Tallahassee, FL 32399

Re: Docket No. 140060-WS - Application for increase in Water and Wastewater rates in Seminole County by Sanlando Utilities Corporation  
Our File No. 30057.214

Dear Ms. Stauffer:

The following is Sanlando Utilities Corporation's response to the Staff's Fourth Data Request dated February 27, 2014:

1. Please complete the table below summarizing gallons of water pumped, sold and unaccounted for after the Orange County Utilities (OCU) connection was closed.

	Total Gallons Pumped (000,000)	Corrected Gallons Pumped (000,000)	Gallons Sold (000,000)	Other Uses (000,000)	Unaccounted for Water	% Unaccounted for Water
August-14						
September-14						
October-14						
November-14						
December-14						
January-15						

Response: Please see the attached document "4-1 Gallons Pumped, etc."

- For each proforma plant item approved by the Commission in Company’s last rate case (Docket No. 110257-WS), please complete the table below.

**Table 1**

Proforma Plant Items Approved in Commission Order No. PSC-13-0085-PAA-WS	Commission Approved Amount in Order No. PSC-13-0085-PAA-WS	Total Amount Transferred to Utility Plant in Service (\$)
1. FDOT scheduled widening of SR 434	\$165,000	\$258,222.65
2. Force Main replacement	\$61,644	\$122,895.58
3. Wekiva Hunt Club Filter Replacement	\$496,752	\$444,142.24
4. Engineering report on Wekiva-Apopka Reuse Main	\$125,000	\$233,883.20
5. Wekiva-Apopka Reuse Main	\$2,167,879	\$4,296,353.90*

\*This amount includes \$1.468 million in CIAC received from the Water Management District.

- For each Pro forma Plant Item identified in which the Total Amount Transferred to Utility Plant in Service exceeds the amount approved by the Commission in Order No. PSC-13-0085-PAA-WS, please provide justification for the increase. Additionally, please provide documentation supporting the total Amount Transferred to Utility Plant in Service.

Response: Please see the attached document “4-3 Justification for Increases”.

- Regarding Sanlando’s Road Widening Project (item 1 in Table 1, above), what work has the Utility provided that required \$59,721 in capitalized labor in addition to the work performed by the contractor?

Response: The additional costs are reflected within the line items for Cap Time and Interest During Construction (IDC). This project’s completion is dependent on the progress of an FDOT project construction timeline that began on August 27, 2012 and scheduled for completion by August 6, 2014. Sanlando’s construction activities and timeline were totally dependent on the sequencing of FDOT’s prime contractor’s schedule. Many delays caused by the FDOT’s contractor pushed the completion date back resulting in additional Cap Time and IDC to be booked against the project. The Utility was able to finish the last portion of our utility relocation work on October 20, 2014.

- Regarding Sanlando’s Force Main replacement Project (item 2 in Table 1, above), what work did the Utility provide that required \$10,489.65 in capitalized labor in addition to the work performed by the contractor?

Response: The additional costs reflect the additional Cap Time, IDC and engineering costs that were incurred. The engineering component was originally performed under a separate project that was reclassified under the capital project to replace the force main. The engineering effort was a necessary component to determine the most cost effective means to treat and dispose of Des Pinar

WWTP's effluent, or alternatively, divert the Des Pinar Plant's flow to the Wekiva WWTF. Engineering services were needed to model the existing and proposed hydraulic profile of the impacted lift stations and pipe network to determine whether any upgrades to existing pumping equipment and/or force mains were necessary.

6. Regarding Sanlando's Engineering report on Wekiva-Apopka Reuse Main (item 4 in Table 1, above), it appears that the engineering contract was increased by more than \$60,000. What factors contributed to the increase in the engineering contract? What additional duties were performed by the engineering firm?

Response: After bidding the project out as originally designed, it was determined that the alignment of the pipeline along SR 436 could not be accommodated as originally designed as a result of constructability issues and the presence of many utility and above grade conflicts that drove up construction costs. To resolve these conflicts, the pipeline route had to be redesigned resulting in an increased expenditure for the additional engineering services required.

**For Questions 7-13 refer to Sanlando's Program to televise and clean 10 percent of its gravity collection system. For all responses that are already contained in the Utility's July 8, 2014 filing in this docket, please state "see July, 8, 2014 Letter."**

7. Prior to implementation of the described inspection program, what was Sanlando's procedure for inspecting its gravity collection system (i.e. once every ten years)?

Response: Typically, Sanlando would initiate an I&I investigation of a portion of its collection system after analyzing wet and dry weather flow patterns in order to identify likely locations of excess I&I entering the system. Thereafter, a capital project would be initiated to correct the deficiencies found during the investigation. However, on a going forward basis, it would be prudent to develop and execute an annual inspection program so that all of the gravity system would be cleaned and inspected on a cyclical basis in order to identify specific locations of deficiencies so that they may be corrected before catastrophic pipe or manhole failure occurs or deficiencies otherwise impact the delivery of sewer service to our customers. An annual inspection program would offer an opportunity to identify pipe or manhole issues without having to rely solely on wet weather flow data as an indicator of where to look in the collection system to evaluate pipe conditions.

