first month of activity, and again every six (6) months of activity thereafter.

Deleted: ALEC

4.2.2 Each forgiveness must be used within six (6) months upon accrual. In other words, an accrued forgiveness is lost if not used within six (6) months.

4.2.3 If there is no activity for a particular submeasure, per CLEC, for twenty-four (24) consecutive months, the process of accruing forgivenesses will begin again upon the next month of activity. In other words, Sprint will not track inactivity beyond twenty-four (24) months for the purpose of accruing forgivenesses.

Deleted: ALEC

4.2.4 A forgiveness can only be used to offset noncompliance for the same submeasure, and CLEC, for which the forgiveness was originally accrued.

Deleted: ALEC

4.2.5 If a forgiveness is available to be used, it must be used at the first opportunity, with the following exception:

Deleted: 3

Deleted: 3

Deleted: /1/03

## *Sprint Performance Measurement Plan*

4.2.6 A forgiveness may never be used, for a particular submeasure and CLEC, in consecutive months.

Deleted: ALEC

4.2.7 Available forgivenesses may not offset a severe non-compliance.

4.3 Sprint will implement materiality thresholds:

4.3.1 Materiality thresholds mitigate situations where benchmark results or parity comparisons misidentify differences as significant. This is due to the fact that small-sample benchmark results, or parity statistical significance, is not necessarily synonymous with business significance. Situations that produce misidentification of differences as significant include but are not limited to the following:

4.3.1.1 Small samples for parity measures. For measures typically associated with small samples, the measure itself can be highly sensitive to small differences in service. Similar to the small sample adjustment used for benchmark proportion measures, small samples for parity measures (especially proportion and rate measures) can result in the need for perfect or near-perfect service in order to be deemed compliant. For example, the measure *Trouble Report Rate* is defined as the number of trouble tickets per month divided by the number of access lines the customer has. Due to small CLEC transaction sizes, a single trouble report for a CLEC with few access lines can produce non-compliance. Since one trouble report for a month does not have a significant impact on the CLEC's ability to compete, this is a statistically significant difference that is not synonymous with business significance.

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

### **Measurement 19**

The following adjustment table applies to all submeasures in Measurement 19, and will be applied when a statistically significant difference is identified:

Number of <u>CLEC</u> Access Lines ( <u>CLEC</u> Denominator)	Permitted Troubles
1 to 4	n/a (no compliance assessment)
5 to 24	1
25 to 74	2
75 or more	3

Deleted: ALEC

Deleted: ALEC

For example: For a CLEC with 100 access lines and 1 trouble, accompanied by a statistically significant difference, this table indicates that more than 3 troubles would be required before a significant business impact would occur. As a note for how *not* to use this table, consider a CLEC with 4 troubles and better than parity service (i.e. the CLEC is receiving better service than the retail results). This table does not indicate that no more than 3 troubles are ever allowable. It is used only when there is a statistically significant difference identified.

Deleted: ALEC

Deleted: ALEC

Deleted: ALEC

Deleted: 3

Deleted: 3

Deleted: /1/03

# Sprint Performance Measurement Plan

4.3.1.2 Large samples for parity measures. Submeasures with a high volume of CLEC transactions produce statistical comparisons that are overly sensitive to small differences between Sprint and CLEC results. This can produce non-compliance when the actual difference in Sprint and CLEC results is very small. For example, if a CLEC has thousands of submeasure transactions in a month, there may be a statistically significant difference, but only a slight difference in results (i.e., a difference of 0.4% on *Usage Completeness*). Since this type of difference does not significantly impact the CLEC's ability to compete, this is a statistically significant difference that is not synonymous with business significance.

Deleted: ALEC  
 Deleted: ALEC  
 Deleted: ALEC  
 Deleted: ALEC  
 Deleted: ALEC

4.4 For benchmark proportion measures, small samples can result in the need for service beyond the benchmark in order to achieve compliance. For instance, the only way to achieve a 95% benchmark with 19 orders would be to fail on none. One failure would result in performance of 94.7%. The small sample adjustments to benchmark proportion measures would, for example, allow for 1 failure in the 19 orders to achieve compliant performance.

4.4.1 Sprint will implement the following table for Small Sample Adjustments to all Benchmark Proportion Measures:

Small Sample Adjustments to Benchmark Proportion Measures							
90% Benchmark		95% Benchmark		98% Benchmark		99% Benchmark	
Sample Size (CLEC Denominator)	Maximum Permitted Misses	Sample Size (CLEC Denominator)	Maximum Permitted Misses	Sample Size (CLEC Denominator)	Maximum Permitted Misses	Sample Size (CLEC Denominator)	Maximum Permitted Misses
1 to 4	n/a	1 to 4	n/a	1 to 4	n/a	1 to 4	n/a
5 to 9	1	5 to 19	1	5 to 49	1	5 to 97	1
10 to 20	2	20 to 40	2	50 to 99	2	98 to 202	2
21 to 31	3	41 to 63	3	100 to 149	3	203 to 319	3
32 to 44	4	64 to 88	4	150 to 199	4	320 to 445	4
45 to 50	5	89 to 100	5	200 to 250	5	446 to 500	5

Deleted: ALEC  
 Deleted: ALEC  
 Deleted: ALEC  
 Deleted: ALEC

4.5 Sprint may perform a limited root-cause analysis process within 45 days of the issuance of the monthly performance reports to provide a reasonable opportunity to explain exceptional conditions. When a root-cause analysis is invoked, Sprint will have the burden of proving that but for the occurrence of an "exceptional condition" Sprint would have succeeded on the submeasure.

