Re: Docket No. 090392-WS; Application for Increase in Water and Wastewater Rates in
Lake County by Utilities, Inc. of Pennbrooke
Our File No.: 30057.177

Dear Ms. Cole:

Enclosed for filing in the above-referenced docket is the response of Utilities, Inc. of
Pennbrooke (the "Utility") to Staff's request for information dated March 10, 2010 ("Fourth
Data Request"). Staff has requested the following information in order to complete its
analysis in the above-referenced docket.

- 1. Regarding the Utility's Project Phoenix, please explain why the Utility
decided to implement Project Phoenix as opposed to upgrading the Utility's
legacy billing system. Please provide any cost/benefit analyses associated
with this decision.

RESPONSE: UI's legacy customer care and billing system was fully customized and no
longer supported by the original sole source software vendor. The individual who
developed the billing system was physically unable to maintain the system any longer.
Consequently, there was an inability to upgrade the legacy system to meet current and
future business requirements or to be assured that the billing system could provide reliable
performance. It was originally installed in 1987, and in the 20 years since, had received
limited updates and revisions. The system had numerous weaknesses including:

- Customer and premise information were linked in one account. As residents moved
and terminated service, the service order history at the original premise was

FPSC-COMMISSION CLERK

purged making prior service activities unavailable for use by accounting, regulatory, and operations staff. This resulted in the permanent loss of valuable information.

- Field personnel did not have direct access to the legacy billing system. Instead, they were sent daily service orders, typically by fax transmission that was then carried into the field, notations made on it, then faxed back to Customer Service. The data was then entered and the service order closed. This process required service orders to pass through multiple hands in a time consuming process before the service order was completed. There was also a significant time lag between each step.
- Because the process was manually intensive, it led to untimely responses due to incomplete fax transmissions and other frequent delays. Service orders that were not promptly completed resulted in increased customer dissatisfaction and complaints with the process.
- As customers moved from one premises to another within a given service area, or from one subsidiary to another, they were issued a new account number with each new premises location. The legacy billing system did not offer a means of tracking specific customers and transferring payment information, service history, deposits and billed services (current balance) from one account to another in a seamless fashion.

CC&B allows the Utility to focus on either a customer, a premises or both. Field activity information at a premises is stored in the records indefinitely, allowing field personnel to retain prior history of past service issues at a specific location. This allows staff to analyze site-specific maintenance and repair activity as well as aggregate data from a larger area. This provides an opportunity to cost effectively determine whether to repair or replace equipment or lines at a premise or to address systemic or chronic problems throughout the neighborhood. In addition, CC&B automates field activities in many ways. A background process makes key decisions regarding the timing and distribution of field activity assignments. CC&B simplifies the uploading and downloading to hand-held devices. The system allows the field operators to complete field activities in a real time environment so that Customer Service Representatives ("CSRs") have the information available to them as soon as the order is completed.

The CC&B system has several other improvements when compared to the legacy system. For instance, the billing estimation function is improved. It now includes a three-tiered process that incorporates customer history from the previous year's consumption

for the same time period, trends customer history for the last three to six months, and trends data from the customer's trend area (CIS Division) and trend class (Residential and Commercial). In addition to the billing estimation function, the system also provides for the automatic proration of billings based on number of days in a read period or bill period. This functionality has streamlined bill proration issues that handicapped the issuance of bills in the past.

CC&B also allows for the automated dispatching of Field Orders and Field Activities to operators for a more timely response to customer and service issues. The system allows for an efficient means of billing customers who have one account, but more than one premises. It offers the means to link on one bill consumption data for separate water and reuse meters at the same premise. It offers a consumption history chart on each bill to illustrate the trailing 12 months' usage pattern.

CC&B allows CSRs to have access to more customer history and information to better answer customer questions by providing both a history of meter reads and a history of billings. In comparison, the Legacy system only held the previous twelve months' data. Field staff now has real time access to customer premise and service point information as well as meter data and meter readings.

The system allows account numbers to stay with the customer for life. This gives the Utility the ability to track a customer from location to location. The system produces randomly generated account numbers, which has reduced the number of misapplied payments caused by data entry errors. CC&B provides CSRs with an enhanced screen display that aids the CSRs in resolving customer account, service, and billing issues. The Legacy system required moving from one screen to another.