8. Please describe how/why Sanlando determined that a 10 percent annual inspection was appropriate at this time.

Response: It is a well-established industry guideline for a utility to internally inspect its gravity sewer facilities on a 10-year cycle. Due to the amount of gravity sewer mains that make up the Sanlando collection system, it is prudent to evaluate a portion of the piping system each year so as to ameliorate the expenditures that would otherwise accrue if the whole system was inspected in a single year.

9. Please discuss the purpose of the inspection. In this discussion please discuss how these inspections may benefit Sanlando customers.

Response: Wastewater flow generated by Sanlando's sewer customers is conveyed to the Wekiva WWTP through a collection system, the majority of which is comprised of vitreous clay pipe installed prior to 1990, which by its age and nature, presents an elevated risk of pipe and gasket failure. By virtue of annually cleaning and video inspecting a portion of the collection system, Sanlando is able to identify and correct deficiencies that would otherwise contribute to

wet weather inflow and infiltration; address the deposition of solids that would otherwise reduce hydraulic capacity and contribute to backups; decrease the organic loading at the Wekiva WWTP; decrease the amount and concentration of fats, oils and grease load on the Wekiva treatment process; and incrementally reduce purchased power costs by maintaining pumping efficiency and reducing excess flow volume. All of these impacts contribute to operating expense or capital expenditures. Additionally, Chapter 62-604.500 F.A.C. mandates that Sanlando operate and maintain its collection system so as to provide uninterrupted service and to maintain the functionality of the system as intended.

10. Please describe the results of inspections performed in 2013 (i.e. the Company identified obvious signs of groundwater infiltration).

Response: The 2013 inspection activity identified numerous deficiencies in sections of gravity main and sewer laterals that provided pathways for groundwater to enter the piping system. In some instances, the inspection showed cracks and fissures in pipe that indicated the possibility of future pipe failure.

11. Did the Utility bid out this inspection program? If so, please provide a summary of the bids. If Sanlando has selected a company to perform the inspections please provide justification for the selected company.

Response: Yes, Sanlando obtained bids from American In-Line and from Altair. The low bid was submitted by American In-Line, which was awarded the work in 2013. See attached documents "4-11 Altair I&I Proposal" and "4-11 American In-Line I&I Proposal".

12. Does the Utility have a deadline for signing an agreement with a contractor to perform the inspections? If yes, when is the deadline?

Response: There is no deadline. Sanlando intends to solicit multiple bids each year in advance of initiating its annual inspection activities.

13. Please provide justification including any bids for Sanlando's selection of Sunshine Building and Development to perform work associated with air header replacement (see Sanlando e-filing dated February 20, 2015).

Response: See attached document "4-13 Air Header bid". The existing 20" air header was installed over 30 years ago. Over time, the high temperature operating conditions degraded the gasket material at each pipe joint that allowed process air to escape the pipe. This has negatively impacted the treatment process and required operations staff to compensate for the inefficient delivery of process air that is critical in the treatment plant's operating performance. The new air header will be made of welded steel and thus offer a tight conduit to convey the process air to the three treatment trains. In summary, the original header was at the end of its service life and the replacement asset is designed to provide efficient and cost effective performance over its service life.

14. Regarding the October 17, 2014, letter filed by Mr. George Hammer in this docket, please discuss all correspondences with Mr. Hammer. Please include any resolution associated with Mr. Hammer's concerns.

Response: A review of our customer records indicates that Mr. Hammer had not previously contacted Sanlando with regard to low water pressure at his house. None of the adjacent neighbors have registered low pressure complaints in the last two years either. In fact, the Wekiva WTP provides a very stable water pressure on a consistent basis throughout its service area using pressure sensors to control the operation of as many as five large high service pumps. Sanlando staff

contacted Mr. Hammer this month to inform him that a pressure logger will be used at a nearby hydrant to monitor pressure conditions in the distribution system near his house. The investigation is ongoing. Once the field data is obtained, Sanlando will inform Mr. Hammer of the results. It is possible that the cause of Mr. Hammer's water pressure complaint is specific to his house plumbing and not to the performance of Sanlando's equipment or distribution network.

15. Please provide detailed support documentation/or a calculation for the Utility's proposed reuse rate of \$5.13 for the base facility charge and \$.51 for the gallonage charge.

Response: The existing residential reuse rate is \$4.50 for the BFC and \$0.45 for the gallonage charge. The proposed rate reflects an increase of 14% in both the BFC and the gallonage charge, which is consistent with the requested increase in sewer revenue of 13.7% rounded off to the nearest 1%.

