## P R O C E E D I N G S

(Transcript continues in sequence from  
Volume 12.)

Thereupon,

PETER TOOMEY

a witness on behalf of Progress Energy Florida, Inc.,  
continues his sworn testimony as follows:

## CONTINUED CROSS-EXAMINATION

BY MS. KAUFMAN:

Q. I want to talk to you a little bit more about  
that. Do you have the stack of documents that staff was  
going to introduce through you? It's got a purple sheet  
on it, and the first one is PEF's Response to Staff's  
Third Set of Interrogatories, Number 12.

MS. FLEMING: Can you give me the subject area  
that it's under?

MS. KAUFMAN: Discovery related to cost of  
capital.

CHAIRMAN CARTER: Hang on a second. Let's all  
get on the same page here.

MS. KAUFMAN: I just didn't want to make more  
copies if --

CHAIRMAN CARTER: Okay. That's fine. Just  
hang on. We just want everybody to get a copy of it,  
and we can go forward.

1                   Okay. Ms. Kaufman, you may proceed.

2                   MS. KAUFMAN: Thank you, Mr. Chairman.

3 BY MS. KAUFMAN:

4                   Q. Do you have that package, Mr. Toomey?

5                   A. I believe that I do.

6                   Q. Okay. In the lower right-hand corner of each  
7 page, there is a -- it says "Hearing Exhibit," and then  
8 there's a Bates stamp number.

9                   A. I see those.

10                  Q. Okay. If you would look at number -- there's  
11 four zeros and then 1616. And let me know when you get  
12 there.

13                  A. I'm there.

14                  Q. I should have asked you, but you're the  
15 sponsor of these interrogatories, are you not?

16                  A. I can tell you on each one. I'm the sponsor  
17 on this one.

18                  Q. Okay. I think that's probably why staff  
19 grouped them together for you.

20                  A. Okay. Sure.

21                  Q. We just talked about the company's request for  
22 a 12.54 return on equity. And in a discovery request to  
23 you -- I believe this is from the staff -- they asked  
24 you to define what is a low ROE. And am I correct that  
25 the company's response would be that any ROE that is

1 lower than 12.54 percent is a low ROE?

2 A. Yes, that's the essence of our response. That  
3 was our response on this; that's correct.

4 Q. Do you have occasion in your position to look  
5 at the ROEs that other companies have recently received?

6 A. I don't know that I have a comprehensive view  
7 of that, but certainly I may see some, sure.

8 MS. KAUFMAN: I'm going to show you or give  
9 you this exhibit, which is already in evidence, I  
10 believe. And I apologize, Mr. Chairman. My colleague  
11 did not write the number on it.

12 CHAIRMAN CARTER: 264. It's Number 264. In  
13 other cases, 461 -- 462 in the other -- that's right.  
14 It's reversed.

15 MS. KAUFMAN: That's a little scary.

16 CHAIRMAN CARTER: It is.

17 MS. KAUFMAN: May I approach the witness?

18 CHAIRMAN CARTER: You may approach.

19 THE WITNESS: Thank you.

20 BY MS. KAUFMAN:

21 Q. Mr. Toomey, as we just said, that has been  
22 entered into the record as Exhibit Number 264, and it  
23 shows the requested as well as the granted returns on --  
24 return on equity for a number of companies in 2009, and  
25 there's a column that compares what has been requested

1 and a column that shows what was approved. Do you see  
2 that?

3 A. Yes. I see the columns, the request and the  
4 authorized, and I see the ROE column.

5 Q. Okay. Now, first of all, do you see any  
6 company on there that requested an ROE at the level  
7 Progress is asking for?

8 A. No.

9 Q. Do you see any Commission that granted any  
10 company an ROE, the ROE that Progress is asking for?

11 A. No, I do not.

12 Q. Would it be your testimony that the ROEs that  
13 were approved by other commissions -- and I believe  
14 there's one decision by this Commission on there. Is it  
15 your testimony that those are all low ROEs?

16 A. Well, again, our reply to 245 was to refer --  
17 to answer the question, which was in turn referring to  
18 the testimony of Mr. Lyash. So I don't know how he  
19 intended to use it without looking at his testimony,  
20 which I would be happy to do. And I think this answer  
21 is in the context of his testimony.

22 Q. Do you disagree with him?

23 A. Well, it would be nice to see his testimony  
24 and see how he described it so I would know the context.

25 Q. Well, the company is asking for 12.4; right?

1           A.    The company is asking for 12.54.

2           Q.    .54.  I'm sorry.

3           A.    And we believe that's the appropriate rate,  
4 and we're defending that here, that's correct.

5           Q.    So let me just be clear with regard to the  
6 chart.  Is it your -- you don't have an opinion one way  
7 or another as to whether those ROEs are low compared to  
8 what your company wants?

9           A.    Well, I would certainly say I can observe that  
10 they're all lower than 12.54, which is what we're  
11 requesting today.  And then beyond that, low is -- in  
12 what context do you want me to talk about it?

13          Q.    I was just referring to the company's answer,  
14 which was anything less than what your expert recommends  
15 is low.

16          A.    And that was our reply, and again, we were  
17 talking about the way Mr. Lyash used it in his  
18 testimony.

19          Q.    Can you look at the very bottom of the chart  
20 that you were just looking at?

21          A.    Yes, uh-huh.

22          Q.    And can you tell us what the average requested  
23 ROE was?

24          A.    It says average requested ROE, 11.18 percent.

25          Q.    And what was the average that was approved?

1           A.    The average authorized ROE was 10.51 percent.

2           Q.    Let me get that back from you, if I might.

3           A.    Of course.

4           Q.    Let's turn to page 9 of your testimony,  
5 Mr. Toomey, please.  And I'll wait until you get there.

6           A.    My direct testimony.  I think I'm there.

7           Q.    The paragraph that begins on line 6 and goes  
8 down almost through the end of the page, you're talking  
9 about some of the -- the reasons that the company is  
10 seeking this increase.  And I particularly wanted to  
11 look at the answer -- the sentence actually begins on  
12 line 13, but on line 16 and 17, you're talking about you  
13 want to recover your required investment and remain  
14 financially sound to provide the reliable power our  
15 customers demand throughout our capital expenditure  
16 program to bring new nuclear generation, and then you go  
17 on.  And I want to talk to you about the new nuclear  
18 generation.  Is part of your revenue request here  
19 related to the company's desire to bring new nuclear  
20 generation online?

21           A.    Not in any direct way, no.

22           Q.    So when you're making that reference to new --  
23 your capital expenditure program and new nuclear  
24 generation, you're not intending to use that as a basis  
25 for your revenue request here?

1           A.    I think the reference is only valid from the  
2 sense that even though our requests for nuclear cost  
3 recovery go through that clause, if the overall  
4 financial health of the company was damaged in the base  
5 rates, we would not be able to continue with our  
6 programs, any of them, but certainly for the new nuclear  
7 program. So I think it was valid to raise it in that  
8 context.

9           Q.    You did anticipate my next question, which is,  
10 the costs that are related to the new nuclear generation  
11 are going through the nuclear cost recovery clause now;  
12 correct?

13          A.    Yes. Everything that is not in base rates,  
14 you know, the nuclear costs that are designated to go  
15 through the clause go through the clause.

16          Q.    Now, on page 13, line 16 -- actually, on line  
17 15, you say the company is already in the largest  
18 capital expansion program in its history. Do you see  
19 that?

20          A.    I do.

21          Q.    Is part of your reference there to the Levy  
22 nuclear plant?

23          A.    Well, it's not completely clear there. I  
24 think it is probably also true that excluding Levy, our  
25 capital expenditure program over the future three years

1 or five years might be the highest period in our  
2 company's history.

3 Q. And I'm just trying to understand your sort of  
4 general reference to -- the largest capital expansion is  
5 intended to encompass the nuclear units as well? Is  
6 that part of the largest capital expansion in your  
7 history?

8 A. Well, I would say, again, if you include Levy,  
9 the number, of course, gets much larger still. But my  
10 point was, even if you were to exclude Levy, we have a  
11 very large capital program.

12 Q. So does your comment at line 16 include or  
13 exclude Levy, the Levy nuclear plants?

14 A. It's not specific. You know, it clearly  
15 doesn't define it there, and I guess I was trying to  
16 clarify. I think that it would be true with Levy or  
17 without Levy.

18 Q. Well, this is your testimony; correct?

19 A. Uh-huh. And when I wrote it, I didn't  
20 specifically -- I guess I was just trying to be -- I  
21 didn't write that specifically with Levy or not.

22 Q. So when you were writing it, you just didn't  
23 consider that one way or the other?

24 A. I think, again, the idea is -- the magnitude  
25 of the capital program that we have was the important

1 point I was trying to make. I didn't further subdivide  
2 it into -- you know, for which projects.

3 Q. Do you happen to know the in-service date of  
4 the Levy plants, the Levy nuclear plants, I should say?

5 A. I think that -- I think they were previously  
6 scheduled for 2016 and 2017, and I think we have  
7 announced publicly that those dates are going to be  
8 shifted to the right, rescheduled. I don't think that  
9 we know the new dates yet at this time.

10 Q. Do you think it's possible that the project  
11 may be further delayed or not even completed at all?

12 A. I don't know.

13 Q. Is that a possibility?

14 A. It is a possibility.

15 Q. I want to talk to you for a moment about the  
16 Commission's O&M benchmark that Ms. Bradley mentioned.  
17 And I think in your testimony you talk about it  
18 beginning at the very bottom of page 21?

19 A. Okay. And the top of 22. Okay.

20 Q. First of all, we're talking about the O&M  
21 benchmark here. And you would agree with me that the  
22 company has exceeded the benchmark in the test year by  
23 \$143 million; correct?

24 A. I could look to be sure, but I know --

25 Q. It's --

1           A.    There's an MFR that details the exact amount,  
2 but that number sounds correct.

3           Q.    You have that in your testimony at page 23,  
4 line 5, if you want to check.

5           A.    Okay.  There you go.

6           Q.    So the company is over by 143 million;  
7 correct?

8           A.    Yes.

9           Q.    And again, that's about -- what?  25 percent  
10 of the requested increase; correct?

11          A.    143 million, say, divided by 500, a little bit  
12 more, uh-huh.

13          Q.    Now, are you familiar -- I guess I should  
14 assume that you are familiar with the Commission's O&M  
15 benchmark calculation?

16          A.    Yes.  I had to familiarize myself with it to  
17 be able to put it in my testimony, that's correct.

18          Q.    Do you know in how many rate cases the  
19 Commission has used that benchmark?

20          A.    I don't.

21          Q.    Would you accept, subject to check, that it  
22 has been in use at least for the last 20 years?

23          A.    I would have no way to know or to disagree  
24 with that.

25          Q.    And would you agree with me that the company

1 is required to make that calculation when it files its  
2 MFRs so the Commission company can have a gauge as to  
3 the reasonableness of the company's request?

4 A. I do agree with that, yes.

5 Q. On page 24 of your testimony at line 7, you're  
6 talking about rate case expense; correct?

7 A. Yes.

8 Q. And you are recommending an amortization  
9 period of two years; correct?

10 A. Yes, that's correct.

11 Q. And you tell us that that is based on  
12 longstanding Commission practice; correct?

13 A. Yes, that's what it says.

14 Q. What is your basis for your comment that it --  
15 let me start again. That your requested time period is  
16 based on longstanding Commission practice of using two  
17 years?

18 A. Our basis for it, my basis for putting that  
19 here was, I believed that it was true.

20 Q. I'm sorry. I didn't hear that.

21 A. I believed that it was true. That's why I put  
22 it in there, of course. And I was just going to flip  
23 here to an interrogatory that we were asked about that  
24 exact statement.

25 Q. Did you review other Commission orders where

1 they addressed rate case amortization to --

2 CHAIRMAN CARTER: I think he was trying to  
3 answer your question.

4 MS. KAUFMAN: Oh, I'm sorry.

5 CHAIRMAN CARTER: You were trying to find the  
6 answer? Is that what you were looking for?

7 MS. KAUFMAN: I'm sorry.

8 THE WITNESS: Well, it's -- that's what I was  
9 doing. Is that what you want me to do?

10 CHAIRMAN CARTER: Yes. Okay.

11 MS. KAUFMAN: That will be fine. I'm sorry.  
12 I thought you were finished.

13 CHAIRMAN CARTER: He's got quite a few books.

14 MS. KAUFMAN: He's got a lot of notebooks up  
15 there.

16 CHAIRMAN CARTER: He's got the library over  
17 there.

18 A. I believe it was OPC Interrogatory 381, which  
19 I'll flip to.

20 And in our answer to that, we refer to at  
21 least one case, a TECO docket from 1982. And, you know,  
22 I think we tried to write out in our answer there that  
23 certainly the practice of taking rate case expenses and  
24 amortizing them over several years is the longstanding  
25 practice.

1 Q. Does that complete your answer?

2 A. If I remember your question, I think it does.

3 Q. Okay. I just wanted to be sure?

4 A. No. I was trying to answer fully.

5 Q. And we appreciate that.

6 And let me ask the question that I was going  
7 to ask. Did you go back and review any Commission  
8 orders? I guess you mentioned a 1982 Tampa Electric  
9 order?

10 A. Yes. That's the one that we cited in our  
11 interrogatory here that I recalled. I personally, I can  
12 tell you I did not go back and further research which  
13 orders that was established in.

14 Q. Did you look at the most recent Tampa Electric  
15 order from April 30th, 2009?

16 A. I did not in answering this. Certainly at the  
17 time that we prepared our rate case, that would not have  
18 been out in any case, but I did not.

19 Q. Are you aware of the amortization period that  
20 the Commission approved in the Tampa Electric rate case?

21 A. I'm not.

22 Q. I'm sorry?

23 A. I am not. I'm sorry.

24 MS. KAUFMAN: Mr. Chairman, I'm just going to  
25 give the witness a copy of an excerpt from the Tampa

1 Electric rate case order.

2 CHAIRMAN CARTER: You may approach. Do you  
3 want to cite it for the record?

4 MS. KAUFMAN: I will. Thank you,  
5 Mr. Chairman. This is the Tampa Electric rate case  
6 order, Docket Number 080317, Order Number PSC-09-0283.

7 Mr. Burnett, I apologize. I do not have  
8 another copy. If you want to --

9 MR. BURNETT: I have it memorized,  
10 Ms. Kaufman.

11 MS. KAUFMAN: Good for you. You know what?  
12 Me too.

13 BY MS. KAUFMAN:

14 Q. Mr. Toomey, I have just handed you an excerpt  
15 from quite a long order in the Tampa Electric rate case.

16 A. Okay.

17 Q. If you would flip over to page 65, in the  
18 middle I've highlighted -- that is where the discussion  
19 of the amortization period begins. And if you would  
20 turn over to page 67, toward the bottom, you'll see a  
21 highlighted sentence. And if you could, read that and  
22 tell us what the Commission decided to do in that case  
23 regarding the amortization.

24 A. Yes. It says, "Also, the amortization period  
25 shall be increased from three to four years, which is

1 consistent with several of our recent rate cases."

2 Q. And so the more recent practice, would you  
3 agree, is a four-year amortization for rate case  
4 expense, not two years?

5 A. That's what the Commission said here, and I'm  
6 sure they're right.

7 Q. You can set that aside.

8 A. Okay. Thank you.

9 Q. I am done with that, yes. Thank you.

10 Also on page 24 of your testimony, we've had  
11 some discussion with other witnesses about the corporate  
12 aircraft.

13 A. Yes.

14 Q. And I'm correct that any expenses related to  
15 that have been removed from this rate case; correct?

16 A. You are correct. Any expenses associated with  
17 that have been removed.

18 Q. Now, I had some questions for Ms. Wyckoff  
19 about some of your affiliated entities, or I guess more  
20 appropriately called your non-regulated entities, and I  
21 believe she told me that you were the right person to  
22 talk to about that. Does that sound right?

