

BEFORE THE
FLORIDA PUBLIC SERVICE COMMISSION

DOCKET NO. 120015-EI

In re: Petition for rate increase
by Florida Power & Light Company.
_____ /

TELEPHONE DEPOSITION OF: ROBERT E. BARRETT, JR.

TAKEN ON BEHALF OF: Office of Public Counsel

DATE: August 9, 2012

TIME: Commenced at 3:05 p.m.
Concluded at 4:38 p.m.

LOCATION: 111 West Madison Street
Tallahassee, Florida

REPORTED BY: MARY ALLEN NEEL, RPR, FPR
Notary Public, State
of Florida at Large

ACCURATE STENOGRAPHY REPORTERS, INC.
2894-A REMINGTON GREEN LANE

WITNESS	PAGE
ROBERT E. BARRETT, JR.	
Direct Examination by Mr. Rehwinkel	7
Cross-Examination by Mr. Moyle	33
CERTIFICATE OF OATH	
CERTIFICATE OF REPORTER	60
READ AND SIGN LETTER	61
ERRATA SHEET	62

PROCEEDINGS

The following deposition was taken on oral examination, pursuant to notice, for purposes of discovery, for use as evidence, and for such other uses and purposes as may be permitted by the applicable and governing rules. Reading and signing of the deposition transcript by the witness was not waived.

* * *

MR. REHWINKEL: We can go on the record. My name is Charles Rehwinkel with the Public Counsel's Office, and we're here for the deposition of Robert Barrett pursuant to notice.

Mr. Butler, if you could ask the notary to administer the oath.

MR. BUTLER: I will do so. Let me have the notary introduce herself, and then she will administer the oath.

THE NOTARY: My name is Pamela Springer, and I'm a notary duly appointed and commissioned here in the State of Florida.

Robert E. Barrett, Jr., in the matter of Petition for rate increase by Florida Power & Light Company, Docket Number 120015-EI, do you solemnly swear that the testimony that you're about to give will be the truth, the whole truth, and nothing but

1 the truth?

2 THE WITNESS: I do.

3 MR. BUTLER: All right. We have the email
4 address that you sent, Charles, and Ms. Springer
5 will send that to -- scan it and send it there.

6 MR. REHWINKEL: Thank you very much.

7 Let's take appearances, starting with the
8 deponent and FPL.

9 MR. BUTLER: This is John Butler appearing on
10 behalf of Florida Power & Light Company. Here with
11 me are Mr. Barrett, the deponent, and Melissa
12 Linton and Sol Stamm, and we've just had join us
13 Jeff Stuart.

14 MR. REHWINKEL: Okay. Could you spell the
15 names of the first two?

16 MR. BUTLER: It's Melissa, M-e-l-i-s-s-a,
17 Linton, L-i-n-t-o-n, and Sol Stamm, S-o-l, and a
18 separate word, S-t-a-m-m. And then Jeff Stuart,
19 J-e-f-f, S-t-u-a-r-t, and John Butler, J-o-h-n,
20 B-u-t-l-e-r.

21 MR. REHWINKEL: Thank you. Any other FPL
22 personnel on the line?

23 Okay. Let's go -- from the Public Counsel's
24 Office, anyone else calling in?

25 MS. MERCHANT: Tricia Merchant.

1 MR. REHWINKEL: Thank you. FIPUG?

2 MR. MOYLE: Jon Moyle on behalf of FIPUG.

3 MR. REHWINKEL: Okay. Hospital Association?

4 MS. PURDY: This is Lisa Purdy for the South
5 Florida Hospital and Healthcare Association.

6 MR. REHWINKEL: Retail Federation?

7 Okay. Public Service Commission?

8 MR. HARRIS: Larry Harris on behalf of the
9 staff, and with me is David Dowds and Sue Ollila.

10 MR. REHWINKEL: Okay. Other parties? Other
11 persons on the line?

12 All right. Mr. Butler, before we get started
13 with the questioning, I understand that we'll
14 follow the normal convention of reserving all
15 objections except as so form of the question?

16 MR. BUTLER: That's right. And also, we will
17 want to read and sign the deposition at the end of
18 it.

19 MR. REHWINKEL: Okay. Thank you.

20 All right. Those are all the preliminary
21 matters I have. Anyone else?

22 Then we will commence the disposition.

23 Thereupon,

24 ROBERT E. BARRETT, JR.

25 the witness herein, having been first duly sworn, was

1 examined and testified as follows:

2 DIRECT EXAMINATION

3 BY MR. REHWINKEL:

4 Q. Mr. Barrett, thank you for making yourself
5 available on short notice in this matter.

6 A. You're welcome.

7 Q. Could you state your name, occupation, job
8 title, and employer for the record?

9 A. Yes. It's Robert E. Barrett, Jr., Vice
10 President of Finance, Florida Power & Light Company.

11 Q. And do you have with you your direct and
12 rebuttal testimony and whatever exhibits you filed?

13 A. I do.

14 Q. Okay. With respect to the testimony that
15 you've filed on both direct and rebuttal, at this time
16 have you identified any changes or corrections that need
17 to be made to either the testimonies or the exhibits?

18 A. No.

19 Q. Okay. Mr. Barrett, I have indicated to your
20 counsel, and I intend to adhere to this commitment, to
21 only -- I only have a need to ask you questions directly
22 related to Section III of your rebuttal testimony, which
23 is page 11 through parts of 13.

24 A. Okay.

25 Q. And so I would ask you to turn to that. I may

1 need to refer to related portions of your direct
2 testimony, but that remains to be seen.

3 So if I could ask you to turn to page 11, the
4 Q and A there, and ask you to review that Q and A
5 starting on line 16 and continuing on page 12, line 2.

6 **A.** Continuing on to line 2 of page 12?

7 **Q.** Yes, sir.

8 **A.** Yes.

9 **Q.** You reference a variance beginning in the --
10 in the sentence beginning on line 23 of page 11 and on
11 to line 1 of page 12. Do you see that?

12 MR. BUTLER: Charles, if you're speaking, you
13 are fading out.

14 MR. REHWINKEL: I am? I'm very close to the
15 speaker here.

16 Let me restate the question.

17 MR. BUTLER: Okay.

18 BY MR. REHWINKEL:

19 **Q.** On line 23 of page 11, continuing on to line 1
20 of page 12, you have the concept of variance. Do you
21 see that?

22 **A.** Yes.

23 **Q.** Okay. Can you tell me, in that context, what
24 was the projected depreciation surplus for 2010?

25 MR. BUTLER: You mean the projected

1 amortization of it for 2010?

2 MR. REHWINKEL: Yes, sir.

3 **A.** Let me find that, if I could.

4 I believe the budget for 2010 was 139 million.

5 **Q.** So in the context of your testimony, the
6 projected amortization of depreciation surplus would
7 have been 139 million?

8 **A.** In the budget for 2010, yes.

9 **Q.** So just to be sure, when you say the budget
10 for 2010, that amount is the same as what you intended
11 when you talked about projected on line 1 of page 12?

12 **A.** Yes.

13 MR. REHWINKEL: Did someone else join the
14 call?

15 MR. KELLIHER: Yes, Tom Kelliher.

16 MR. REHWINKEL: Are you a party?

17 MR. BUTLER: He's an FPL employee.

18 MR. REHWINKEL: Oh, I apologize.

19 MR. KELLIHER: Yes, I'm an FPL employee.

20 MR. REHWINKEL: Yes, sir. Thank you for
21 identifying yourself.

22 MR. BUTLER: Sorry.

23 MR. REHWINKEL: No problem.

24 BY MR. REHWINKEL:

25 **Q.** Mr. Barrett, what is your definition of

1 extreme weather?