16. How much reuse water was produced during the test year?

Response: In 2013, the Wekiva WWTP produced 277.435 mg of reuse. In 2014, the Wekiva WWTP produced 379.519 mg of reuse. The plant flow in excess of those volumes was either applied to the perc ponds or discharged into Sweetwater Creek.

17. For the test year, please provide the monthly residential potable water billing data for the residential reuse customers?

Response: Please see the attached document "4-17 2013 Bella Vista Potable Billing"

18. Please provide, by primary operation and maintenance expense account, the estimated portion of those expenses required to operate the reuse system.

Response: Sanlando's operating expenses associated with the Wekiva Plant's reuse facilities, as well as the reuse piping system, are integrated into the overall cost of operating, maintaining, repairing and managing those facilities. Sanlando does not discretely differentiate between reuse and non-reuse expenses within its accounting system. For example, the Wekiva Plant's operating permit offers three effluent disposal options including (1) reuse; (2) perc ponds; and (3) surface discharge to Sweetwater Creek. Each disposal option requires that the effluent quality meet permit limits that are distinctly different in each case. The treatment process is adjusted by the operating staff from time to time in order to be compliant with one, two or all three sets of water quality limits. These adjustments may occur on a daily, weekly, monthly or less frequent basis depending on plant performance, reuse demand, weather conditions, maintenance activities, instrumentation performance and many others. Consequently, the cost of operating reuse components of the Wekiva Plant are not discernable separately from the total cost of plant operations.

19. If the Commission were to approve a rate structure to bill Seminole County for wastewater service based on those customers' water demand, would the Utility be able to obtain those customers' monthly water demand data from Seminole County? Would there be any cost associated with obtaining that data?

Response: Sanlando is unaware of whether Seminole County is willing to provide water demand data or if there would be any cost involved in doing so. Seminole County has not indicated to Sanlando whether Seminole is willing to provide such data on a monthly basis and at what cost. Heretofore, Seminole has not been forthcoming with a list of their sewer customers that are ultimately served by Sanlando.

20. Please provide a detailed explanation of the marketing agreement with HomeServe USA? What are the expenses associated with this agreement? What accounting treatment is used for regulatory purposes?

Response: These revenues are booked at the UI level and are not allocated to the operating companies.

21. According to the MFR's the Utility bills the private fire protection service (PFP) on an annual basis. The current approved PFP tariff reflects it should be billed on a monthly basis. Please explain why the Utility bills the PFP service on an annual basis?

Response: The current practice of billing the PFP accounts on an annual basis is rooted in the language of the tariff sheet that was approved by the Commission in December 1997 wherein the Terms of Payment states: "Bills shall be rendered annually at the beginning of the service year." Sanlando has continued this practice following the transfer of ownership that took place in 1998. Even though the current tariff sheet describes the billing period as monthly, which was also the case in December 1997, the PFP customers benefit by having to make only a single payment each year instead of making a recurring payment each month. Since the PFP tariff is solely based on meter size and has no gallonage charge, the annual bill reflects the sum of each of the 12 monthly amounts. In the event that service is provided by Sanlando to a PFP account for less than a year, the annual bill is prorated. Therefore, no PFP customer is at risk of overpaying for services rendered. Sanlando has no record of any of the PFP account holders requesting that they be billed on a monthly basis instead of annually.

### **Woodlands Des Pinar (WDP)**

22. According to Audit Finding No. 3 in staff's audit of Sanlando, the Utility asserted that any increase in annual operating expense at the Wekiva wastewater plant was, "offset by a corresponding decrease in annual operating expense due to the closure of the WDP wastewater plant." Additionally, per the audit, the Utility is still compiling a list of Utility assets that were inventoried, removed, or transferred to other affiliate systems. As a result of the limited available information at the time of the audit, the audit staff was unable to determine whether the increase in operating expense at the Wekiva wastewater plant was indeed offset by the closing and demolishing of the WDP wastewater plant. Please provide additional documentation including, but not limited to, invoices, work papers, and calculations to support the Utility's assertion.

Response: The Des Pinar Plant was taken out of service in September 2012, which is prior to the test year. Consequently, with one exception, the test year O&M expenses accurately reflect the cost to operate the Wekiva Plant inclusive of the flow that was diverted to Wekiva from the Des Pinar collection system. The exception is chemical cost, specifically, the annual cost of sodium aluminate. In 2013, Sanlando incurred \$41,645 in chemical costs for the purchase of sodium aluminate that was used in the treatment process approximately 182 days in that year. On a going forward basis, Sanlando expects DEP to drastically reduce the permitted loading rate on the percolation ponds, and as a consequence, the discharge of Wekiva Plant's effluent to surface waters will occur sporadically throughout the year. This will dictate the use of sodium aluminate on a continuous basis in order to insure that the Total Phosphorus limit is met every day. At the current unit price of \$0.23/pound and a chemical feed rate sufficient to achieve the target phosphorus concentration of less than 0.30 mg/L with an average daily plant flow of 2.1 mgd, the annual expense for sodium aluminate is \$124,935. This represents an increase of \$83,290 in chemical expense. See attached document "4-22 Sodium aluminate costs".