CC&B features an automatic collections and severance process which reduces input errors, and as a result accidental disconnections for a customer for non-payment have been greatly reduced. It supports multiple bill payment options and offers the opportunity to implement additional payment options for the benefit of the customers. And finally, updates to the system are real time with respect to the completion of field activities, customer payments, adjustments and customer information. Both CSRs and field staff are able to terminate severance activity upon real time posting of payment resulting in fewer customers have their service cut off for non-payment.

There have been many advantages and improvements to Utilities, Inc. and its subsidiaries since the implementation of Project Phoenix, and there are many more that

will be realized over time, but, at this point it is difficult to determine the quantifiable cost savings and benefits because the system is still being acclimated to all aspects of the Utility. Utilities, Inc. is developing a series of metrics to be used to assess and evaluate customer service activities.

2. How long was the Utility's Legacy billing system in service before being replaced by the Phoenix Project?

RESPONSE: The legacy billing system was in service for 21 years (1987 to 05/31/2008).

3. Please provide staff with the allocation percentages relating to the Phoenix Project for Miles Grant Water and Sewer Company, Wedgefield Utilities, Inc., and the North Carolina system before they were sold.

RESPONSE: The allocation percentages related to Project Phoenix would have been determined as of December 31, 2007. The system went live on December 2, 2007, and the closest allocation period would be the end of that December. Please see the attached file titled "December 2007 Allocations" for the allocation percentages for all companies regarding the costs for Project Phoenix (equally distributed based off of ERCs). Specifically, the percentages for Miles Grant Water and Sewer Company and Wedgefield Utilities, Inc. were 0.747% and 1.056%, respectively.

4. Please provide staff with the allocation percentages relating to the Phoenix Project for any other system divested by Utilities, Inc. since January of 2008.

RESPONSE: The following companies have been sold since the implementation of Project Phoenix:

Company Name	JDE Company Number	GLAP Company Number	Date Sold
Holiday Service Corp.	170	50	06/01/2008
Charleston Utilities, Inc.	370	65	06/01/2008
Harrco Utilities, Corp.	180	33	10/01/2008
County Line Water Co.	116	11	05/31/2009
Eastlake Water Service	243	64	05/31/2009
South Gate Utilities, Inc.	258	105	07/06/2009
Pebble Creek Utilities, Inc.	244	66	07/21/2009
North Topsail Utilities, Inc.	189	120	08/31/2009
Miles Grant Water & Sewer Co.	253	91	11/09/2009
Hutchinson Island Irrigation Company	254	94	11/09/2009
Utilities, Inc. of Hutchinson Island	261	108	11/09/2009
Wedgfield Utilities, Inc.	247	69	11/18/2009

The attached allocation schedule titled "September 30 2009 Allocation Percentages" shows the ERCs as of September 30, 2009, and also includes any divestments the company has made above. If, however, Staff is requesting the ERC percentages at the time Project Phoenix went live, that information is supplied as part of the Utility's response to Item No. 3, above.

5. The Utility's MFRs recorded transportation expenses of \$9,937 for water and \$8,458 for wastewater. Of these amounts, how much relates to fuel purchases and what were the total gallons of fuel purchased?

RESPONSE: The Utility's MFRs recorded transportation expenses of \$9,937 for water and \$8,458 for wastewater, of these amounts \$13,709.66 was booked to the fuel account (object account 6215). The company then allocated that amount between water and sewer based on ERCs for allocated amounts of \$7,405.85 for water and \$6,303.87 for sewer. The company cannot determine the total gallons of fuel purchased for Utilities, Inc. of Pennbrooke because Utilities, Inc. (parent) utilized GE Capital Fleet to manage its entire convoy, but recently the company has switched vendors. Utilities, Inc. (parent) would receive the allocated amounts from a GE Fleet report along with their invoice. GE would provide a division of the costs by state cost center, which were booked appropriately. Please see the attached GE Fleet invoices with division report in the attached file titled "GE

Fleet Invoices.” At that point, the state cost center would allocate the costs out based on ERC percentage. A breakout has been supplied for the November allocation in the MS Excel file titled “Allocation Example.xlsx” on the enclosed data disc.