23 A. I recall that, yes.

24 MS. KAUFMAN: Okay. And I have an exhibit  
25 that I would like to distribute, Mr. Chairman.

1 CHAIRMAN CARTER: Do you need a number?

2 MS. KAUFMAN: I do.

3 CHAIRMAN CARTER: Okay. For the record, it  
4 will be Number 282. Short title?

5 MS. KAUFMAN: OPC Interrogatories 402 to 406.

6 CHAIRMAN CARTER: OPC Interrogatories 402 --

7 MS. KAUFMAN: Through 406.

8 CHAIRMAN CARTER: Through 406. Thank you.

9 (Exhibit Number 282 was marked for  
10 identification.)

11 CHAIRMAN CARTER: You may proceed.

12 MS. KAUFMAN: Okay. Thank you. And I  
13 apologize. The cover sheet says Wyckoff on it, but if  
14 everyone wouldn't mind changing that to Toomey.

15 THE WITNESS: That's fine.

16 BY MS. KAUFMAN:

17 Q. You sponsored this set of interrogatory  
18 answers, right, Mr. Toomey?

19 A. On my listing, I had myself down as the  
20 sponsor, I believe, for 400, 401, and 406, so maybe not  
21 all of these, but I'm familiar with them.

22 Q. Let's see if we can get through them. If you  
23 look at your affidavit at the back, the one that I'm  
24 going to be talking to you about is 402.

25 A. Okay.

1 Q. And it looks like your affidavit suggests you  
2 sponsored that one?

3 A. Okay. I am familiar with that one.

4 Q. Okay. Very good. Now, Progress has a number  
5 of entities that provide unregulated or non-regulated  
6 services; correct?

7 A. Yes. I thought it might be helpful to  
8 clarify.

9 Q. Go right ahead.

10 A. Yes. There was a discussion the other day  
11 about kind of a corporate organizational chart and the  
12 discussion that there are companies owned by the parent  
13 holding company that are not regulated utilities. Now,  
14 they're not doing a whole lot now. We have the service  
15 company that provides services to the utilities. But  
16 for me, I think of those as affiliates, like affiliated  
17 companies who aren't regulated. That's not a huge  
18 difference, but it's sometimes meaningful.

19 Actually, Progress Energy Florida itself  
20 actually engages in some operations that by definition  
21 are not utility operations. I don't so much think of  
22 those as affiliates, because it's our company. And it  
23 will just be helpful if I can keep -- you know, that's  
24 kind of below the line type activities.

25 Q. Okay. I'll try to stay within that

1 nomenclature --

2 A. That's fine.

3 Q. -- if I can, if I know.

4 A. And again, on 402, in a general way, I think  
5 this refers to activities that PEF would be engaged in  
6 that are, you know, by definition not tariffed,  
7 regulated services. They're kind of below the line.

8 Q. So if you look at page 3 of 402 at I and also  
9 at J, the services that are listed there are provided by  
10 the utility, but they are not regulated; is that  
11 correct?

12 A. Yes. That was the distinction I was just  
13 trying to highlight earlier. That's correct.

14 Q. And if you look on page 4 at item J where some  
15 of the services are listed, I think that -- I apologize  
16 for not remembering the witness's name, but we had some  
17 discussion with the customer service representative  
18 about some of these.

19 A. Perhaps Willette Morman.

20 Q. Yes. I'm sorry.

21 A. That's fine.

22 Q. It's been a long week, a long couple of weeks.

23 If you look on J, you see a service there  
24 that's called home wire. What is that?

25 A. It's -- it may be explained in better detail

1 here. I was just flipping. But it's a service that in  
2 a general way -- and I think somewhere here it's  
3 probably defined better, but it's a service that we  
4 offer that's clearly not regulated, that we will, you  
5 know, for the payment of a fee from customers monthly,  
6 take care of the wiring inside their house, I believe.  
7 I believe that's what it does.

8 Q. I don't know if you would be familiar with  
9 this analogy. In the telecommunications industry, it's  
10 like an inside wire service?

11 A. Yes, that's my understanding. And again,  
12 somewhere in the interrogatories, I think we explain  
13 what each of the programs are, and from my memory, I  
14 believe that's what this one is.

15 Q. You have -- at the time of this interrogatory,  
16 about -- over 180,000 customers were taking that  
17 service; correct?

18 A. Yes, 182,000 is what was mentioned there,  
19 that's right.

20 Q. And the service above that I think is the one  
21 that Ms. Morman discussed with us, the surge protection  
22 program, and that's -- a little more than 93,000 people  
23 are taking that service; correct?

24 A. Yes.

25 Q. When a customer of Progress Energy signs up

1 for one of these services, is it billed on their  
2 electric bill?

3 A. Yes. If they're a Progress Energy Florida  
4 customer and they sign on on this, they're billed on  
5 their bill.

6 Q. On the next page, page 4, we see the revenue  
7 by month --

8 A. Page 5? It's page 5 on mine.

9 Q. I'm sorry. Page 5.

10 A. Okay. Uh-huh.

11 Q. And, you know, for example, the home wire we  
12 just talked about, for the first six months of this  
13 year, the company collects over \$4 million for that  
14 service; correct?

15 A. I see that, yes.

16 Q. And I was looking for the -- do you know where  
17 the surge protection service is on here?

18 A. It might be the power quality services. My  
19 guess is it would be in the power quality services.  
20 That's kind of the nature of the service, and it's the  
21 next largest dollar amount.

22 Q. The 3 1/2 million?

23 A. Yes.

24 Q. Is there any compensation back to the  
25 regulated entity for billing for these services on the

1 electric bill?

2 A. There is an overhead allocation that is  
3 applied to these below the line type activities to  
4 allocate the cost to them. We believe that's correct.  
5 So it's not a -- it's an allocation of overhead. I'm  
6 sorry.

7 Q. And that is intended to account for the fact  
8 that the service is billed on the electric bill?

9 A. Yes. That's one of the things accounted for,  
10 yes.

11 Q. Does that allocation also account for these  
12 non-regulated services being marketed to a captive  
13 customer base?

14 A. The only reason why I'm hesitating on that  
15 answer is, again, somewhere in all of our  
16 interrogatories -- and I'll be happy to look for a  
17 minute. I believe we were asked a question about how  
18 the company is reimbursed for that, and we answered it,  
19 and I believe there's sort of a marketing fee paid.

20 Q. Would that be in this set I handed you, do you  
21 think?

22 A. Well, I'm looking for that right now.

23 If you go to -- yes. It's on page 3, little  
24 letter E. You can see our answer to a question. And if  
25 you flip back up to the front in the series of

1 questions, this says customers of FP&L, but it's us.  
2 It's asking are they offered non-regulated services at  
3 the time they initiate service, and then E says, hey, if  
4 you say yes to that, tell us how that works. And so  
5 over here we've said, yes, when a new customer signs up,  
6 we do offer them this. And then in E, we explain the  
7 allocation on the value of the sale.

8 Q. So when you say value of the sale, I'm just  
9 going to --

10 A. It goes on to explain it in case it's not a  
11 universal term, which I don't think it is. It's the  
12 value of the sales determined based on one to two months  
13 of revenue generated from the product, which it  
14 describes here as an industry standard. And --

15 Q. Can -- I'm sorry.

16 A. And then it goes on to talk about that on a  
17 per sale basis. I'm sorry.

18 Q. That's okay. Can an entity that is not  
19 related to Progress Energy market and bill their  
20 services to your captive customers?

21 A. I believe the answer is no.

22 Q. So if I wanted to have you market my service  
23 for every new customer and bill them for me, that's  
24 something that's not permissible?

25 A. Yes. This is not like a tariffed service that

1 we make available to companies to bill through our  
2 bills; that's correct.

3 Q. So would you agree with me that certainly in  
4 marketing a product like inside wire protection or surge  
5 protection that the regulated -- not the -- the  
6 unregulated entities have somewhat of an advantage over  
7 others in the marketplace?

8 A. Well, they certainly are able to do that when  
9 others can't. So if you think of all the things under  
10 which businesses compete, that's an advantage for them.  
11 And certainly they have to compete on everything,  
12 quality, quality of service. But we are the only  
13 company that can provide that ourselves; you're correct.

14 Q. Are there ever bill inserts used to market any  
15 of these services?

16 A. I don't know.

17 Q. I guess I should have asked Ms. Morman, huh?

18 A. Perhaps.

19 Q. All right. We're going to switch gears, and I  
20 want to talk to you just for a moment about the storm  
21 accrual that Mr. Rehwinkel discussed with you.

22 A. That's fine.

23 Q. And I think you told him that the company is  
24 requesting to increase the accrual from 6 million to 16  
25 million, so an increase of \$10 million per year;

1 correct?

2 A. Yes, that's right.

3 Q. Do you know the current amount that is in the  
4 fund at this time?

5 A. I know it approximately?

6 Q. I think that would be fine for our purposes.

7 A. I was going to say, I think it's about, from  
8 memory, maybe 150 million, 140 million. And I can look  
9 to do better, but --

10 Q. Well, in your deposition, you told us it was  
11 154 million. Does that sound right?

12 A. Even better. Okay. That's fine. I  
13 apologize.

14 Q. That's fine. So currently, there's  
15 154 million in there, and that was based on accruing  
16 \$6 million a year; correct?

17 A. That's what the accrual has been recently.  
18 Just so you know, that has varied in the recent past  
19 quite a bit.

20 Q. And I want to just clarify something that  
21 Mr. Rehwinkel asked you. This might have been my  
22 misunderstanding. When dollars are collected pursuant  
23 to the storm accrual, are those set aside in a dedicated  
24 fund?

25 A. They are not.

1 Q. So are they part --

2 A. I should explain more completely. I'm sorry.  
3 They're not in the sense of like a trust fund. They're  
4 not set up that way. It is, rather, a reserve on the  
5 books with limited ability to use it, but it is just a  
6 reserve on the books. A term people use is, is it a  
7 funded trust or a funding reserve or unfunded, and with  
8 that distinction, it's not a funded reserve.

9 Q. Is it part of the company's cash flow?

10 A. I would say the receipts are part of the cash  
11 flow; that's correct.

12 Q. Is it part of operating revenue?

13 A. Well, to the extent -- I guess that if a rate  
14 increase is granted and a portion of those revenues are  
15 for it, you know, what it is is revenues, which clearly  
16 count for the operating revenue part. If they match the  
17 expense reserve, the net impact is zero.

18 Q. And I think that you told Mr. Rehwinkel that  
19 in the case of Progress that the storm accrual funds can  
20 only be used for that specific purpose, the purpose of  
21 repairing damage after a storm; is that correct?

22 A. Well, I know that -- I'm not familiar with the  
23 details, but I do know that it was set up for that  
24 specific purpose. It's not in any way general corporate  
25 funds. And I believe he was asking didn't that lead to

1 us having to ask if we wanted to use them for something  
2 which we had to do, and the Commission, of course,  
3 decided no in that instance.

4 CHAIRMAN CARTER: One second, Ms. Kaufman.  
5 Commissioner Skop.

6 COMMISSIONER SKOP: Thank you, Mr. Chairman.  
7 I just wanted to, I guess for my own clarification, ask  
8 a question on this point, because I seem to have heard  
9 two different answers, and I want to make sure I  
10 understand it specifically, because I spoke to it  
11 yesterday. But with respect to the question that  
12 Mr. Rehwinkel asked, followed by Ms. Kaufman's question,  
13 basically, Progress has asked for 10 million additional  
14 dollars in storm accrual amounts. And so I think that  
15 you've testified, as others have, that that's an  
16 unfunded reserve.

17 So what I'm trying to get some clarification  
18 of -- and this is my misunderstanding in terms of what  
19 I'm hearing, at least from my perspective -- and correct  
20 me if I'm wrong. To me, the moneys collected, if that  
21 were to be granted, the \$10 million additional request,  
22 would represent unencumbered free cash flow to the  
23 company to the extent -- and I'll ask you to illustrate  
24 this for me in a second in an exhibit that was  
25 previously mentioned. But you've got theoretically

1 \$10 million of additional cash flow coming in a year,  
2 and you're making an accounting entry. But with respect  
3 to the cash itself, it's not being encumbered or swept  
4 into a funded account, so that cash is free to go  
5 anywhere, theoretically. It could be swept up to pay  
6 dividends at the corporate level, swept up to the  
7 corporate level or used for other operating expenses.

8 So I guess what I'm trying to get  
9 clarification of, the cash comes in, and until there's a  
10 storm event, the company is free to use that incoming  
11 cash any way it sees fit within corporate operations; is  
12 that correct?

13 THE WITNESS: I would say yes, and just being  
14 careful then to go on and say as you're talking about  
15 the cash, I think the receipt of the cash is step one.  
16 If after that -- a good thing maybe to me, just for  
17 clarity, if you think of like the nuclear  
18 decommissioning trust, when the funds are segregated  
19 into a separate trust account, that does not exist in  
20 this case.

21 So I think confirming what you're saying, the  
22 cash flows come in, in effect, they're part of our cash  
23 flows from revenues, because it's in our revenues, and  
24 so those are available for any other purposes of the  
25 corporation.

1           COMMISSIONER SKOP: So I guess in summary, the  
2 incoming cash or the free cash flow coming in is  
3 unencumbered, but there is an offsetting accounting  
4 entry made that should there be a storm reserve event,  
5 the company would be required at that point to recognize  
6 what the consumers have already paid for; correct?

7           THE WITNESS: Absolutely true. And that's the  
8 reserve part of it; that's correct.

9           COMMISSIONER SKOP: And I guess the response  
10 to that -- I was going to look at the monthly cash flows  
11 on Citizens' Fourth Set of Interrogatories, Number 65,  
12 but I think that's unnecessary based on your response.  
13 Thank you.

14          THE WITNESS: Okay.

15          COMMISSIONER EDGAR: Ms. Kaufman.

16          MS. KAUFMAN: Thank you, Madam Chairman.  
17 Thank you, Commissioner Skop. That was the point I was  
18 trying to get to.

19 BY MS. KAUFMAN:

20          Q. So when the cash comes in for the storm  
21 accrual, the company can use it as it deems appropriate?

22          A. Yes. You can say that; that's correct.

23          Q. Now, would you agree that when -- hopefully  
24 not, but if a storm were to hit the Progress service  
25 territory and cause some damage that the fund was not

1 sufficient to cover at this point in time, the company  
2 could certainly come to the Commission and ask for a  
3 surcharge on the customers in order to cover any  
4 prudently incurred costs that related to the storm?

5 A. I would say yes, we are free to ask. I would  
6 want to say more if you think that's okay.

7 Q. Well, I don't know. Given the hour, I guess  
8 I'll leave that to the Chairman.

9 A. I can make it quick. The effect of the  
10 reserve there is, if we incur a lot of cost, the book  
11 income effect is that we would be able to charge those  
12 against that reserve that was created, so the earnings  
13 impact of that is somewhat possibly mitigated by the  
14 reserve.

15 But your points on cash flow are -- you know,  
16 given that it's not a separate funded trust, the cash  
17 costs of putting everything back in place and all that  
18 would have to be borne immediately, as they would be, on  
19 the cash of the company. It's the reserve that would  
20 help from a book income impact standpoint. I just  
21 wanted to clarify that briefly.

22 Q. Thank you for that clarification. The last, I  
23 guess, bad storm season we had was in 2004, correct,  
24 where you had several storms hit?

25 A. Well, there were several bad storms there. A

1 question was asked the other day, when was the last  
2 tropical storm that hit us, and I remember Fay in 2008,  
3 and that was part of our request here. That was, you  
4 know, noticeable.

5 Q. But the sort of events that we had in 2004  
6 caused a lot of damage, because we had a lot of storms?

7 A. Yes. I wasn't here at the time. Everyone  
8 tells me I should be glad. But those depleted everybody  
9 in the state's storm reserves. There were lots of  
10 surcharges. It was in that period of time; that's  
11 right.

12 Q. And when that happened, am I correct that  
13 Progress came to the Commission and requested a  
14 surcharge, and as a matter of fact, there was actually a  
15 stipulation among most of the parties here that that  
16 would be appropriate; correct?

17 A. I believe that's true.

18 Q. And you don't have any reason to believe that  
19 the Commission won't allow prudent recovery of storm  
20 costs in the future, do you?