23. A utility is entitled to an amortization period for forced abandonment or the prudent retirement of plant assets prior to the end of their depreciable life using a prescribed formula set forth in Rule 25-30.433(9) Florida Administrative Code (F.A.C.).
- a. Do the circumstances of the Utility's decommissioning of WDP make this adjustment appropriate?  
Response: Yes.
  - b. If so, please provide the appropriate calculations and support documentation.  
Response: The response to this data request will be provided as a supplemental response.

### **Rate Case Expense**

24. Please clarify if any of the Water Service Corporation (WSC) employee capitalized time spent on the rate case was compensated as overtime pay for hourly employees or bonuses for salaried employees. If so, please provide a breakdown of the amount by employee.  
Response: No.
25. In Docket No. 110257-WS, the Utility's most recent rate case, the Commission approved \$45,673 of rate case expense for mapping revisions made by CPH Engineers, Inc. In Docket No. 130212-WS, the Utility's sister company, Cypress Lakes Utilities, Inc., the Commission approved WSC employee rate case expense which included 14 hours for the updating of maps by Susan DiPasquale. Please explain why 42.75 hours, attributed to Susan DiPasquale, were required to update Sanlando's maps in light of the Utility's previous expense, as well as in comparison to its sister company.  
Response: The cost to revise system maps in preparation for filing MFR's varies in each rate case and reflects the size and complexity of each water and sewer system that is depicted on the maps. In the case of Sanlando, two map atlases, comprised of 29 sheets for the water system and 29 sheets for the sewer system, are used to identify the location and size of our piping systems as well as the locations of wells, lift stations, treatment plants, valves, hydrants and other pertinent information. These same maps are used to identify each property served by Sanlando and are color coded to differentiate between class of customers (e.g. residential, commercial and irrigation services). These sheets are 11" x 17" in size and are drawn at a 1:400 scale, which allows for ease of use by staff. The atlases cover the approximately 14 square mile service area. In contrast, the revisions to the Cypress Lakes maps require much less time and effort because that service area is much smaller, the water and sewer network is much less complex, and the information can be shown using a single full size drawing. Consequently, the cost to update the Sanlando maps requires a much greater investment in resources compared to Cypress Lakes' map revisions in order to generate the information that is mandated by PSC rule.
26. Based on the itemized descriptions of rate case work performed by WSC employees, approximately 16 hours of various MFR preparation are recorded for Patrick Flynn and Darrien Pitts' hours reflected approximately 124 for preparation of MFR schedules A, B, D, and E, and an additional 50 hours for the preparation of the chemical and transportation schedules. Please explain why the WSC In-House hours related to MFR preparation are not duplicative of the approximately 351 hours for MFR preparation and review that Milian, Swain and Associates, Inc. documented in its rate case expense support documentation.  
Response: The WSC In-House hours related to MFR preparation are in no way duplicative of the hours Milian, Swain and Associates, Inc. spends on MFR preparation. The WSC In-House hours

associated with the MFR preparation primarily entail gathering the company's raw data, project plans, invoices and a slew of other information and then translating those items into a usable format for Milian, Swain and Associates, Inc. to use in the preparation of the MFRs.

27. Based on the itemized descriptions of rate case work performed by WSC employees, Darrien Pitts spent approximately 142 hours responding to audit requests. Please provide a detailed description of the work performed and information provided for each entry, including whether the time was related to prior Commission-ordered adjustments the Utility had not made.

Response: Please see attached document "4-27 DPitts Audit Response Detail".

### **Insurance Expense**

28. For the following items, please refer to the table provided by the Utility for Affiliate Audit Request No. 4. According to Audit Request Number "Affiliate 4."

- a. What type of insurance is included in the category "Other"?

Response: Please see attached document "4-28 Other Insurance (2013)".

- b. Please provide a similar breakdown of "Other" insurance expense for 2011, 2012, and 2014.

Response: Please see the attached document "4-28 Other Insurance (2011,2012 and 2014)".

### **Miscellaneous Expense**

29. According to the affiliate audit conducted for Utilities, Inc. in this docket, audit staff noted expenses totaling approximately \$46,000 in Account 6185 - Travel/Lodging related to a leadership meeting held at the Rosen Center Hotel during the test year ending December 31, 2013.

- a. Please provide a breakdown by vendor, amount, and allocation of the total expenses associated with this meeting.

Response: See the attached document "4-29 Leadership Meeting Allocation".

- b. Please explain the details of the meeting, including, but not limited to its purpose, who at Sandlando Utilities, Inc. attended, and how often it has been held annually. In addition, please explain why the level of expense is reasonable and should be allocated to the Utility.