6. Staff notes that none of the bid proposals for Pennbrooke's pro forma plant items have been signed by the Utility. Please provide copies of all signed agreements or contracts for the pro forma plant items as well as copies of invoices to date, if any.

RESPONSE: See below.

Replace Well #1

The work has not yet started but the work is budgeted for completion in 2010. It has been estimated that the design and permitting process will take approximately four (4) months followed immediately by the bidding process with construction to be completed by December 31, 2010. The Utility has previously provided quotes for this project in response to Staff's first data request. The engineering consultant and two sub-consultants (for electrical engineering and hydrogeology services) have been selected and are capable of starting work immediately. The Utility does not have any additional signed agreements or invoices for this pro-forma plant item since the response was submitted to Staff's first data request.

WTP Electrical Improvements

The electrical system's components have been evaluated to determine which ones must be replaced, but the work has not commenced. The projected in-service date should be by the end of the third quarter of 2010. The Utility has previously provided proposals for this project in response to Staff's first data request. The project has been successfully billed out and the preferred contractor selected. The Utility does not have any additional signed agreements or invoice for this pro-forma plant item since the response was submitted to Staff's first data request.

Lift Station Upgrade (including pumps, control panel,
and 100 amp underground electric service)

Please see the attached pro forma project quotes for the signed proposals for the Lift Station Upgrade.

The Replacement of A Hydro-pneumatic Tank

The Utility proposes another pro-forma project for the Staff to review; the replacement of a hydro-pneumatic tank at the WTP at a cost of \$38,180. The following information supports this investment:

- a) The hydro-pneumatic tank inspection conducted by Thomas Knight of Knight Engineering, Inc. in February 2010 (attached hereto) identified the failure of Tank #1 to pass inspection due to its inferior wall thickness and severe interior corrosion on the top half of the tank. Knight recommended in his report that the tank be taken out of service immediately and that it not be pressurized again. It was his professional opinion that in its current condition the tank would pose a very serious safety hazard. In order to maintain the hydraulic design of the water treatment plant, the hydro tank must be replaced.
- b) No invoices for the hydro tank replacement have been received yet. The tank has been ordered with an 8-10 week delivery time.
- c) Please see the attached copy of the lower of two bids received to replace the tank in the attached report and quote dated February 19, 2010 from Knight Engineering Consultants. Eco-2000, Inc. will complete all work associated with the project at a cost of \$38,179.60. The tank will be built to ASME code in order to conform with FDEP rule contained in Chapter 62-550 F.A.C.
- d) No engineering or permitting is required for this project. FDEP will be notified by letter that this project entails a like-for-like replacement of an existing hydro tank.
- e) It is estimated that the project will be completed no later than June 30, 2010. In the interim, Hydro Tank #2 remains on line, but having only one tank in service will constrict flow during high demand periods and may cause flow and pressure constraints.

The Utility would also like to include two additional Deferred Maintenance Projects, one dealing with the painting of three ground storage tanks and replacing the ladders at said tanks (please see the attached invoice from The Huntington Company regarding this project). The second concerns the inspection of the hydro-pneumatic tank referenced in the new pro-forma plant project proposed above (please see the attached professional services agreement between Knight Engineering Consultants and the Utility).

7. At the customer meeting held on February 24, 2010, some of the customers stated that they receive multiple bills for water, sewer and irrigation as opposed to one single bill. Please explain why their bills are not consolidated into one bill.

RESPONSE: Residential customers who have a separate irrigation meter have been billed for irrigation service separately from their customary water and sewer bill. There are about 82 customers who are thus affected. The Utility's legacy billing system did not offer single billing for service locations with more than one metered connection. Since the new billing system is now in place, the Utility will combine the two into one monthly bill upon request by the customer. Upon request by a customer, the Utility will notify the billing administrator who ensures that the customer will only be receiving one bill per billing period from Utilities, Inc, of Pennbrooke in the future. The Utility encourages all customers to sign up for automatic bill payment in order to facilitate making payments without having to submit payment through the mail.