2 **A.** In this context, it -- well, my definition of
3 extreme would be a low probability of occurrence, I
4 guess would be kind of a layman's way of thinking of it.
5 And 2010, that was certainly the case.

6 **Q.** Would you consider that to be a subjective
7 definition?

8 **A.** Well, I guess I would -- if I could further
9 define it, I'll make it less subjective.

10 **Q.** Okay.

11 **A.** The winter that we experienced in 2010 was the
12 coldest in 60 years, and the summer I believe was also
13 the warmest over that same time period. So that's a
14 little less subjective, and that's what I would consider
15 extreme.

16 **Q.** Okay. Do you have any definition that would
17 be related to cooling degree days, for example?

18 **A.** I don't have that handy.

19 **Q.** Did a variance from normal cooling degree days
20 by X percent factor into the definition of extreme as
21 used in your testimony?

22 **A.** Again, I think the way I referred to extreme
23 was, you know, kind of the coldest winter on record and
24 the warmest summer on record. I'm sure I could probably
25 get the cooling degree days and heating degree days, but

1 that's not what I used to define it.

2 **Q.** Okay. Fair enough.

3 You used the phrase -- in that same line that
4 I cited on the bottom of 11 and the top of 12, you used
5 the phrase "almost all," and you're referring to the
6 variance. Can you tell me what "almost all" means?

7 **A.** Well, actually, when I look at the data, it's
8 more than all, so "almost all" probably should have said
9 "more than all." We actually quantified -- if I can
10 elaborate, we qualified the impact of weather on
11 revenues in 2010 of \$180 million, \$182 million. That
12 was submitted in discovery. So it was bigger than the
13 variance.

14 **Q.** What discovery was that submitted in?

15 **A.** South Florida Hospital Number 44. I don't
16 know what that was.

17 **Q.** Okay. Interrogatory 44?

18 **A.** Yes.

19 **Q.** So by that last answer, you would say there
20 were no other factors that contributed to the variance;
21 is that fair?

22 **A.** I would say that's probably fair, although
23 there probably were things moving in both directions.
24 But clearly, this overwhelmed all of the other
25 variances.

1 **Q.** Was there a particular objective basis for
2 measuring the impact of extreme weather as it relates to
3 your testimony?

4 **A.** Yes. The objective basis is normal weather,
5 which is the way we plan and budget for our revenues. I
6 think witness Morley talks a lot about weather and how
7 we define normal weather over a 20-year period.

8 **Q.** Okay. Was the same basis for measuring
9 weather's impact on revenues used for 2011 and 2012 to
10 date?

11 **A.** Yes, the same approach, 20 years of cooling
12 and heating degree days, again as further described by
13 witness Morley. Obviously, as you roll forward in time,
14 it's a different 20 years, but it's the same approach.

15 **Q.** Okay. On page 12, line 7, you indicate that
16 the 2013 forecast was developed using a rigorous
17 forecast with proven performance; is that right?

18 **A.** Yes.

19 **Q.** And on lines 7 and 8 of page 12, you also
20 indicate that the 2012 forecast was developed using the
21 same rigorous forecast process; is that right?

22 **A.** Yes.

23 **Q.** Was the rigorous forecast process that you
24 used with respect to the 2012 and 2013 forecasts also
25 used to develop the 2010 budget?

1 **A.** Yes.

2 **Q.** If I asked you the same question with respect
3 to the 2011 budget, what would your answer be?

4 **A.** Yes.

5 **Q.** Would the results for 2010 and 2011 be part of
6 the proven performance which you rely on in determining
7 that the 2012 and 2013 forecasts are reasonable?

8 **A.** Yes. And we would look at a number of years,
9 but certainly it would include 2010 and '11.

10 **Q.** Okay. Can I get you to look at the answer to
11 the question that is posed on lines 20 and 21, that
12 begins on line 22 of your rebuttal testimony and
13 continues on to page 9 of -- line 9 of page 13?

14 **A.** Yes.

15 **Q.** Could you just review that for a second?

16 **A.** Okay.

17 **Q.** I want to ask you a hypothetical, and I want
18 to know if you could clarify for me what would happen in
19 2013 if hypothetically the unamortized reserve as of
20 12/31/2012 was 265 million instead of 191 million, by
21 explaining what the company would propose to be done
22 with the extra 74 million if, as you state, FPL would
23 not amortize any additional reserve surplus in
24 subsequent years?

25 **A.** Okay. Our proposal would be that we would

1 amortize the 191, and that's what would be reflected in
2 the revenue requirements in this case for purposes of
3 setting revenues. And then in your case -- I forget
4 exactly what number you used. Was it like 265?

5 **Q.** Yes.

6 **A.** You're testing my math here. So 73, 78, 74 --
7 the attorney is doing better math than me -- that would
8 be left over at the end of 2013. We would propose to do
9 nothing with that and have it to be considered -- well,
10 I should say, we are scheduled to file a depreciation
11 study March of next year, at which point we'll be taking
12 a fresh look at our theoretical reserve imbalance
13 situation. And so it would be captured in that and
14 whatever future decision the Commission would make
15 regarding surplus or deficit, et cetera. So we would
16 stop at 191, and whatever is left would be considered as
17 part of the next comprehensive study.

18 **Q.** Okay. So on page 13, in the sentence that
19 begins on line 2, "FPL's proposal" -- do you see that?

20 **A.** Yes.

21 **Q.** And it concludes on line 5. There is a phrase
22 "not to amortize any additional reserve surplus in the
23 subsequent years in which the newly approved base rates
24 remain in effect." Do you see that?

25 **A.** Yes.

1 **Q.** Okay. What is the meaning of the phrase "any
2 additional reserve surplus"?

3 **A.** Well, let me, if I may, refer to your
4 hypothetical. In your case, it was the 74 million.

5 **Q.** Okay. So you're not referring to any amount
6 of a depreciation reserve surplus that would be
7 different from what was contained in the \$894 million
8 identified in the last rate case?

9 **A.** Correct. I'm not addressing that at all in
10 the lines we're talking about. I'm addressing the 894.
11 And whatever may be left at the end of 2013, we just
12 stop there.

13 **Q.** I know that I did not ask your attorney to
14 have you review a discovery request as a part of this
15 deposition, but I think a supplemental response to staff
16 interrogatory 434 from the 14th set was filed. Are you
17 familiar with that?

18 **A.** If you could give me a moment to pull it up.

19 MR. REHWINKEL: And I apologize, John. I just
20 saw this this morning.

21 MR. BUTLER: That's all right. Just give us a
22 moment. I'm going to put it on mute here for a
23 moment and let Mr. Barrett have an opportunity to
24 review it.

25 THE WITNESS: Before you do that, which one is

1 it again?

2 BY MR. REHWINKEL:

3 **Q.** It's 14-434, supplemental, and it relates to
4 the depreciation reserve surplus.

5 **A.** Okay. Just give me a moment to review it, if
6 you would.

7 **Q.** Yes, sir.

8 **A.** Okay. I've got it.

9 **Q.** And I had a series of questions that started
10 with this question: Has the amortization forecast for
11 2012 been updated? And by "amortization forecast" I
12 mean of the depreciation surplus.

13 **A.** Yes.

14 **Q.** And how has it been updated?

15 **A.** How processwise?

16 **Q.** In what manner has the update manifested
17 itself?

18 MR. BUTLER: Do you mean by that the process
19 that was gone through to update it?

20 MR. REHWINKEL: Well, let's do that first.

21 **A.** Okay. Each month we do a forecast of our
22 expected results for the year. As we roll through the
23 year, we do that. And so the most recent one we have is
24 from June, and we have a new forecast of what we expect
25 2012's surplus amortization requirement to be.

1 **Q.** And in what form does that forecast exist now?

2 MR. BUTLER: You mean what documentation is
3 there of it?

4 MR. REHWINKEL: Yes, sir.

5 **A.** We report it to management in our monthly
6 management, operating, and performance review session.
7 It's on a page in a book.

