BellSouth Telecommunications, Inc. FPSC Dkt. No. 00121A-TP Responses to September 7, 2006 Workshop Action Items (2<sup>nd</sup> Set) Filing Date: September 29, 2006 Item No. 7 Page 1 of 1

- REQUEST: Over the most recent three months of data, please provide the number of hot-cuts where the conversion reflected a zero cut interval for P-7.
- RESPONSE: For the three-month period, May July 2006, the number of hot-cuts reflecting a zero cut interval for measure P-7 are shown below:

Data Month	Cuts with Zero Duration	<b>Total Service Orders</b>
May	6	468
June	3	404
July	1	637
Total	10	1509

This really means that there were 10 orders with an actual cut time of less than 1 minute, and such times were rounded down to zero. This does not mean that the actual time was zero.

BellSouth Telecommunications, Inc. FPSC Dkt. No. 00121A-TP Responses to September 7, 2006 Workshop Action Items (2<sup>nd</sup> Set) Filing Date: September 29, 2006 Item No. 8 Page 1 of 4

REQUEST: a. Please provide an analysis on retaining the original due dates for LSRs that were rejected in error in lieu of the CLECs proposed measurement P-12A.

b. Please provide the Florida aggregate number of LSRs rejected in error over the past 6 months.

c. Please explain why CLEC orders are place in "duration" and held for 48 hours after being screened for errors as described in CLECs proposed business rules for **P-12B**.

RESPONSE: a. As an initial matter, it is a misnomer to refer to "retaining an original due date" when a CLEC's LSR is rejected in error. This is because until BellSouth provides a FOC to the CLEC, there is no original due date. In the event that an LSR is rejected in error, BellSouth uses its best efforts to provide the "requested due date" to the CLEC. See the response to part c, which explains the process used when an LSR is rejected in error.

b. There is no practical way to track the number of LSRs clarified in error by BellSouth's Service Representatives. Moreover, for manually submitted LSRs, this would require a manual review of LSRs, which is not feasible in a production mode. Thus, for purposes of attempting to estimate this value, BellSouth assumed that any partially mechanized LSR that was clarified and an associated FOC is subsequently issued, with no change in the version of the LSR, was clarified in error. BellSouth Telecommunications, Inc. FPSC Dkt. No. 00121A-TP Responses to September 7, 2006 Workshop Action Items (2<sup>nd</sup> Set) Filing Date: September 29, 2006 Item No. 8 Page 2 of 4

Based on Florida data, the chart below shows, for the six-month period March – August 2006, the number of partially mechanized LSRs clarified, the estimated number LSRs clarified in error (based on the assumption stated above), and the corresponding estimated percentage clarified in error.

Month	Total LSRs Clarified	Estimated # of LSRs Clarified in Error by Service Reps.	Estimated% Clarified in Error
March	21379	355	1.66%
April	16960	226	1.33%
May	16156	295	1.83%
June	13762	289	2.10%
July	15715	349	2.22%
August	17962	346	1.93%
Total	101934	1860	1.82%

These results show that less than 2% of LSRs were clarified in error by the centers, based on BellSouth's approach of estimation, over this 6-month period. Further, based on the total LSRs submitted for Florida over this period, which was about 830,917, only about 0.22% were potentially clarified in error by the centers.

As previously stated, BellSouth does not understand the CLEC's statement regarding service requests placed in duration for 48 hours. BellSouth continues to use best efforts to achieve the interval commitments set forth for FOCs. Meeting the FOC interval would in turn allow providing the standard due dates, as if the LSR had not been rejected in error. The interval commitments for FOCs are 3 hours for fully mechanized LSRs, 10 hours for Partially Mechanized LSRs and 24 hours for Manual LSRs. In light of these measurement interval requirements, it is not in the interest of BellSouth to hold an order for 48 hours if a FOC can be returned to the CLEC within the required interval. Furthermore, holding the LSR for 48 hours would result in BellSouth missing the FOC measurement interval.

c.

BellSouth Telecommunications, Inc. FPSC Dkt. No. 00121A-TP Responses to September 7, 2006 Workshop Action Items (2<sup>nd</sup> Set) Filing Date: September 29, 2006 Item No. 8 Page 3 of 4

The FOC interval for an LSR is calculated by adding the appropriate hours of the interval commitments, 3, 10, or 24, to the receipt time of the version of the LSR. BellSouth makes every effort possible to return an FOC on all LSRs clarified in error, when BellSouth is made aware of the "clarification-in-error" status before the FOC interval expires. BellSouth rarely misses an FOC in these situations and, importantly, thus the service delivery dates are not impacted by BellSouth center LSR processing.

