VIA HAND DELIVERY

Ms. Ann Cole Division of the Commission Clerk and Administrative Services Florida Public Service Commission Betty Easley Conference Center 2540 Shumard Oak Boulevard, Room 110 Tallahassee, FL 32399-0850

RE: Docket No. 130245-EI

Dear Ms. Cole:

Please find enclosed for filing an original and five copies of Florida Power & Light Company's responses to Staff's first set of data requests dated October 18, 2013.

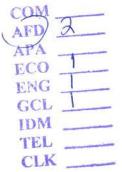

If you have any questions related to this filing please feel free to call me.

Sincerely,

R S. Jum

Bryan S. Anderson

Enclosure cc: Michael T. Lawson, Esq.

Florida Power & Light Company

Florida Power & Light Company Docket No. 130245 Staff's First Set of Data Request Interrogatory No. 1 Page 1 of 1

Q.

- In Exhibits 13, 48-50, filed in Docket No. 130009-EI, FPL provided schedules supporting \$13,825,845 in 2013 revenue requirements for incremental 2012 Extended Power Uprate plant placed into service. In this docket, FPL requested a \$19,142,379 true-up of the 2012 base rate adjustment (See paragraph 8 and Attachment D).
 - a. Please explain and reconcile the differences, if any, in FPL's filings in Docket Nos. 130009-EI and 130245-EI regarding 2012 plant in service that has not yet been included in FPL's base rates revenue requirements.
 - b. Will the approval of FPL's petition for an additional \$19,142,379 in revenue requirements during 2014 associated with incremental 2012 rate base result in double recovery during 2014?
 - 1. If no, please explain why not.
 - 2. If yes, please describe FPL's mitigation action, if any.
 - c. Will the approval of FPL's petition for an additional \$19,142,379 in revenue requirements during 2014 associated with incremental 2012 rate base result in over recovery during 2014?
 - 1. If no, please explain why not.
 - 2. If yes, please describe FPL's mitigation action, if any.

A.

Please see attachment 1.

Florida Power & Light Company Docket No. 130245 Staff's First Set of Data Requests Interrogatory No. 1, Attachment 1

Florida Power & Light Co. Response to FPSC Staff's First set of Data Requests Number 1

Question:

In Exhibits 13, 48-50, filed in Docket No. 130009-EI, FPL provided schedules supporting \$13,825,845 in 2013 revenue requirements for incremental 2012 Extended Power Uprate plant placed into service. In this docket, FPL requested a \$19,142,379 true-up of the 2102 base rate adjustment (See paragraph 8 and Attachment D).

 Please explain and reconcile the differences, if any, in FPL's filings in Docket Nos. 130009-EI and 130245-EI regarding 2012 plant in service that has not yet been included in FPL's base rate revenue requirements.

	Revenue Requirements
2012 Incremental Plant placed into Service Docket No. 130009-El	\$13,825,845
Reconciling Items	
The base rate revenue requirements included in Docket No. 130009-EI calculate the recovery of plant and a return on the unrecovered plant from the time the plant is placed into service (or the time the post in service costs are incurred) through the end of the first twelve months of commercial operation. The base rate revenue requirements included in Docket No. 130245-EI represent a full year's recovery of and return on plant assuming all the plant costs were placed into service at the beginning of the first twelve months of commercial operation. The difference in the calculation creates an approximate \$26.2 million dollars change in the Total Annualized Rate Base.	
Revenue Requirements associated with difference in calculation of Annualized Rate Base:	\$3,224,578
The revenue requirement calculated in Docket No. 130009-EI does not include amortization of Net Book Value of retirements, removal and salvage. The revenue requirement calculated in Docket No. 130245-EI includes such amortization.	
Revenue Requirements associated with the amortization of NBV of retirements, removal and salvage:	\$1,306,074
FPL used actual plant in service costs through February 2013 and projected plant in service costs for March through December 2013 to calculate the revenue requirement in Docket No. 130009-EI. For Docket No. 130245-EI, FPL used actual plant in service costs through June 2013 and revised projections for July through December 2013. This accounts for an approximately \$5.8 million difference in total company plant in service costs, of which about \$5.6 million is attributable to the Turkey Point Unit 3 outage (PTN 3-26).	
Revenue Requirements associated with difference in plant in service:	\$785,883
Total	\$19,142,379
In the process of completing the responses to Staff's discovery FPL identified the following adjustments to	
our base rates revenue requirements associated with 2012 True-Up as filed in Docket No. 130245-EI:	
2012 Base Rate Increase True-Up as filed Adjustment to include salvage inadvertently excluded	\$19,142,379 (\$5,395)