8 **Q.** Can you tell me what the amount is?

9 **A.** 506 million.

10 **Q.** So that would be compared to the 526?

11 **A.** Yes.

12 **Q.** Okay. The document I asked you about, is it
13 related to that forecast? And I mean interrogatory
14 number 434, supplemental response.

15 **A.** Yes and no. The "no" part is because the
16 number I just gave you is a 12 months ended December of
17 2012 projection. To the extent there's the same actual
18 information in this interrogatory response as is
19 reflected there, which I think is through June, then
20 there would be consistent information. But one is a
21 forecast and one is a comparison of actual.

22 **Q.** Okay. And as a part of your testimony, I
23 think you described -- in your direct testimony, you
24 described your -- on page 3 of your direct, lines 10
25 through 12, you described your duties and

1 responsibilities as Vice President of Finance.

2 **A.** Correct.

3 **Q.** And the results that you described, the
4 updated forecast of 506 million, is that something that
5 would have been developed in your shop, so to speak?

6 **A.** Yes.

7 **Q.** Okay. What about -- I think Kim Ousdahl
8 signed the interrogatory supplemental 434, but the
9 information that is contained in 434, was that also
10 produced by your shop?

11 **A.** I believe that 434 is -- hang on a second.
12 Let me just scroll down a little bit. I'm looking at it
13 online, so pardon me.

14 **Q.** No problem.

15 **A.** Yes. This contains information through June
16 of this year, I believe; correct?

17 **Q.** Yes.

18 **A.** That would be the actual books and records of
19 the company. I don't produce that, other than the fact
20 that accounting reports to me. But Kim Ousdahl is the
21 witness that would be attesting to these numbers.

22 MR. BUTLER: These being the actuals?

23 THE WITNESS: The actuals, yes.

24 BY MR. REHWINKEL:

25 **Q.** Let's just talk about 434 for a second, if I

1 can just ask you. There are numbers in here that are
2 actual that show that the variance -- well, tell me what
3 the \$13.261 million that's contained at the table on 434
4 supplemental represents, if you can.

5 **A.** \$13.2 million is the difference in the surplus
6 amortization that has been recorded from July of '11
7 through June of '12 in actual versus what was in the
8 rate case forecast.

9 **Q.** Okay. So the numbers in here that went actual
10 since the time that you forecasted 2012, those would be
11 inputs to the forecast that yielded the \$506 million
12 number; is that fair?

13 **A.** I'm sorry. Could you repeat that?

14 **Q.** Yes, sir. At the time you filed your case and
15 prepared your filing that showed \$526 million to be
16 amortized in 2012, there were months in 2012 that were
17 not actual. They were forecasted; correct?

18 **A.** All of 2012 was forecasted.

19 **Q.** Okay. So in that time frame, six months of
20 2012 have become actual, so those are known facts to the
21 company; right?

22 **A.** Correct.

23 **Q.** Okay. Is the knowledge of those actuals
24 through 2012 part of what made up the revision to the
25 forecast that yielded the 506 million that you have now

1 presented to management?

2 **A.** Yes, and if I could explain.

3 **Q.** Please.

4 **A.** The 506 is an annual number, and it's
5 comprised of, obviously, a 13-month average rate base
6 and a 12 months ended NOI for 2012.

7 I want to point out that the surplus numbers
8 that you're seeing on this interrogatory response, as is
9 explained in the response, is influenced by more than
10 just that month's activity, because each time we
11 determine how much surplus to book in a given month,
12 it's based on a trailing 12-month view. So I will say
13 that my 506 -- I think this is where you want to go.
14 The 506 includes actuals through June.

15 **Q.** Okay. Now, if the -- is it the company's
16 intention that there not be -- well, let me strike that
17 and start over again.

18 If you end up in 2012 at \$506 million of
19 depreciation amortization surplus, would the company
20 consider it to be appropriate or inappropriate to
21 increase the amortization that's included in the filing
22 for 2013 by \$20 million?

23 **A.** Well, if I could -- let me revisit your
24 question, because I think your question was if we end up
25 the year at 506.

1 **Q.** Yes.

2 **A.** We're not going to know where we end up the
3 year at the time that we are going through the hearings
4 next week or two weeks from now and the Commission is
5 making a decision. So I don't know if that's what you
6 meant when you said "if we end the year at 506," so if
7 you could clarify that.

8 **Q.** Okay. That's a fair point. You won't know
9 how the year is going to end up until after the hearing.

10 **A.** Yes. We actually won't know until we do a
11 surveillance report that includes December actuals,
12 which would be early February of 2013.

13 **Q.** Okay. Is there a difference in the quality of
14 the forecast that yields the 506 from the one that
15 yielded the 526 that is included in the filing?

16 **A.** I guess I would answer that a couple of ways.
17 One is that they're within 1 percent of each other. I
18 will admit that the 506 includes six months of actual.
19 That doesn't necessarily mean that the year-to-date
20 variance would be expected to be there at year-end.
21 There could be the timing of things that have happened
22 in expenses. There could be weather effects that impact
23 us over the balance of the year. So I don't believe the
24 526 is a reasonable estimate for the year, despite the
25 fact that my current best view is 506.

1 **Q.** Okay. Is there anything qualitatively with
2 respect to the process that yielded the 506 that is
3 inferior to the process that yielded the 526? And when
4 I say process, I mean the forecasting process.

5 **A.** The only thing that's really different -- and
6 I'm sorry to pause so long. The process that yielded
7 the 526 is a complete budget review process. Each month
8 we go through a re-estimating process for the balance of
9 year that, you know, is our best guess at that point in
10 time, our best forecast, but it doesn't necessarily have
11 the same rigor around it that an annual planning process
12 would result in.

13 **Q.** But nevertheless, this is the number you
14 presented to management for their use?

15 **A.** Right. As we are reviewing the operations of
16 the company, it's my best view today. I will say that
17 there's probably -- well, again, I don't look at -- I
18 know that 506 and 526 are different by 20. Again,
19 that's within 1 percent, so I think that's pretty good
20 from a forecasting perspective. And the 506 could
21 bounce around throughout the remainder of the year based
22 on variables that we have influence over, and some that
23 we don't, such as weather.

24 **Q.** On line 12 of page 12 --

25 **A.** Are we in direct or rebuttal?

1 **Q.** I apologize. We can put the direct aside and
2 go back to rebuttal.

3 MR. BUTLER: Charles, are you leaving your
4 discussion of interrogatory 434?

5 MR. REHWINKEL: Yes, I am.

6 MR. BUTLER: Before you do, I want to point
7 out that we don't believe that is a supplemental
8 response. We think it is the response. It is
9 supplementing an earlier question that was asked at
10 a point where we didn't have as much actual data.
11 The update is to the 434 response, not a supplement
12 to 434.

13 MR. REHWINKEL: I apologize. I was just
14 looking at the word "supplemental" in the first
15 line, and that's my mistake. Thank you for the
16 clarification.

17 MR. BUTLER: Certainly.

18 BY MR. REHWINKEL:

19 **Q.** On page 12 of your rebuttal, line 12, you use
20 the term "reasonable." Do you see that?

21 **A.** I do.

22 **Q.** What is the range in criteria for the use of
23 that term as it applies to your claim in your testimony
24 that the projected amortization level is still
25 reasonable?

1 **A.** Well, I don't have a specific objective
2 criterion. When I looked at this particular variance,
3 seeing that we were about 1 percent off of the original
4 projection, I thought that to be pretty reasonable.

5 **Q.** Okay. At the time you filed your testimony --
6 I think it was on July 31st, is that right, your
7 rebuttal?

8 **A.** I don't have it. Yes, July 31st.