When the FOC interval has expired, BellSouth still strives to return an FOC on the same day that BellSouth is made aware of the clarification error. In these situations for UNE and Complex products, FOCs are generated using the standard interval for the product ordered, reflecting the date that BellSouth removes the LSR from clarification as day zero. If this results in a due date beyond that originally requested, the CLEC can call and request an earlier due date. BellSouth will pursue an expedite due to the BellSouth error. If it is determined that BellSouth can meet the expedite request, a new FOC will be generated with the expedited Due Date. The CLEC is not billed an expedite charge when the request for an expedite is based on a BellSouth error.

Resale LSRs are handled in a similar fashion based upon provisioning being on a non-dispatch or a dispatch basis. For non-dispatch orders, the Resale FOC is generated using a standard due date interval. If a dispatch is required, the FOC is given the next available due date for field dispatch, as determined by BellSouth's systems.

When BellSouth returns an FOC on an LSR rejected in error, where the FOC interval has not expired, the original requested service date is not impacted by BellSouth center LSR processing. When BellSouth returns an FOC on an LSR rejected in error, where the FOC interval has expired, and the CLEC requested service date is still within the standard interval, the FOC is returned without impact to the original requested service date.

BellSouth Telecommunications, Inc. FPSC Dkt. No. 00121A-TP Responses to September 7, 2006 Workshop Action Items (2<sup>nd</sup> Set) Filing Date: September 29, 2006 Item No. 8 Page 4 of 4

When BellSouth returns an FOC on an LSR rejected in error for which the FOC interval has expired and the FOC delay causes the requested service date to be beyond the product standard interval, the original requested service date is impacted. If the CLEC calls and requests an earlier due date than the date given on the FOC, an expedite due to a BellSouth error will be pursued. If it is determined that BellSouth can meet the expedite request, a new FOC will be generated with the expedited due date. The CLEC is not billed an expedite change when the request is due to a BellSouth error.

BellSouth Telecommunications, Inc. FPSC Dkt. No. 00121A-TP Responses to September 7, 2006 Workshop Action Items (2<sup>nd</sup> Set) Filing Date: September 29, 2006 Item No. 9 Page 1 of 1

- REQUEST: Please provide analysis of the impact to SQM and SEEM data for M&R-2 if the proposed exclusion to remove troubles captured in P-9 and M&R-4 were adopted.
- RESPONSE: The analysis required to provide the impact to SQM and SEEM data based on the removal of troubles in P-9 and M&R-4 from Customer Trouble Report Rate (CTRR) is extensive. This is because the measure P-9, Percent Provisioning Troubles within "X" Days of a Completed Service Order, is calculated one month in arrears, and CTTR is calculated based on the current data month. CTRR would have to be reported one month in arrears to properly exclude troubles captured by measure P-9. Also, because these are retail analog measures and troubles would have to be excluded from both the CLEC side and retail side, the impact is not expected to be significant. Given the extensive level of analysis required to provide the impact of this proposed change, BellSouth requests that it not be required to provide this analysis in this review.

BellSouth Telecommunications, Inc. FPSC Dkt. No. 00121A-TP Responses to September 7, 2006 Workshop Action Items (2<sup>nd</sup> Set) Filing Date: September 29, 2006 Item No. 10 Page 1 of 1

- REQUEST: Please provide proposed language to be added to the Glossary of the SQM that defines "Valid business days" whereas parity will exist between wholesale and retail hours of operation.
- RESPONSE: BellSouth proposes to use the same definition that can be found in the Change Control Process (CCP) document (Section 11.0, Terms and Definitions) for a "business day."

This is being proposed since the CCP document has already been agreed to by the industry. The definition is as follows:

# A business day is considered any Monday – Friday workday that does not fall on an official BellSouth holiday.

BellSouth Telecommunications, Inc. FPSC Dkt. No. 00121A-TP Responses to September 12, 2006 Conference Call Action Items Filing Date: September 29, 2006 Item No. 1 Page 1 of 1

REQUEST: For CM-11, Please explain the steps between prioritization and implementation for a change request. Please provide a number of days to complete each step based on change request magnitude.

•

RESPONSE: BellSouth will provide a response to this action item on October 6, 2006, as agreed to by Staff.

BellSouth Telecommunications, Inc. FPSC Dkt. No. 00121A-TP Responses to September 12, 2006 Conference Call Action Items Filing Date: September 29, 2006 Item No. 2 Page 1 of 1

REQUEST: For CM-11 please provide a proposal for developing timeframes for software releases based on the change request magnitude or complexity.

.

RESPONSE: BellSouth will provide a response to this action item on October 6, 2006, as agreed to by Staff.