8. The following questions relate to the insurance solicitation (see attachment) that Utilities, Inc. has been mailing to its customers on behalf of Technology Insurance Company:
 - (a) Were the insurance solicitations mailed to all of Utilities, Inc. customers in Florida or were they mailed to customers in other states as well?
 - (b) How often are the insurance solicitations mailed to Utilities, Inc. customer?
 - (c) To date, how many customers have signed up for the insurance?
 - (d) Does Utilities, Inc. receive any compensation from Technology Insurance Company? If so, how much?
 - (e) What are the expenses associated with mailing out the insurance solicitations?
 - (f) How much administrative time does it take Utilities, Inc. to mail the insurance solicitations?

- (g) Which Utilities, Inc. employees prepare and mail the insurance solicitations?
- (h) What is the relationship between Utilities, Inc. and Technology Insurance Company?
- (i) If any of Utilities, Inc. customers have a claim with Technology Insurance Company, who performs the repair work?

RESPONSE:

- (a) The insurance solicitations were mailed to all Utilities, Inc. customers in all states in which Utilities, Inc. provides service.
- (b) The solicitations are mailed by Home Service USA quarterly to Utilities, Inc. customers.
- (c) Twenty-four (24) customers of Utilities, Inc. of Pennbrooke have signed up for the service as of March 15, 2010.
- (d) Utilities, Inc. does not receive compensation from Technology Insurance Company ("TIC"). Instead, TIC's parent corporation, Home Service USA, pays Utilities, Inc. a percentage of premiums paid.
- (e) Utilities, Inc. does not incur any expenses with mailing out the solicitations.
- (f) Utilities, Inc. spends at most approximately one hour per month in administrative time in connection with Home Service USA's mailings.
- (g) Utilities, Inc. does not have any employees that prepare or mail the solicitations.
- (h) Utilities, Inc. has a contractual relationship with Home Service USA (the parent of TIC).
- (i) Home Service USA contracts a plumber or contractor to perform any necessary repair work. None of the work is performed by Utilities, Inc. employees.

It is the Utility's burden to justify its requested costs. By letter dated November 21, 2007, pursuant to Rule 25-30.436(6), F.A.C., the Utility through counsel provided their final actual rate case expense incurred for Docket No. 060261-WS. The total rate case expense for WSC employees was \$21,378. In the current rate case, the Utility is requesting \$62,311 for WSC employees. This is a 291% increase in the amount for WSC employees hours from 2006.

1. Please explain what is so significant in this current rate case compared to Pennbrooke's last rate case causing the need for the 291% increase in the amount for WSC employees.
 - (a) Please provide any additional documentation to support the WSC employee's hours estimated to complete the rate case.

RESPONSE: There are a few significant factors in the current rate case, apart from inflation, that have contributed to the 291% increase in the amount for WSC employees. As Staff and Commission are aware, the issues involved in each rate case are unique. Some of the unique costs include the Utility's time in investigating and responding to Staff's October 29, 2009 letter regarding a potential show cause proceeding. The Utility had to acquire a bond to secure interim rates (which is more expensive than a corporate undertaking). The HOA has hired an independent consultant and the Utility expects that there will be more work associated with the HOA's inquiries.

The Utility is also more accurately capturing the costs associated with the rate case. Previously the Utility did not capture the time spent by the billing department (for implementing rate changes, prorating calculations, reviewing and mailing customer notices, etc.). Now this is possible with the time entry portion of JDE, and as a result, these costs are now being captured. The same is true of mailroom clerks and administrative assistants. The Utility has also made an effort to perform all audit facilitation in house to minimize temporary and consultant services.

Lastly, the Utility would like to point out that these are estimates to complete the rate case. The 291% figure is a comparison of actual rate case expense and estimated rate case expense. A more appropriate comparison would be the Utility's estimated rate case expense in Docket No. 060261-WS. Even then the cases are different, but at least the comparison would be of like variables. Moreover, the Utility has no way of knowing which issues will arise. The Utility's last rate case, Docket No. 060261-WS, included a significant amount of public input and opposition. With the HOA's hiring of a consultant and the

involvement of OPC, the Utility believes it is prudent to assume that rate case expense estimates should take into account this heightened level of involvement.