4.5.1 Examples of these exceptional conditions include, but are not limited to the following:

4.5.1.1 Significant activity by a third party external to and not controlled by Sprint (e.g., damaged facilities, third party systems, bomb threats)

4.5.1.2 Failure of a CLEC process or system (e.g., CLEC switch failure, CLEC backlog of orders)

Deleted: ALEC  
 Deleted: ALEC  
 Deleted: ALEC  
 Deleted: 3  
 Deleted: 3  
 Deleted: 1/1/03

## Sprint Performance Measurement Plan

4.5.1.3 Environmental events not considered force majeure (e.g., fire or other hazardous condition)

4.5.1.4 Force majeure events

4.5.2 Sprint will not be required to utilize a forgiveness if it is determined that noncompliance is not warranted due to an exceptional condition under this section.

4.5.3 If Sprint finds that an exceptional condition had a significant impact on Sprint's ability to provide compliant service, Sprint will exclude the affected data from results and publish a notification and full justification on the reporting website.

4.5.3.1 If the exceptional condition was identified after the affected results were reported, Sprint will exclude the affected data from results, publish a notification and full justification on the reporting website, and repost the results in accordance with the Reporting Obligations section of this Methodology.

4.5.4 Commission Staff or a CLEC may initiate a request for a review of differences associated with the assessment of exceptional conditions. If modification of reports is found to be appropriate, Sprint will repost the results in accordance with the Reporting Obligations section of this Methodology.

Deleted: ALEC

4.5.4.1 If the review process does not yield a mutually acceptable outcome, Commission Staff or a CLEC may initiate a request for an expedited hearing process in accordance with the Commission's rules to resolve differences. If modification of reports is requested by the Commission, Sprint will repost the recommended results in accordance with the Reporting Obligations section of this Methodology.

Deleted: ALEC

### 5. Reporting Obligations

5.1 The due date for reporting performance measurements will be no later than the 20<sup>th</sup> calendar day of the month, unless otherwise approved by the Commission.

5.2 Sprint must publish results for all "reportable" CLECs. Reportable CLECs meet one or more of the following criteria:

5.2.1 The CLEC must have placed one (1) or more CLEC product orders in the reporting month.

5.2.2 The CLEC must have one (1) or more CLEC access lines.

## *Sprint Performance Measurement Plan*

5.2.3 The CLEC must utilize an electronic ordering interface (i.e., IRES, FTP) to submit orders.

Deleted: ALEC

5.3 If stated in the Performance Measurement Plan, additional reporting obligations will apply.

### **6. Uniform Business Rules**

6.1 To ensure a unified plan across Sprint LTD states, Sprint will propose to the Florida Commission changes to measurement business rules ordered in other Sprint LTD states if applicable to the Florida PMP.

6.1.1 When other Sprint LTD states issue an order approving changes to the Sprint PMP measurement business rules, and those changes are applicable to the Florida PMP, Sprint will notify the Commission of performance measurement changes by other states, and file such changes in the appropriate docket. Such changes will be filed within 15 days of the order being issued in other states. Interested CLECs and Commission Staff shall be allowed an opportunity to review such changes before a recommendation is brought before the FPSC.

## Attachment A

### Statistical Calculations for Parity Submeasurements

**Statistical methods:**

<i>SAMPLE SIZE</i>	<i>TYPE OF MEASURE</i>	<i>STATISTICAL METHOD (WITHOUT CELL LEVEL COMPARISONS)</i>	<i>STATISTICAL METHOD (WITH CELL LEVEL COMPARISONS)</i>
“small”	mean	Permutation Testing	Permutation Testing (p-value converted to a z-score)
	proportion	Fisher’s Exact Test (i.e. Hypergeometric)	Standard Z, with finite population correction
	rate	Binomial Test	Standard Z, with finite population correction
“large”	mean	Modified Z, with skewness correction (Sprint variance used, rather than pooled variance)	Modified Z, with skewness correction (Sprint variance used, rather than pooled variance)
	proportion	Standard Z, with finite population correction	Standard Z, with finite population correction
	rate	Standard Z, with finite population correction	Standard Z, with finite population correction

**Statistical functions definitions:**

$\Phi^{-1}(x)$       Inverse cumulative standard normal distribution function.  
 $pt(t, df)$       Cumulative distribution function of a t-statistic with df degrees of freedom.

$BN(x, n, p)$       Binomial distribution density function. The probability of observing x of n successes with a probability p of success.

$CBN(x, n, p)$       Cumulative binomial distribution function.

$$CBN(x, n, p) = P(B \leq x) = \begin{cases} 0(x < 0) \\ \sum_{k=0}^x BN(k) (0 \leq x \leq n) \\ 1(x > n) \end{cases}$$

$HG(q, m, n, k)$       Hypergeometric distribution density function where q represents the number of red balls out of a sample of size k drawn from an urn containing m red balls and n black ones.

Deleted: 3

Deleted: 3

Deleted: 1/03

## Sprint Performance Measurement Plan

- CHG*(*q, m, n, k*) Cumulative hypergeometric distribution.
- $$CHG(q, m, n, k) = P(H \leq q) = \begin{cases} 0 & (q < \max(0, k - m)) \\ \sum_{h=\max(0, k-m)}^q HG(h) & (\max(0, k - m) \leq q \leq \min(k, m)) \\ 1 & (q > \min(k, m)) \end{cases}$$
- rank*(*x*) Ranks the input variables. In case of ties, the average rank is calculated.
- choose*(*n, k*) Calculates the binomial coefficients.

