Re: Abandonment of Country Club Utilities

Ladies and Gentlemen:

Be advised that Country Club Utilities, Inc., a Florida corporation, hereby gives notice of its intent to abandon, in strict compliance with Section 367.165, Florida Statutes, the water and waste water utilities ("Country Club Utilities") within and serving the Country Club of Sebring, Highlands County, Florida.

The abandonment shall be effective sixty-five (65) days from the date this notice is dispatched to and receipt is confirmed (whichever is later) by the Board of County Commissioners of Highlands County, Florida and the Florida Public Service Commission. If necessary to accommodate the Court, the prospective receiver, or the residents of the Country Club of Sebring, the abandonment may be postponed by agreement for a reasonable time.

The Board of County Commissioners is respectfully requested to file the appropriate action in the Circuit Court seeking the appointment of a receiver to operate the Country Club Utilities so that there will be no interruption of service; and asking the court to establish a reasonable rate so that the outstanding encumbrances on Country Club Utilities may be paid.

Abandonment has become necessary because Country Club Utilities cannot pay its cost of operation. Rates have not been increased in over thirty (30) years. The current rate is \$.70 per thousand gallons (compared to the Southwest Florida Water Management District's average rate for equivalent service of \$2.70 per thousand gallons). Our rates are controlled by the Florida Public Service Commission ("PSC"). They have determined that Country Club Utilities does not qualify for a rate increase under the applicable statutes and rules.

The Florida Department of Environmental Protection ("DEP") mandated several actions and improvements (all to protect the public health--the most recent mandate requires Country Club Utilities to replace a second collapsed back-up well). Because Country Club Utilities cannot obtain a rate increase under the current PSC statutes and rules, Country Club Utilities does not have the capital to comply with the actions and improvements mandated by DEP. Country Club Utilities acknowledges that the DEP mandates are required by the statutes and

rules under which DEP operates. DEP worked diligently to assist Country Club Utilities in complying with the rules and statutes for the protection and benefit of the public.

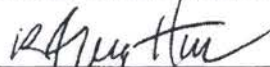

The South West Florida Water Management District ("Water District") brought legal action against Country Club Utilities to compel it to comply with the Water District's water use permit and to cease over-pumping. However, Country Club Utilities has no authority to force its customers to use less water. That authority resides with the Water District. Country Club Utilities is faced with a fine for over-pumping because its customers use more water than its permit allows. Country Club Utilities does not have the capital to pay the fine, nor the authority to reduce its customers' water use.

Greg Harris, as owner of Country Club Utilities, has personally invested a very significant amount of money to fund Country Club Utilities' attempt to comply with the DEP mandates, to petition the PSC for a rate increase, and to seek compliance with the Water District permit. However, these statutory schemes have, in this case, made compliance impossible and further attempts futile. Hence, Country Club Utilities will be abandoned so that utility service may be provided by one or more governmental agencies.

Based upon the above, Country Club Utilities, Inc., gives this notice that it intends to abandon the utilities so that government may provide the service.

Sincerely,

COUNTRY CLUB UTILITIES, INC.