Response: The purpose of the annual leadership meeting is to provide a forum for cross-functional senior leadership to meet, collaborate, share and learn. They can share knowledge, discuss innovative ideas and stay current on industry regulations, trends and technologies. The agenda also includes "state of the Company" presentations from various departments as well as in-depth planning sessions where Company goals and performance metrics are formulated. Company and industry best practices are shared and discussed. The annual leadership meeting has been held since 2008. The location was chosen because of its cost effective nature. Low travel expense and the ability to negotiate for lowest rates assures best value at the lowest expense possible. The President, Vice President of Operations, and Regional Manager of Sanlando Utilities Corp. attended the meeting.

### **Other**

30. In the Utility's response to Item 26(c) of staff's third data request, the Utility provided invoices for Contractual Services-Engineering, Acct. No. 631. One of the invoices included a water main

removal and replacement with a corresponding reimbursement from the Florida Department of Transportation (FDOT) totaling \$5,650. The following items relate to this response.

- a. For the entire project, what was the total contribution received from FDOT? Please provide support documentation of the entire amount.

Response: The total contribution by FDOT was \$5,650. See attached document "4-30a FDOT reimbursements".

- b. In addition to capitalizing this project to plant, did the Utility also make a corresponding adjustment to CIAC as well for the amount of the reimbursement? If so, please provide supporting documentation.

Response: No.

31. The Utility added approximately \$4.6 million of wastewater plant in the test year ended December 31, 2013.

- a. Was IRS bonus tax depreciation available for any of the plant additions?

Response: Yes.

- b. If so, did the Utility use the bonus tax depreciation available to calculate tax depreciation in the current rate case?

- i. If affirmative, please identify the amount of bonus tax depreciation as well as the Utility's support calculations.

Response: See attached document "4-31 Bonus Tax Dep".

- c. If bonus tax depreciation was available and the Utility did not use it, please explain why it did not.

Response: N/A

32. Please refer to MFR Schedule C-5, page 2 of 2, lines 2 and 3.

- a. Please explain why Tax Depreciation and Amortization is lower than Book Depreciation and Amortization.

Response: The allocation of Tax Depreciation was incorrect.

- b. Please explain why there is not any imputation for tax depreciation on the pro forma plant additions of \$154,765 (MFR Schedule B-3, page 2 of 2, Line 22 less Line 24; \$168,850 - \$14,085).

Response: There was no imputation for Tax depreciation on the pro forma plant additions in keeping with the practice of previous filings.

33. In the settlement between OPC and Utilities, Inc. approved by Commission Order No. PSC-14-0044-FOF-WS, the Utility agreed that for rate cases, Utilities, Inc. should make adjustments to its capital structure as necessary to reflect the proper amount of deferred income taxes on proforma plant additions." Please provide the amount of all actual and projected deferred income taxes associated with the Utility's requested pro forma plant additions.

Response: The response to this data request will be provided as a supplemental response.

34. Please refer MFR Schedule C-5, pages 1 and 2, line 2. Please explain why water tax depreciation and amortization is greater than wastewater tax depreciation and amortization (\$2,173,104 vs. \$796,031).

Response: The allocation of Tax Depreciation was incorrect.

35. Please refer to MFR Schedule C-2, line 12, and C-5, line 14. Please provide a detailed explanation of the entries labeled *Other Adjustments* and footnoted as "Adjustment needed due to the fact that the Company's tax schedules were done (sic) prior to the Company's books being closed."

Response: There was an error in the tax calculation.

36. Please refer to MFR Schedule C-4, Book/Tax Differences – Permanent. Please explain why the amount for water was brought forward to Schedule C-2, page 1 of 2, line 10, as a negative, but the amount for wastewater was brought forward to Schedule C-2, page 2 of 2, line 10 as a positive (the sign appears to be reversed for the wastewater).

Response: The wastewater amount brought forward to Schedule C-2 was incorrect and should have been a negative amount. This was due to an incorrect formula on the MFR Schedule C-2.

37. Please refer MFR Schedule C-2. Please explain the inconsistencies between bringing forward the amounts from MFR Schedule C-5, pages 1 and 2, line 16 to MFR Schedule C-2, pages 1 and 2, line 11. It appears that signs were reversed on C-2 for water and not all the entries on C-5 were not brought forward to the C-2 for wastewater.

Response: The inconsistencies are due to incorrect formulae on the MFR Schedule C-2.

38. In the settlement between OPC and Utilities, Inc. approved by Commission Order No. PSC-14-0044-FOF-WS, the Utility agreed that for "those systems where cash CIAC has been inadvertently allocated to plant designated accounts, all cash shall be moved back to the appropriate cash CIAC accounts." The settlement further stated that these adjustments shall be made no later than June 30, 2014.