2. Regarding the quality of service concerns brought up at the February 24, 2010 meeting, multiple customers complained about inadequate pressure (primarily in "K" section and particularly on Saturdays) and poor water quality that has sediment, tastes of chlorine, and is discolored. There is a hardness in the water, and it stains fixtures and leaves a film residue. There appears to be a sense of general frustration among the customers over the lack of improvement since the last rate case concerning the above-mentioned problems. Please provide an explanation as to what the utility is doing to maintain adequate water pressure, as well as the status of the quality of water delivered to the customers by the Utility.

RESPONSE: Since its last rate case, the Utility has taken a number of steps to address low pressure issues, including the construction of a second point of connection of the water treatment plant to the distribution system to alleviate a hydraulic bottleneck. In addition, worn impellers on high service pumps were replaced in order to restore the designed pumping capacity of the equipment. The Utility surveyed all distribution valves to verify that all were in the "open" position. Customers were placed on a watering schedule where odd numbered houses were to irrigate on days different from even numbered houses. Until November 2009, homeowners could irrigate twice per week. After that date, the new irrigation rule imposed by the St. Johns River Water Management District limited irrigation to once per week, Saturdays and Sundays, during delineated times (Eastern Standard Time). This has had the effect of concentrating irrigation demand into two days from four and causing the instantaneous demand to spike on those days.

The Utility's analysis of water production data indicates that Wednesdays and Saturdays are the peak demand days of the week, which reflects the days that odd-numbered houses can irrigate. The Utility intends to propose to the Pennbrooke HOA the division of the community into three zones in order to reduce the number of homes irrigating at any one time. This will allow the high service pumping equipment to better meet instantaneous demand. However, it is critical that the final water rates be structured in such a way that the customers are further encouraged to reduce water consumption so that the total groundwater withdrawal does not exceed the limits imposed by St. Johns River WMD in the Pennbrooke Fairways Consumptive Use Permit.

Ann Cole, Commission Clerk
Office of Commission Clerk
Florida Public Service Commission
March 19, 2010
Page 12

Regarding water quality, the water delivered to the Pennbrooke customers meets all current federal and state water quality requirements. The source water for the community is the Upper Floridian Aquifer, which contains relatively hard water. Any further investment in additional treatment methods designed to reduce calcium hardness would require the support of the customer base, including an acknowledgement that additional investment would generally be recovered through higher water rates. It would be imprudent on the part of the utility to install additional treatment equipment and incur additional operating expense that is not supported by the customers in a future rate proceeding when the utility is already in full compliance with all regulatory requirements regarding water quality.

Should you or the Staff have any questions regarding this filing, please do not hesitate to give me a call.

Very truly yours,

CHRISTIAN W. MARCELLI

DIRECT INQUIRIES TO CUSTOMER SVC 866-874-9186

3099

NOTE: GE retains the benefit of sales and other tax credits and receives and retains discounts and other monies from OEMs, suppliers and third parties with respect to vehicles, goods and services. Interim rent does not affect book value. Customer should review this invoice and notify GE of errors within 30 days. The exclusive remedy will be adjustments in Customer's account. GE does not provide legal, tax or accounting advice (which Customer should seek from their own advisors).

ITT Water & Wastewater Florida, LLC

Flygt Products
2152 Sprint Blvd. Apopka Florida 32703
Phone: 407-880-2900 • Fax: 407-880-2962

To: Utilities Inc. of Florida

Date: February 18, 2010

Subject: Pennbrook Fairways LS #1
Quote Number: 2010-APO-0016

We are pleased to offer the following equipment:

- (2) 4" Flygt NP3127/489 submersible wastewater pumps, 7.5hp, 3/230v, each with 50' of motor cable.
- (1) Duplex control panel to Utilities Inc. standards, 7.5hp, 3/230v.
- (4) Liquid level sensing floats, each with 40' of cable.
- (1) Startup service by a representative of this company.

Note: Installation is not included.

Price: \$19,015.00, plus taxes, freight included, F.O.B. factory.

THIS PROPOSAL WILL EXPIRE IN NINETY (90) DAYS UNLESS EXTENDED IN WRITING BY ITT WATER & WASTEWATER.