9 **Q.** Okay. Had you developed the \$506 million
10 forecast that we just talked about?

11 **A.** Let me get my dates together. Hang on.

12 Yes. That would have been our June review, so
13 that would have been -- yes, it would have been done in
14 early to mid July.

15 **Q.** Okay. So is this review done monthly?

16 **A.** Yes.

17 **Q.** When will the July review be done?

18 **A.** Actually, the July review won't be done
19 because we'll be in hearings. We've put off the July
20 review of FPL's operations because it actually falls
21 during the week that we'll be in Tallahassee.

22 **Q.** Okay. Are you preparing -- whether you do the
23 review or not -- are you just not doing the
24 documentation either?

25 **A.** We will be preparing the documentation.

1 **Q.** When will that documentation be done?

2 **A.** Hang on. If I could do some quick math here.
3 Based on my calculations of when I think the
4 material is going to go out, it's mid next week.

5 **Q.** Okay. Is the forecast -- do you have any
6 preliminary estimates of where this forecast of the
7 surplus utilization or amortization in 2012 stands?

8 **A.** No, I don't. It's part of a process we go
9 through after we've closed the books and begun our
10 review of all the variances and all of that. So
11 literally, our forecast gets done about the day that the
12 book goes out, which, as I said, will be about mid next
13 week.

14 **Q.** Okay. Fair enough.

15 Just so I understand the nature of your
16 rebuttal testimony, in the Q and A that starts on page
17 12, lines 3 through 19, you reference the rebuttal
18 testimony of FPL witnesses Slattery and Hardy. Do you
19 see that on line 13?

20 **A.** I do.

21 **Q.** And you're referencing their rebuttal of the
22 actual accounting adjustments proposed by OPC witness
23 Schultz; is that fair?

24 **A.** Yes. I believe he makes some adjustments to
25 2013, and they address those specifically, so I'm

1 referring to their rebuttal of his positions, because he
2 then just extrapolates those back to 2012.

3 **Q.** Correct. So are you making a substantive
4 rebuttal to Mr. Schultz's adjustments to 2013 as
5 extrapolated into 2012, or are you merely referring the
6 reader to Slattery and Hardy's rebuttal?

7 **A.** I guess the approach I took was -- his
8 objection to our forecast was the same for both years,
9 and they were the appropriate witnesses to rebut it in
10 2013. So my approach was, if his reasoning was not
11 appropriate, if his logic was faulty, then that would
12 carry back into 2012 as well. So I was kind of hinging
13 off of that rather than rebutting 2012 specifically,
14 because I think, you know, he didn't develop 2012 kind
15 of bottoms-up. He started with his observations of '13
16 and then by inference said those same things apply to
17 2012. That's why I took the approach I did in my
18 rebuttal.

19 **Q.** To the extent the Commission were to agree
20 with some or all of the adjustments recommended by
21 Mr. Schultz related to employee complement, tree
22 trimming, pole inspection, et cetera, do you agree that
23 it would be appropriate to reduce the 2012 amortization
24 by the corresponding dollar amount that related to 2012?

25 **A.** I don't necessarily agree with that. I think

1 that we have to look at 2012 kind of holistically and
2 not look at, you know, an item here, an item there. And
3 I still believe that the 2012 forecast is reasonable and
4 reflective of the costs that we're going to incur.

5 So I guess if the Commission were to decide
6 that they didn't believe that, I would still believe
7 that we're still going to spend those dollars, and we're
8 still going to amortize that amount of surplus in 2012,
9 and it would be not be available for 2013. So I would
10 respectfully disagree with the Commission's decision
11 about 2013, but I believe that I have a good sense of
12 what we will probably spend in 2012.

13 **Q.** Okay. Turning to page 13 and back to the
14 statements in your testimony that go from lines 2 to 9,
15 are you opposed to a true-up of the actual difference
16 between the 894 million and the actual amortization?

17 **A.** Would you explain how that would work?

18 **Q.** Well, outside of the rate case.

19 **A.** I'm still not following you. Can you give me
20 a hypothetical?

21 **Q.** Well, let's take that 74 million. Are you
22 opposed to -- let me start again. Let's take that
23 74 million in my hypothetical. Do you recall that, the
24 265 minus 191?

25 **A.** Yes.

1 **Q.** Okay. If that was the actual difference
2 between what you projected to use and what you actually
3 used, would it be inappropriate for the Commission to
4 make a true-up in 2013 or 2014 based on actual
5 amortization of the depreciation surplus?

6 MR. BUTLER: Charles, just for clarification,
7 are you proposing that it would work whichever
8 direction the difference turned out to be?

9 MR. REHWINKEL: Yes, a credit or a surcharge.

10 **A.** Just to make sure I'm crystal clear before I
11 give a preference here, you're suggesting that when we
12 get through the end of 2012, we end up having 265 left
13 over?

14 **Q.** Yes.

15 **A.** And you're asking would I believe it's
16 appropriate for us to amortize 265 and have an
17 adjustment to our already-determined rates to bring them
18 down that 74 to match that additional amortization?

19 **Q.** Yes. It's just a question. It's not a
20 suggestion that it be done that way. I'm just exploring
21 your view on whether that should be done or not.

22 **A.** Well, the mechanics matter, and I just wanted
23 to make sure before I respond that I kind of have a view
24 of what you're thinking.

25 **Q.** You've factually stated what my question was,

1 which is, would you adjust rates another \$74 million on
2 a one-time basis beyond where the Commission set rates?

3 **A.** So I guess my response to that would be, 191
4 is already a pretty big number, and to increase it to
5 265 would mean that going into '14, we would have a
6 \$265 million hole rather than the \$191 million hole
7 which we're already anticipating. So I think we're kind
8 of -- no. I would suggest the Commission not do that
9 and consider it in the context of our next depreciation
10 study that. You know, 50, 70, \$100 million is not a lot
11 in the context of \$30 billion in assets that will be
12 considered in the next depreciation study.

13 So that's my long-winded way of saying I would
14 not suggest that we make a true-up to either raise or
15 lower rates. In fact, the whole purpose behind my
16 position here was to get some certainty around rates for
17 customers and the company so that we can plan and know
18 what our level of revenues are going to be. So I would
19 not propose that we do any kind of true-up. I think the
20 next depreciation study is a very fine place to do any
21 kind of truing up of all accounts, depreciation related.

22 **Q.** So it sounds to me like your answer was in the
23 context of a true-up that would be a recurring reduction
24 to rates rather than a one-time credit. Did I miss --

25 **A.** I guess I'm not sure how it would work. So

1 are you suggesting -- let's again go to your example --
2 that if we end up having 75 or \$74 million more than
3 what we projected available for 2013, that we lower
4 rates in 2013 to match a bigger credit, and then raise
5 rates by that 74 million or 265 million in 2014?

6 **Q.** I'm just exploring whether there was a
7 sensitivity on the company's part about doing it as a
8 one-time credit or reducing rates on a going-forward
9 basis.

10 **A.** I don't think that we think that would be a
11 good thing to do. Quite frankly, we think \$191 million
12 rolling off at the end of '13 is going to be a big
13 enough challenge for us.

14 **Q.** Okay. Again referring to that -- the
15 statement on page 13, lines 2 through 9, focusing on the
16 lines that begin on page -- 5 through 9, that starts
17 "This will ensure a proper matching." Do you see that?

18 **A.** Yes.

19 **Q.** Would that statement be true if the Commission
20 adopted Mr. Schultz's adjustments and reflected those
21 adjustments in the 2013 revenue requirements?

22 **A.** If the Commission -- let me walk it through,
23 and correct me if I don't understand your question. But
24 if the Commission were to make available 40 million more
25 of surplus in 2013 by virtue of making some adjustments

1 in 2012?