21 A. No, I have no reason to believe that they  
22 would not.

23 Q. And would you agree with me to the extent that  
24 your request for an additional \$10 million a year for  
25 the accrual is not granted, or if the Commission decides

1 that no accrual is appropriate, that would certainly  
2 lighten the burden on some of the ratepayers at this  
3 point in time, because it would reduce your revenue  
4 requirement; correct?

5 A. It would reduce our revenue requirement today,  
6 not without a corresponding effect, and that would be  
7 that the reserve itself would not build as rapidly over  
8 time, and when a storm occurred, while we would go out  
9 and get the cash, it would be very destructive from the  
10 reserve standpoint. We would need a surcharge to  
11 recover that.

12 Q. Correct?

13 A. And so the reserve kind of plays a role in  
14 buffering against that.

15 Q. My only point being that you don't have any  
16 reason to doubt that such a surcharge would be  
17 permitted, assuming that the costs were reasonable and  
18 prudent?

19 A. Yes. I have no reason to doubt that. In  
20 fact, I count on the fact that it would be.

21 Q. Let's talk for a moment about the purchased  
22 power adjustment. I have just a few questions on that.

23 A. Okay.

24 Q. Some folks have already talked to you about  
25 it. And you told us that the annual revenue requirement

1 associated with the imputation of that is, you told  
2 Mr. Rehwinkel, about \$25 million a year; correct?

3 A. Yes, for our test year. And he had the  
4 specific number, and I could refer to it, but that's  
5 what I recall.

6 Q. I think the record is clear on that.

7 A. Okay.

8 Q. Are you familiar with the decision the  
9 Commission made on the imputed debt issue for PPAs in  
10 the Tampa Electric rate case?

11 A. I'm not.

12 Q. Were you aware that Tampa Electric made the  
13 same request to the Commission in its rate case, to be  
14 allowed to impute debt based on the purchased power --

15 A. To impute equity?

16 Q. Excuse me. Yes, impute equity.

17 A. I did know that they had made a request. I'm  
18 not familiar with the details, but I'm familiar that  
19 they made a similar request.

20 Q. And do you know that it was denied?

21 A. Again, I wasn't familiar with the specifics on  
22 that.

23 Q. I'm going to give you a different excerpt --

24 A. Okay. That's fine.

25 Q. -- from the Tampa Electric rate case that we

1 can look at together.

2 CHAIRMAN CARTER: For the record, Ms. Kaufman,  
3 do you want to -- for the record, do you want to give  
4 the number for the order, please?

5 MS. KAUFMAN: Yes. It's Docket Number  
6 080317-EI, Order Number PSC-09-0283-FOF-EI, entered by  
7 the Commission on April 30, 2009.

8 CHAIRMAN CARTER: You may proceed.

9 MS. KAUFMAN: Thank you.

10 BY MS. KAUFMAN:

11 Q. Mr. Toomey, I've only excerpted the portion  
12 that deals with the pro forma adjustment to equity that  
13 Tampa Electric requested. If you want to take a minute  
14 to look through it, I've highlighted the portions that I  
15 want to talk to you about.

16 A. You can just direct me to the highlighted  
17 portions if you like.

18 Q. As I said, in that case, the Commission denied  
19 the same adjustment that the company is requesting here.  
20 If you would, turn to page 36 and read the highlighted  
21 sentence at the top there.

22 A. "With this proposed adjustment, we find that  
23 the company is attempting to take a portion of S&P's  
24 consolidated credit assessment methodology and use it  
25 for a purpose it was never intended."

1           Q.    And then if you look down on that same page,  
2 if you could read the sentence that begins with  
3 "therefore."

4           A.    Yes.  "Therefore, based on the record evidence  
5 and the reasons discussed above, we find that TECO's  
6 requested pro forma adjustment to equity shall be denied  
7 for purposes of setting rates in this proceeding."

8           Q.    And you were not aware of this order at the  
9 time you drafted -- made your recommendation?

10          A.    Made what recommendation?

11          Q.    That the imputed equity adjustment be made in  
12 your case.

13          A.    Well, if this came out after we filed ours on  
14 March 30th --

15          Q.    It did.

16          A.    Yes.  So we wouldn't have known it at the time  
17 we filed by virtue of the dates; right?

18          Q.    Yes, sir.  I'm sorry.  You're right about  
19 that?

20                   Does it change your view on whether this  
21 adjustment should be made?

22          A.    Well, it's an important data point.  I'm not  
23 familiar with their specifics versus ours, and, you  
24 know, I know the Commission will consider it in this  
25 proceeding.

1           Q.    Let's talk for a moment now about pension.  
2    You cover a lot of areas in your testimony.

3           A.    That's fine.

4           Q.    And I think you discussed with Mr. Rehwinkel  
5    the fact that part of your revenue request relates to  
6    the decreased value of your pension fund; correct?

7           A.    Yes.  It's an important contributing factor to  
8    the increase in the pension expense we're requesting.

9           Q.    And that decline in the pension fund was based  
10   on the downturn and the low part of the economy in  
11   March; correct?

12          A.    Actually, again, for purposes of this  
13   calculation, the 2008 actual results.  The way that's  
14   used in the pension is -- an important data point in the  
15   calculation is what are the assets you have available at  
16   the first of the year to be invested to grow the pension  
17   fund.  And then as I mentioned earlier, that asset  
18   balance on January 1st of 2009, instead of having grown  
19   maybe something on the order we would have expected of  
20   80 to 90 million during 2008, in fact, it went down by  
21   about 320 million, so it was way off where it had been  
22   previously.

23          Q.    Can you quantify for us the effect that the  
24   stock market decline has had on your requested pension  
25   fund request for 2010?

1           A.    Well, maybe not with complete precision.  
2           Again, the pension's calculation is very detailed,  
3           but --

4           Q.    A high level is always good for me.

5           A.    Okay.  I was just going to refer to C-17 for a  
6           moment, if I can move this out of the way.

7                         Again, the effect of the stock market and the  
8           downturn in 2008 really shows up in that -- what assets  
9           do you have available for investment at the beginning of  
10          the year.  Apparently we used a 8.75 earnings rate for  
11          2010.  You know, that was the statistic that I had cited  
12          earlier.

13                        And again, I want to say that if you just take  
14          the -- I'll flip to the amount, the negative 320  
15          million, I believe it is, that was lost in 2008.  Yes.  
16          On line 3 is actual return -- woops.  Yes, line 3 is  
17          actual returns, gains or loss.  You can see in the  
18          future we're forecasting gains, but in 2008, it was  
19          about a \$320 million loss.  If I just look at that,  
20          that's 320 million I wasn't counting on losing that  
21          would have been invested.  I might also have, other  
22          things equal, said I would have earned about 8 or  
23          9 percent on about a billion.  That would be another 80  
24          or 90, so let's just call it 400 million that wasn't  
25          invested at something like 9 percent.  Just that alone

1 would -- using round numbers, 9 percent is like  
2 36 million. So that comes out of the math right away  
3 just by virtue of the history in 2008. And --

4 Q. Could you -- I'm sorry.

5 A. That's the ballpark that I was trying to  
6 capture. That would be the effect of the '08 downturn.

7 Q. Would you agree that the stock market has  
8 rebounded substantially since that time and since you  
9 filed your case on March 20th?

10 A. Yes.

11 MS. KAUFMAN: I have another exhibit,  
12 Mr. Chairman.

13 CHAIRMAN CARTER: Okay. That number will be  
14 283, 283. Short title?

15 MS. KAUFMAN: Stock Market Price Indices.

16 CHAIRMAN CARTER: Stock Market Price Indices.

17 MS. KAUFMAN: It says -- or indexes.

18 CHAIRMAN CARTER: Okay.

19 MS. KAUFMAN: Take a look at these two pages,  
20 or three pages, while we're distributing it, Mr. Toomey.

21 CHAIRMAN CARTER: Thank you. I think you're  
22 right. It's indexes.

23 (Exhibit Number 283 was marked for  
24 identification.)

25 BY MS. KAUFMAN:

1           Q.    I'll represent to you that this was printed  
2 off the Internet for me, and it shows the Dow, the S&P,  
3 and the NASDAQ. It gives us a historical look at what  
4 has happened. So if we take a look at the low point,  
5 the first one, which is the Dow Jones Industrial  
6 Average, take a look at March '09.

7           A.    Yes. And I'm in the Adjusted Close column, I  
8 assume.

9           Q.    That's fine. I think it shows it either way.  
10 You would agree with me that certainly we've seen a  
11 substantial increase in the value of the Dow from March  
12 '09 when you filed your case to September '09?

13          A.    Yes, we have. I see that. That's correct.

14          Q.    And if you flip over to the S&P, which is the  
15 next page, and we look at March '09, we see that the S&P  
16 was at about 798; correct?

17          A.    Uh-huh.

18          Q.    And the adjusted close is about 1,060;  
19 correct?

20          A.    I see that.

21          Q.    So again, you agree that we've had some  
22 substantial turn-around there?

23          A.    Yes, I would agree.

24          Q.    And the last one is NASDAQ, and if you look at  
25 that, March '09, it closed at about 1,528, and September

1 it's about 2,131; correct?

2 A. Yes, I see that.

3 Q. Do you know what the value of your pension  
4 fund is today?

5 A. I don't.

6 Q. Would you suspect that it's worth  
7 substantially more than it was when filed your testimony  
8 on March 20th?

9 A. Yes. I would say yes. I absolutely think  
10 it's worth more today than it was.

11 Q. And wouldn't you agree that if that's the  
12 case, your revenue requirement that relates to the  
13 pension downturn would be less today than it was on  
14 March 20th?

15 A. Let me explain. Well, I guess I would say not  
16 yet, and let me explain. Pension accounting basically  
17 relies on this actuarial calculation, which for us is  
18 done once a year. If the market goes down today, or in  
19 fact if the market has come up today, anything during  
20 the year, in effect, we reset all of our adjustments and  
21 rebook the pension on a calendar year basis.

22 So I certainly hope the market stays up and we  
23 get to the end of the year and then our pension  
24 calculation for next year would result in lower pension  
25 expenses next year. But the point I want to make is we

1 don't adjust every month or anything like that. It's  
2 done once a year.

3 Q. But -- I don't know if it was fortuitously or  
4 not, but you apparently selected the lowest point from  
5 the data we just looked at to base your revenue increase  
6 on; is that right?

7 A. Well, I can assure you, the timing of our rate  
8 case was not at all centered on what the optimum time  
9 was for the market to crash for the pension assets.

10 Q. Oh, I didn't mean to imply that. If we know  
11 that, we all probably would have made different  
12 decisions.

13 A. You know, the timing of our rate case was  
14 centered on having new rates on January 1st of 2010.  
15 Yes, I can see from this that the markets obviously  
16 dropped quite a bit in late '08 and continued some into  
17 early '09, and since then, they have recovered. I  
18 completely agree.

19 Q. And you would agree as well that your pension  
20 fund today is worth substantially more than it was when  
21 you made the calculation of that portion of your revenue  
22 requirement?

23 A. Yes. I don't have the specific number, but I  
24 would agree that it's worth more today than on  
25 January 1st.

1 Q. Do you have any idea how much, a range?

2 A. I don't.

3 Q. Once you've redone your actuarial studies, as  
4 you said, on an annual basis, if the pension expense is  
5 less next year, will ratepayers pay less for that  
6 pension expense?

7 A. Based on a series of assumptions, I would say  
8 no. I think what ratepayers pay as it relates to the  
9 pension expense will be a function of the outcome of the  
10 rate case.

11 Q. So to the extent that, as we all hope, the  
12 economy gets back on track and the market keeps going  
13 up, ratepayers will be paying rates based on this low  
14 point in the market, right, as it relates to pension?

15 A. As it relates to the pension expense.  
16 However, I would just point out we did defer \$34 million  
17 out of '09, as we had discussed earlier, and that is to  
18 be repaid prospectively. If our pension expense is less  
19 than the amount that's set, we're to use that to  
20 amortize that 34 million. So there's kind of 34 million  
21 that has to get chewed up going forward as well. I just  
22 didn't want to lose track of that.

23 Q. One more question on the pension issue here.  
24 I think you said that you target your pension earnings  
25 at -- did you say 8.75 percent?

1           A.    Yes.  That was on Schedule C-17, which I could  
2 flip to again.

3           Q.    You don't need to do that.

4           A.    But there's a data point on there as part of  
5 the key pension assumptions that says what's the assumed  
6 return on assets invested in the fund.  And for the 2010  
7 year, I believe, from memory, it was 8.75 percent.

8           Q.    So am I correct that if your fund earns 8.75,  
9 that's a good year for the fund?  It's satisfactory?

10          A.    Well, each year at the time all the  
11 assumptions are re-examined, the idea is what should we  
12 anticipate going forward, or re-examined.  I think for  
13 the 2010 year, we set a very reasonable expectation.  In  
14 fact, we should plan on it.  It was 8.75 percent.

15          Q.    So that's what you expect and hope the fund  
16 will earn in the test year; correct?  Is that -- my  
17 understanding right?

18          A.    Yes.  Our expense projection and everything  
19 else is predicated on return.

20          Q.    But in terms of what the company wants to earn  
21 on its equity, it wants to earn 12.54; correct?

22          A.    What we've asked for in this case is 12.54,  
23 and that's not really an apple and an apple, if you want  
24 to discuss that.

25          Q.    Well, I'm just kind of trying to kind of weigh

1 the -- on the one hand, you've got your pension, and  
2 you're projecting 8.75. And I'm assuming that, you  
3 know, that's an appropriate projection. And on the  
4 other hand, you're asking the Commission to grant a  
5 return on equity to your company of 12.54 percent. Is  
6 that right?

7 A. Both of those are true. And again, the  
8 distinction I -- I kind of got started on this earlier.  
9 Just to finish it, the pension will by its nature invest  
10 in a broad variety of assets, not all common stocks,  
11 certainly not all common stocks of our utility. When  
12 they invest in bonds, they will achieve what you get  
13 when you invest in bonds, which is more stable, but a  
14 lower return, and the pension by its nature devotes a  
15 fair portion of its investments to bonds.

16 So that 8.75 is, as Mr. Rehwinkel was kind of  
17 asking earlier, it's kind of a weighted average of the  
18 assumed returns on a variety of investments. It's not  
19 at all, I think, comparable to what's the appropriate  
20 ROE for a single company in a rate case proceeding.  
21 That's all I was going to mention.

22 Q. Can you turn back to that purple package,  
23 please?

24 A. Discovery related to cost of capital?

25 Q. Yes, that we were talking about before?

1           A.    I have it.

2           Q.    And if you would turn to page 1618, just a few  
3 pages in from the front.

4           A.    Yes, I see it.

5           Q.    This question asks you to provide specific  
6 examples of Florida regulatory decisions that have  
7 contributed to PEF's inability to actually earn its  
8 authorized return. Do you see that?

9           A.    I do.

10          Q.    And would you agree with me that there aren't  
11 any regulatory decisions cited in that response, are  
12 there?

13          A.    There are none; that's correct.

14          Q.    Let me just ask you this. Is it your  
15 testimony today before the Commission as Vice President  
16 of Finance for Progress Energy that if the Commission  
17 doesn't grant you the one-half billion dollar increase  
18 along with the 12.54 return on equity, you will be  
19 unable to provide safe, reliable service to your  
20 customers?

21          A.    No, that would not be my testimony.

22          Q.    So I would be correct that if the Commission  
23 were to grant a lower ROE or a lower revenue  
24 requirement, you would still be able to provide safe and  
25 reliable service to your customers?

1           A.    No, I wouldn't say that.  I would say we will  
2 always try as hard as we can to provide that safe,  
3 reliable service to our customers.  I just wanted to  
4 avoid an absolute.

5                        Certainly if the Commission were to make a  
6 decision that was very low that damaged our financial  
7 metrics and everything that was testified about in the  
8 ROE testimony yesterday, which I won't go back through,  
9 I seriously believe it would hinder our ability to go to  
10 the capital markets and get access to capital that we  
11 need to serve those customers.  So I believe that their  
12 decision is tied to our ability to deliver that service.  
13 I would not go as far as the absolute, that anything  
14 below 12.54 means we could not.

15           Q.    You have -- I would assume you're comfortable  
16 that the Commission will make a reasonable decision in  
17 this case, weighing all of the different concerns of the  
18 consumers and the company?