NOTE: WE DO NOT SUPPLY, PIPING, VALVES, GUIDE BARS, PRESSURE GAUGES, DISCONNECTS, JUNCTION BOXES, KELLUMS GRIPS, SURGE PROTECTION EQUIPMENT, SPARE PARTS, LABOR OR ANY OTHER ITEM NOT SPECIFICALLY LISTED ABOVE.

TERMS: Subject to credit approval net 45 days after date of invoice or 100% payable before start-up of equipment (whichever comes first). A service charge of 1.5% per month will be added to all balances unpaid 30 days after invoice date. Failure to pay in accordance with these terms will void all warranties. A cancellation charge of 20% of the value of the order will be assessed for special orders or control panels cancelled after production is completed.

- CONDITIONS:**
1. Price is firm based on our receiving complete approval and release for productions four (4) weeks after drawings have been submitted by ITT Water & Wastewater, Florida, LLC.
 2. PARTIAL BILLING WILL BE MADE ON ANY PARTIAL SHIPMENT.

We thank you for your interest in our equipment and look forward to being of service to you in the near future.

IN THE ABSENSE OF A FORMAL ISSUED PURCHASE ORDER, A SIGNED FACSIMILE COPY OF THIS PROPOSAL IS ACCEPTABLE AS A BINDING CONTRACT.

Patrick,

Apparently ITT's sales department is having difficulty evaluating PB LS #1 in regards to sizing the pumps. See the emails below. ITT actually performed an on-site drawdown using a 5HP and a 7.5HP pump with the 7.5 being the correct pump. This of course raises the price from;

Original: \$17,311.00 + Tax (7%) = \$18,522.00
Revised: \$19,015.00 + Tax (7%) = \$20,346.05
Difference = \$1,824.05

Not a huge amount but an increase nonetheless. I have attached the original and the revised quote for your use.

Regards,

Bryan K. Gongre

Bryan,

I had ITT out to do draw downs and they brought out a 5 hp pump do draw downs and it wouldn't pump against the head so ha brought out a 7.5 and it did the job. So here is the revised quote. Any questions please call me.

Chuck

Subject: Pennbrook Fairways LS 1

Good morning Chuck,

The proposal we discussed is attached. Please review this at your convenience and let me know if you have any questions. We have confirmed that the Flygt pumps will work on the existing Hydromatic elbows & rail system without any modifications. Please note that I have priced this equipment as 3/230v as you instructed. As there is currently only 1/230v service at the site, the electrical service will need to be upgraded when this equipment is installed. The control panel I will provide has an 80A main breaker so I suspect you will need to install a minimum of a 100A 3/230v service.

Thank you for the opportunity to provide you with this pricing.

Regards,

PROFESSIONAL SERVICES AGREEMENT

Between: Knight Engineering Consultants, Inc.; herein referred to as "Engineer"
11648 Osprey Pointe Blvd.
Clermont, Florida 34711

And: Utilities, Inc. of Pennbrooke; herein referred to as "Client"
200 Weathersfield Avenue
Altamonte Springs, Florida 32714

Re: Civil Engineering Services Proposal
Water Tank Inspections, Pennbrooke Fairways WTP

Knight Engineering Consultants, Inc. (KECI) is pleased to present this proposal for professional civil engineering services. Please find herein the Project Description, Scope of Services, Conditions of the Agreement, and Compensation for the proposed professional services.

PROJECT DESCRIPTION

The proposed project involves inspection and cleaning of one (1) 7,500 gallon hydropneumatic tank, one (1) 10,000 gallon hydropneumatic tank and three (3) 50,000 gallon ground storage tanks. The tanks are part of the Pennbrooke Fairways Water Treatment Plant (WTP).