2 Q. Yes.

3 A. And if they ordered us to amortize 231 -- I'm
4 going to use 40 as a round number -- and reflected that
5 in rates, this statement would still be true.

6 Q. Okay.

7 A. However, it's the same situation that we just
8 discussed. The bigger we make that number, the more
9 aberrant that number appears in the context of setting
10 rates for a normal test year.

11 Q. Okay. Are you aware of circumstances in the
12 past where FPL agreed to amortize as a credit to income
13 excess reserve or surplus reserve amounts?

14 A. As part of settlement agreements, yes.

15 Q. Do you think that was fair when you did that?

16 A. I think that -- again, I wasn't part of the
17 settlement agreement, so I don't view my opinion as of
18 -- you know, my position today. It was in the context
19 of an overall settlement agreement that was deemed to be
20 fair to both company and customers. It was one
21 component of an overall agreement.

22 Q. Okay. That's fair.

23 Do you believe the Commission was wrong when
24 it ordered FPL to amortize the \$894 million of excess
25 reserve?

1 **A.** "Wrong" is a strong word, because the
2 Commission has a lot of latitude as to what they decide
3 they feel is in the customers' best interests. I don't
4 feel it's prudent to have amortized that much over such
5 a short period of time, but I understand the pressures
6 that they were under to try to hold rates down. But it
7 did diverge a bit from, you know, what we had seen in
8 the past.

9 MR. REHWINKEL: Okay. Mr. Barrett, I
10 appreciate your time today. Those are all the
11 questions I have. Thank you for your answers.

12 THE WITNESS: Thank you.

13 MR. REHWINKEL: Does anyone else want to ask
14 questions?

15 MR. MOYLE: FIPUG has some.

16 MR. REHWINKEL: Okay.

17 THE WITNESS: Mr. Moyle, if you could get a
18 little closer to your speaker.

19 MR. MOYLE: How's this?

20 THE WITNESS: A little bit better.

21 MR. BUTLER: It's only okay, Jon. If you can
22 either get closer or turn up your volume, it would
23 help. There's a pretty big difference from the
24 level we were hearing Charles at.

25 MR. MOYLE: Okay. Let's go off the record for

1 a minute.

2 (Discussion off the record.)

3 CROSS-EXAMINATION

4 BY MR. MOYLE:

5 Q. Mr. Barrett, good afternoon. Jon Moyle on
6 behalf of FIPUG. I have some questions for you about
7 your direct. And I think the easiest way to do it would
8 be just to walk through your direct testimony.

9 A. Okay.

10 Q. Certain portions. You have that in front of
11 you; correct?

12 A. I do.

13 Q. Okay. On page 9, line 6, you indicate you
14 have overall responsibility for a number of things,
15 including the capital expenditure budget.

16 A. Yes.

17 Q. Okay. Can you just -- again, you can either
18 refer me to a document or give me your understanding.
19 But with respect to the capital expenditure budget for
20 Florida Power & Light, how far out into the future do
21 you project those?

22 A. Five years. I should say it's a one-year
23 budget and a four-year forecast.

24 Q. So with respect to what is currently being
25 forecast, what is the amount of CAPEX spend in your

1 current forecast, your current five-year forecast?

2 MR. BUTLER: For all five years, is that what
3 you're asking, Jon?

4 MR. MOYLE: Yes.

5 THE WITNESS: Let me see if I have that real
6 handy here.

7 I don't think I have the whole five years.

8 MR. BUTLER: Hey, Jon, it doesn't look like we
9 have that readily accessible. If you've got some
10 place you're thinking it is and can point us to it,
11 I'm certainly happy to have Mr. Barrett look at it.
12 But in terms of the MFRs and the discovery
13 responses we've got here at hand, I don't think
14 we've got --

15 THE WITNESS: I know it's in the 10-K, but I
16 don't have that with me right here.

17 BY MR. MOYLE:

18 Q. Well, do you know what the one-year forecast
19 is?

20 A. I believe for this year it's about 4 billion.

21 Q. Four billion?

22 A. For 2012. Hang on one second.

23 3.7 billion.

24 Q. Yesterday in a deposition, Mr. Avera used a
25 \$9 billion number as a CAPEX spend. Does that sound

1 right to you?

2 **A.** That was over a three-year period. I believe
3 that was probably '10, '11, and '12.

4 **Q.** I think it was not clear. I'll tell you what.
5 Not to hold you to it, I'll look in the 10-K, but can
6 you give me a ballpark as to what you think the
7 five-year CAPEX spend is?

8 **A.** If you can -- can one of y'all pull it up?
9 We're going to try to pull it up here,
10 Mr. Moyle.

11 **Q.** Thank you. And do you know, have you produced
12 it in any discovery to date or filed it as part of the
13 MFRs?

14 **A.** I don't know that it has been produced,
15 because that goes out beyond the test year.

16 MR. BUTLER: This would have been the 10-K
17 available at point where -- (inaudible).

18 MR. REHWINKEL: John and Jon, the court
19 reporter is having a hard time with the dialogue.
20 Do you want to go off the record and get it sorted
21 and then get it back on?

22 MR. MOYLE: Yes. I think for purposes of a
23 clean record, let's just take it back to the point
24 where I asked him, you know, can you tell me what
25 the five-year CAPEX spend is. I know we've had a

1 lot of back-and-forth as to where it it, but it
2 sounds like it can be located. I just want it on
3 the record. So if the witness -- John Butler, if
4 you're comfortable, if he comes back on and says
5 it's X based on Y, then I'm good.

6 MR. BUTLER: That's fine. I think that's a
7 good solution, Jon.

8 THE WITNESS: Can we have just a moment for me
9 to -- I'm sorry. I'm frantically flipping through
10 the 10-K. I don't have --

11 MR. MOYLE: That's fine. Take your time.

12 MR. REHWINKEL: Let's go off the record. John
13 Butler, when you all are ready, come back on.

14 (Recess from 4:00 p.m. to 4:02 p.m.)

15 BY MR. MOYLE:

16 Q. The pending question related to the capital
17 expenditure program for Florida Power & Light, and,
18 Mr. Barrett, I had asked you if you knew what the
19 five-year capital expenditure program for Florida Power
20 & Light currently was. Do you have that information?

21 A. I do. Based upon our 10-K filing for 2011,
22 the forecast for '12 through '16 is a total of
23 10.7 billion.

24 Q. That's for --

25 A. 2012 through 2016.

1 **Q.** What is the amount sought in the test year?

2 **A.** 2.3 billion. And again, it's not being
3 sought, quote, as CAPEX. It's either as CWIP, you know,
4 in rate base, or as plant in service that closes to rate
5 base, et cetera. So giving you the CAPEX number is just
6 one piece of information.

7 **Q.** Okay. Is it fair to say that the average is
8 approximately 2 billion per year on a five-year?

9 **A.** I would -- it depends which five years you
10 take. If you go the '12 through '16, it's a little over
11 2 billion, 2.2 billion.

12 **Q.** Average per year?

13 **A.** Right. Now, I will say that in the table that
14 was here in the 2011 10-K, we did not include any
15 expenditures for the Port Everglades plant because we
16 hadn't gotten all the approvals yet, so that would be
17 out there in '15 and '16 and is not reflected here. But
18 this is what we published in the 10-K.

19 **Q.** Thank you. On page 10, you're asked about the
20 process to develop the forecast underlying the filing,
21 and you reference a longstanding process that you go
22 through and that ultimately is reviewed by a, quote,
23 unquote, Review Committee.

24 **A.** Yes.

25 **Q.** Were there any changes to the longstanding

1 process that took place between the last rate case and
2 this rate case?

3 **A.** No.

4 **Q.** Okay. And that longstanding process, is that
5 written down somewhere?