**Global variable definitions:**

- L* = The total number of occupied cells.<sup>1</sup>
- j* = An index counter indicating cell number.
- n<sub>1j</sub>* = The number of Sprint transactions in cell *j*.
- n<sub>2j</sub>* = The number of CLEC transactions in cell *j*.
- n<sub>j</sub>* = The total number of transactions in cell *j*.
- X<sub>1jk</sub>* = Individual Sprint transactions in cell *j*.
- X<sub>2jk</sub>* = Individual CLEC transactions in cell *j*.
- $\Phi^{-1}$  = Inverse cumulative standard normal distribution function.

Deleted: ALEC

**Mean Performance Measures<sup>2</sup>**

At this time, the following calculations will apply to parity submeasures contained in measures 6, 7, 13, 14, 21, and 44. Any subsequent change to measure classification (mean, proportion, rate) to a measure or submeasure in the PMP will take precedence over this list.

Deleted: 28,

**Variable definitions:**

<i>STATISTIC</i>	<i>DEFINITION</i>	<i>EXPLANATION</i>
$\bar{X}_{1j} = \frac{1}{n_{1j}} \sum_{k=1}^{n_{1j}} X_{1jk}$	Sprint sample mean of cell <i>j</i> .	Add observations and divide by the number of observations.
$\bar{X}_{2j} = \frac{1}{n_{2j}} \sum_{k=1}^{n_{2j}} X_{2jk}$	CLEC sample mean of cell <i>j</i> .	Add observations and divide by the number of observations.

Deleted: ALEC

<sup>1</sup> If comparisons are performed at the submeasure level, L = 1 and only one cell (the submeasure) exists. If comparisons are performed at the cell level, L may exceed 1 and more than one cell may exist (see Attachment C for the list of (sub)measurements approved for comparison at the cell level).

<sup>2</sup> Only perform STEP 4 and STEP 5 if L > 1 (e.g., if this is a cell-level comparison, and there is more than one cell with CLEC activity, then perform STEP 4 and STEP 5).

Deleted: 3

Deleted: 3

Deleted: /1/03

## Sprint Performance Measurement Plan

$$s_{1j}^2 = \frac{1}{n_{1j} - 1} \sum_{k=1}^{n_{1j}} (X_{1jk} - \bar{X}_{1j})^2$$

Sprint sample variance in cell j. May be NA for very small sample sizes.

Subtract each observation by its mean, square the difference, add them all up, and divide by the number of observations minus 1.

$$s_{2j}^2 = \frac{1}{n_{2j} - 1} \sum_{k=1}^{n_{2j}} (X_{2jk} - \bar{X}_{2j})^2$$

CLEC sample variance in cell j. May be NA for very small sample sizes.

Subtract each observation by its mean, square the difference, add them all up, and divide by the number of observations minus 1.

Deleted: ALEC

$$\gamma_{1j} = \frac{\frac{1}{n_{1j}} \sum_{k=1}^{n_{1j}} (X_{1jk} - \bar{X}_{1j})^3}{\left[ \frac{1}{n_{1j}} \sum_{k=1}^{n_{1j}} (X_{1jk} - \bar{X}_{1j})^2 \right]^{3/2}}$$

The Sprint sample skewness in cell j. May be NA for very small sample sizes.

Subtract each observation by its mean, cube the difference, add them all up, and divide by the number of observations. Then divide that number by the cubed square root of the population variance.

$$\gamma_{2j} = \frac{\frac{1}{n_{2j}} \sum_{k=1}^{n_{2j}} (X_{2jk} - \bar{X}_{2j})^3}{\left[ \frac{1}{n_{2j}} \sum_{k=1}^{n_{2j}} (X_{2jk} - \bar{X}_{2j})^2 \right]^{3/2}}$$

The CLEC sample skewness in cell j. May be NA for very small sample sizes.

Subtract each observation by its mean, cube the difference, add them all up, and divide by the number of observations. Then divide that number by the cubed square root of the population variance.

Deleted: ALEC

$XY_j$

Combined Sprint and CLEC samples.

Concatenate the Sprint and CLEC samples into a single variable.

Deleted: ALEC

Deleted: ALEC

### STEP 1: Calculate Cell Weights

$$W_j = \sqrt{\frac{n_{1j} n_{2j}}{n_j}}$$

For each cell, multiply the Sprint sample size and the CLEC sample size, divide by their sum, and take a square root.

Deleted: ALEC

If all Sprint and CLEC transactions within a cell have identical performance measures (e.g. service durations), set  $W_j = 0$ .