19           A.    I am.

20           Q.    And in that event, would it be your testimony  
21 that the company will be able to provide safe, reliable  
22 service to its customers?

23           A.    That's kind of a hypothetical.

24           Q.    Absolutely.

25           A.    It would depend on what they decide.

1 Q. And the company, I assume, will always do its  
2 utmost to provide that safe and reliable service?

3 A. Yes, we will.

4 MS. KAUFMAN: Thank you, Mr. Chairman. And  
5 thank you very much for your patience, Mr. Toomey.

6 THE WITNESS: Sure.

7 CHAIRMAN CARTER: Thank you, Ms. Kaufman.  
8 Mr. Wright.

9 MR. WRIGHT: Thank you, Mr. Chairman.

10 CROSS-EXAMINATION

11 BY MR. WRIGHT:

12 Q. Good afternoon, Mr. Toomey.

13 A. Good evening.

14 Q. I guess it depends on how you define evening,  
15 but good evening to you.

16 We haven't formally met. I am Schef Wright.  
17 I represent the Florida Retail Federation in this case.  
18 And I think I don't have very many questions for you. I  
19 hope that turns out to be true.

20 A. Okay.

21 Q. I believe that in his opening statement, your  
22 general counsel, Mr. Glenn, made a statement to the  
23 effect that cash is king. Have you heard that  
24 expression?

25 A. I have heard that expression. I don't know

1 that I recall that from the opening statement, but go  
2 ahead.

3 Q. Well, in the context of your company's request  
4 for a rate increase in this case, do you agree that --  
5 is it your opinion that cash is king?

6 A. Yes. The cash flows of the company are  
7 certainly critical, and for the decision here, the cash  
8 flows on the revenue side, I absolutely agree.

9 Q. So in what we call down here "walking around  
10 language," the more cash you all get, the better for  
11 you?

12 A. Yes, the company is better off. The more  
13 operating cash flow it has, the better off it will be  
14 and the stronger it will be financially.

15 Q. I just have a couple of questions following up  
16 on Ms. Kaufman's questions to you regarding the pension  
17 fund and expense. Do you know the composition of the  
18 pension fund in rough terms as between bonds and  
19 equities?

20 A. I don't know I do sitting here today. I don't  
21 know that I do. I know that the -- it's periodically  
22 reconsidered. Investment allocations are adjusted based  
23 on different things, but I don't know its -- but I don't  
24 know the current weighting today.

25 Q. Do you think it's somewhere between 40-60 and

1 60-40, either way?

2 A. Well, I have seen it in the past, and while I  
3 don't remember it specifically now, it's -- there are  
4 quite a few categories. Again, the MFR that I spoke to  
5 earlier, there's, you know, several different gradations  
6 within the stocks and as well within the bonds. So it's  
7 more like there's five or six layers, not two, and I  
8 don't recall the current percentages.

9 Q. You don't have a document with you that you  
10 could look at?

11 A. If I do, I'm not aware of it. I don't think  
12 that I do.

13 Q. All right. Thank you. I had one follow-up  
14 question regarding MFR Schedule C-17, and it really  
15 doesn't have anything to do with -- well, it has very  
16 little to do with the pension expense, and that is at  
17 line 27. The MFR shows assumptions regarding salary  
18 increases, and I believe looking at Note 3, it indicates  
19 that it's 4.25 percent assumed for the bargaining unit  
20 plan customers and 4 percent for non-bargaining unit --  
21 I said customers; I meant employees -- and 4 percent for  
22 the non-bargaining unit employees. Is that accurate?

23 A. Yes. I see those as well, yes.

24 Q. What I really am trying to get at is, I've  
25 seen a bunch of numbers in discovery responses and other

1       testimonies as to exactly what salary increase, what  
2       average wage increase or salary increase the company is  
3       asking for in 2010. Do you know what it is?

4           A. Well, I think what you're referring to in that  
5       context is, what have we budgeted for salary increases  
6       that are included in our O&M request in the rate case, I  
7       think.

8           Q. I was trying to ask on a per employee basis,  
9       and I've seen 3 percent, 3.75, 4.7, and now 4.25 and  
10       4.0.

11          A. Okay. I can -- on the overall, I would have  
12       gone with 3.5 percent. On this number, again, this  
13       number is specific to the calculation of the pension, so  
14       this, just as with everything else in the pension, it is  
15       an extremely long-term number by its nature. And  
16       they'll consider what they think the rate of inflation  
17       is going to be, not so much what's going to happen in  
18       2010. It's much more of a life cycle. So to me, if you  
19       consider that, it's easy to see how this number could be  
20       different than what we're currently thinking of this  
21       year. I just want to mention that.

22          Q. That's okay. As you're sitting here this  
23       afternoon as the company's Vice President of Finance, I  
24       think you just testified the number you would go with  
25       for an average salary or wage increase is 3 1/2 percent.

1 Is that true?

2 A. For the budget purpose, for 2010, I believe  
3 that's the instruction that we gave. The only details I  
4 provide beyond that is, it's a little different for  
5 bargaining unit versus non-bargaining unit, of course.

6 Q. Thank you. I need to clear up another thing,  
7 and that is what the company's estimated current -- or  
8 let's say estimated January 1, 2010, or December 31,  
9 2009, balance for the storm reserve account is.

10 Mr. Harris's testimony uses the value of 133 million.  
11 I've also seen in an exhibit to Mr. Schultz's testimony  
12 about 135 million. And you testified earlier in your  
13 cross-examination this afternoon that it's 154 million.  
14 I would just like to ask you as the company's Vice  
15 President for Finance what your best estimates of that  
16 number is.

17 A. Okay. At what point in time specifically  
18 again?

19 Q. End of 2009, 12/31/2009 or January 1, 2010.

20 A. Yes. If you'll just bear with me, I'm going  
21 to try to find it. I believe there's a schedule in the  
22 MFRs that has that forecasted amount.

23 Q. Thank you.

24 A. I'm just not sure it's visible separately on  
25 the MFR.

1           Actually, perhaps it might help me find it  
2 even faster if I could just ask someone I work with if  
3 they know where it might be in the MFRs while I look, if  
4 that's acceptable.

5           MR. WRIGHT: It is certainly acceptable to me,  
6 Mr. Chairman. I just want the answer.

7           CHAIRMAN CARTER: Yes, you can do that. He  
8 can help you out there.

9           THE WITNESS: Okay. And I'll look myself as  
10 well. That will double the odds of getting there sooner  
11 if it's available.

12          CHAIRMAN CARTER: I'm all in favor of moving  
13 along.

14           I think he's got a life line.

15          THE WITNESS: Maybe. I'm sorry to ask that.  
16 I should know.

17           Okay. I don't think it's available in the  
18 MFRs directly, but I've got some data points that will  
19 bracket it, if you'll bear with me. On MFR B-17, which  
20 is a presentation of working capital, but it's on a  
21 13-month average basis. If you're able to flip to that,  
22 page 3 of 5, it presents the average during '09 and the  
23 average during '10, and it's identifiable there as line  
24 number 3, and the 13-month average during '09 is about  
25 145 million. The 13-month average during '10 is 159

1 million. So during 2009, we're clearly going to be  
2 above that midpoint, headed towards something in that  
3 153.

4 And I know that number exists somewhere, and  
5 I'm happy to confirm it. Again, this would confirm my  
6 judgment that we're going to be close to that, say,  
7 150-ish, 153-ish by the end of '09, and that's in the  
8 MFRs.

9 CHAIRMAN CARTER: Do you need him to bring  
10 that back on rebuttal, Mr. Wright?

11 MR. WRIGHT: I don't think so. If I could, I  
12 would just like to ask the witness to --

13 BY MR. WRIGHT:

14 Q. And I'm sorry. You closed your book. I got  
15 to B-17, and I was listening and taking notes. If you  
16 could just tell me which page and the line number, that  
17 would be great.

18 A. Schedule B-17, page 3 of 5.

19 Q. Thank you.

20 A. And the upper right-hand corner of that shows  
21 the year. It's for the projected year '10 and the prior  
22 year '9. You can see column B is prior year 2009 on  
23 that 13-month average. Column C is the test year 2010  
24 13-month average. The line number that you want to look  
25 at is line number 3, Account Number 228.13, Retail

1           Unfunded Storm Reserve. And so those are the 13-month  
2           averages I was speaking of.

3           Q.    Thank you. And the real purpose of my  
4           question was just to get a handle on the number. So if  
5           I use 153 million when I'm talking about the beginning  
6           2010 storm reserve in my brief, nobody is going to fuss  
7           at me; right?

8           A.    I will not.

9           Q.    Thank you. I just want to follow briefly  
10          along some questions you were asked, I believe, by  
11          Ms. Kaufman regarding the company's understanding of the  
12          tough realities of the current economic situation. Is  
13          it your understanding that the current unemployment rate  
14          in the State of Florida is 10.7 percent?

15          A.    I don't know it exactly, but I know that it's  
16          very high, and it's probably in that ballpark.

17          Q.    Thanks. Is it your understanding that the  
18          foreclosure rate in the State of Florida is the highest,  
19          or at least right up there at the very top of those, in  
20          the United States?

21          A.    I thought I heard somewhere during the hearing  
22          we're second behind Nevada, but, yes, we're very high.  
23          I agree with that.

24          Q.    Are you aware whether the company, Progress  
25          Energy Florida, evaluated the impact of another half

1 billion dollar a year increase on its customers, on the  
2 unemployment rate in Florida?

3 A. I know of no such study of the impacts that we  
4 would have made. I don't think we did.

5 Q. And you're not aware of any other study of the  
6 economic impact on the state of this kind of increase,  
7 are you?

8 A. No, I'm not.

9 Q. Do you know how much of the company's total  
10 revenues goes to investors or vendors outside the State  
11 of Florida?

12 A. The immediate answer is, I don't. And maybe I  
13 should just stop. The question itself is a little  
14 confusing to me.

15 Q. Well, I'll risk going for another 30 or 40  
16 seconds.

17 A. All I was going to say is, when you talk about  
18 revenues, those would be cash in, and your question  
19 seemed to be directed at where does that cash go and how  
20 much of that stays in the State of Florida, I think.

21 Q. That was indeed my question.

22 A. So a lot of the salaries are going to stay in  
23 the State of Florida. A lot of the operating expenses  
24 are going to stay in the State of Florida. A lot of the  
25 capital expenditures are doing to stay in the State of

1 Florida.

2 And I think you may have asked someone else  
3 this the other day, where you also were asking about  
4 dividends, and that, of course, would depend on where we  
5 mail the dividend checks to. You know, I don't have any  
6 kind of good way to measure all that. But I feel safe  
7 to say a very substantial part of the cash that we spend  
8 lands and stays in the State of Florida.

9 Q. For base rate expenditures; right?

10 A. Yes.

11 Q. You would agree that something real close to  
12 100 percent of your fuel bill goes out of the state,  
13 would you not?

14 A. Yes, a very high percentage.

15 Q. Now, as indicated by Exhibit 283, I think, the  
16 stock market indexes.

17 A. I've got it.

18 Q. The financial market is doing substantially  
19 better now than it was six months ago; correct?

20 MR. BURNETT: Mr. Chairman?

21 CHAIRMAN CARTER: Yes, sir, Mr. Burnett.

22 MR. BURNETT: This was fascinating the first  
23 four or five times we established the stock market is  
24 doing better. I've tried to be a gentleman, but this is  
25 clearly -- I think the exact same question has already

1           been done.

2                   CHAIRMAN CARTER:   Mr. Wright.

3                   MR. WRIGHT:   It was a predicate to a couple  
4           more questions, Mr. Chairman.

5                   CHAIRMAN CARTER:   Okay.  Let's see where it  
6           leads.

7                   MR. WRIGHT:   Thank you.

8           BY MR. WRIGHT:

9                   Q.    Did you hear Mr. Bernanke, Benjamin Bernanke,  
10           the Chairman of the Federal Reserve, testify the other  
11           day that he believes the recession is over?

12                   A.    I saw the headline.

13                   Q.    When you were talking with Ms. Kaufman about  
14           the pension expense and the potential impact of the  
15           increased fund value between some previous time and  
16           January 1st of 2010, I want to just follow up on that  
17           briefly.  Did I understand your earlier testimony  
18           correctly to be that you basically do a reset of the  
19           fund value at January 1st each year?

20                   A.    I'm not 100 percent certain what I might have  
21           said.  If I could explain that more fully --

22                   Q.    That would be great.

23                   A.    We go through the process of updating the  
24           actuarial assumptions and revisiting the investment  
25           returns and the discount rates once a year, and when we

1 do that, we reset the calculation of the pension expense  
2 consistent with that entire update. We do that late in  
3 the year and update the pension expense early in the  
4 next year. The point I was trying to get at there is  
5 that we don't really change it for the next year. The  
6 expense just runs.

7 Q. Well, when you say you don't really change it  
8 for the next year, you do change the assumptions based  
9 on the projected earnings on whatever the fund balance  
10 is as of the re-evaluation point; is that correct?

11 A. Yes, yes.

12 Q. Okay. And you said late in the year and early  
13 in the year, but we're really talking about a reset that  
14 occurs sometime around the first of the year. Is that  
15 fair enough?

16 A. Yes. One of the items I mentioned that's very  
17 important is your balance at the beginning of the year.  
18 So you can do some work ahead of time, but you need  
19 that.

20 Q. And so my question for you is, in light of the  
21 current state of the financial markets and in light of  
22 Chairman Bernanke's comments, wouldn't you agree that  
23 the conditions on September 24, 2009, are a better  
24 indicator of where the fund balance is going to be at  
25 December 31st, 2009, than what it was at January 1st,

1 2009?

2 A. I would say it might appear that way today.  
3 I'm still probably one of the casual observers of the  
4 market who was astounded how it fell apart in the last  
5 four months last year, so I'm probably just going to be  
6 cautious about that for quite a while.

7 Q. And I meant to actually couch my question  
8 subject to the usual caveat that past performance is not  
9 a guarantee of future profits.

10 A. That was the point.

11 Q. Okay. Subject to that caveat, you would agree  
12 that where we sit today is a better indicator of where  
13 we're likely to be three months from now than where we  
14 were nine months ago?

15 A. I would agree with that.

16 Q. I too have, I think, one or two questions for  
17 you regarding a page in the packet with the purple cover  
18 sheet. This one -- my question goes to or addresses the  
19 sheet that's numbered in the bottom right-hand corner  
20 00001691.

21 A. I see it. I'm there, I think. It's headed  
22 "2009 Strategic Objectives."

23 Q. That is the sheet. Thank you. I note that  
24 the third from the bottom objective is to achieve a  
25 reasonable outcome on PEF rate proceedings. Now, we

1 understand you all want half a billion dollars. Is  
2 there something less than that that you would consider  
3 reasonable?

4 A. I guess it would depend on all the terms of  
5 the outcome of the rate case.

6 Q. A couple of other attorneys who have practiced  
7 here a really long time ask the following question:  
8 Have you ever heard the old -- what I would call an old  
9 saw, that the company always asks for twice as much as  
10 it needs and gets half and is happy with what it got?  
11 Have you heard that?

12 A. I've not heard that specifically, no.

13 Q. How long have you been at this job?

14 A. Actually, I think for quite a while.

15 Q. Okay. You just mentioned that you've been  
16 with the company for quite a while. Have you been Vice  
17 President of Finance for a while?

18 A. Yes. I meant to say I've been at this kind of  
19 job for quite a while. I've been the VP of Finance for  
20 Progress Energy Florida basically from just at the end  
21 of 2007 on, so not quite two years. But I was  
22 previously employed by the former Florida Power/Florida  
23 Progress at a time in the past.

24 Q. In financial positions?

25 A. I was.

1           Q.    Thank you.  Are you familiar with the  
2 company's that rate case that were filed in 2005?

3           A.    I'm not.  That was -- I mean, I'm familiar  
4 with the settlement generally since then, but I wasn't  
5 here at that time.

6           Q.    I'm sorry.  When you say you weren't here,  
7 what does that mean?

8           A.    I was out of the state.  I'm sorry.  You know,  
9 I wasn't in Florida paying attention to the rate case  
10 outcome.  That's all I meant to say.

