ORDER TO SUSPEND UNDERGROUND CONVERSION TARIFF REVISIONS

BY THE COMMISSION:

On April 30, 2008, Florida Power & Light Company (FPL) filed a petition for approval of underground conversion tariff revisions. Customers who opt to convert their overhead electric distribution system to underground facilities are required to pay FPL a Contribution in Aid of Construction (CIAC), which represents the conversion costs incurred by FPL. The proposed tariff revisions are designed to implement the requirements of Rule 25-6.115(11)(a), Florida Administrative Code (F.A.C.), that FPL include the net present value of operations costs, including the average historical storm restoration costs, for comparable facilities over the expected life of the facilities in determining the CIAC paid by the customer. Rule 25-6.115, F.A.C., was amended in February 2007 to require that the calculation of CIAC paid by customers for underground conversions include the difference in the net present value of operational costs between underground and overhead systems.<sup>1</sup> We have jurisdiction over this matter pursuant to Sections 366.03, 366.04, 366.05, and 366.06, Florida Statutes.

Pursuant to Section 366.06(3), Florida Statutes, we may withhold consent to the operation of all or any portion of a new rate schedule, delivering to the utility requesting such increase a reason or written statement of good cause for doing so within 60 days. We find that there is good cause, consistent with the requirement of Section 366.06(3), Florida Statutes, to suspend the proposed tariff revisions in order to allow our staff sufficient time to review this petition and gather all pertinent information in order to present an informed recommendation on the tariff proposal.

Based on the foregoing, it is

<sup>1</sup> See Order No. PSC-07-0043-FOF-EU, issued January 16, 2007, in Docket No. 060172-EU, In re: Proposed rules governing placement of new electric distribution facilities underground, and conversion of existing overhead distribution facilities to underground facilities, to address effects of extreme weather events.