6 **A.** I believe as part of my testimony, one of the
7 exhibits is the budget guidelines, and I think it's
8 Exhibit 2. We set out, kind of lay out how we expect
9 that process to be followed and when the meetings would
10 be. It sort of details out that process.

11 **Q.** So when you about reference the longstanding
12 process, you're referencing what's set forth on Exhibit
13 2, the capital budgeting and the five-year capital
14 forecast, REB-2; is that right?

15 **A.** Yes.

16 **Q.** And the Review Committee, who is on the Review
17 Committee?

18 **A.** It is me. It is the budget director, the
19 Director of Corporate Budget. Actually, I think that's
20 in my testimony on page 9. The FPL president.

21 **Q.** Are you referring to something?

22 **A.** I'm sorry. If you go to page 9 of my
23 testimony, the prior page, starting on line 8.

24 **Q.** Okay. Are there any others besides these
25 people that you've identified?

1 **A.** Others would participate, but this is the
2 actual committee. Again, the business unit heads would
3 come in and present, but they're presenting to this
4 committee.

5 **Q.** Okay. And are minutes kept of these meetings?

6 **A.** Not formal minutes, no. It's more of a
7 working session.

8 **Q.** And decisions that are made by the committee,
9 how are those captured?

10 **A.** Ultimately we present the recommendations to
11 the board of directors in December for the O&M and
12 capital levels that we would seek approval for.

13 **Q.** And has this Review Committee been in place
14 for a long period of time? Was it recently formed?
15 Tell me about that as far as you know.

16 **A.** I can only speak to the five years I've been
17 in this job, and it's been in place since then, and
18 probably before that.

19 **Q.** You were asked some questions by counsel for
20 Public Counsel about weather and normal weather and
21 extreme weather. Have you at this point made a
22 determination as to the type of weather that you've
23 experienced this summer?

24 **A.** I would probably need to refer you to
25 Dr. Morley on that. I believe it's been fairly normal

1 based on the kilowatt-hour sales and what we attribute
2 to weather. Fairly normal. I don't have the exact
3 numbers in front of me.

4 **Q.** And with respect to -- is there an industry
5 standard as to how extreme weather is defined and how
6 normal weather is defined?

7 **A.** I think that Dr. Morley is the best one to
8 answer that. We selected 30 years. I think that's
9 consistent with NOAA and -- I'm sorry. Twenty years as
10 the definition of normal weather, and that's again
11 consistent with others that use a weather forecasting
12 process. But you're going to find different definitions
13 at different places. We've used 20 years for a long
14 time here, and it seems to have worked well. There's
15 random variation around it to suggest that it's a good
16 measure. But again, I'm not the expert on weather.
17 That's a question for Dr. Morley.

18 **Q.** All right. On page 19 of your testimony, you
19 are discussing financial information, and toward the end
20 of the page, you talk about the rate settlement, and
21 then you say that the revenue requirements associated
22 with allowing FPL an opportunity to earn an appropriate
23 equity return is 80 million. How did you calculate the
24 80 million? Is that the difference between an 11.0
25 return on equity and an 11.5 return on equity?

1 **A.** Yes.

2 **Q.** So it follows then that every percentage point
3 or 100 basis points represents approximately 160 million
4 in revenue requirement?

5 **A.** I believe it's actually 158-something. Yes,
6 roughly 160.

7 **Q.** Okay. And you have some testimony about
8 inflation and the inflation rate that was used.

9 MR. BUTLER: Where is that, Jon?

10 MR. MOYLE: Starting on page 21.

11 MR. BUTLER: Okay.

12 BY MR. MOYLE:

13 **Q.** How did it come to be -- well, you used the
14 CPI for most all costs; is that right?

15 **A.** Yes.

16 **Q.** But then for medical and dental, you've opted
17 not to use the CPI?

18 **A.** Yes. And let me explain that if I can. First
19 of all, this whole analysis that I refer to as the
20 drivers analysis is meant to be relied upon as
21 reasonable, but more illustrative of the kinds of
22 categories of cost drivers that we've experienced in
23 this case since 2010. So I thought it was reasonable to
24 use CPI for the vast majority of the costs that we face,
25 although we know that medical has outpaced CPI quite a

1 bit. So for that one category of costs, I used the
2 medical trend. I believe it was around 8 percent.

3 Q. And how did you determine that medical and
4 dental had outpaced the CPI? Is there a chart you look
5 to, or some piece of paper that says, "Wow, look,
6 medical has gone a lot higher than the CPI"?

7 A. Based upon the assumptions presented in the
8 whole budget process, the folks that forecast the
9 medical costs would suggest that in the industry --
10 actually, in South Florida, medical costs have trended
11 at about 8 percent a year. Now, that's not necessarily
12 the costs that we have occurred. And to the extent that
13 we've been able to manage costs through good plan design
14 and cost shifting towards employees, et cetera, to the
15 extent we have come in less than that, I attribute that
16 to productivity improvement. We have found ways to do
17 better than what an average level of performance would
18 indicate based on general inflation.

19 Q. Were there -- I assume medical and dental were
20 significant costs in your cost structure.

21 A. They're not insignificant.

22 Q. Were there insignificant, to use that term --
23 well, were there significant other costs that may have
24 escalated at a lower rate than CPI?

25 A. None that come to mind. And again, this was

1 done for kind of an overview, for illustrative purposes,
2 and I thought the CPI was reasonable. There are
3 probably some of our costs that grow at less than CPI
4 and some that may grow at more than CPI. I didn't
5 attempt to get real granular on this particular
6 analysis. I was trying to show the overall level and a
7 reasonable attribution of the cost drivers to inflation.

8 **Q.** And do you know, out of the 7.2 percent that
9 you reference up on line 16 of your testimony, how much
10 of that can be attributed to dental and medical that
11 have escalated above CPI?

12 **A.** Again, I think the long-term trend for medical
13 has been around 8 percent. The 7.2 is just CPI. It was
14 7.2 for everything except medical and dental. The
15 medical and dental aren't part of the 7.2. The 7.2 is
16 just a compounding of CPI for '10, '11, '12, and '13.

17 **Q.** I may be confused. The number that you're
18 using with respect to your rate case, is it the CPI, or
19 is it the CPI plus you've added some costs and some
20 projections for medical and dental that are above CPI?

21 **A.** Well, let's be clear. In our rate case
22 filing, we are forecasting expenses for various things
23 based upon kind of a bottoms-up view from the business
24 units responsible for implementing the work.

25 This is just merely an analysis to try to

1 carve up the need for new revenues into various cost
2 drivers. I'm the one that attributed a 7.2 inflation
3 rate to everything except medical, not doing any more
4 work than that to try to understand which costs have
5 gone up faster and which have gotten up slower. So it's
6 really just an analytical approach to try to suggest a
7 reasonable amount of inflation that the company has
8 endured.

9 **Q.** So up on the top of the page, you have 162
10 million?

11 **A.** Yes.

12 **Q.** For inflation. Is there a back-up document
13 that essentially shows how you got to that number?

14 **A.** Yes. We actually filed that in discovery. I
15 don't remember the actual -- we actually filed a model
16 that I used to come up with this. It's basically the
17 inflation on our O&M from 2010 forward, and then also
18 the revenue requirement impact of the inflation on our
19 capital expenditures. So there's a backup document.
20 Actually, the whole model is there for your
21 investigation as to how I came up with the 162 2.

22 **Q.** Is this a proprietary model that a third party
23 developed, or is this a Mr. Barrett model?

24 **A.** It's a Mr. Barrett model, with some help from
25 my friends.

1 **Q.** Do you know what the inflation factor is for
2 the test year? You've given us a three-year -- if I
3 understand your testimony, the 7.2 represents a
4 cumulative number; is that right?

5 **A.** Yes, that's right. I believe in my REB-4
6 where I have all the assumptions -- I believe it is
7 there. Let me see if I can find it real quick.