11          Q.    I'm sorry.  It is somewhat late in the day,  
12 but when you said you had previously held financial  
13 positions with PEF and Florida Power Corporation, the  
14 predecessor, I interpreted that to mean continuously  
15 from sometime earlier through the present day.  Is that  
16 not true?

17          A.    Yes.  I do see that.  I was with the prior  
18 company from 1984 to 2000.  I then left the company and  
19 left the state, and I was gone for seven years and just  
20 returned.  And that was the reason for my "I wasn't  
21 here" comment.  I'm sorry.

22          Q.    That's okay.  Thank you for that  
23 clarification.

24                    I could show you the order, but we don't need  
25 to spend the time.  Are you aware that the company asked

1 for about a \$205 1/2 million increase in 2005?

2 A. I'm not familiar with the specific amount, no,  
3 but that sounds right, approximately.

4 Q. And you did mention that you're familiar with  
5 the settlement?

6 A. I am.

7 Q. And the settlement involved a base rate freeze  
8 subject to the subsequent recovery for Hines 2 and 4 and  
9 some other considerations; correct?

10 A. Yes, I believe that's correct.

11 Q. Thank you. Do you know what the company's  
12 return on equity on an FPSC-adjusted basis was in 2007?

13 A. I do not. That was after I left. I don't  
14 recall. I know it's public. It's a matter of --

15 Q. Yes, it's in your earnings surveillance  
16 reports. Will you accept that it was 9.70 percent?

17 A. Subject to check, yes.

18 Q. Sure. And I'm happy for you to check whatever  
19 you want to.

20 A. That's fine.

21 Q. And will you also accept, subject to check,  
22 that the company's achieved ROE on an FPSC-adjusted  
23 basis in 2008 was 9.71 percent?

24 A. Yes, subject to check.

25 Q. To the best of your knowledge, was Progress

1 Energy Florida able to provide safe, adequate, and  
2 reliable service in 2007 and 2008?

3 A. Yes, I believe we were.

4 Q. Were you able to raise capital in 2007 and  
5 2008?

6 A. Yes, we were.

7 MR. WRIGHT: One moment, Mr. Chairman.

8 CHAIRMAN CARTER: Absolutely.

9 MR. WRIGHT: Thank you, Mr. Chairman, and  
10 thank you, Mr. Toomey. That's all the questions I have.

11 CHAIRMAN CARTER: Thank you, Mr. Wright.  
12 Commissioner Skop.

13 COMMISSIONER SKOP: Thank you, Mr. Chairman.  
14 I'm just going to try and -- I have some quick  
15 questions, and I guess that will take us to staff's  
16 cross.

17 Good evening, Mr. Toomey.

18 THE WITNESS: Good evening.

19 COMMISSIONER SKOP: Your prefiled testimony  
20 essentially summarizes the basis for Progress's request  
21 to increase rates; correct?

22 THE WITNESS: Yes, it does, I believe.

23 COMMISSIONER SKOP: And given the state of the  
24 economy and the economic hardships facing your  
25 customers, you would expect that this Commission would

1 thoroughly review and scrutinize the Progress request to  
2 increase rates, would you not?

3 THE WITNESS: I do except that.

4 COMMISSIONER SKOP: And that would be only  
5 fair; right?

6 THE WITNESS: That's correct.

7 COMMISSIONER SKOP: If you could please your  
8 attention to page 8 of your prefiled testimony, please.

9 THE WITNESS: Yes.

10 COMMISSIONER SKOP: And on lines 5 through 8  
11 on page 8 of your prefiled testimony, you discuss the  
12 primary drivers of the revenue deficiency; is that  
13 correct?

14 THE WITNESS: I do.

15 COMMISSIONER SKOP: And the primary drivers  
16 for the 2010 revenue deficiency would be the Bartow  
17 repowering project and the CR3 steam generator  
18 replacement; is that correct?

19 THE WITNESS: Well, those are the first two  
20 that I listed, yes.

21 COMMISSIONER SKOP: And is it correct to  
22 understand that the Bartow repowering project is  
23 tentatively scheduled to come into operation or has come  
24 into operation in June of this year?

25 THE WITNESS: Yes. It did come into operation

1 on June 1st of this year; that's correct.

2 COMMISSIONER SKOP: And the CR3 steam  
3 generator replacement is scheduled to be complete in  
4 December of this year; is that correct?

5 THE WITNESS: It is, and that's still the  
6 current estimate.

7 COMMISSIONER SKOP: Okay. With respect to  
8 line 8 of your testimony on that page, the 170 million  
9 for the impact of the economy on sales, can you briefly  
10 explain what that might entail?

11 THE WITNESS: Yes. We were simply trying to  
12 capture what the financial impact was from the downturn  
13 in terms of our load forecast and the number of  
14 customers we expect to have on the system. Obviously,  
15 when we have fewer customers connected and they're  
16 buying fewer megawatt-hours, just mathematically, we  
17 have fewer revenues.

18 The source for the 170 million calculation  
19 was, I believe, the load and energy forecast used in  
20 this rate case, which coincided with that that we used  
21 in the Ten-Year Site Plan of almost the same time, if  
22 you looked ahead to the 2010 year and looked at what our  
23 sales were going to be, comparing it with the view from  
24 just one year earlier in the previous Ten-Year Site  
25 Plan. So that kind of captures at two different points

1 in time how many megawatt-hours we thought we would be  
2 selling in 2010, and that's the drop in revenues from  
3 that.

4 COMMISSIONER SKOP: Thank you. Now if I could  
5 draw your attention to lines 20 through 22 on that same  
6 page, please.

7 THE WITNESS: Yes.

8 COMMISSIONER SKOP: And as the basis for the  
9 justification of the CR3 steam generator replacement  
10 project, you indicate that it will enable the company to  
11 continue to provide customers with energy from the  
12 lowest cost fuel source available to the company; is  
13 that correct.

14 THE WITNESS: Yes.

15 COMMISSIONER SKOP: And is that because that  
16 is nuclear generation?

17 THE WITNESS: Yes.

18 COMMISSIONER SKOP: And that's the lowest cost  
19 dispatched unit in the generating fleet?

20 THE WITNESS: Yes. The lowest cost fuel  
21 source is always the first dispatched; that's correct.

22 COMMISSIONER SKOP: All right. If I could  
23 next turn your attention to page 9 and 10 of your  
24 prefiled testimony, please.

25 THE WITNESS: I see them.

1                   COMMISSIONER SKOP: Starting at line 22 on  
2 page 9 with respect to the interim rate relief request,  
3 and then continuing on to lines 1 through 12 of page 10.

4                   THE WITNESS: Yes, I see those.

5                   COMMISSIONER SKOP: And is it correct that  
6 Progress requested interim relief of \$13.1 million as  
7 shown in PR-5?

8                   THE WITNESS: Yes, that's correct.

9                   COMMISSIONER SKOP: And you cite in line 3  
10 Commission approval. Has that changed, or has the  
11 Commission already granted the interim relief?

12                   THE WITNESS: It's my understanding the  
13 Commission granted the interim relief, not on the terms  
14 that we requested.

15                   COMMISSIONER SKOP: All right. Thank you. If  
16 I could turn your attention to Exhibit PT-5, please.

17                   THE WITNESS: PT-5, the interim revenue  
18 requirements?

19                   COMMISSIONER SKOP: Yes, sir.

20                   THE WITNESS: I'm there.

21                   COMMISSIONER SKOP: And this was previously  
22 discussed, so I'm going to make it very brief. On line  
23 6, do you see the earned rate of return?

24                   THE WITNESS: I do.

25                   COMMISSIONER SKOP: Okay. And what is that

1 for that projected period?

2 THE WITNESS: That's 7.68 percent.

3 COMMISSIONER SKOP: Okay. If the earned rate  
4 of return would continue to fall, what detriment might  
5 occur to the credit rating if that were to happen?

6 THE WITNESS: Well, obviously, depending on  
7 how long it continues to fall and how far it falls, it  
8 certainly would erode our credit metrics, and at a point  
9 in time, we wouldn't be able to access the capital  
10 markets if it went far enough.

11 COMMISSIONER SKOP: Okay. And with respect to  
12 a question that Ms. Kaufman had previously asked in  
13 relation to the requested ROE versus ROEs that were  
14 granted by other commissions in the near term, is the  
15 earned rate of return shown for the current period  
16 significantly less than the approved ROEs that  
17 Ms. Kaufman spoke of?

18 THE WITNESS: Yes. This earned rate of  
19 return, the 7.68 percent, is clearly below that range  
20 that we were discussing.

21 COMMISSIONER SKOP: Thank you. If I could now  
22 briefly turn your attention to page 11 of your prefiled  
23 testimony?

24 THE WITNESS: Yes, I'm there.

25 COMMISSIONER SKOP: And on page 11 of your

1 prefiled testimony -- hold on one second. On page 11 of  
2 your prefiled testimony, starting at line 4 and  
3 continuing to line 20, do you see that?

4 THE WITNESS: I do.

5 COMMISSIONER SKOP: You discuss why 2010 is  
6 the appropriate test year for the base rate proceeding;  
7 is that correct?

8 THE WITNESS: Yes, I do.

9 COMMISSIONER SKOP: And that's essentially  
10 because it captures the large capital investments that  
11 Progress placed in service to serve its customers, and  
12 also because that's the primary reason for the 2010  
13 revenue deficiency?

14 THE WITNESS: Yes. Both of those are true.

15 COMMISSIONER SKOP: Okay. If I could next --  
16 I think I just have two or three additional questions.  
17 If I could turn your attention now to page 23 of your  
18 prefiled testimony.

19 THE WITNESS: Yes, I'm there.

20 COMMISSIONER SKOP: And beginning on lines 2  
21 through 10, you discuss the results of applying the  
22 Commission O&M benchmark test to the proposed O&M costs  
23 for the proposed 2010 test year. Do you see that?

24 THE WITNESS: I do.

25 COMMISSIONER SKOP: All right. And you stated

1 on line 5 that the Progress request exceeds the O&M  
2 benchmark by approximately \$143 million; is that  
3 correct?

4 THE WITNESS: I do see that.

5 COMMISSIONER SKOP: Now, your comparison to  
6 the benchmark I guess is on PT-8; is that correct?

7 THE WITNESS: Yes, it is.

8 COMMISSIONER SKOP: And if I could ask you to  
9 briefly turn to PT-8, please.

10 THE WITNESS: I am there.

11 COMMISSIONER SKOP: The majority of the  
12 differences or variances appear to be line 1, which is  
13 production, fossil fuel and other -- I mean fossil and  
14 other, is that correct, as well as line 14, which is G&A  
15 expenses?

16 THE WITNESS: Yes. Those are the two largest  
17 dollar amounts, and they make up a substantial portion  
18 of the total.

19 COMMISSIONER SKOP: And on line 20, do you see  
20 details of major adjustments?

21 THE WITNESS: I do.

22 COMMISSIONER SKOP: And on line 23, it  
23 identifies retail rate case expenses. Do you see that?

24 THE WITNESS: I do.

25 COMMISSIONER SKOP: And are those the

1 projected rate case expenses associated with this rate  
2 case?

3 THE WITNESS: Yes, that's citing the  
4 adjustment for the retail rate case expenses.

5 COMMISSIONER SKOP: And that would be  
6 approximately \$1.4 million; is that correct?

7 THE WITNESS: Yes, that's the number here.

8 COMMISSIONER SKOP: And if I could turn your  
9 attention to the confidential document, the larger red  
10 folder. I'm trying to get a number on this. The  
11 document that I would like you to take a look at is  
12 Staff's 22nd Set of Interrogatories, and it's the  
13 question on the top left-hand side, Number 267.

14 THE WITNESS: You know, I think I might have  
15 that here as well. That's fine. I'll flip to it.

16 COMMISSIONER SKOP: And if you have a redacted  
17 version, that will be sufficient.

18 THE WITNESS: I think I've got one here. It's  
19 267, and it is on rate case expenses.

20 COMMISSIONER SKOP: Okay. With respect to the  
21 cost of consultants on lines 1, 6, and 7, is there a  
22 reason why -- excuse me, on lines -- excuse me, the  
23 footnote on the far right, Footnotes 1, 3, 6 and 7. Is  
24 there a reason, generally speaking, without disclosing  
25 any confidential information, why the expense listed for

1 Footnote 1 is substantially higher than those for the  
2 consultant services provided for Footnotes 3, 6, and 7?

3 THE WITNESS: I don't know of any one specific  
4 reason for that, no.

5 COMMISSIONER SKOP: Okay. With respect to the  
6 footnote on line 8 for legal expenses, do you see that?

7 THE WITNESS: I do.

8 COMMISSIONER SKOP: Do you feel that those  
9 expenses are prudently and appropriately incurred?

10 THE WITNESS: Yes, I do.

11 COMMISSIONER SKOP: All right. Thank you. I  
12 think we're done with that. Let's move on to a few  
13 additional questions.

14 If I could turn your attention to MFR schedule  
15 C-41, please.

16 THE WITNESS: Yes, I'm getting that in front  
17 of me. That's the benchmark variance by function?

18 COMMISSIONER SKOP: Yes, sir. And that  
19 generally -- starting on page 148 of that filing and  
20 continuing on the -- bear with me for one second.  
21 Continuing on to page 165, that generally provides the  
22 variance analysis that provides the justification for  
23 why Progress's proposed O&M costs exceed the O&M  
24 benchmark; is that correct?

25 THE WITNESS: Yes. In each case, that's the

1 explanation of the variances.

2 COMMISSIONER SKOP: If I could turn your  
3 attention to page 151 of that document, lines 40 through  
4 42, please.

5 THE WITNESS: Yes, I see that.

6 COMMISSIONER SKOP: And that discusses  
7 incremental security costs. Do you see that?

8 THE WITNESS: Yes, I do.

9 COMMISSIONER SKOP: How might those costs on  
10 that page, which are identified as incremental security  
11 costs, differ from the security costs that are  
12 identified on page 153, lines 19 through 21 on the  
13 following page?

14 THE WITNESS: They're from two different  
15 functional areas, just to be sure that that's clear.  
16 One of them is fossil. The other one is nuclear. Other  
17 than that, the nature is the same.

18 COMMISSIONER SKOP: Very well. Thank you. On  
19 page 155 of that schedule, on lines 1 through 19, it  
20 discusses increased vegetation management spending.

21 THE WITNESS: Yes, I see that.

22 COMMISSIONER SKOP: And would it be correct to  
23 understand that that increase or that positive variance  
24 is resultant from the need to increase program spending  
25 for 2010 to meet NERC standards and also Commission

1 hardening initiatives?

2 THE WITNESS: Yes. The positive number shows  
3 it's an unfavorable variance.

4 COMMISSIONER SKOP: All right. So that's an  
5 additional cost that the consumer would need to incur if  
6 such a request were approved?

7 THE WITNESS: Yes.

8 COMMISSIONER SKOP: And then one last question  
9 on this. On page 163, continuing on to page 164, it  
10 discusses beginning on line 10 on 163, administrative  
11 and general costs, under FERC Account 920 through 935.  
12 Do you see that?

13 THE WITNESS: I do.

14 COMMISSIONER SKOP: Are those general and  
15 administrative costs, particularly those identified on  
16 the following page, on 164, that deal with the pension  
17 expense, credit, employee benefit costs, and long-term  
18 compensation, are those administrative and general  
19 expenses dealing with employee benefits, are those  
20 properly included within the O&M type costs? I'm not  
21 very familiar with FERC accounting standards. That's  
22 the reason I'm asking.

23 THE WITNESS: Yes. They're properly located.  
24 It goes by FERC account, and this is where they belong.

25 COMMISSIONER SKOP: Okay. Very well. If you

1 could next -- I think it's three more questions. We're  
2 almost done. Page 25 of your prefiled testimony.

3 THE WITNESS: Okay.

4 COMMISSIONER SKOP: And we briefly covered  
5 this in terms of what might result if the Progress  
6 increase to the storm reserve accrual were granted. I  
7 guess Progress is asking for approximately \$10 million  
8 per year to go into a reserve accrual. I just wanted to  
9 get some clarity from you as to the pros and cons of  
10 whether such an increase should be approved. Would you  
11 agree that a higher accrual amount might be justified if  
12 it was necessary to keep parity with replacement costs  
13 of equipment, poles, or such?