Deleted: ALEC

### STEP 2: Calculate a Z-statistic for each cell

a. If  $W_j = 0$ , then set  $Z_j = 0$ .

b. If  $\min(n_{1j}, n_{2j}) > 6$  and  $s_{1j}^2 > 0$

Deleted: 3

Deleted: 3

Deleted: /1/03

## Sprint Performance Measurement Plan

$$T_j = \begin{cases} t_j + \frac{g}{6} \left( \frac{n_{1j} + 2n_{2j}}{\sqrt{n_{1j} n_{2j} (n_{1j} + n_{2j})}} \right) \left( t_j^2 + \frac{n_{2j} - n_{1j}}{n_{1j} + 2n_{2j}} \right) & t_j \geq t_{mnj} \\ t_j + \frac{g}{6} \left( \frac{n_{1j} + 2n_{2j}}{\sqrt{n_{1j} n_{2j} (n_{1j} + n_{2j})}} \right) \left( t_{mnj}^2 + \frac{n_{2j} - n_{1j}}{n_{1j} + 2n_{2j}} \right) & \text{otherwise} \end{cases}$$

where

$$t_j = \frac{\bar{X}_{1j} - \bar{X}_{2j}}{s_{1j} \sqrt{\frac{1}{n_{1j}} + \frac{1}{n_{2j}}}},$$

$$t_{mnj} = \frac{-3\sqrt{n_{1j} n_{2j} n_j}}{g(n_{1j} + 2n_{2j})}$$

and  $g$  is the median value of all values of  $\gamma_{1j}$  over all cells within the submeasure (reporting level) such that

- i)  $\gamma_{1j} > 0$
- ii)  $n_{1j} > 6$ , and
- iii)  $n_{1j} > n_{3q}$ , where  $n_{3q}$  is the 3 quartile of all  $n_{1j}$  in cells where (i) and (ii) are true.

If no cells within a submeasure exist that satisfy conditions (i) - (iii), then set  $g = 0$ .

Calculate the p-value from the  $T_j$  statistic with  $n_{1j} - 1$  degrees of freedom using

$$P_j = pt(T_j, n_{1j} - 1).$$

Calculate the z-score  $Z_j$  from this p-value<sup>3</sup> as  $Z_j = \Phi^{-1}(P_j)$ .

c. If [ $\min(n_{1j}, n_{2j}) \leq 6$  OR  $s_{ij}^2 = 0$ ] AND  $W_j > 0$  (from part 1):

1) Calculate the number of possible permutations

$$N_{perms} = \text{choose}(n_j, n_{1j})$$

$$2) \text{ If } n_{1j} = n_{2j} = 1, \text{ then } Z_j = \begin{cases} 0.6744898 & X_{1j} > X_{2j} \\ 0 & X_{1j} = X_{2j} \\ -0.6744898 & X_{1j} < X_{2j} \end{cases}$$

<sup>3</sup> Set the z-score to  $T_j$  if the p-value is 0 or 1.

## Sprint Performance Measurement Plan

- 3) If only  $n_{1j} = 1$  then let  $R_0$  equal the rank of the Sprint observation in the combined sample  $XY_j$ . Calculate  $Z_j = \Phi^{-1}\left(\frac{R_0 - 0.5}{n_j}\right)$ .
- 4) If only  $n_{2j} = 1$  then let  $R_0$  equal the rank of the CLEC observation in the combined sample  $XY_j$ . Calculate  $Z_j = -\Phi^{-1}\left(\frac{R_0 - 0.5}{n_j}\right)$ .
- 5) If  $\min(n_{1j}, n_{2j}) \geq 2$  and  $Nperms \leq 1000$  then
  - i) Generate all possible permutations of sizes  $n_{1j}$  and  $n_{2j}$  from the combined sample  $XY_j$ .
  - ii) For each permuted sample, calculate the sum of sample of size  $n_{1j}$ .
  - iii) Let  $R_0$  equal the rank of the observed sum within all of the permuted sums.  
Calculate  $Z_j = \Phi^{-1}\left(\frac{R_0 - 0.5}{Nperms}\right)$ .
- 6) If  $\min(n_{1j}, n_{2j}) \geq 2$  and  $Nperms > 1000$  then
  - i) Generate 1,000 random permutations of sizes  $n_{1j}$  and  $n_{2j}$  from the combined sample  $XY_j$ .
  - ii) For each permuted sample, calculate the sum of the sample of size  $n_{1j}$ .
  - iii) Let  $R_0$  equal the rank of the observed sum within the 1000 permuted sums and calculate  $Z_j = \Phi^{-1}\left(\frac{R_0 - 0.5}{1001}\right)$ .

Deleted: ALEC

### STEP 3: Truncate Z-statistic for each cell

$$\text{For each cell, } Z_j^* = \begin{cases} Z_j & L = 1 \\ \min(0, Z_j) & \text{otherwise} \end{cases}$$

Note that there is no truncation step if there is only one cell in the submeasure calculation.

### STEP 4: Calculate the theoretical mean and variance of the truncated statistic under parity.

1. If for cell  $j$ ,  $W_j = 0$ , set  $ExpectedMean_j^{parity}$ ,  $ExpectedVariance_j^{parity}$ , and  $ExpectedSkew_j^{parity}$  all equal to 0.
2. If  $\min(n_{1j}, n_{2j}) > 6$  and  $s_{1j}^2 > 0$ 
  - a.  $ExpectedMean_j^{parity} = -\frac{1}{\sqrt{2\pi}}$ .
  - b.  $ExpectedVariance_j^{parity} = \frac{1}{2} - \frac{1}{2\pi}$

Deleted: 3

Deleted: 3

Deleted: /1/03

## Sprint Performance Measurement Plan

$$c. \text{ ExpectedSkew}_j^{\text{parity}} = -\left(\frac{1}{2\sqrt{2\pi}} + \frac{2}{(2\pi)^{\frac{3}{2}}}\right)$$

