Information Management	UIMS.00000166.02.01	Paging Sys Replace BC - Base O&M	A01	The FCC has mandated that all non-Federal public safety radio licenses using 25 KHz radio systems must migrate to narrowband 12.5 KHz by January 1, 2013. 2012 scope is to continue replacing the paging transmitters purchased in 2011, migrate paging traffic to the new transmitters before 1/1/2013, purchase replacement pagers and deploy them to the customers.	N				This is an IM internal business case activity and has no affiliate benefit
Information Management	UIMS.00000168.02.01	Remote Access BC - O&M	A01	In 2010 Internal Auditing presented a review of FPL's AT&T VPN remote access solution and processes and stated - "the ATT VPN remote access solution and the associated processes provide adequate controls for the authentication and authorization of remote user access to our network. However, the solution does not have robust capabilities to both manage the actions of remote users while on our network and to control the access to network resources and applications. As such, the limitation of these capabilities makes it difficult for the Company to restrict remote users from accessing sensitive information and applications." In 2012 the Remote Access project that began in 2011 will be continued. In scope will be the completion of Remote Access deployment to employees and vendors; Enabling Endpoint Inspection; Expanding remote access network restriction to employees; Expanding remote access capability to selected mobile devices and additional desktop vendors. Information Management	UIMS.00000286.02.01	SAP ECC 6 Upgrd w/Unicode Conv O&M Base	A01	Apply Enhancements Pack Upgrade (EHP5) to ECC6 and Support Pack Upgrades to all systems (ECC6, SRM, 3 BW's, Portal, Pi, and MDM) to leverage new functionality. This would also involve a NetWeaver 7.3 Upgrade to ECC6, Portal, BW, and Pi driven by an ESS Upgrade as part of the ECC6 Upgrade. This would also include a Unicode Conversion. These upgrades will also bring these applications to a level to be able to support Windows 7 deployment and use throughout the enterprise.	N	X			Affiliate component billed directly
Information Management	UIMS.00000289.02.01	Income Tax Forecasting System O&M Base	A01	Implement an end-to-end "future state" process and reporting tool for income tax forecasting. This new process includes the implementation of a "tax forecasting source cube" which would collect data from various FPL & NextEra Energy Resources systems (SAP (SEM-BW, ECC), OTP TaxStream, PowerPlant/Tax, Utilities International, MS Excel) and use that data to calculate the income tax forecast. The future design would also incorporate Integrated Planning to produce reports, what-if scenarios, and an executive dashboard with drill-down capabilities. This tool will facilitate responding to Senior Management information requests to support decisions related to business strategies.	N	X			Affiliate component billed directly
Information Management	UIMS.00000290.02.01	Environmental Management Information Sys	A01	Implement an Environmental Management Information System to automate and streamline the collection and reporting of strategic environmental and sustainability data, automate and streamline the licensing and permitting process maximizing compliance, updating and streamlining environmental auditing and providing metrics to monitor and improve strategic decisions.	N	X			Affiliate component billed directly