14 THE WITNESS: Yes. That's at least one reason  
15 that would argue for the increase, yes.

16 COMMISSIONER SKOP: Okay. Now, a positive  
17 aspect of increasing the accrual amount, since it  
18 generates additional free cash flow for operations would  
19 be that improved cash flow benefits the company; right?

20 THE WITNESS: Yes, it does, from a financial  
21 strength standpoint; that's correct.

22 COMMISSIONER SKOP: Now, on the flip side of  
23 that, given the prevailing economic conditions and the  
24 hardships of the consumer, any request to increase the  
25 storm reserve accrual amount essentially means that the

1 customers are going to be asked to pay more for that; is  
2 that correct?

3 THE WITNESS: Yes. If we ask for it and it's  
4 granted in rates, they clearly would pay more for that;  
5 that's correct.

6 COMMISSIONER SKOP: So notwithstanding some of  
7 the positive aspects that might result from that in  
8 terms of keeping parity with increased costs or making  
9 sure that there's sufficient reserve to handle any  
10 storm, which, knock on wood, hasn't happened, but  
11 essentially, increasing that reserve is analogous to  
12 asking ratepayers to save for a rainy day; is that  
13 correct?

14 THE WITNESS: In a very broad way, I suppose,  
15 yes.

16 COMMISSIONER SKOP: All right. Thank you.  
17 And then just on the same page, on lines 12 through 23,  
18 they talk about the company's plan to discontinue the  
19 practice of accruing interest on the reserve balance for  
20 storm related reserves; is that correct?

21 THE WITNESS: Yes.

22 COMMISSIONER SKOP: And on line 21 through 23,  
23 doing such results or would result in a reduction to  
24 base rate; is that correct -- or rate base. I'm sorry.

25 THE WITNESS: To rate base, yes. The reserve

1           itself counts as a reduction in the calculation of rate  
2           base.

3                    COMMISSIONER SKOP:  So as it occurs today for  
4           the storm hardening accrual, consumers pay into that and  
5           an accounting adjustment is made.  It generates free  
6           cash flow for operations.  If a storm were to occur, the  
7           company would use those -- then be obligated to use the  
8           funds it had previously collected to offset any storm  
9           restoration costs.  But the accrual amounts currently  
10          accrue interest, which is ultimately charged back into  
11          rates; right?

12                   THE WITNESS:  Well, I suppose accrual of the  
13          interest helps the reserve build more rapidly in that  
14          sense.

15                   COMMISSIONER SKOP:  So under the proposal, the  
16          only way the reserve would build would not be through  
17          interest accrual.  It would be through contributions on  
18          an annual basis for the increased reserve amount; is  
19          that correct?

20                   THE WITNESS:  That's correct.

21                   COMMISSIONER SKOP:  All right.  And I think  
22          just one more question.  I guess in response to  
23          Ms. Bradley's question, she had suggested that some  
24          expenses might be discretionary or within the discretion  
25          of management over and above those that would be

1 necessary expenditures. Would it be correct to  
2 understand that your testimony does not address any  
3 additional cost saving measures that might be taken to  
4 further reduce fixed costs or discretionary expenditures  
5 in relation to the declining retail sales that you  
6 mentioned, thereby mitigating the overall magnitude of  
7 the requested rate increase?

8 THE WITNESS: It doesn't reflect anything  
9 beyond our basic filing itself; that's correct.

10 COMMISSIONER SKOP: Now, in fairness to  
11 Progress, Progress has taken steps to do certain things  
12 to reduce head count and other measures. Do you see  
13 additional steps being taken, or should they have been  
14 taken already to mitigate the proposed rate increase?

15 THE WITNESS: It would be my opinion that  
16 there isn't anything that I would have done differently  
17 up to this point. I think it has come onto the record  
18 on and off before, we're very, very worried about the  
19 continued decrease in sales, perhaps beyond what we  
20 filed in this rate case. So we're going to be in a  
21 tough situation for quite a while on that.

22 COMMISSIONER SKOP: And I know that not  
23 only -- the company takes a long-term approach, and that  
24 may be some of the -- you know, in terms of your  
25 responses, some reasons or rationale that you previously

1 provided for the record as to why in your judgment  
2 certain costs or discretionary expenditures have not  
3 been made. I guess Ms. Bradley mentioned the need to,  
4 in her opinion, curtail salary increases or executive  
5 compensation and such.

6 But in terms of those additional opportunities  
7 where cost savings might be achieved to match parity  
8 with declining sales, is Progress currently looking at  
9 those opportunities such that instead of seeking rate  
10 increases, it could match -- you know, if sales trend  
11 down, then obviously, scale back, as many other  
12 businesses and consumers have had to do at this time.

13 THE WITNESS: I have would answer that in a  
14 global fashion, as several of the other witnesses have.  
15 Yes, we're constantly looking at ways we can take  
16 expenses out without hurting the business. I don't have  
17 a number that's produced that is different for 2010.

18 COMMISSIONER SKOP: Well, I appreciate your  
19 candor, and thank you for your time.

20 CHAIRMAN CARTER: Staff.

21 MR. YOUNG: Thank you, Mr. Chairman.

22 Ms. Fleming is going to handle the exhibits, and we do  
23 have cross for this witness, unfortunately.

24 CHAIRMAN CARTER: Well, let's do the cross  
25 before we do the exhibits. Okay?

1 MR. YOUNG: Not a problem.

2 CHAIRMAN CARTER: Commissioners, anything  
3 further from the bench before we go to staff?

4 MR. YOUNG: Mr. Chairman, just for point of  
5 information, I have -- Mr. Toomey, I have four series of  
6 questions to ask you, under four topics. Let me say  
7 that. The first three, if you can be concise, but  
8 detailed, I will be very grateful for that. Thank you.  
9 All right?

10 THE WITNESS: Okay.

11 CROSS-EXAMINATION

12 BY MR. YOUNG:

13 Q. Mr. Toomey, do you have some knowledge of  
14 PEF's application to the U.S. Department of Energy for  
15 smart grid funding from the American Recovery and  
16 Investment Act?

17 A. Yes, I have some knowledge of that.

18 Q. All right. Thank you. Progress has applied  
19 for \$200 million in smart grid funding from the stimulus  
20 bill; correct?

21 A. Yes, I believe that's correct.

22 Q. Will any of the costs associated with the  
23 project be added to PEF's rate base?

24 A. While we don't know if we'll get any, I could  
25 almost certainly tell you that if we were awarded any

1 funding under the DOE, the application of those funds  
2 would in no way increase rate base.

3 Q. Okay. Was it a condition of the grant that a  
4 project -- was it a condition of the grant that projects  
5 be incremental above existing plans for the smart grid?

6 A. I think they were intended to be new projects,  
7 you know, so, yes, I think that's a yes.

8 Q. Okay. Could you please -- could any of these  
9 projects be capitalized and added to rate base in future  
10 rate cases?

11 A. I don't -- again, I don't see any way that  
12 they could be if in fact they're funded with federal  
13 funds.

14 Q. All right. Are there plans to add them to  
15 future rate cases?

16 A. No.

17 Q. Okay. What steps, if any, has PEF taken to  
18 ensure that no costs of these projects are recovered  
19 from customers in future years?

20 A. Well, again, were we to be awarded any funding  
21 from the DOE on that, we would have to carefully  
22 segregate the investments we made for that, probably  
23 similar to the way we do CIAC or something to be sure it  
24 doesn't get in rate base.

25 Q. All right. Moving to my second series of

1 questions, on page 25 -- do you have your direct  
2 testimony with you?

3 A. I do, and I'll get it.

4 Q. Okay. On page 25, lines 21 through 23, and  
5 continuing on page 26, line 1 -- let me know when you're  
6 there, sir.

7 A. Yes, I see it.

8 Q. You state that PEF advocates discontinuing the  
9 accrual of interest on the storm reserve balance and  
10 including the storm reserve in the calculation of PEF's  
11 rate base, which results in a reduction of the rate  
12 base, and therefore lowers the revenue requirements or  
13 rate base; is that correct? Is that a true statement?

14 A. Yes, that's what it says, and that's true.

15 Q. Okay. On your correct Schedule B-1 filed  
16 June 5th, 2009 -- do you have that?

17 A. Yes. Let me flip to that. Okay.

18 Q. All right. The corrected schedule would be  
19 the one filed June 2009, and an adjustment has been made  
20 on line 7 to increase working capital allowance. Do you  
21 see that, column H?

22 A. I do.

23 Q. By 154,429,000, entitled "To remove storm  
24 reserve." And then on line 32, an adjustment is  
25 included to decrease working capital in the amount of

1 159,106 -- 159 million, excuse me, 106,000, labeled  
2 "Company adjustment, storm reserve study." Do you see  
3 that?

4 A. Yes, I see both entries.

5 Q. Why are there two separate adjustments to  
6 storm reserves?

7 A. It's -- if you'll bear with me, in the line at  
8 the top, system per books, there is an amount embedded  
9 in that total for the storm reserve. That amount is a  
10 credit, a reduction of rate base of 154,429,000.

11 For the 2010 year -- and part of what  
12 triggered the change in this schedule is, we had to go  
13 back -- and, again, this is a 13-month average of the  
14 storm reserve. On the prior version, we didn't portray  
15 that adjustment the way we did after the amendment. The  
16 154 million is what the 13-month average of the storm  
17 reserve would be during 2010 if no increase in the storm  
18 reserve accrual was granted.

19 So the sequence there is, it's embedded in the  
20 working capital allowance as a credit, it's added back  
21 at the 154, and then down in the adjustments section  
22 below, it's taken out at the 159 million. That's our  
23 proposal. So by the time it makes it to the bottom, we  
24 are proposing the increased accrual of 159 million, and  
25 it serves as a credit to rate base.

1 Q. Mr. Toomey, why is it necessary to have the  
2 positive 154,429,000 adjustment to working capital, and  
3 therefore rate base, that is shown on line 7?

4 A. There could be different ways to portray it.  
5 If you want to isolate the entire 159 million as an  
6 adjustment, then you have put the 154 in as a positive.  
7 The important thing, both the old and the new  
8 presentation, it was a net reduction of 159 in either  
9 case. And this is basically the essence of the change  
10 in the presentation. You could just show a net  
11 adjustment of a negative 5, but I don't think that would  
12 be the proper way to do it. It would get you to the  
13 same amount, negative 5 million, I mean.

14 Q. Would the two adjustments to the storm reserve  
15 be necessary if the Commission orders PEF to continue to  
16 accrue interest in the storm reserve balance?

17 A. If they continue -- if it continues to accrue  
18 interest.

19 Q. If the Commission orders PEF to continue to  
20 accrue interest in the storm reserve balance, would it  
21 be necessary, the two adjustments?

22 A. I'm not certain.

23 Q. Okay. Applying the jurisdictional factor --  
24 and I'm so sorry. It's late at night, and we've got to  
25 do math. I'm sorry.

1           A.    That's okay.

2           Q.    Applying the jurisdictional factor of .85016  
3 show on line 25, column J, and it's to the  
4 154,429,000 --

5           A.    I just caught up with the page again.  I'm  
6 sorry.  Go ahead.  If you would repeat it.

7           CHAIRMAN CARTER:  Mr. Young.  Are you okay?  
8 I'm sorry.  You may proceed.

9 BY MR. YOUNG:

10          Q.    Applying the .85016, okay, shown on line 25,  
11 column J --

12          A.    Yes, I see it.

13          Q.    To the 154,429,000 would result in a  
14 jurisdictional adjustment to remove the storm reserve of  
15 131,289,000, correct, subject to check?

16          A.    Yes, subject to check.

17          Q.    Okay.  Netting the 131,289,000 against a  
18 negative 159,106,000 shown on line 32 of column J  
19 results in a rate base adjustment to the storm reserve  
20 of a negative 27,817,000, correct, subject to check?

21          A.    Yes, that's the way those numbers would net,  
22 subject to check.

23          Q.    Can you please refer to OPC's Third Set of  
24 Interrogatories, which is going to be handed out right  
25 now?  Mr. Toomey, if you'll bear with me, I promise I

1 will try to have you done in 25 more minutes.

2 A. That's fine.

3 Q. Okay?

4 A. That's fine.

5 MR. YOUNG: Mr. Chairman, the parties already  
6 have a copy of the interrogatory I'm going to refer to,  
7 and it's Interrogatory Number 153.

8 CHAIRMAN CARTER: Is that the understanding of  
9 the parties? Okay.

10 MS. FLEMING: For ease of reference, it was  
11 handed out last night. It's Peter Toomey discovery  
12 related to rate base. It's the yellow cover page.

13 CHAIRMAN CARTER: You guys got it?  
14 Mr. Wright, do you have it?

15 MR. WRIGHT: May I just ask what interrogatory  
16 we're looking for here?

17 MR. YOUNG: Number 153. We're going to give  
18 you a copy.

19 CHAIRMAN CARTER: Mr. Saylor has one for you  
20 there, Mr. Wright.

21 Ms. Kaufman, do you need one? Mr. Saylor,  
22 would you give that to Ms. Kaufman, please?

23 MR. YOUNG: And it's tabbed for ease of  
24 reference, Mr. Chairman.

25 CHAIRMAN CARTER: Okay. You may proceed.

1 THE WITNESS: I have it.

2 BY MR. YOUNG:

3 Q. Okay. And I want you to refer to the column  
4 labeled "Month Accrued Interest." Excuse me. This is  
5 the -- Number 153, the response has a column labeled  
6 "Month Accrued Interest"; correct?

7 A. I do see it. Yes, I'm there.

8 Q. Okay. Now, subject to check, would the last  
9 12 months of the accrued interest, April 2008 through  
10 March 2009, total \$4,117,273?

11 A. I'll accept that subject to check, yes.

12 Q. Which methodology results in a lower revenue  
13 requirement, the continual accrual of interest of the  
14 storm reserve balance or the adjustments shown on B-1,  
15 lines 7 and 32, that have been made to rate base related  
16 to the storm reserve?

17 A. The continued payment of the interest clearly  
18 gives you a larger reserve balance, which would be a  
19 larger credit to rate base, which in turn would lower  
20 revenue requirements. The only thing -- the reason why  
21 I hesitated earlier on that, if it continues to earn  
22 interest, I'm not sure that it would qualify as a  
23 reduction of rate base. That was my hesitation.

24 Q. And a final question on this series before  
25 you. What are the appropriate adjustments to reflect

1 the base rate increase for the Bartow repowering  
2 authorized -- the Bartow repowering project authorized  
3 by Order No. PSC-09-0415-PAA-EI?

4 A. Could you repeat the question, the first part  
5 of the question again?

6 Q. What are the appropriate adjustments to  
7 reflect the base rate increase for the Bartow repowering  
8 project authorized in Order No. PSC-09-0415-PAA-EI, in  
9 general terms?

10 A. Well, in general terms, you know, that Bartow  
11 limited increase was granted. For our whole rate case,  
12 it's part of the calculation of the request for 2010.  
13 So it's part of the request here, so it's -- and that's  
14 why I wasn't sure how you were referring to what  
15 adjustments are necessary.

16 MR. YOUNG: Mr. Chairman, may we approach the  
17 witness?

18 CHAIRMAN CARTER: You may approach.

19 BY MR. YOUNG:

20 Q. Mr. Toomey, I'm going to hand you an article  
21 that was printed by the St. Petersburg Times, and it was  
22 dated September 21, 2009.

23 A. Okay.

24 Q. And it's dealing with the Bartow --

25 CHAIRMAN CARTER: Hang on. Hang on a sec.

1 Let all the parties get a copy first.

2 MR. YOUNG: Mr. Chairman, it's not going to be  
3 an exhibit. This is just for cross-examination purposes  
4 only.

5 CHAIRMAN CARTER: Okay. Then let's do it.  
6 You may proceed.

7 MR. YOUNG: If we could have one second for  
8 counsel to review it.

9 BY MR. YOUNG:

10 Q. Mr. Toomey, could you please read the label of  
11 the article?

12 A. Yes. "St. Petersburg times. Progress Energy  
13 wins 22.9 million court judgment. Progress Energy has  
14 won a \$22.9 million judgment in a lawsuit against" --  
15 I'm sorry. I'll stop.