Response: Per conversation with Staff and the Utility's Asst Controller, Christine Kim, in which she walked through how the Utility tracks cash & property CIAC separately on its books, it was determined on the call that the Utility did not need to make any adjustments.

a. On what date did the Utility make the agreed upon adjustments to move cash CIAC allocated to plant designated accounts back to the appropriate cash CIAC accounts?

b. Please provide proof of the adjustments, and any affect the adjustments have on the CIAC and Plant balances for water and wastewater.

39. In a letter dated February, 6, 2015, the Utility requested to add the cost of a new back hoe (\$69,991.36) to the pro forma plant amounts already requested. The letter indicated that the Utility would take delivery of the new back hoe on February 13, 2015.

a. Please provide documentation of receipt of payment for the back hoe, and

Response: Please see the attached document "4-39 JCB Backhoe Invoice" and document 4-39 JCB Backhoe Payment regarding documentation of payment for the backhoe.

b. Please provide the salvage value and any retirement amounts associated with the old back hoe.

Carlotta S. Stauffer, Commission Clerk

March 13, 2015

Page 11

Response: The salvage value of the backhoe is \$4,500.00. The backhoe is scheduled to be sold on March 31, 2015. Until then the unit remains in the Utility's possession. The backhoe was purchased in 1990 and thus is fully depreciated.

If you or the Staff have any questions, please feel free to contact me.

Very truly yours,

MARTIN S. FRIEDMAN

### 4-3 Justification for Increases

Project #	Cost Code	Cost Type	Account Description	Actual Amounts	Commission Approved	Explanation
<b>SANLANDO SR434 WIDENING - I-4</b>						<b>Explanation</b>
	2012075 00105	1665	CAPITALIZED TIME	62,955.58		The additional costs are reflected within the line items for Cap Time and IDC. This project is under an FDOT contract that began on 8/27/12 and was scheduled to be complete by 8/6/14. The Utilities construction activities were tied directly to the sequencing of the FDOT contractor's schedule. Many delays by the FDOT's contractor pushed the completion date forward resulting in additional Cap Time and IDC to be booked against the project. The Utility was able to finish the last portion of work on 10/20/2014.
	2012075 00105	1666	INTEREST DURING CONSTR	30,267.07		
	2012075 00105	1672	PIPING	<u>165,000.00</u>		
	2012075 00105	1699	TRANSFER TO FIXED ASSET	\$ (258,222.65)	\$ 165,000	
<b>Des Pinar WW Flow Diver to Wekiva WWTP</b>						<b>Explanation</b>
	2009719 00208	1705	CAPITALIZED TIME	10,489.65		The additional costs are reflected within the line items for Cap Time, IDC and engineering. The engineering component was originally performed under a separate project that was reclassified under the Capital project to replace the force main. The engineering effort was a necessary component to determine the most cost effective means to treat and dispose of or transfer the Des Pinar sanitary flows to the Wekiva WWTF and to model the existing upstream sanitary lift stations and pipeline to determine any impacts that would require upgrades to existing pumping equipment or force mains.
	2009719 00208	1706	INTEREST DURING CONSTR	3,352.78		
	2009719 00208	1707	ENGINEERING	47,408.90		
	2009719 00208	1708	LIFT STN MATERIAL	<u>61,644.25</u>		
	2009719 00208	1710	MATERIAL	\$ (122,895.58)	\$ 61,644	
	2009719 00801	2856	PRELIMINARY SURVEY PRO			
<b>WEKIVA FILTER REPLACEMENT</b>						<b>Explanation</b>
	2011046 00201	1705	CAPITALIZED TIME	18,978.90		The decrease in the project cost reflects the Utility's success in receiving a lesser cost proposal for the filter equipment from a different vendor than originally proposed.
	2011046 00201	1706	INTEREST DURING CONSTR	13,073.67		
	2011046 00201	1707	ENGINEERING	10,064.55		
	2011046 00201	1709	EQUIPMENT	<u>402,025.12</u>		
	2011046 00201	1739	TRANSFER TO FIXED ASSET	\$ (444,142.24)	\$ 496,752	
<b>ENG WEKIVA-APOPKA REUSE TRANSMISSION MAIN</b>						<b>Explanation</b>
	2011016 00201	1705	CAPITALIZED TIME	11,790.71		After bidding the project out as originally designed it was determined that the route or alignment of the pipeline along SR 436 could not be economically accommodated as a result of constructability issues and many conflicts driving up construction
	2011016 00201	1706	INTEREST DURING CONSTR	15,454.15		

2011016 00201	1707	ENGINEERING	<u>206,638.34</u>	
2011016 00201	1739	TRANSFER TO FIXED ASSET	\$ (233,883.20)	\$ 125,000

consequently, issues and many permits during up construction costs. To overcome this issue, the pipeline route had to be redesigned by changing the route resulting in an increased cost for engineering fees.

