Subject: Please Deny FPL's Request for Fracked Gas

Dec 6, 2014

Commissioner Eduardo Balbis
FL

Dear Commissioner Balbis,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

Crystal Glover

FL

Dear Commissioner Balbis,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

Victoria Ansaldo

Subject: Please Deny FPL's Request for Fracked Gas

Dec 6, 2014

Commissioner Eduardo Balbis
FL

Dear Commissioner Balbis,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

Sherrill Cleary

Subject: Please Deny FPL's Request for Fracked Gas

Dec 6, 2014

Commissioner Eduardo Balbis
FL

Dear Commissioner Balbis,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

Thomas Bolker

Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

This particular State, Florida, has environment issues that can be different than other states. Our drinking water safety should be priority # 1, than there is evidence that fracking has and will again cause earthquakes, Ohio for example. We do not need anything like that in Florida. Florida is made different than other areas and sink holes are becoming more and more of an issue and fracking could create more risks along this line. So I urge you to say NO NO NO NO NO.....

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

Carl Green

Subject: Please Deny FPL's Request for Fracked Gas

Dec 6, 2014

Commissioner Eduardo Balbis
FL

Dear Commissioner Balbis,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

Lori Moldovan

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

Rosa Roman

Dear Commissioner Balbis,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

FRACKING HAS NOT BEEN DEMONSTRATED TO BE SAFE FOR EITHER PEOPLE OR THE ENVIRONMENT. DO NOT PERMIT FPL PERMITS TO FRACK ANYWHERE!

INSTEAD, OFFER INCENTIVES FOR ALL ENERGY COMPANIES TO DEVELOP NON-POLUTING, RENEWABLE ENERGY SOURCES.

NO FRACKING!

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

Randa ROBINSON-ANDERSON

Dear Commissioner Balbis,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

John Watt

Subject: Please Deny FPL's Request for Fracked Gas

Dec 6, 2014

Commissioner Eduardo Balbis
FL

Dear Commissioner Balbis,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

I am begging you. If I have to do it in person please let me know. We desperately need to explore cleaner ways of producing energy. Other countries are investing in other more reliable ways of producing clean energy. Their energy producing costs have decreased and many jobs have been created. Please don't let FPL do this. If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Subject: Please Deny FPL's Request for Fracked Gas

Dec 8, 2014

Commissioner Julie Imanuel Brown
FL

Dear Commissioner Imanuel Brown,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

Julia Meadows

Dec 8, 2014

Commissioner Julie Imanuel Brown
FL

Dear Commissioner Imanuel Brown,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health. This is especially true here in Florida where our ecosystem is more fragile than many others in the United States. It is imperative that we keep our environment as pristine as possible, and fracking will damage said ecosystem in ways that could not be repaired for generations.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit. I am against allowing Florida Power & Light (FPL) to damage our ecosystem for any amount of profit, and I say this as a shareholder in FPL's parent company, NewEra.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians. This is unacceptable, especially since the reason for it was a relatively small amount of profit for one company for a relatively short amount of time.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Dear Commissioner Imanuel Brown,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

Kay Klinsport

Subject: Please Deny FPL's Request for Fracked Gas

Dec 6, 2014

Commissioner Julie Imanuel Brown
FL

Dear Commissioner Imanuel Brown,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

Reports say this investment would be funded by customers, while Florida Power & Light would be able to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida. We are closer than ever before to doing away with this dangerous form of energy extraction. Why should we devote money to unsustainable energy when we have the ability to invest in local, renewable energy that would promote Florida-based jobs, lower energy costs and offer a more sustainable option for the environment?

I urge you to protect the people of Florida by denying Florida Power & Light's request for fracked natural gas.

Sincerely,

Ovid Battat

Dear Commissioner Imanuel Brown,

I urge you to deny Florida Power & Light's request to get into the gas drilling business by investing in drilling companies like PetroQuest.

If this request is approved, Florida Power & Light could start investing in the extraction of natural gas. Drilling for natural gas or oil using a form of extreme extraction known as fracking can contaminate air and water and endanger public health.

In addition to these risks, this project could cost customers an estimated \$750 million a year, while allowing Florida Power & Light to reap a 10.5% profit.

This proposal could also encourage the development of more fracking across our region. Fracking has been shown to be inherently unsafe and would have negative economic and environmental impacts for all Floridians.

Just recently, a bill was introduced by Senators Soto and Bullard that would ban fracking in the state of Florida.
