A

Q.

For the twelve months of 2007 and for the period January 1, 2008 through July 31, 2008, for each month that hedged volumes of fuel oil or natural gas were outside the percentage range for volumes to be hedged stated in FPL's risk management plan or otherwise stated in internal procedures governing FPL's hedging activities, please state the month, the extent to which the volume hedged was outside of the range, and an explanation of the cause.

A.

1 For the twelve months of 2007, FPL's natural gas hedge percentages were within the approved
2 ranges stated in FPL's risk management plan.

3 For the twelve months of 2007, FPL's heavy oil hedge percentages were within the approved
4 ranges stated in FPL's risk management plan for January through October. For November and
5 December, FPL's last burn projections prior to each month showed that FPL would burn 205,463
6 barrels in November and 47,130 barrels in December. As part of FPL's rebalancing process, FPL
7 sold all of its swaps positions prior to each month in an effort to lower its hedge percentages
8 down to the targets. Even with that effort, FPL was [REDACTED] and [REDACTED] hedged based on these last
burn projections prior to each month. This was due to the fact that FPL also had options in place
for these months. Because the heavy fuel oil burn projections during those months were
extremely low (almost to the point of infeasible from a system perspective) and the high
variability between projection runs caused by small variations in price, FPL decided to keep its
options positions as protection in case the heavy fuel oil burns actually turned out to be higher.
This caution proved well-founded, as FPL's actual fuel oil burns for November and December
turned out to be 338,455 barrels (64% higher than projected) and 153,125 barrels (225% higher
than projected), respectively.

For the period January 1, 2008 through July 31, 2008, FPL's hedge percentages for natural gas and heavy fuel oil were within the approved ranges stated in FPL's risk management plan.

This description for heavy oil in November and December 2007 was provided previously in Data Request No. 2, Question No. 1 as part of the comprehensive hedging audit.