16 Q. Are you aware of this decision prior to seeing  
17 this article?

18 A. I'm not, and I just was checking for the date.  
19 So this just came out yesterday or today, I suppose.

20 Q. Are you aware of the lawsuit that Progress  
21 filed?

22 A. I'm aware of the lawsuit, yes.

23 Q. Subject to check, this is the court's decision  
24 based on that lawsuit that was filed by Progress Energy;  
25 correct?

1           A.    Yes.

2           Q.    Subject to check?

3           A.    Yes, yes.

4           Q.    Now, the amount is 22.9 million in the court  
5 judgment; correct?

6           A.    Yes, I see that.  That's right.

7           Q.    Will this amount be used to reduce the cost of  
8 the Bartow plant, since it relates to Bartow?

9           A.    If I understand what you're saying, if we  
10 actually win through the appeal and we get 22.9 million,  
11 that's kind of credited -- you know, the company would  
12 get proceeds of the lawsuit.  Would we credit that  
13 against the money we otherwise have invested in Bartow,  
14 and I think the answer is yes.

15           MR. BURNETT:  Mr. Chair.

16           CHAIRMAN CARTER:  Mr. Burnett.

17           MR. BURNETT:  If I may, I don't want to accuse  
18 Mr. Young of mischaracterizing, but I would just note  
19 this is for the Hines 2 plant that is located in Bartow  
20 and not the Bartow plant.

21           THE WITNESS:  I apologize, John.  I'm sorry.

22           BY MR. YOUNG:

23           Q.    We're still dealing with the dollars.  I'm  
24 sorry for mischaracterizing it, but I want to focus on  
25 the dollars in terms of coming back to the customers, if

1 any. Will that amount be credited back to the customers  
2 if it wins that on appeal?

3 A. Let me explain. Not credited back to  
4 customers in terms of a credit on their rates. You  
5 know, in the absence of these moneys, we invested  
6 whatever money it took. And again, with Mr. Burnett's  
7 help, this is related to the Hines plant. We built the  
8 plant, so it's in rate base at that amount. If we  
9 receive the proceeds, we would potentially handle those  
10 as a credit to that investment, which in any  
11 calculations of revenue requirements, we would have a  
12 lower rate base after that. But it wouldn't be credited  
13 back, like we have a sudden rate decrease, just to  
14 clarify.

15 Q. Now, you were reading the article; correct?  
16 And you saw that Progress won 22.9 million excluding  
17 attorney's fees and costs; correct?

18 A. I'm just reading for that other phrase.

19 Q. Subject to check. We'll move on.

20 A. Okay. That's fine.

21 Q. Now, is it my understanding that cost of  
22 litigation is included in rate -- is a part of rate  
23 base; correct?

24 A. Cost of litigation. If we incurred costs and  
25 part of that could be specifically attributed to getting

1 an asset in service, it could be capitalized into the  
2 project and become part of rate base.

3 Q. Will those costs be -- I hate to use the word  
4 "credited back," but credited back to the customers or  
5 rate base if you recoup those dollars?

6 A. Well, again, to our earlier discussion, if we  
7 receive proceeds from the lawsuit and we have it, we  
8 would certainly handle that as a credit against the  
9 investment in the plant in rate base. That would be the  
10 treatment.

11 Q. All right. Now, moving on to my final series  
12 of questions --

13 A. Okay.

14 Q. I think I have about 15 more minutes; right?  
15 I told you 25 minutes.

16 Earlier in your discussion with Mr. Rehwinkel  
17 and Ms. Kaufman, you talked about the \$711 million of  
18 imputed equity; correct?

19 A. I did indeed.

20 Q. Okay. Is Progress proposing to include the  
21 \$711 million of imputed equity in the capital structure  
22 to increase its equity ratio?

23 A. Yes, we are. That's part of our filing.  
24 That's our intent.

25 Q. Okay. Can you please refer to PEF's Response

1 to Staff's 27th Set of Interrogatories, Number 328?

2 A. This is it. Sorry.

3 Q. Mr. Toomey, are you familiar with this  
4 response?

5 A. I am.

6 Q. In PEF's Response to Interrogatory Number 328,  
7 PEF was asked to explain the offsetting entry for the  
8 \$711 million specific adjustments to increase the  
9 balance of common equity; correct?

10 A. That's correct. That's what we were asked.

11 Q. PEF's response was that an offsetting entry is  
12 not made by the PEF in the MFRs; rather, it was made by  
13 credit rating agencies; correct?

14 A. Yes. That's the first sentence of our  
15 response; that's correct.

16 Q. Okay. If the Commission decides to disallow  
17 the \$711 million adjustment for the imputed equity,  
18 where in the MFRs should the corresponding adjustment be  
19 made to offset the removal of the \$711 million from  
20 common equity?

21 A. Sure. As we touched on earlier, I think you  
22 would go to that D-1b and look where we had put in the  
23 adjustment, in effect, adding that 711 million to the  
24 common equity. And if you were to just pull it out on  
25 the Excel spreadsheet and recalculate it, that's how you

1 would make the adjustment.

2 Q. I'm glad you mentioned D-1b. Can you please  
3 refer to MFR Schedule D-1b, page 2 of 2?

4 A. D-1b, page 2 of 2.

5 Q. Okay. Take a second to review that for me,  
6 sir.

7 A. Okay.

8 Q. Mr. Toomey, there is no pro rata reduction to  
9 total capital in the amount of \$711 million offsetting  
10 the increase in common equity to the \$711 million;  
11 correct?

12 A. Correct from the standpoint that, no, the  
13 total capital, and especially not on the jurisdictional  
14 capital structure, it would not go up by 711 million.

15 Q. So no?

16 A. No. I'm sorry.

17 Q. If the Commission decides to back out the  
18 \$711 million from common equity, it must also reduce  
19 rate base by \$711 million; correct?

20 A. No. I'm sorry. I would say no to that.

21 Q. Can you please explain how the adjustment of  
22 \$711 million to common equity should be removed from the  
23 filing?

24 A. Well, if you were to try to remove it, again,  
25 it's part of the calculation of what the equity and debt

1 mix is in this cost of capital schedule. It's not a  
2 part of rate base per se. So if you were to decide to  
3 take it out, there would be no change in rate base. It  
4 would affect the relative mix of equity and debt in the  
5 capital structure here. You could have relatively less  
6 equity in that mix, relatively more of everything else,  
7 I suppose. And as you recalculated that cost of  
8 capital, you would get a difference in your cost of  
9 capital, but your rate base itself wouldn't be any  
10 different, is the way I would explain that.

11 Q. Are you the witness sponsoring MFR Schedule  
12 B-1, D-1a, D-1b, and C-22?

13 A. I am for B-1, I believe, D-1a and D-1b. And  
14 then the last one was C-22?

15 Q. Yes, sir.

16 A. Yes, I am.

17 Q. Okay. MFR Schedule D-1a shows PEF's proposed  
18 capital structure and cost of capital for the projected  
19 test year ending December 31, 2010; correct?

20 A. Yes. On page 1 of 3, that's for the 2010  
21 year.

22 Q. MFR Schedule D-1b, page 2, lists the pro rata  
23 and specific adjustments that PEF made to the company's  
24 proposed capital structure on MFR Schedule D-1a;  
25 correct?

1           A.    Yes.  It gives the detail to those  
2 adjustments.

3           Q.    This adjustment listed on MFR Schedule D-1b,  
4 page 2, are made to the capital structure on a pro rata  
5 basis over all sources of capital; correct?

6           A.    Yes.  And just to repeat what I think you  
7 said, the pro rata adjustments shown on page 2 of 2 are  
8 applied pro rata over all capital sources; that's  
9 correct.

10          Q.    Okay.  Deferred income taxes are included as  
11 one of the sources of capital in PEF's proposed capital  
12 structure; correct?

13          A.    Yes, they are a component of the capital  
14 structure.

15          Q.    All right.  Can you please refer to PEF's  
16 Response to Staff's 27th Set of Interrogatories, Number  
17 324, which is being handed out to you right now, sir.

18          A.    Okay.

19                CHAIRMAN CARTER:  Very efficient, Mr. Young,  
20 very efficient.

21 BY MR. YOUNG:

22          Q.    Take a second to review it, sir, if you can.

23          A.    Yes, I've reviewed it.

24          Q.    Okay.  Interrogatory Number 324 lists the line  
25 item adjustments on MFR Schedule D-1b, page 2, that do

1 not involve depreciable plant; correct?

2 A. Yes. That was the request, and that was what  
3 we answered.

4 Q. And in your deposition, do you recall that you  
5 briefly explained the tax normalization rules?

6 A. Yes, I do.

7 CHAIRMAN CARTER: You did say briefly; right?

8 THE WITNESS: Yes. It's in my deposition, as  
9 far as I was able to answer it.

10 BY MR. YOUNG:

11 Q. Also, during your deposition, you talked about  
12 the timing difference between book and tax depreciation  
13 that give rise to deferred income tax; correct?

14 A. I did.

15 Q. Deferred income taxes, Mr. Toomey, included in  
16 the capital structure on MFR Schedule D-1a, line 9, are  
17 created by the timing difference between depreciation  
18 used for calculating federal income tax liabilities and  
19 the actual book depreciation for depreciable utility  
20 property or plant; correct?

21 A. Yes, the deferred income taxes come from those  
22 timing differences. I'm just thinking a minute. I  
23 don't know if automatically I would say everything is  
24 related to depreciable plant. Other things give rise to  
25 timing differences, like the items related to Levy.

1 When we collect payments under the nuclear cost recovery  
2 clause, they're treated differently on book and taxes,  
3 and that's a timing difference.

4 Q. Okay. Now, let me have you refer to MFR  
5 Schedule C-22.

6 A. Yes.

7 Q. MFR Schedule C-22 is PEF's presentation of the  
8 state and federal income taxes for the company; correct?

9 A. Yes, it.

10 Q. The federal deferred taxes are identified in  
11 the last column on MFR Schedule C-22; correct?

12 A. Yes. There are columns there for the deferred  
13 taxes, both state and federal, so they're set out there.

14 Q. Okay. Do the individual line items listed on  
15 MFR Schedule C-22 for the federal deferred taxes match  
16 the individual line items one for one on the MFR  
17 Schedule D-1b, page 2?

18 A. No. I was asked this during the deposition,  
19 and I answered no, and they don't. This --

20 Q. Can -- go ahead. I'm sorry.

21 A. That's fine. You know, again, this C-22, this  
22 is part of the net operating income calculations, so  
23 this is part of the calculation of taxes just during the  
24 test year. So this is kind of the deferred tax  
25 calculation -- the components of the deferred taxes

1 during the test year. These items all would end up with  
2 balances of deferred taxes, and over on the rate base  
3 type schedule, that's more of a balance of deferred  
4 taxes presentation.

5 Q. So it --

6 A. So it's kind of -- one is a one-year income  
7 statement view, and the other one is a balance sheet  
8 view. But the line items themselves, as you mentioned  
9 the other day, they're not necessarily grouped the same  
10 way.

11 Q. So no?

12 A. No. I'm sorry. I should have just said that.  
13 No.

14 Q. Thank you. Can you identify the amount of  
15 deferred taxes included on MFR Schedule C-22 that are  
16 associated or match up to the adjustments to PEF's  
17 capital structure on MFR Schedule D-1b, page 2?

18 A. No.

19 Q. Okay. Is it PEF's position that the pro rata  
20 adjustments made to accounts contained in PEF's rate  
21 base that do not generate deferred taxes should be  
22 reconciled over all sources of capital?

23 A. I just want to be very careful about the  
24 wording of the question again. If you could repeat it,  
25 please.

1 Q. Sure. Is it PEF's position that the pro rata  
2 adjustments made to accounts contained in PEF's rate  
3 base that do not generate deferred taxes should be  
4 reconciled over all sources of capital?

5 A. It's -- and I'm not sure I understand the  
6 question fully, so I'll start to explain part of it.  
7 There clearly are pro rata adjustments that we show, and  
8 it is our position on the cost of capital schedule that  
9 they should be applied over all sources of capital.  
10 Those are those pro rata adjustments that you spoke to.  
11 You were kind of relating them specifically to deferred  
12 income taxes, I think, in the question, and I'm not 100  
13 percent sure that I could do that, and that's the only  
14 part I struggled with on your question.

15 Q. Do you recall your deposition, sir?

16 A. I do.

17 Q. Do you remember during the course of the  
18 deposition, you and Ms. Fleming had a discussion where  
19 she asked you do you believe that those, "those" meaning  
20 the pro rata adjustments, should be reconciled over all  
21 sources of capital and past ratemaking capital  
22 structures, and do you recall your response was, "I  
23 believe the adjustments should be made pro rata across  
24 all sources of capital"? Do you recall that discussion?

25 A. I do.

1           Q.    Okay.  In your deposition, you indicated that  
2 PEF is proposing to make pro rata adjustments over all  
3 sources of capital instead of tracking and segregating  
4 the sources of capital because the treatment is the  
5 easiest method to comply with Internal Revenue Service  
6 tax normalization rules.  Do you remember that?

7           A.    Well, I remember a discussion around that  
8 point, and we discussed our answer to Interrogatory 321,  
9 and we explained our rationale for that.  And as I  
10 recall my deposition, the first reason we cited is that  
11 we don't want to violate normalization.  The second  
12 reason we cited is that we don't color code the way we  
13 fund the capital that way, so there's no rational basis.  
14 And I also mentioned for administrative ease, it's  
15 easiest to do it pro rata that way.  That's what I  
16 recall from the deposition.

17           Q.    Okay.  Are you familiar with PEF's Response to  
18 Staff's 20th Request for Production of Documents?

19           A.    Likely, yes.

20           MR. YOUNG:  May we approach, Mr. Chairman?

21           CHAIRMAN CARTER:  You may approach.

22           Mr. Young, you said Ms. Fleming will be  
23 handling the exhibits?  Is that what you said?

24           MR. YOUNG:  Yes, sir.  They're stipulated,  
25 sir.

1 CHAIRMAN CARTER: Oh, okay. All right, all  
2 right. I feel better already. You may proceed.

3 MR. YOUNG: And just for point of information,  
4 Mr. Chairman, I have five more questions for this  
5 witness.

6 CHAIRMAN CARTER: Okay. We're trying to  
7 figure out how to do it in the time, but go right ahead.

8 MR. YOUNG: If we're concise and detailed,  
9 then we'll be fine.

10 BY MR. YOUNG:

11 Q. In your response, sir, PEF provided copies of  
12 the Internal Revenue Code and the income tax regulations  
13 that address the tax normalization rules; correct?

14 A. Yes, we did.

15 Q. Are you familiar with the Internal Revenue  
16 Code and the internal tax regulations that addresses the  
17 IRS tax normalization rules?

18 A. In a general way, yes.

19 Q. The IRS tax normalization rules relate to the  
20 treatment of deferred taxes and income tax expense for  
21 the purpose of calculating federal income tax liability;  
22 correct?

23 A. Yes.

24 Q. Do the IRS tax normalization rules specify how  
25 deferred taxes should be treated when a regulated

1 utility such as PEF makes pro rata adjustments to its  
2 capital structure for ratemaking purposes?

3 A. I think, yes.

4 Q. Do the IRS tax normalization rules specify how  
5 deferred taxes should be treated when a regulated  
6 utility such as PEF makes adjustments to reconcile the  
7 rate base to the capital structure for ratemaking  
8 purposes?

9 A. Again, I think, yes.

10 Q. Would you please point out where the documents  
11 provide such -- specify such treatment? Excuse me.

12 A. I'm not sure that I can.

13 Q. My previous question, can you please specify  
14 where the documents that provide such treatment that I  
15 asked you does the IRS tax normalization rules specify  
16 how deferred taxes should be treated when a regulated  
17 utility such as PEF makes pro rata adjustments to its  
18 capital structure for ratemaking purposes?