3. If  $\min(n_{1j}, n_{2j}) \leq 6$  OR  $s_{1j}^2 = 0$

a. Let  $N_j = \min(N_{perms}, 1000)$

b. For  $i = 1, \dots, N_j; z_{ji} = \min\left\{0, \Phi^{-1}\left(\frac{i-0.5}{N_j}\right)\right\}$ .

$$c. \Theta_{ji} = \frac{1}{N_j}$$

$$d. \text{ ExpectedMean}_j^{\text{parity}} = \sum_{i=1}^{N_j} \Theta_{ji} z_{ji}$$

$$e. \text{ ExpectedVariance}_j^{\text{parity}} = \sum_{i=1}^{N_j} \Theta_{ji} z_{ji}^2 - (\text{ExpectedMean}_j^{\text{parity}})^2$$

$$\text{ExpectedSkew}_j^{\text{parity}} =$$

$$f. \sum_i \Theta_{ji} z_{ji}^3 - 3 \text{ExpectedMean}_j^{\text{parity}} \times \text{ExpectedVariance}_j^{\text{parity}} - [\text{ExpectedMean}_j^{\text{parity}}]^3$$

STEP 5: Calculate the initial aggregate test statistic.

$$Z_0^T = \begin{cases} Z_1 & L = 1 \\ Z^T = \frac{\sum_j W_j (Z_j^* - \text{ExpectedMean}_j^{\text{parity}})}{\sqrt{\sum_j W_j^2 \times \text{ExpectedVariance}_j^{\text{parity}}}} & \text{otherwise} \end{cases}$$

STEP 6: Calculate the final aggregate test statistic.

1. If  $L = 1$ , we use the cell modified Z statistic.  $Z^T = Z_0^T = Z_1$ .

2. If  $L > 1$ , do the following.

a. Calculate the aggregate skewness coefficient.

$$g_{\text{agg}} = \frac{\sum_j W_j^3 \times \text{ExpectedSkew}_j^{\text{parity}}}{6 \times \left(\sum_j W_j^2 \times \text{ExpectedVariance}_j^{\text{parity}}\right)^{\frac{3}{2}}}$$

Deleted: 3

Deleted: 3

Deleted: /1/03

## *Sprint Performance Measurement Plan*

b. If  $Z_0^T > -\frac{1+4g_{agg}^2}{4g_{agg}}$  or  $-10^{-6} < g_{agg} < 0$  then  $Z^T = Z_0^T$ .

c. Otherwise

$$Z^T = \frac{-1 + \sqrt{1 + 4g_{agg}^2 + 4g_{agg}Z_0^T}}{2g_{agg}}$$

Deleted: 3

# Sprint Performance Measurement Plan

## Proportion Performance Measures<sup>4</sup>

The following calculations will apply to parity submeasures contained in measures 5, 8, 11, 12, 15, 17a, 20, 22, 23, 26, ~~28~~, 31, 32, 33, 34, 37, 38, and 39. Any subsequent change to measure classification (mean, proportion, rate) to a measure or submeasure in the PMP will take precedence over this list.

### Variable definitions:

- $a_{1j}$  = Number of Sprint cases possessing an attribute of interest in cell j.
- $a_{2j}$  = Number of CLEC cases possessing an attribute of interest in cell j.
- $a_j$  = Number of cases possessing an attribute of interest in cell j.

Deleted: ALEC

**\*\*NOTE:** All measurements made using the number of *misses* (or negative measurement value).\*\*

STEP 1: Calculate Cell Weights.

$$W_j = \sqrt{\frac{n_{1j}n_{2j}}{n_j} \frac{a_j}{n_j} \left(1 - \frac{a_j}{n_j}\right)}$$

For each cell, multiply the Sprint sample size and the CLEC sample size, the proportion of affected transactions and the proportion of non-affected transactions, divide by the total number of transactions, and take a square root.

Deleted: ALEC

STEP 2<sup>5</sup>: Calculate a Z-statistic for each cell.

If  $W_j = 0$  then set  $Z_j = 0$ .

Else, calculate the Z-statistic as 
$$Z_j = \frac{n_j a_{1j} - n_{1j} a_j}{\sqrt{\frac{n_{1j} n_{2j} a_j (n_j - a_j)}{n_j - 1}}}$$

STEP 3: Truncate Z-statistic for each cell.

For each cell, 
$$Z_j^* = \begin{cases} Z_j & L = 1 \\ \min(0, Z_j) & \text{otherwise} \end{cases}$$

<sup>4</sup> Only perform STEP 4 if  $L > 1$  (e.g., if this is a cell-level comparison, and there is more than one cell with CLEC activity, then perform STEP 4).

<sup>5</sup> If  $L = 1$  and  $W_j = 0$ , then skip STEP 5, STEP 6 and STEP 7 and  $Z^T = 0$ .  $Z^T = 0$  in the following cases: (1)  $P_{\text{Sprint}} = P_{\text{CLEC}} = 100\%$  (when high values are "better"); (2)  $P_{\text{Sprint}} = P_{\text{CLEC}} = 0\%$  (when low values are "better").

Deleted: 3

Deleted: /1/03

## Sprint Performance Measurement Plan

Note that there is no truncation step if there is only one cell in the submeasure calculation.

STEP 4: Calculate the theoretical mean and variance of the truncated statistic under parity.