Revised 2012 True-Up Base Rate Revenue Requirements

Page 1 of 2

\$19,136,984

Florida Power & Light Company Docket No. 130245 Staff's First Set of Data Requests Interrogatory No. 1, Attachment 1

Florida Power & Light Co. Response to FPSC Staff's First set of Data Requests Number 1

> 1b. Will the approval of FPL's petition for an additional \$19,142,379 in revenue requirements during 2014 associated with incremental 2012 rate base result in double recovery during 2014?

1. If no, please explain why not.

No, the revenue requirements in Docket No. 130009-EI represent an annualized return on the 2012 Incremental Plant not included in base rates for 2013 from the time the plant is placed into service (or the time the post in service costs are incurred). The revenue requirements in Docket No. 130245-EI represent the annualized base rate recovery of the 2012 Incremental Plant beginning in January 2014 which no longer will be recovered through the NCRC.

2. If yes, please describe FPL's mitigation action, if any.

1c. Will the approval of FPL's petition for an additional \$19,142,379 in revenue requirements

during 2014 associated with incremental 2013 rate base result in over recovery during 2014? 1. If no, please explain why not.

With the exception of the adjustment identified in 1(a), FPL currently projects that the actual costs of its 2012 Extended Power Uprate plant placed into service will be equal to the estimated costs of its 2012 Extended Power Uprate plant placed into service as filed in its October 4, 2013 petition. Therefore, currently FPL does not expect the need for a subsequent true-up of the associated revenue requirements. However, in the event that there is a variance between actual and estimated 2012 plant placed into service, FPL will assess the need to true up its revenue requirements through an appropriate rate adjustment process, such as those provided by Rule 25-6.0423(7)(a) and (e), F.A.C.

2. If yes, please describe FPL's mitigation action, if any.

Page 2 of 2

Florida Power & Light Company Docket No. 130245 Staff's First Set of Data Request Interrogatory No. 2 Page 1 of 1

Q.

In Exhibits 25, 49-50, filed in Docket No. 130009-EI, FPL provided schedules supporting \$62,039,072 in 2013 revenue requirements for incremental 2013 Extended Power Uprate plant placed into service. In this docket, FPL has requested a \$94,064,105 revenue requirement for the plant placed into service during 2013. (See paragraph 8 and Attachment B).

- a. Please explain and reconcile the differences, if any, in FPL's filings in Docket Nos. 130009-EI and 130245-EI regarding 2013 plant in service that has not yet been included in FPL's base rates revenue requirements.
- b. Will the approval of FPL's petition for an additional \$94,064,105 in revenue requirements during 2014 associated with incremental 2013 rate base result in double recovery during 2014?
 - 1. If no, please explain why not.
 - 2. If yes, please describe FPL's mitigation action, if any?
- c. Will the approval of FPL's petition for an additional \$94,064,105 in revenue requirements during 2014 associated with incremental 2013 rate base result in over recovery during 2014?
 - 1. If no, please explain why not.
 - 2. If yes, please describe FPL's mitigation action, if any?

A.

Please see attachment 1.

Florida Power and Light Company Docket No 130245-El Number 2

- In Exhibits 25, 49-50, filed in Docket No. 130009-EI, FPL provided schedules supporting \$62,039,072 in 2013 revenue requirements for incremental 2013 Extended Power Uprate plant placed into service. In this docket, FPL has requested a \$94,064,105 revenue requirement for the plant placed into service during 2013. (See paragraph 8 and Attachment B).
 - a. Please explain and reconcile the differences, if any, in FPL's filings in Docket Nos. 130009-EI and 130245-EI regarding 2013 plant in service that has not yet been included in FPL's base rates revenue requirements.