19 A. I believe the IRS's normalization rules  
20 specify things that have to be done in the reporting of  
21 the deferred taxes in order to ensure that you don't  
22 violate normalization. And again, that's what these  
23 rules in their entirety do.

24 So again, the idea, as I explained in a more  
25 general way in my deposition, is -- it's really just not

1 violating the IRS's guidelines on the normalization  
2 treatment that is required. I don't think there's  
3 anything in here that would specifically tell a PEF  
4 exactly how to make the adjustments in its MFRs, for  
5 example.

6 Q. So there's nothing -- you cannot identify  
7 anything in the document that tells PEF to make these  
8 adjustments; correct?

9 A. Absent -- if they find that we violated the  
10 normalization rules, they're very clear that we lose the  
11 benefit of the accelerated depreciation, and that is our  
12 concern.

13 Q. Okay. And the final question, sir. Does the  
14 IRS tax normalization rules specify that a regulated  
15 utility shall make such adjustments to its rate base  
16 over all sources of capital as opposed to only investor  
17 sources of capital in its capital structure?

18 A. I don't know if it does specifically or not.

19 Q. Can you identify -- can you please point out  
20 where in the documents it provides such treatment?

21 A. I can't.

22 MR. YOUNG: Okay. Thank you, Mr. Chairman.  
23 I'm sorry for batting cleanup.

24 CHAIRMAN CARTER: That's all right.

25 MR. YOUNG: I'll turn it over to Ms. Fleming.

1                   CHAIRMAN CARTER: No, no. We're going to do  
2 -- we'll come back to the exhibits. Let's do redirect  
3 first.

4                   Redirect, Mr. Burnett.

5                   MR. BURNETT: Yes, sir. It's so briefly, I  
6 think I could beat the green light even.

7                   REDIRECT EXAMINATION

8 BY MR. BURNETT:

9                   Q. Mr. Toomey, would you please get Schedule MFR  
10 B-1 again, out again, the corrected schedule, B-1, page  
11 1 of 3?

12                  A. B-1, the revised page 1 of 3?

13                  Q. Yes, sir. Do you remember the calculations  
14 that staff asked you to do with respect to B-1, column  
15 H?

16                  A. Yes.

17                  Q. Looking at B-1, column H, line 7, am I correct  
18 or incorrect that that number is a retail number as  
19 opposed to a system number?

20                  A. It's -- I think it is the retail number.

21                  Q. And given the fact that we've established that  
22 this is in fact a retail number, does that affect or  
23 change in any way the calculation that you did provide  
24 to staff?

25                  A. It doesn't change at all the net outcome. The

1 credit of 159,106,000 against rate base is the same.  
2 But when staff was talking about applying a  
3 jurisdictional factor against it, you would not have to  
4 because it's the retail only portion.

5 MR. BURNETT: Thank you. Mr. Chair, that's  
6 the end of my redirect, but I do note that Mr. Joyner  
7 did punt one of Commissioner Skop's questions to this  
8 witness. We can take it up now or in rebuttal, just to  
9 your pleasure and the Commission's.

10 CHAIRMAN CARTER: Commissioner Skop, do you  
11 want it now or do you want it -- go for it.

12 COMMISSIONER SKOP: That was a long time ago.  
13 I might have forgotten the question.

14 MR. BURNETT: Yes, sir. It was reference MFR  
15 C-6, page 69. Commissioner Skop had raised the issue of  
16 the actuals and the budgets, that there was a variance  
17 where the actuals appeared -- the budgets, I'm sorry,  
18 appeared consistently greater than the actuals, and  
19 Mr. Joyner said Mr. Toomey may be able to explain that.

20 COMMISSIONER SKOP: Yes. If there's an  
21 explanation to that, that the historical -- if I can  
22 refresh my memory, the historical budgeted amounts on  
23 that schedule were in excess of the actual amounts  
24 incurred, and then there was a substantial year-to-year  
25 increase on the 2009 budget to 2010 which was a 50

1 percent year-to-year increase, if my memory serves me  
2 correctly.

3 THE WITNESS: Yes. And while I haven't gotten  
4 to the line items that John mentioned yet, I believe  
5 that -- well, if I could just get to that right now,  
6 that would probably help me just be sure. John, we're  
7 on C-6.

8 MR. BURNETT: Mr. Chair.

9 THE WITNESS: And we're on -- excuse me.  
10 We're on distribution.

11 CHAIRMAN CARTER: Mr. Burnett.

12 MR. BURNETT: Mr. Toomey, it was MFR Schedule  
13 C as in Charlie 6, reference to pages 69 and 71.

14 THE WITNESS: Yes, got it. And on page 69 is,  
15 I believe, the line that was being discussed, and it's  
16 distribution-operation, if you look at that at the  
17 subtotal, and I think that's what was yielding that  
18 abnormal pattern.

19 COMMISSIONER SKOP: I believe in the  
20 aggregate, it was the summation of line 37, subject to  
21 check, and then moving over to page 71, line 39, a  
22 summation of those two as they related to actual versus  
23 budgeted.

24 Actually, I'm sorry. I stand corrected. I'll  
25 let you answer the question.

1           THE WITNESS: The pattern on the operations  
2 side does in some years show imbalances between the  
3 budgets and the actuals. And if you do look at that,  
4 perhaps where you were headed, in conjunction with the  
5 distribution-maintenance amounts on page 71 at line 39,  
6 if you take the sum of the two, you have very little  
7 variability, you know, just eyeballing those two.

8           And that was the point I had touched on  
9 earlier. As you push these down into more detail in the  
10 FERC accounts, there are times that the budget and the  
11 actuals may not line up as well the farther down you  
12 push them. But if you total distribution operation and  
13 maintenance, you see variances. For 2004, if you were  
14 to add those two groups, budget of the two combined was  
15 about 78 million, actual was about 78 million. For  
16 2005, budget was about 180 and actuals were about 124.  
17 For 2006, budget was about 81 and actuals were about  
18 114. For 2007, the budget was 128 and the actual was  
19 125 1/2. And for -- excuse me. That was 2007. 2008,  
20 the budget was 123, and the actuals were about 121.

21           So again, the only point that I wanted to make  
22 in terms of coming back to Jackie's point is, there are  
23 times in pushing this down into the FERCs that, you  
24 know, the budgets and actuals don't match up as well,  
25 and if you just look one line higher, the budgets and

1 actuals are really pretty close through those years. So  
2 I just wanted to make that point.

3 COMMISSIONER SKOP: Okay. Just one follow-up,  
4 please, on page 69. I guess when you look at the  
5 aggregate of the distribution-operation on 69 combined  
6 with the distribution-maintenance on 71 -- I guess those  
7 were the combinations that you just read off. So the  
8 variance is not as great as it would -- is there any  
9 reason why on the distribution-operation side, though,  
10 it would be as substantial as it is on line 37 for some  
11 of the years?

12 THE WITNESS: Again, certainly in the  
13 operations, you're going to get variability on the  
14 operations side based on workload. On the maintenance,  
15 it can be very driven by, again, how much maintenance  
16 you're able to get done in the year. It's kind of how  
17 the work falls. So we take a budget for how much  
18 everybody is going to be working on maintenance versus  
19 operating type activities. If the work activity in the  
20 field responding to storms, dealing with scheduled  
21 maintenance, and that kind of stuff varies, you'll get a  
22 variance between those two FERC accounts, and we won't  
23 automatically correct for it. So you can end up in a  
24 situation that actuals and budgets in that detail don't  
25 match, but again, in total they're close.

1           COMMISSIONER SKOP: And with respect -- if I  
2 can recall, my memory, the difference between the 2009  
3 budget, aggregating the distribution operation and  
4 distribution and distribution maintenance for the  
5 year-to-year increase, which was 15 percent greater  
6 shown in the 2010 budget, I think the majority of that  
7 had to do with vegetation management; is that correct?

8           THE WITNESS: That's correct.

9           COMMISSIONER SKOP: All right. Thank you for  
10 the clarification, and thank you, Mr. Burnett, for your  
11 diligence in following up, because I had forgotten it,  
12 so I appreciate that.

13           CHAIRMAN CARTER: All right. Anything further  
14 from the bench? Exhibits?

15           MR. BURNETT: Yes, sir. With respect to the  
16 rate case proper testimony, we would move Exhibits 117  
17 through 127. And with respect to --

18           CHAIRMAN CARTER: Hang on. Hang on.

19           MR. BURNETT: Yes, sir. Sorry.

20           CHAIRMAN CARTER: Any objection to 117 through  
21 127? Without objection, show it done.

22           (Exhibits Number 117 through 127 were admitted  
23 into the record.)

24           CHAIRMAN CARTER: Okay. Mr. Burnett.

25           MR. BURNETT: Yes, sir. And with respect to

1 the Bartow testimony, we would move Exhibits 128 through  
2 132.

3 CHAIRMAN CARTER: Any objection? Without  
4 objection, Exhibits 128 through 132.

5 (Exhibits Number 128 through 132 were admitted  
6 into the record.)

7 CHAIRMAN CARTER: Now, everybody, let's go to  
8 the back pages. Mr. Rehwinkel, I think you've got 281.

9 MR. REHWINKEL: Yes, sir. I would move 281.

10 CHAIRMAN CARTER: Are there any objections?  
11 Without objection, show it done.

12 (Exhibit Number 281 was admitted into the  
13 record.)

14 CHAIRMAN CARTER: Ms. Kaufman, you've got 282?

15 MS. KAUFMAN: And 283.

16 CHAIRMAN CARTER: And 283, that's correct.

17 MS. KAUFMAN: I would move those.

18 CHAIRMAN CARTER: Any objections?

19 MR. BURNETT: Not to 282, sir. I do object to  
20 283. As made clear by Ms. Kaufman's questions, this  
21 exhibit is being offered in an attempt to show that  
22 pension expenses have decreased based on updated  
23 information on stock market performance and projections  
24 as to what the stock market will do. If the Commission  
25 accepts it for that purpose or makes any expense

1 adjustments based on this exhibit or that concept, the  
2 principle of parity would be invoked and, in all  
3 fairness, would reopen the door to PEF introducing its  
4 updated load and sales forecasts that the intervenors  
5 previously moved to withdraw.

6 MS. KAUFMAN: We'll withdraw the exhibit,  
7 Mr. Chairman.

8 CHAIRMAN CARTER: Okay. Thank you,  
9 Ms. Kaufman. Thank you.

10 (Exhibit Number 282 was admitted into the  
11 record.)

12 CHAIRMAN CARTER: Anything further for this  
13 witness at this point in time?

14 MS. FLEMING: Staff exhibits.

15 CHAIRMAN CARTER: Staff exhibits, the purple  
16 sheet. Ms. Fleming, you actually have cleanup.

17 MS. FLEMING: Yes, I do.

18 CHAIRMAN CARTER: You're recognized.

19 MS. FLEMING: I am happy to note for the  
20 record that Staff Composite Exhibits for this witness,  
21 Number 42, 43, 44, and 45 are all stipulated. I would  
22 like to note, though --

23 CHAIRMAN CARTER: Hang on. Hang on a second  
24 and let me make sure. Is that the understanding of the  
25 parties? That would be Exhibits 42, 43, 44. And 44?

1 MS. FLEMING: And 45.

2 CHAIRMAN CARTER: And 45? Is that correct?

3 MS. KAUFMAN: Yes, Mr. Chair.

4 CHAIRMAN CARTER: Okay.

5 MS. FLEMING: And I would like to note with  
6 respect to Item 1 under Exhibit 45, we will not be  
7 moving that portion of the exhibit in, as it relates to  
8 an issue that has been dropped in this proceeding.

9 CHAIRMAN CARTER: Okay. Without objection,  
10 show it done.

11 (Exhibits Number 42 through 45 were admitted  
12 into the record.)

13 MS. KAUFMAN: I'm sorry. Ms. Fleming, could  
14 you just repeat that, Mr. Chairman, if that would be all  
15 right.

16 MS. FLEMING: Item 1 under Exhibit 45 related  
17 to Issue 55, which was dropped.

18 MS. KAUFMAN: Thank you.

19 CHAIRMAN CARTER: Okay.

20 MS. FLEMING: And Exhibit 46 is not being  
21 entered, because that relates to the nuclear  
22 decommissioning issues that were spun out.

23 CHAIRMAN CARTER: Okay.

24 MS. FLEMING: And we have two additional  
25 matters. We handed out this yellow packet, which does

1 not have an exhibit number on it, and staff would ask  
2 that it be marked as 284. It's the Peter Toomey  
3 discovery related to rate base.

4 CHAIRMAN CARTER: Okay. Is this the one that  
5 has Interrogatory 1 -- PEF's Responses to Staff's 20th  
6 Set of Interrogatories, et cetera, et cetera?

7 MS. FLEMING: Yes. It's got a yellow  
8 Post-It --

9 CHAIRMAN CARTER: With the Yellow Post-It.  
10 Okay. That will be --

11 MS. FLEMING: And the --

12 CHAIRMAN CARTER: Hang on a second.  
13 Commissioners, for the record, that will be 284.

14 (Exhibit Number 284 was marked for  
15 identification.)

16 CHAIRMAN CARTER: Ms. Fleming.

17 MS. FLEMING: And finally, earlier today --

18 CHAIRMAN CARTER: Hang on a second. Is that  
19 -- give me a shorter title.

20 MS. FLEMING: Oh, I'm sorry. Staff's  
21 Composite Rate Base.

22 CHAIRMAN CARTER: Okay. You may proceed.

23 COMMISSIONER ARGENZIANO: I'm sorry,  
24 Mr. Chair.

25 CHAIRMAN CARTER: Yes, ma'am.

1                   COMMISSIONER ARGENZIANO: Did you say that  
2 would be 284?

3                   CHAIRMAN CARTER: 284, yes, ma'am.

4                   COMMISSIONER ARGENZIANO: Okay. Thank you.

5                   CHAIRMAN CARTER: Ms. Fleming.

6                   MS. FLEMING: And finally, Commissioners, we  
7 during -- earlier today we handed out two red folders,  
8 and staff would ask that that be identified as Exhibit  
9 285, as a composite, and just labeled confidential  
10 documents of --

11                   CHAIRMAN CARTER: 285, composite, that will be  
12 the confidential documents?

13                   MS. FLEMING: Yes.

14                   CHAIRMAN CARTER: Okay.

15                   (Exhibit Number 285 was marked for  
16 identification.)

17                   MS. FLEMING: And it's my understanding that  
18 the parties have stipulated to Exhibits 284 and 285.

19                   CHAIRMAN CARTER: Is that the understanding of  
20 the parties? Okay. Show it done.

21                   (Exhibit Number 284 and 285 were admitted into  
22 the record.)

23                   CHAIRMAN CARTER: Ms. Fleming.

24                   MS. FLEMING: We have no other exhibits.

25                   CHAIRMAN CARTER: Commissioners, let's do

1 this. The parties have been working together. Staff  
2 has been working with them, and when we leave, they  
3 normally meet. So I think rather than go to 8:00 and  
4 then have them meet afterwards, let's kind of reward  
5 them with some good time, and you guys can -- we'll just  
6 go ahead on and break for the evening, and you guys can  
7 have your meeting now and then maybe get a decent  
8 night's sleep.

9 Yes, the witness may be excused.

10 MR. BURNETT: Thank you.

11 CHAIRMAN CARTER: See you guys at 9:30 in the  
12 morning.

13 (Proceedings recessed at 7:41 p.m.)

CERTIFICATE OF REPORTER

STATE OF FLORIDA:

COUNTY OF LEON:

I, MARY ALLEN NEEL, Registered Professional Reporter, do hereby certify that the foregoing proceedings were taken before me at the time and place therein designated; that my shorthand notes were thereafter translated under my supervision; and the foregoing pages numbered 1782 through 1900 are a true and correct record of the aforesaid proceedings.

I FURTHER CERTIFY that I am not a relative, employee, attorney or counsel of any of the parties, nor relative or employee of such attorney or counsel, or financially interested in the foregoing action.

DATED THIS 29th day of September, 2009.

  
MARY ALLEN NEEL, RPR, FPR  
2894-A Remington Green Lane  
Tallahassee, Florida 32308