1. If for cell  $j$ ,  $W_j = 0$ , set  $ExpectedMean_j^{parity}$ ,  $ExpectedVariance_j^{parity}$ , and  $ExpectedSkew_j^{parity}$  all equal to 0.
2. If  $\min\left\{a_{1j}\left(1 - \frac{a_{1j}}{n_{1j}}\right), a_{2j}\left(1 - \frac{a_{2j}}{n_{2j}}\right)\right\} > 9$ .
  - a.  $ExpectedMean_j^{parity} = -\frac{1}{\sqrt{2\pi}}$ .
  - b.  $ExpectedVariance_j^{parity} = \frac{1}{2} - \frac{1}{2\pi}$ .
  - c.  $ExpectedSkew_j^{parity} = -\left(\frac{1}{2\sqrt{2\pi}} + \frac{2}{(2\pi)^{\frac{3}{2}}}\right)$
3. Else, if  $\min\left\{a_{1j}\left(1 - \frac{a_{1j}}{n_{1j}}\right), a_{2j}\left(1 - \frac{a_{2j}}{n_{2j}}\right)\right\} \leq 9$ .
  - a. Let  $i = \max(0, a_j - n_{2j}), \dots, \min(a_j, n_{1j})$ .
  - b. Calculate  $z_{ji} = \min\left\{0, \frac{n_j i - n_{1j} a_j}{\sqrt{\frac{n_{1j} n_{2j} a_j (n_j - a_j)}{n_j - 1}}}\right\}$  for each value of  $i$ .
  - c. For each value of  $i$ , calculate  $\Theta_{ji} = HG(i, n_{1j}, n_{2j}, a_j)$ .
  - d.  $ExpectedMean_j^{parity} = \sum_{i=1}^{N_j} \Theta_{ji} z_{ji}$ .
  - e.  $ExpectedVariance_j^{parity} = \sum_{i=1}^{N_j} \Theta_{ji} z_{ji}^2 - (ExpectedMean_j^{parity})^2$ .
  - f.  $ExpectedSkew_j^{parity} = \sum_{i=1}^{N_j} \Theta_{ji} z_{ji}^3 - 3ExpectedMean_j^{parity} \times ExpectedVariance_j^{parity} - [ExpectedMean_j^{parity}]^3$

STEP 5: Calculate the initial aggregate test statistic.

1. If  $L = 1$  and  $\min\left\{\left\{a_{1j}\left(1 - \frac{a_{1j}}{n_{1j}}\right), a_{2j}\left(1 - \frac{a_{2j}}{n_{2j}}\right)\right\}\right\} \leq 9$ ,

# Sprint Performance Measurement Plan

## Rate Performance Measures<sup>6</sup>

The following calculations will apply to parity submeasures contained in measure 19. Any subsequent change to measure classification (mean, proportion, rate) to a measure or submeasure in the PMP will take precedence over this list.

### Variable definitions:

$b_{1j}$  = Number of Sprint base elements in cell j.

$b_{2j}$  = Number of CLEC base elements in cell j.

$b_j$  = Total number of base elements cell j.

$r_{1j} = n_{1j} / b_{1j}$  = Sprint sample rate of cell j.

$r_{2j} = n_{2j} / b_{2j}$  = CLEC sample rate of call j.

$q_j = b_{1j} / b_j$  = Relative proportion of Sprint elements for cell j.

Deleted: ALEC

Deleted: ALEC

STEP 1: Calculate Cell Weights.

$$W_j = \sqrt{\frac{b_{1j} b_{2j} n_j}{b_j b_j}}$$

For each cell, multiply the number of Sprint base elements, the number of CLEC base elements and the number of transactions, divide by the total number of base elements squared, and take a square root.

Deleted: ALEC

STEP 2<sup>7</sup>: Calculate a Z-statistic for each cell.

If  $W_j = 0$  then set  $Z_j = 0$ .

Else, calculate the Z-statistic as  $Z_j = \frac{n_{1j} - n_j q_j}{\sqrt{n_j q_j (1 - q_j)}}$

STEP 3: Truncate Z-statistic for each cell.

For each cell,  $Z_j^* = \begin{cases} Z_j & L = 1 \\ \min(0, Z_j) & \text{otherwise} \end{cases}$

<sup>6</sup> Only perform STEP 4 if  $L > 1$  (e.g., if this is a cell-level comparison, and there is more than one cell with CLEC activity, then perform STEP 4).

<sup>7</sup> If  $L = 1$  and  $W_j = 0$ , then skip STEP 5, STEP 6 and STEP 7 and  $Z^T = 0$ .  $Z^T = 0$  in the following cases: (1)  $P_{\text{Sprint}} = P_{\text{CLEC}} = 100\%$  (when high values are "better"), (2)  $P_{\text{Sprint}} = P_{\text{CLEC}} = 0\%$  (when low values are "better").

Deleted: 3

Deleted: /1/03

## Sprint Performance Measurement Plan

Note that there is no truncation step if there is only one cell in the submeasure calculation.

STEP 4: Calculate the theoretical mean and variance of the truncated statistic under parity.

1. If for cell  $j$ ,  $W_j = 0$ , set  $ExpectedMean_j^{parity}$ ,  $ExpectedVariance_j^{parity}$ , and  $ExpectedSkew_j^{parity}$  all equal to 0.