FPL's filing in Docket No. 130009-EI, as revised for errata, reflected \$75,864,917 of Base Rate Revenue Requirements. Of this amount, \$13,825,845 related to 2012 incremental plant placed into service and \$177,454 relates to contractor adjustments to be collected in 2013. Therefore, the adjusted 2013 base rate revenue requirement for plant placed into service in 2013 is \$62,216,525.

Revenue Requirements for 2013 Plant Placed into Service Revised for Errata in Docket No. 130009-El \$62,216,525 The revenue requirements in Docket No. 130009-El calculate the 2013 partial year recovery and a return from the time the plant is placed into service (or the time the post in service costs are incurred) through the end 2013. The base rate revenue requirements included in Docket No. 130245-El represent the annualized 13 month average base rate recovery of and return on the

2013 plant assuming all the plant costs were placed into service at the beginning of the first 12 months of commercial operation, resulting in higher revenue requirements. Offsetting this, FPL's actual in service costs through February 2013 and projected plant in service costs from March through December 2013 in Docket No. 130009-EI, were higher than those in Docket No. 130245-EI which included actual plant in service costs through June 2013 and revised projections for July through December 2013 resulting in lower revenue requirements in the base rate increase. Lastly, the jurisdictional separation factors decreased in Docket No 130245-EI resulting in lower base rate revenue requirements.

The revenue requirement calculated in Docket No. 130009-El does not include amortization of Net Book Value of Retirements, Removal, and Salvage. The revenue requirement calculated in Docket No. 130245-El includes such amortization.

Revenue Requirements for 2013 Plant Placed into Service in Docket No. 130245-El \$94,064,105

In the process of completing its responses to Staff discovery, FPL identified the following adjustments to our base rate revenue requirements associated with 2013 as filed in Docket No. 130245-EI:

2013 Base Rate Revenue Requirements in Docket No 130245-El	\$94,064,105
Adjustment to projections	(\$107,278)
Correction to transmission jurisdictional separation factor from 0.88877421 to 0.88497613	(\$255)
Adjustment to Work Order P00000001479 for incorrect query	\$58,698
Adjustments to 2013 Base Rate Revenue Requirements	(\$48,835)
Revised 2013 Base Rate Revenue Requirements	\$94,015,270

Page 1 of 2

\$32,765,209

(\$917,630)

Florida Power & Light Company Docket No. 130245 Staff's 1st Set of Data Requests Interrogatory No. 2, Attachment 1

b. Will the approval of FPL's petition for an additional \$94,064,105 in revenue requirements during 2014 associated with incremental 2013 rate base result in double recovery during 2014?

No, the revenue requirements in Docket No. 130009-EI represent the 2013 partial year recovery and return from the time plant is placed into service in 2013 (or the time the post in service costs are incurred) through the end of 2013. FPL will true-up the 2013 Actual/Estimated revenue requirements in its' March 2014 filing to be collected in 2015. Any over or under recoveries as a result of the true-up will earn a return at the statutory rate. The revenue requirements in Docket No. 130245-EI represent the annualized 13 month average base rate recovery of the 2013 Plant placed into service beginning in January 2014 for the year 2014 and forward.

c. Will the approval of FPL's petition for an additional \$94,064,105 in revenue requirements during 2014 associated with incremental 2013 rate base result in over recovery during 2014?

With the exception of the adjustments identified in 2(a), FPL currently projects that the actual costs of its 2013 Extended Power Uprate plant placed into service will be equal to the estimated costs of its 2013 Extended Power Uprate plant placed into service as filed in its October 4, 2013 petition. Therefore, currently FPL does not expect the need for a subsequent true-up of the associated revenue requirements in its' petition. However, in the event that there is a variance between actual and estimated 2013 plant placed into service, FPL will assess the need to true up its revenue requirements through an appropriate rate adjustment process, such as those provided by Rule 25-6.0423(7)(a) and (e), F.A.C.

Q.

With respect to any equipment (assets) retired in 2013 as a result of the 2013 Extended Power Uprate plant placed into service, please provide a description and the dollar amounts related to these 2013 retirements, if any.

A.

Please see attachment 1.

