Re: Docket No. 110000-OT - Undocketed Filings - 2012 FEECA Report Data Collection

1. The table below compares the 2010 goals established by the Commission (Order No. PSC-090855-FOF-EG) against FPUC's 2010 annual achievements (FPUC's 2010 Annual Conservation Report, Page 2-1, filed March 1, 2011).

a. Please verify that the demand and annual savings values are accurate.

The demand and annual savings values in the table below are accurate.

b. Please provide an explanation for FPUC's failure to achieve its commercial/industrial summer demand goal.

The programs to meet the 2010 goals were not approved until the Consummating Order was issued on December 7, 2010. Until that date, FPUC was using programs adopted during the 2004 goal setting process. Thus during almost all of 2010 FPUC was using programs which were designed to meet the 2004 goals. It would not be expected that programs developed to meet the 2004 goals would meet the 2010 goals which were established based on the E-TRC test. In addition, the economic recession during 2010 negatively impacted FPUC's commercial/industrial conservation programs. The only 2004 FPUC commercial/industrial program that did not require expenditures by FPUC's commercial/industrial customers was the Commercial GoodCents Energy Survey. That program exceeded its projected number of participants in 2010 while all other FPUC commercial/industrial programs did not achieve their projected number of participants which is further evidence of the negative impact of the recession upon FPUC's commercial/industrial customers. In general, they simply did not have money to spend even if it saved them money in the long run.

c. Please provide an explanation for FPUC's failure to achieve its commercial/industrial annual energy goal.

Please see the answer to question 1b.

FPUC	Winter (MW)		Summer (MW)		Annual (GWH)	
	Goal	Savings Achieved	Goal	Savings Achieved	Goal	Savings Achieved
Residential	0.1	0.5	0.2	0.2	0.5	0.5
Commercial/Industrial	0.1	0.1	0.2	0.1	0.8	0.3
Total	0.2	0.6	0.4	0.3	1.3	0.8