2. If  $\min(n_{1j}, n_{2j}) > 15$  and  $n_j q_j (1 - q_j) > 9$

a.  $ExpectedMean_j^{parity} = -\frac{1}{\sqrt{2\pi}}$ .

b.  $ExpectedVariance_j^{parity} = \frac{1}{2} - \frac{1}{2\pi}$

c.  $ExpectedSkew_j^{parity} = -\left(\frac{1}{2\sqrt{2\pi}} + \frac{2}{(2\pi)^{\frac{3}{2}}}\right)$

3. If  $\min(n_{1j}, n_{2j}) \leq 15$  or  $n_j q_j (1 - q_j) \leq 9$

a. Let  $i = 0, \dots, n_j$ .

b. Calculate  $z_{ij} = \min\left\{0, \frac{i - n_j q_j}{\sqrt{n_j q_j (1 - q_j)}}\right\}$  for each value of  $i$ .

c. For each value of  $i$ , calculate  $\Theta_{ij} = BN(i, n_j, q_j)$ .

d.  $ExpectedMean_j^{parity} = \sum_{i=1}^{N_j} \Theta_{ij} z_{ij}$ .

e.  $ExpectedVariance_j^{parity} = \sum_{i=1}^{N_j} \Theta_{ij} z_{ij}^2 - (ExpectedMean_j^{parity})^2$ .

f.

$ExpectedSkew_j^{parity} =$

$$\sum_i \Theta_{ij} z_{ij}^3 - 3 ExpectedMean_j^{parity} \times ExpectedVariance_j^{parity} - [ExpectedMean_j^{parity}]^3$$

STEP 5: Calculate the initial aggregate test statistic.

1. If  $L = 1$  and  $(\min(n_{1j}, n_{2j}) \leq 15$  or  $n_j q_j (1 - q_j) \leq 9)$ ,

$$Z_0^T = \Phi^{-1}(\alpha)$$

where  $\alpha = CBN(n_{1j}, n_j, q_j)$ .

Deleted: /1/03

## Sprint Performance Measurement Plan

2. If  $L > 1$  or  $[\min(n_1, n_2) > 15$  and  $n_j q_j (1 - q_j) > 9]$ ,

$$Z_0^T = \begin{cases} Z_1 & L = 1 \\ Z^T = \frac{\sum_j W_j (Z_j^* - \text{ExpectedMean}_j^{\text{parity}})}{\sqrt{\sum_j W_j^2 \times \text{ExpectedVariance}_j^{\text{parity}}}} & \text{otherwise} \end{cases}$$

STEP 6: Calculate the final aggregate test statistic.

1. If  $L = 1$ , we use the cell modified Z statistic.  $Z^T = Z_0^T$ .

2. If  $L > 1$ , do the following.

a. Calculate the aggregate skewness coefficient.

$$g_{\text{agg}} = \frac{\sum_j W_j^3 \times \text{ExpectedSkew}_j^{\text{parity}}}{6 \times \left( \sum_j W_j^2 \times \text{ExpectedVariance}_j^{\text{parity}} \right)^{\frac{3}{2}}}$$

b. If  $Z_0^T > -\frac{1 + 4g_{\text{agg}}^2}{4g_{\text{agg}}}$  or  $-10^{-6} < g_{\text{agg}} < 0$  then  $Z^T = Z_0^T$ .

c. Otherwise

$$Z^T = \frac{-1 + \sqrt{1 + 4g_{\text{agg}}^2 + 4g_{\text{agg}} Z_0^T}}{2g_{\text{agg}}}$$

# Sprint Performance Measurement Plan

## Attachment B

### Measures of Severity (parity and benchmark)

#### Benchmark Measurements:

Definition:

$$D_B = \frac{I - B}{B} \times 100\%$$

where **I** is Sprint performance (mean, proportion, or rate) in service to a CLEC, and **B** is the benchmark set as the performance tolerance limit. This calculation assumes that the larger the value of **I**, the worse the service. For measures where this assumption does not hold true, the subtraction in the numerator is reversed. In other words, the numerator should be positive when the service to the CLEC is worse than the benchmark.

Deleted: ALEC

Deleted: ALEC

Rationale:

Upon determining that Sprint performance (in service to a CLEC) is not meeting the benchmark, the measure of severity will be calculated to represent the percentage difference from the benchmark. For example, if the benchmark is 4 hours and Sprint performance is 5 hours, then  $D_B = \frac{5.0 - 4.0}{4.0} \times 100\%$ , or  $D_B = 25\%$ . For a benchmark mean measure, this result would be considered a "moderate" deviation from the benchmark. Such a measure for compliance is only valid if the benchmark is set appropriately; set as a tolerance limit as opposed to a target.

Deleted: ALEC

#### Parity Measurements:

Definition:

Given  $Z^T$  (as calculated in STEP 6, Attachment A, for mean, proportion, and rate measures), define the measure of severity  $D_p$  as:

$$D_p = \sqrt{\frac{1}{N_1} + \frac{1}{N_2}} Z^T$$

where  $N_1$  and  $N_2$  are the number of Sprint and CLEC transactions combined from all cells in a submeasure with  $W_j > 0$  (where  $W_j$  is the cell weight for cell  $j$ , as defined in Attachment A). As described in section 9 of this document,  $Z^T$  is negative when the CLEC is receiving non-compliant service.