**WEKIVA-APOPKA REUSE TRANSMISSION**

Project #	Cost Code	Cost Type	Account Description		Explanation
	2012027 00209	1705	CAPITALIZED TIME	22,064.80	
	2012027 00209	1706	INTEREST DURING CONSTR	192,474.56	
	2012027 00209	1707	ENGINEERING	93,809.24	
	2012027 00209	1713	SITE WORK	<u>3,988,005.30</u>	
	2012027 00209	1739	TRANSFER TO FIXED ASSET	\$ (4,296,353.90)	\$ 2,167,879
			SJRWMD CIAC	1,468,000.00	
				\$ (2,828,353.90)	

The Commission-approved amount included the cost share allocation of \$1.468MM from the SJRWMD that was received by the Utility. Additions to the original contract in the amount of \$370,660.00 were primarily the result of a requirement by Seminole County to encase all pipe at each road crossing, effectively doubling the cost of each road crossing.

## 4-3 Journal Entries

FDOT scheduled widening of SR 434 - \$258,222.65

4-11 Altair I&I Proposal and

4-11 American In-Line I&I Proposal

# QUOTATION

## AMERICAN IN-LINE INSPECTION, Inc.

415 Timaquan Trail  
Edgewater, FL 32132

Phone (386) 409-5446  
Fax (386) 957-4919

Proposal Submitted To:	Sanlando Utilities Corp. Utilities Inc. of Florida	Phone	800-272-1919 Ext. 1360	Date	08-19-13
Street	200 Weathersfield Ave.	Job Name	Sanlando I & I, Vac & CCTV		
City, State, Zip Code	Altamonte Springs, FL 32714	Job Location	Seminole County, FL		
ATTN:	Mr. Bryan Gongre	Fax:	BKongre@uiwater.com		

We propose hereby to furnish the following:

To provide cleaner truck & video crew to clean/desilt, CCTV & Smoke Test existing/active 8" VCP sanitary sewer pipes & manhole structures, locating pipe defects for infiltration, root intrusion & blockages. Our price includes all labor, equipment, material and workmanship to complete the project, along with a clear typed report and video of our findings. One DVD or VHS will be provided. If additional copies are needed, they can be purchased for \$20.00 each.

Cleaner Truck LF Rate of 2000 + LF of Various Existing Sanitary Sewer Pipe @ \$0.75 per LF

CCTV/Video LF Rate of 2000 + LF of Various Existing Sanitary Sewer Pipe @ \$0.75 per LF

~~Smoke Testing LF Rate of 6000 + LF of Various Existing Sanitary Sewer Pipe @ \$0.25 per LF~~ 

Mobilization.....S N/C

To be provided by others: Acceptable access to system to perform duties requested, permits, traffic control, water meter or clean water source, bypass pumping, plugging and suitable dump site for debris or environmental disposal charges will apply.

\*\* Please note that any downtime out of our control will be billed at an hourly rate of \$175.00 per hour.

Example - Waiting on MOT to be moved, etc.

\*\* Please note that Heavy Cleaning will be billed at \$175.00 per hour. Heavy Cleaning is defined as pipe's having more than 20% sediment in pipe.

We appreciate this opportunity to serve *Sanlando Utilities Corporation*  
**Utilities Inc. of Florida**

Note: This proposal may be withdrawn by us if not accepted within **30** days.

Terms: NET 30 DAYS

Representative: Walt Kush

Authorized Signature: \_\_\_\_\_ Date: 08-19-13

Acceptance of Proposal...The above prices, specifications, and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be made as outlined above. We understand that attorney fees and collection costs will be recovered if contract is not paid in full.

Authorized Signature:  Date: 9/5/13

*ALTAIR ENVIRONMENTAL GROUP, LLC*

*STANDARD TERMS & CONDITIONS OF BUSINESS*

**COMPANY:** Altair Environmental Group, LLC, a Florida Limited Liability Company, whose address is 710 S Milwee Street, Longwood, Florida 32750 (hereinafter referred to as "ALTAIR")

**CLIENT:** Any corporation, company, organization, agent or individual entering into a written agreement with ALTAIR for the provision of services or materials or any other business dealing, for which payment is agreed with or becomes due and payable to ALTAIR. (hereinafter referred to as "Client")

**PROPOSALS & QUOTATIONS:** All proposals or quotations provided by ALTAIR must be in writing and signed by an authorized representative of the company to be valid and any such proposal or quotation is valid for acceptance within 30 days of the respective submission date, unless agreed otherwise in writing.

**PAYMENT TERMS:** Payment of all invoices is due within 15 days from the invoice date, unless terms are agreed otherwise, in writing from ALTAIR. Invoices will be raised weekly based on completed work and at ALTAIR'S discretion. Any dispute or query regarding the invoiced amount must be communicated in writing within 10 days (objection period) from the invoice date and Client will be deemed to have accepted the invoice as delivered and all services / work standards relating thereto, unless objected to in writing within the objection period.