8 Okay. For 2013, I believe it's 2 percent.

9 **Q.** So back on the 162 number, did you take
10 2 percent and apply it, plus the medical and dental, to
11 an expenditure figure for the test year?

12 **A.** What I did what, I said, "If I look at 2010
13 for each of the categories of cost, what would the
14 inflation impact be of just growing that level of cost?"
15 If, for instance, I had \$100 of costs for a certain
16 activity, applying a 7.2 compound inflation rate would
17 suggest 7.2 million, or in this case, 7.2 dollars
18 attributable to the cost of inflation. To do that same
19 activity from 2010 and 2013 would cost me 7.2 dollars
20 more. It's kind of as simple as that.

21 **Q.** So why did you use 2010?

22 **A.** I was trying to show how our need for new
23 revenues has grown since the time that base rates were
24 last set, which was 2010. So using the approved level
25 of expenditures in 2010, I said, "If you grow that

1 forward, that's what you would normally expect there to
2 be in terms of cost inflation on the company."

3 Q. So if I'm understanding, in effect, that
4 7.2 percent number is the number that you used, and you
5 multiplied the 7.2 percent against a CAPEX number and
6 some other things to get to your 162; is that right?

7 A. It was as simple as that for the O&M items.
8 Capital is a little more complicated. Basically, I took
9 the capital from each of the years, '10, '11, '12, and
10 '13, pulled out the implied inflation from them, in
11 other words, kind of brought it back to 2010, and said,
12 "Okay. How much of that CAPEX is related to inflation,
13 and what does that mean in terms of capital revenue
14 requirements?" So it's converting it into a capital
15 revenue requirement. So it's a little more complicated
16 with capital than it is with O&M, but it's the same
17 thought process.

18 Q. Okay. I'm just trying to understand the
19 rationale. To the extent you haven't filed a rate case
20 and you stayed out for ten years, your analysis would
21 look at inflation, and you would do a CPI type inflation
22 analysis for the gap period of time from your last rate
23 case to your current rate case and then seek to recover
24 those dollars under an inflation category; is that
25 right?

1 **A.** Two points there. One is, it's a methodology
2 that's kind of -- it's consistent with the Commission's
3 benchmark methodology, which looks at customer growth
4 and inflation for most things.

5 But, no, we're not -- the intent here is not
6 to say we're seeking recovery of \$162 million worth of
7 inflation. We're seeking recovery of the revenue
8 requirements we filed in this case. What I'm trying to
9 show here is, what are the drivers of those costs. For
10 instance, you know, we have done some things to not
11 allow our costs to go up that much, and those are the
12 kind of things that fall into productivity improvements,
13 such that we don't need to ask for the whole 162 in this
14 case. What we have filed is lower than the sum of all
15 these drivers because of productivity improvements that
16 we have implemented and revenue growth.

17 **Q.** But you see how somebody like FIPUG might make
18 an argument based on our conversation and your testimony
19 that the inflation number, by going back and
20 cumulatively adding a inflation number of 2 percent,
21 give or take, for 2010, 2011, and 2012 is arguably
22 capturing inflation that has already occurred and is not
23 prospective?

24 **A.** I guess what I would argue is that our rates
25 were set based on 2010 costs. We are currently

1 experiencing 2013 costs. They are different by
2 7.2 percent, in my estimation. So our current rates are
3 insufficient to recover the level of costs that we are
4 experiencing today, because they were set three years
5 ago.

6 **Q.** Okay. Well, I appreciate that.

7 Let me ask you to clarify, for me anyway, a
8 conversation that you were having with counsel for
9 Public Counsel related to depreciation. For my
10 thinking, it was easier just to reference your testimony
11 found on page 26 starting at line 22. And this is on
12 the accelerated depreciation amortization.

13 **A.** Yes.

14 **Q.** And it flows over to page 27.

15 **A.** Yes.

16 **Q.** So if I understood the import of the
17 discussion you had with Public Counsel, in essence, it
18 was that your current estimate, your current best number
19 with respect to the number found on page 26, line 23, in
20 parentheses, 191 million -- I think you even said it's
21 205.

22 **A.** That's two different years. 191 is the 2013
23 estimate. The 206 was the -- I'm sorry. That was 506
24 for 2012. I don't know where the 206 number came from.

25 **Q.** I'm sorry. 205.

1 **A.** I'm not remembering a 205 number.

2 **Q.** I'm sorry. The net effect of the discussion
3 related to the amount of depreciation. I guess it was
4 506 and 526; is that right?

5 **A.** Yes. That's for 2012.

6 **Q.** So that's a \$20 million number. Does that
7 change your testimony in any way based on the testimony
8 you've laid out on page 26 and 27?

9 **A.** No. I still think 526 is a reasonable
10 estimate. Given the uncertainty over the next six
11 months, it's certainly within the realm of
12 reasonableness, and it's within 1 percent of our latest
13 forecast.

14 **Q.** If you assumed 506 rather than 526, what would
15 that assumption do to the number found on line 3, where
16 it says it increases the 2013 revenue requirements by
17 33 million?

18 **A.** I'm sorry. Line 3 of --

19 MR. BUTLER: He's looking at page 27.

20 THE WITNESS: Okay. I want to get oriented to
21 that.

22 First of all, let's keep in mind that the
23 20 million is related to 2012, so in and of itself,
24 it doesn't have any impact on the 191. That would
25 be my testimony, and that would be my

1 recommendation, that it would just change what's
2 left over at the end of 2013. If that's the case,
3 then it does nothing to the 33.

4 BY MR. MOYLE:

5 **Q.** It doesn't have an impact if you have
6 additional depreciation that you can carry forward to
7 impact that number?

8 **A.** Again, I'm not suggesting that the 191 change,
9 so I would just -- under my way of thinking, we would
10 have 20 million left over at the end of 2013 to be dealt
11 with however -- you know, in the next depreciation
12 study.

13 **Q.** Through the back of your testimony, you have
14 some testimony about Cape Canaveral and the step
15 increase.

16 **A.** Yes, sir.

17 **Q.** And I wanted to ask you -- on page 32, line
18 10, lines 10 through 17, I read that to, in effect, to
19 say, "Here's what would happen if Canaveral were treated
20 in the ordinary course of business." Is that fair?

21 **A.** Let me just rephrase that. I think it's how
22 Canaveral would be treated if we just looked at the 2013
23 revenue requirements for Canaveral in 2013.

24 **Q.** But isn't it true typically in the ratemaking
25 process that when an asset comes online or becomes

1 available for a portion of a test year, that the moneys
2 recovered only relate to the period of time in which the
3 asset was available and serving customers?

4 **A.** I don't think that that's true just *a priori*.
5 Particularly in the case of large generating units,
6 there's precedent for giving a step increase to recover
7 the full revenue requirement of the asset when it goes
8 into service.

9 So I wouldn't say that in all cases that you
10 would just put the 2013 portion of Canaveral in. It has
11 clearly been the case in other situations where as the
12 generating unit is going in, it's totally appropriate to
13 evaluate the total cost of that unit. In fact, all the
14 evidence is in front of the Commission to evaluate the
15 full cost of Canaveral, and we think it makes a lot of
16 sense to just go ahead and deal with that now, plus the
17 fact that there will be no increase until it goes in.
18 If you're doing it the way you're suggesting, then
19 customers will be paying for something for the first
20 five months of the year that they haven't received yet.

21 **Q.** So help me understand something from the
22 standpoint of Bobwhite. You have some expenditures
23 related to the Bobwhite transmission upgrade. Are you
24 familiar with that?

25 **A.** Vaguely. I think Mr. Miranda is the witness

1 probably best able to answer questions around
2 Manatee-Bobwhite.