Deleted: /1/03

Rationale:

Upon determining that an out-of-parity situation exists for a particular submeasure, for a particular CLEC, a measure of severity will be calculated to reflect the magnitude of the performance difference between Sprint's retail and Sprint's CLEC service. The statistical tests

## Sprint Performance Measurement Plan

performed to determine whether service is in parity, provide the “yes” or “no” answer to the question of parity service. Further, the z-score itself provides a measure for the degree of certainty as to whether parity service exists. However, this degree of certainty does not indicate the severity of non-compliance, mainly due to the fact that the z-score is highly dependent on the sample size. If the submeasure has a considerably large sample size, yet a small difference between Sprint’s retail and Sprint’s CLEC service, the large sample size could cause the z-score to indicate a high confidence in lack of parity. This high confidence told by the z-score indicates that there is a *statistically* significant difference in service for the CLEC, but it does not indicate that there is a significant difference in service from a *business impact* point of view.

A reasonable measure of severity will provide an indication for how different the Sprint’s CLEC service is from that of Sprint’s service to its retail customers. Because parity service is defined as the CLEC receiving equivalent service to that provided to Sprint’s retail customers, the measure of severity should indicate the difference between Sprint’s retail and Sprint’s CLEC service. In practice, there are important considerations for appropriately calculating such a measure of severity. First, the measure should be consistent with the results of the z-score, accounting for the differences in calculations that result from small samples, truncating, weighting of cells, and adjustments for skewness. Second, the measure of severity should be applicable to all types of measurements (mean, proportion, and rate). These considerations can be taken into account by utilizing the aggregate, truncated z-score,  $Z^T$ ; simply adjusting the z-score so as to not include the sensitivity to sample size.

To visualize how this measure of severity works, consider the example of a mean submeasure having a single cell. In this case, it can be shown that  $D_p$  is simply the difference in mean performance between the Sprint’s retail and Sprint’s CLEC service, measured relative to the dispersion (or standard deviation) of Sprint’s retail service. As an equation, this yields:

$$D_p = \frac{\bar{X}_1 - \bar{X}_2}{s_1}, \text{ where } \bar{X}_1 \text{ is the mean Sprint retail service, } \bar{X}_2 \text{ is the mean Sprint service to}$$

CLECs, and  $s_1$  is the standard deviation of Sprint’s retail service. Under this example, consider the following graphs depicting a scenario in which a CLEC receives out-of-parity service on two different submeasurements (“Submeasurement A” and “Submeasurement B”):

### Submeasurement A

If the service provided on submeasurement A to Sprint’s retail customers has a standard deviation of 1.2 hours, then

## Sprint Performance Measurement Plan

$$D_P = \frac{4.0 - 5.0}{1.2}, \text{ or } D_P = -0.83.$$

So, for submeasurement A, the CLEC receives out-of-parity service that is a “moderate” severity.

Deleted: ALEC

### Submeasurement B

If the service provided to Sprint’s retail customers on submeasurement B has a standard deviation of 0.4 hours, then

$$D_P = \frac{4.0 - 5.0}{0.4}, \text{ or } D_P = -2.50.$$

So, for submeasurement B, the CLEC receives out-of-parity service that is a “severe” severity.

Deleted: ALEC

Notice that the difference in the mean service is the same for both submeasurements. However, because Sprint’s service to its retail customers on submeasurement B has a lower dispersion (or standard deviation) than Sprint’s service on submeasurement A, the severity of the mean difference is higher for submeasurement B.

# Sprint Performance Measurement Plan

## Attachment C

### Parity Measures and Submeasures with Cell-level Comparisons

Cell-level comparisons (using the statistical methodology described in Attachment A) will be applied to the following measurements:

Measurement Number / Description	Cell Level (i.e., wire center, etc...)
5 - Percentage of Orders Jeopardized	Wire Center, Company Number
6 - Average Jeopardy Notice Interval	Wire Center, Company Number
7 - Average Completed Interval	CLLI Code, Wire Center, Company Number
8 - Percent Completed Within Standard Interval	CLLI Code, Wire Center, Company Number
11 - Percent of Due Dates Missed	CLLI Code, Wire Center, Company Number
12 - Percent Due Dates Missed Due to Lack of Facilities	CLLI Code, Wire Center, Company Number
13 - Delay Order Interval to Completion Date (For Lack of Facilities)	CLLI Code, Wire Center, Company Number
14 - Held Order Interval	Wire Center, Company Number
15 - Provisioning Trouble Reports Prior to Service Order Completion	Company Number
17a - Percentage Troubles in 5 Days for New Orders	CLLI Code, Wire Center, Company Number
19 - Customer Trouble Report Rate	Wire Center, Company Number
20 - Percentage of Customer Trouble Not Resolved Within Estimated Time	CLLI Code, Wire Center, Company Number
21 - Average Time to Restore	CLLI Code, Wire Center, Company Number
22 - POTS Out of Service Less Than 24 Hours	Wire Center, Company Number
23 - Frequency of Repeat Troubles in 30 Day Period	CLLI Code, Wire Center, Company Number
28 - Usage Timeliness	Company Number
31 - Usage Completeness	Company Number
32 - Recurring Charge Completeness	Company Number
33 - Non-Recurring Charge Completeness	Company Number
34 - Bill Accuracy	Company Number
37 - Database Update Timeliness	Company Number
38 - Percent Database Accuracy	Company Number
39 - E911MS Database Update Interval	Company Number

# *Sprint Performance Measurement Plan*

## **Definitions:**

Company Number – Sprint LTD has two operating companies in FL. Therefore we calculate results at the company level to establish parity before aggregating the results into one FL result.

Wire Center – A building housing one or more end office and/or tandem switches.

CLLI Code – (Common Language Location Identifier) An 11-digit code that Sprint LTD assigns to a Carrier's location to designate the central office or area served by a central office.
