Subject: FPL Proposal To Drop Cedar Bay

While I am certain that this will fall on deaf ears, I can't keep quiet about it any longer. There is a power generation facility here in Florida, that is going to be approved to be shut down by the commission, simply because a bully of a company wants to be bailed out for a decision they made, which at the time no doubt made them tons of money.

This plant is Cedar Bay in Jacksonville. 68 people are losing their jobs, way of life, and about to endure severe hardship, all because the bully (FPL), doesn't want to honor their commitment. What's worse, is this facility is one of the cleanest and most reliable coal fired utilities in the country.

The proposal to buy and shut the plant, by FPL, just because they don't want to honor what they agreed to, in my humble opinion, undermines the very principal of signing contracts, and locking in costs.

In closing, I ask the commission to consider more than just forward thinking, unpredictable future outlooks on the costs of relying on natural has only, and consider the lives of those employees who are being put on the street, in an "unfavorable" economy, just because someone wants to save a buck, and use the public to back up that unproven statement of savings for them.