Question 3:

With respect to any equipment (assets) retired in 2013 as a result of the 2013 Extended Power Uprate plant placed into service, please provide a description and the dollar amounts related to these 2013 retirements, if any.

Note:

FPL has trued-up the EPU project net book value of the retirements and cost of removal to the capital recovery schedule from Docket No. 080677-EL As a result, the total 2013 net book value of retirements, cost of removal and salvage (jurisdictional, net of participants) reflects a net refund to customers of (\$3,961,275) amortized over five years or (\$792,346) each year as shown in Docket No. 130245-El Attachment B, page 3 of 54.

Florida Power & Light Company Docket No. 130245 Staff's First Set of Data Request Interrogatory No. 4 Page 1 of 1

Q.

Provide an explanation describing how the retirement of these assets identified above is directly related to the 2013 Extended Power Uprate plant placed into service.

A.

Each of the assets retired as identified in Question 3 was a direct result of newly installed 2013 EPU plant being placed into service. Specifically, each of the following EPU work orders placed into service in 2013 directly resulted in retired assets and related components due to the replacement of Retirement Units:

- 1. Transmission Turkey Point String Bus Spacers
- 2. Nuclear St. Lucie Simulator Phase III
- 3. Nuclear Turkey Point Extended Power Uprate Unit 4 Cycle 27
- 4. Nuclear Turkey Point Unit 4 Cycle 27 Turbine Valve
- 5. Nuclear St. Lucie Fabric Building B and F Restoration.

Many of the asset retirements were caused by the work performed pursuant to the Nuclear -Turkey Point Extended Power Uprate Unit 4 Cycle 27 work order. The following is a list of modifications implemented and major components replaced associated with that work order during the outage, which caused many of the asset retirements:

- 1. High Pressure Turbine Rotor Replacement
- 2. Generator Upgrade Rotor Replacement and Stator Rewind
- 3. Generator Current Transformers and Bushings Replacement
- 4. Generator Hydrogen Coolers Replacement
- 5. Generator Exciter Cooler Replacement
- 6. Heater Drain Pumps and Valves Replacement
- 7. Main Steam Isolation Valves Replacement
- 8. Moisture Separator Reheaters Replacement
- 9. Turbine Plant Cooling Water Heat Exchangers Replacement
- 10. Main Condenser Replacement
- 11. Normal Containment Cooling Modification
- 12. Condensate Pumps and Motors Replacement
- 13. Feedwater Heater Nos. 5 and 6 Replacement

Q.

Please identify all differences, if any, in FPL's depreciation amounts and property taxes compared to the depreciation amounts and property taxes FPL supported in its Need Filing in Docket No. 070602-EI. For each identified change in depreciation amount and/or taxes, explain the reason for the difference.

A.

Please see attachment 1.

Florida Power and Light Company Docket No. 130245-El Number 5

Below is a comparison of depreciation expense and property tax expense recovered through base rate increase through 2013 compared to the Need Determination.

b Percents are calculated by dividing Rate Class Revenue Requirements by Total Retail Revenue Requirements (from lines 2 and 3)

c EPU Revenue Requirements by Rate Class per Attachment E, page 1, column (3), labeled Total Nuclear Cost Allocation, Docket No. 130245-EI

d Percents are calculated by dividing Rate Class Revenue Requirements by Total Retail Revenue Requirements (from line 12)

Florida Power & Light Company Docket No. 130245 Staff's First Set of Data Request Interrogatory No. 8 Page 1 of 1

Q.

How does the Company envision the true-up of the revenue requirement associated with the 2013 Extended Power Uprate plant placed into service in this docket will be addressed?

A.

Except for the errata identified in FPL's response to questions 1.a. and 2.a. above, FPL currently projects that the actual costs of its 2013 Extended Power Uprate plant placed into service will be equal to the estimated costs of its 2013 Extended Power Uprate plant placed into service as filed in its October 4, 2013 petition. Therefore, currently FPL does not expect the need for a subsequent true-up of the associated revenue requirements. However, in the event that there is a variance between actual and estimated 2013 plant placed into service, FPL will assess the need to true up its revenue requirements through an appropriate rate adjustment process, such as those provided by Rule 25-6.0423(7)(a) and (e), F.A.C.