3 **Q.** Well, just assume a couple of facts for me,
4 that the Bobwhite substation is a new substation that's
5 coming online, and it's coming online in December of
6 2013, the last month of the test year, and assume it
7 costs \$12 million. How would that expense typically be
8 treated, if you know, in a rate case?

9 **A.** Well, I believe that it would be considered
10 part of the 13-month average rate base, and so there
11 would be basically 1/13 of it in our rate base for that
12 year for purposes of setting rates.

13 **Q.** So you would get 1/13 of \$12 million?

14 **A.** Well, I think you said 12 million was the
15 investment, so 1/13 of the revenue requirements
16 associated with \$12 million I think is the way that the
17 rates would be set.

18 **Q.** And you're not proposing that that be done in
19 the Canaveral situation; is that right?

20 **A.** Absolutely not. It's a totally different
21 situation, with it being an almost billion-dollar asset
22 that's going to immediately begin providing fuel savings
23 to customers.

24 And again, the Commission has all the
25 information in front of them to make a decision about

1 the total revenue requirements of Canaveral. We're just
2 asking that we get the appropriate lift in base rates
3 that's going to correspond to the unit coming in service
4 in June.

5 It's large enough to move the needle, so I
6 think it's totally appropriate, for a large generating
7 unit like that, to look at it in terms of trying to get
8 it right, I guess, in terms of ratemaking. If these
9 rates are going to be in effect longer than 2013, then
10 they really need to reflect the kind of going-forward
11 view from 2013. In order to do that, you've got to
12 consider all of Canaveral.

13 Otherwise, as I say in my testimony, you would
14 consign the company to not recover about 70 of the
15 \$174 million without coming back in to the Commission to
16 seek recovery of costs that have already been presented
17 here and shown to be reasonable. That's the reason for
18 the step increase.

19 **Q.** Has the Commission ever awarded a step
20 increase to Florida Power & Light such as the one being
21 sought in this case in a non-settlement context?

22 **A.** You would have to go all the way back into the
23 '80s with the St. Lucie 2 nuclear unit, which I believe
24 came online in '84, somewhere in there, early '80s. And
25 that was a unit-specific rate increase that was a

1 granted.

2 Q. So what is the distinction between the
3 Bobwhite substation and Cape Canaveral in terms of the
4 regulatory treatment?

5 A. I think one of the distinctions is that it's a
6 large unit that has been already in front of this
7 Commission and approved. It's a large revenue
8 requirement for the company. Bobwhite-Manatee is not
9 insignificant dollars, but we would probably assume that
10 a, you know, 10 or \$12 million kind of investment is the
11 ordinary kind of investments that we make throughout a
12 year. There are going to be some that get made early in
13 the year, and there are going to be some that get made
14 late in the year. And quite frankly, the big deal here
15 is the financial impact to the company.

16 The other side of it, too, is that it is going
17 to deliver fuel savings to customers immediately when it
18 goes into service. And so it just seems appropriate,
19 particularly with -- otherwise, you're consigning the
20 company to underearn on this asset or to have to file a
21 subsequent case just to recover what can already be
22 decided now.

23 Q. So would it be fair to say that the chief
24 distinguishing factor with respect to the Cape Canaveral
25 project and some of the other expenditures you have is

1 the order of magnitude of dollars that's represented by
2 the facility?

3 **A.** I guess I would say the chief distinction is
4 kind of the administrative efficiency. It wouldn't be
5 practical to come in to the Commission and suggest base
6 rate changes every month based on how things go into
7 service. This is unique enough -- it doesn't happen
8 every month. It only happens every so often that we
9 bring in a huge unit like this with these kind of
10 revenue requirements. And so from an administrative
11 efficiency perspective, again, having all the evidence
12 in front of the Commission to make the decision, it just
13 seems the right thing for us.

14 **Q.** Do you know if the PSC has any rules related
15 to step increases and when they're appropriate and when
16 they're not appropriate?

17 **A.** I don't know.

18 **Q.** And other than St. Lucie, do you know if it
19 has ever been done before in the Florida Power & Light
20 regulatory history?

21 **A.** Well, when you go back beyond the last rate
22 case -- we haven't had a fully litigated case almost
23 back to St. Lucie, so I'm not sure we have a whole lot
24 of record, if you will, related to asking for step
25 increases. Most of the time it has been handled in the

1 case of settlements or ordinary course.

2 Q. Just a final question or two on this. Explain
3 your understanding. If the Commission were to grant
4 this, would the fuel adjustment -- I understand you're
5 suggesting there be a simultaneous fuel adjustment that
6 would be sought at the same time as the rate increase;
7 is that right?

8 A. Yes. We're proposing that the fuel factors be
9 reduced to reflect the efficiency of the unit at the
10 same time the unit goes in so that you do get kind of a
11 nice price signal. You get the offsetting fuel to the
12 increasing base that kind of mutes the impact to
13 customers.

14 Q. And is it your company's position that that
15 adjustment would be made regardless of what may
16 otherwise be happening with fuel at that point in time?

17 A. Yes. I'm not sure what else otherwise might
18 be happening with fuel, but we're proposing that the
19 fuel factors prospectively from the date of in-service
20 be reflective of the unit being online.

21 Q. So if fuel -- I guess where I'm going with
22 this is, if the fuel prices went up considerably, Cape
23 Canaveral is delinked, so to the extent that fuel prices
24 were up, you would still come in with Cape Canaveral and
25 make an adjustment relative to the fuel savings

1 associated with Cape Canaveral and put aside any other
2 things that might be going on with fuel prices above and
3 beyond the mechanism that you're proposing; is that
4 right?

5 **A.** I believe what we're proposing is that in this
6 round of fuel hearings, the filings that we're going to
7 be making in the next few weeks or months basically have
8 two factors, a pre-Canaveral factor and a Canaveral and
9 prospective factor. So it won't really kind of matter
10 what's happening with fuel out in '13, because we'll
11 have established factors, and then we'll either
12 under-recover or over-recover, depending on what happens
13 in the real world.

14 But I believe we're going to -- we're
15 proposing to right up front know what that factor is
16 going to be on the in-service date and have that
17 litigated in this round of fuel hearings.

18 MR. MOYLE: Okay. That's all I have. Thank
19 you.

20 MR. BUTLER: Okay. Hold on just one moment.
21 Let me pause to see if I have anything to ask
22 Mr. Barrett.

23 I don't think I do, so thank you both for
24 being efficient. And we would like to get a copy
25 of the deposition transcript. Electronic only is

1 fine. And we would read and sign.

2 MR. REHWINKEL: Public Counsel would like a
3 copy as well. Thank you, Mr. Barrett.

4 MR. HARRIS: Staff of the Public Service
5 Commission would like a copy, but we also are
6 satisfied with an electronic one only, please.

7 MR. REHWINKEL: Same here.

8 MS. PURDY: And the same goes for South
9 Florida Hospital and Healthcare Association. Thank
10 you.

11 MR. MOYLE: And FIPUG.

12 THE REPORTER: Okay. So you all want copies
13 of the transcript.

14 MR. BUTLER: Sounds like we all want
15 electronic ones.

16 MR. REHWINKEL: Yes. Anything else?

17 Okay. We're going to terminate the line.
18 Thank you very much.

19 (Deposition concluded at 4:38 p.m.)

Dear Mr. Butler:

Re: Docket No. 120015-EI
Petition for rate increase by FPL

Enclosed is your copy of the deposition of ROBERT E.
BARRETT, JR. taken in the above matter on August 9,
2012.

Since reading and signing was not waived, please make
arrangements with the witness to read your copy of the
transcript and make any corrections on the errata sheet
on the following page.

Please forward the completed errata sheet to Charles
Rehwinkel and copies to Jon Moyle, Lisa Purdy, and Larry
Harris.

Thank you for your cooperation in this matter.

Sincerely,

/s/ Mary A. Neel
