Subject: Changes to Staff Recommendation in Docket No. 080281-EI, on the July 15, 2008, Agenda Conference (Item No. 5)

Staff is requesting approval to make some minor corrections to the above mentioned recommendation. The change shown below does not affect the issues or recommendation statements, therefore, an oral modification at agenda conference should not be necessary. This item should not be deferred because the item implements new legislation.

On page 7 of the recommendation, strike the second sentence in the paragraph under the subheader: Status of Other Permitting:

~~While not directly required for eligibility, receipt of these permits is important because, if the projects are not constructed, the associated in-service date costs of the projects cannot be recovered through the EERC.~~