**REMEDIES FOR NON PAYMENT:** All sums not paid when due will bear interest at the rate of 1.5% per month from due date until paid or the maximum legal rate permitted by law, whichever is less. In the event of legal action being deemed necessary to enforce payment, ALTAIR shall be entitled to all costs of collection, including a reasonable attorney's fee. In addition, if the Client fails to make payment to ALTAIR as herein provided, then ALTAIR may stop work without prejudice to any other remedy it may have. The parties further agree that in the event of any controversy arising between them, then in such event, the State Courts of Seminole County, Florida, shall be the forum in which the parties agree to try and have heard any matters of litigation arising out of such controversies.

**WARRANTIES:** All workmanship and materials are guaranteed against defects in workmanship for a period of one year from the date of substantial completion of the project. This warranty is in lieu of all other warranties, expressed or implied, including any warranties of merchantability or fitness for a particular purpose. ALTAIR will not be responsible for damage to its work by other parties or normal wear and tear. Any repair work necessitated by caused damage will be considered as an order for extra work.

**INDEPENDENT CONTRACTOR:** Both ALTAIR and the Client agree that ALTAIR will act as an independent contractor in the performance of its duties under this contract. Accordingly, ALTAIR shall be responsible for payment of all taxes, including Federal, State, and local taxes arising out of ALTAIR'S activities, including by way of illustration but not limitation, Federal and State income tax, Social Security tax, Unemployment Insurance taxes, and any other taxes.

**UNFORESEEN OCCURENCES:** In the event that any unforeseen occurrences or conditions are encountered after the work has commenced and which ALTAIR judge, at their sole discretion, to significantly effect or may effect the services, the risk involved in providing the services or there being a material change to the proposed or quoted scope of services, ALTAIR may a) immediately cease work without liability to the client, or b) renegotiate with client to change the scope of work with price adjustment or change order, or c) Apply downtime / hourly or day rates until occurrence or condition is resolved to the satisfaction of ALTAIR.

**DOWNTIME/STOPPAGES/ADDITIONAL WORK:** In the event that ALTAIR is unable to work or encounter stoppages due to circumstances beyond their control or unforeseen circumstances or occurrences, particularly any underground structure problems causing delay or stoppage of work or in the event of any work being required beyond the quoted scope of work, then an hourly or daily rate will be charged, subject to prior client notification in writing from ALTAIR.

**PROJECT ESTIMATES:** ALTAIR may from time to time provide written estimates of projected timescale or hours for a particular project at client's request, however, this in no way binds ALTAIR to a final timescale for the services to be provided. The actual hours will be determined by specific site requirements and operational demands, which cannot be wholly determined due to the nature of the services provided by ALTAIR.

**CLIENT SERVICE ORDERS:** In the event that the Client chooses to issue a service order, whether verbal or in writing, such service order shall be

governed by ALTAIR'S Standard Terms & Conditions of Business as detailed herein and any such client agreement cannot change the Payment Terms under any circumstances unless specifically agreed to in writing from ALTAIR and such agreement being authorized and signed by the owner or director of ALTAIR. In the event of any inconsistency between the ALTAIR terms and conditions as detailed herein and the terms of a service order, the ALTAIR terms and conditions shall prevail. In any event, settlement of all ALTAIR correctly submitted invoices must be made within 30 days from invoice date, irrespective of client having received payment from their respective client.

**CONTRACT ACCEPTANCE:** In the event that the Client fails to sign acceptance of an ALTAIR proposal or quotation, due to oversight by either or both parties or any other reason and the services are commenced or completed on the Clients written or verbal instruction due to emergency, urgency or some other reason, then these terms and conditions will be deemed to have been accepted by the Client as if such proposal or quotation had been signed.

**CLIENT RESPONSIBILITIES:** The Client will normally provide the following services, at no cost to ALTAIR for the duration of the project, unless agreed otherwise in writing by ALTAIR, a) Approved dumpsite and disposal for all materials to be removed from site of work, b) Access to site of work for ALTAIR personnel and equipment, without delay, c) All temporary site facilities including suitable storage space for equipment, d) Any special permits and/or licenses, without delay, e) Supply and access to all water required for the project from the nearest fire Hydrant, f) Work areas prepared and accessible, without delay, to enable the services to be provided, g) Authorized representative of the Client at the site of work, at all times services are being performed and with authority to accept the services as completed and / or hours worked and h) Location and exposure of all manholes in the project area.

Re: 20" Air Line At Wekiva Plant

Dear Scott:

We propose to furnish 20" steel pipe and fittings, connect to existing steel pipe and to existing DIP outside of compressor building, for a lump sum price of thirty eight thousand six hundred thirty four dollars and twenty one cents (\$38,634.21).

Thank you for the opportunity to quote you on this.

Very truly yours,

  
John T. Bush