SCOPE OF SERVICES

The scope of services includes inspection and cleaning services for the above described five (5) water tanks. The following services will be provided for each tank:

- Ultrasonic testing and recording of residual metal thickness for steel tanks
- Visual inspection and recording of conditions inside and outside of all tanks including corrosion and surface treatment (coating).
- Visual inspection and recording of condition of access cover (manway) and gasket
- Replacement of manway gasket if necessary
- Digital photography inside and outside of all tanks
- Brushing and/or pressure washing inside of tanks
- Removal of up to 1" soft sediment
- Rinsing inside of tanks
- Water Tank Inspection Report

PROFESSIONAL SERVICES AGREEMENT

Between: Knight Engineering Consultants, Inc.; herein referred to as "Engineer"
And: Utilities, Inc. of Pennbrooke; herein referred to as "Client"

Re: Civil Engineering Services Proposal
Water Tank Inspections, Pennbrooke Fairways WTP

The tanks will be cleaned and inspected on three (3) separate days. The first inspection will include one (1) hydropneumatic tank and one (1) ground storage tank. The second inspection will include one (1) hydropneumatic tank and one (1) ground storage tank. The third inspection will include one (1) ground storage tank. All inspections will occur within a 30 day period.

Each tank will need to be bypassed or taken offline during the inspection and cleaning process. The "Client" is responsible for these services. Each tank should be emptied by the client's representative prior to inspection and/or cleaning by the engineer or his assistant.

A boil water notice may be required and bacteriological samples collected. The "Client" is responsible for any and all boil water notices.

The scope of services includes the removal of soft sediment up to 1" in depth. Additional sediment removal will be done at the rate of \$90.00 per hour.

The scope of services includes provisions for sanitary tools and equipment to gain access to and complete interior cleaning of tanks.

The scope of services does not include any analysis of any existing potable water supply or distribution system.

CONDITIONS OF THE AGREEMENT

PROFESSIONAL SERVICES AGREEMENT

Between: Knight Engineering Consultants, Inc.; herein referred to as "Engineer"
And: Utilities, Inc. of Pennbrooke; herein referred to as "Client"

Re: Civil Engineering Services Proposal
Water Tank Inspections, Pennbrooke Fairways WTP

- 1) The "Engineer" agrees to provide the "Client" with three (3) sets of the Water Tank Inspection Report for each tank. Additional copies may be obtained at the current reprographic service rate or, at the "Client's" option, a complete set of digital files can be provided. All original documents, including field notes, tracings, calculations, etc., shall be retained and remain the property of the "Engineer".
- 2) The "Engineer" shall provide work of a professional caliber; however, the "Engineer" cannot, and does not guarantee the action of the permitting agencies or the court to provide project approvals.
- 3) The "Client" agrees to limit the "Engineer's" professional liability to the "Client" and all construction contractors and subcontractors on the project, due to the performance or non-performance of this contract, such that the total aggregate liability of the "Engineer" to all those named shall not exceed \$5,000 or the fees received in this Agreement, whichever is greater.
- 4) The "Client" may terminate this Agreement without cause upon giving the "Engineer" seven (7) days written notice. In the event of termination, the "Engineer" shall be paid for all work in progress, to be based on the working hours completed up to and including the date of termination as well as any additional work to reproduce project files at the request of the "Client".
- 5) The "Engineer" may terminate this Agreement without cause upon giving the "Client" seven (7) days written notice. In the event of termination, the "Engineer" shall provide the "Client" with copies of the project file, a set of reproducible plan sheets of work completed and copies of CAD drawings that have been completed on diskette. The "Engineer" shall be paid, based on the working hours expended, for all work completed and for the reproduction costs of the project file, plan sheets and CAD drawings.
- 6) Claims, disputes or other matters in question between the "Client" and the "Engineer" arising out of or relating to this Agreement or breach thereof shall be resolved through mediation.
- 7) This contract is offered with the understanding of the relevant regulations of the local government, the State of Florida, and the United States as of the date of the signature by an officer of Knight Engineering Consultants, Inc., of this contract. Regulations that become effective after the signature date of this contract may affect the Scope of Services contained herein. In such an event, Knight Engineering Consultants, Inc. is not bound to the fees contained herein. Both parties shall have full rights to renegotiate to reflect the effect of new regulations on the relevant components of this Agreement.

PROFESSIONAL SERVICES AGREEMENT

Between: Knight Engineering Consultants, Inc.; herein referred to as "Engineer"
And: Utilities, Inc. of Pennbrooke; herein referred to as "Client"
Re: Civil Engineering Services Proposal
Water Tank Inspections, Pennbrooke Fairways WTP

COMPENSATION

The total fee is \$2,150 per tank, \$10,750 total. The fee schedule is as follows:

Retainer Fee, due upon execution of this Agreement	\$5,375.00
Submittal Fee, due upon submittal to "Client"	\$5,375.00

The "Engineer" shall submit invoices to the "Client" for compensation of the work completed as specified in this section of this Agreement. Payment is due upon receipt of invoice. If the "Client" fails to make any payment due to the "Engineer" for services and/or expenses within thirty (30) days of the invoice date the "Engineer" reserves the right to discontinue any or all work on the subject property. If the "Engineer" employs legal services to collect overdue amounts, the "Client" agrees to pay all costs of collection, including reasonable attorney's fees, whether action be brought or not. The "Client" agrees to pay all required application and permit fees, all survey verification fees and any other fee that may be required to obtain the necessary permits that are not specifically noted by this Agreement.

Additional services will be provided only at the Client's request. Additional services will be billed at KECI's current hourly billing rates. KECI's current hourly billing rates are as follows:

Principle Engineer	\$175.00
Engineering Assistant/Mechanic	\$90.00
Administrative (Secretarial)	\$50.00

If this agreement meets your approval, please sign and return one copy along with a check for the retainer fee. Your execution of this contract shall serve as authorization to proceed with the work as described herein.

Re: Pennbrooke Fairways Hydropneumatic Tank Inspection

Dear Mr. Gongre:

On Tuesday February 9, 2010, I inspected the two (2) hydropneumatic tanks at Pennbrooke Fairways in Lake County, Florida. The first tank inspected was the 10,000 gallon tank. The second tank inspected was the 7,000 gallon tank. The first tank passed inspection. The second tank did not. The purpose of this letter is to address the second (failed) tank.

The exterior of the 7,000 gallon tank was in fair condition. The interior of the tank was in poor condition. The top half of the tank's interior was severely corroded. Sheets of corroded steel were peeling away from the sides. The metal thickness readings of the tank ranged from 0.06 inch to 0.17 inch on the sides and 0.20 inch to 0.28 inch on the end caps. The lowest readings of 0.06 inch, 0.09 inch and 0.12 inch were measured on the top half of the tank where the majority of the corrosion has taken place. The tank did not have a manufacturer's identification plate. The manufacturer's specifications for this tank, including the date of manufacture and pressure rating, are unknown.

As a result of the severe corrosion and unacceptable metal thickness readings for the 7,000 gallon tank, I recommended to the plant operator that the tank be replaced with a new ASME certified tank. I also recommended that the existing tank be immediately taken out of service and not be pressurized again at any time in the future.

As you know, it is my obligation as a Professional Engineer to protect the health, safety and welfare of the public. It is my professional opinion that it would pose a very serious safety hazard to the public if the 7,000 gallon tank were to be put back into service.

I will be submitting a complete inspection report for both tanks within two (2) weeks.

Should you have any questions or need additional information, please do not hesitate to call me at (352) 394-8514.

Sincerely,
KNIGHT ENGINEERING CONSULTANTS, INC.

Description	Amount
<p>Pembroke location: Drain the main holding tanks at the Pembroke location (3) and remove the damaged and inoperable ladders int eh tank with new aluminum ladders to gain access to the inside of the containers</p> <p>Drain down 1 tank and remove the water inside. Powerwash ALL rust and corrosion out of the tanks, and remove the debris with a pump system, and manually with buckets. After rust removal, the tank must be dry to apply a Paint to Metal primer.</p> <p>Apply an epoxy PTH on the entire inside of the tank TOP TO BOTTOM to prevent further rust damage in the tank. EACH TANK WILL TAKE 1 WEEK FROM START TO FINISH. So, 1 tank will need to be isolated from the others during this work.</p>	<p>963.00</p>
Tank 1	6,836.00
Tank 2	6,836.00
Tank 3	6,836.00
<p>*****Confined space permits will need to be acquired prior to starting project</p>	
<p>***** All Proper ventilation equipment will be in use per code enforcement and safety during this project.</p>
