Re: Docket No. 130209-SU

Dear Sirs,

As representatives of the utility discussed with staff, we have included additional requests for service, and a map of the service area, reduced from the original request to accommodate the desires of local government and to remove the more remote phases of future service, for staffs' reconsideration and review. The attached maps delineate the present service area in green. Territories proposed to be added to NPUC's certificated territory are also in color, with the exception of the Kingston Shore's development, which is also within the requested territory, (which is highlighted on the second map). This is the same map that was handed out to staff at our last meeting at the Commission's headquarters.

By this letter, NPUC withdraws its request for a main extension charge.

Any request for information or further documentation should be relayed to me, and I will promptly see that the utility responds. Thank you in advance for your consideration of these materials.

Sincerely,

/s/ John L. Wharton

RE: PSC Docket No. 130209
Certificate No. 249-S

Dear NPUC,

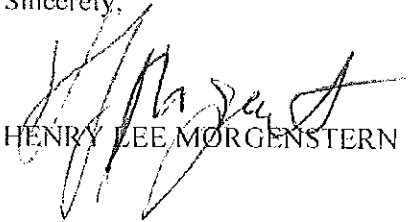

I own the house and property at 14 Dolphin Avenue, Ormond Beach (Ormond Plaza), which is in or near the expansion area covered by the above Docket Number.

This is to inform you that I would very much like to have my house connected to central sewer to replace the septic tank and drainfield currently there.

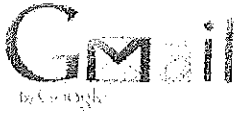

Please let me know what I have to do to get sewer lines extended to my property.

Thank you.

Sincerely,

HENRY LEE MORGENSTERN

Dear Bob:

I have sent numerous requests to you concerning the possible hook up for sewer services at the above property which I own.

Thus far, I have had the septic tank pumped twice this year and I would like to hook up to the sewer line in front of the property immediately.

Please contact me as soon as possible for the hook up.

Thank you.

As you can see by our address, we live just north of the last street in Seabridge Development, and would be very happy to be included in the proposed addition of territory of the North Peninsula Utilities Corp. We currently have a septic tank and would welcome the opportunity to consider sewer hook up because we live directly on the Halifax River. We have always had concerns about the effect of pollutants on our beautiful river.

Thank you for your consideration of our request.

Sincerely,

Marilyn & Bill French

Bob,

My wife and I own property on 138 Capri Drive in the Ormond By The Sea area on the Northern Peninsula of Volusia County. We hope to start building within the next six months and would like to hook up to your waste water connection for the North Peninsula Utilities Corp. We currently have a dry pipe installed for this purpose on Capri but I understand the approval has not been reached by Volusia County for this connection. Please let us know as soon as the waste water hookup is available for our connection so we can inform our building contractor.

If there is anything else my wife and I can do to help expedite this process please let us know.

Thanks very much,

Bruce and Diane Petku

Dear Bob,

Per our discussion, we would like to confirm that you have capacity at your waste-water treatment plant and the ability to serve the sewer needs of the 25-35 condominiums units that will be built on our property. We prefer to hook-up to your central sewer service and not build an on site system.

Please advise if the service is available to our project.

Dear Mr. Hillman,

I have lots and new construction on Capri Drive in Ormond-by-the-Sea. We have a paved road with sewer lines and connections with no central service. Even though the lines are in I am forced to install a septic system with each house at an average of \$8,000. I and other builders would like to have the availability of central sewer service in this area for current and future Construction. Please let me know if NPUC can provide service to our area.

PO Box 2803
Ormond Beach, FL

Dear Mr. Hillman

Please accept our apologies for our lack of communication over the past few months. We have been obtaining approval from the owners of the condominium building to replace the current sewer treatment plant with a direct connection to the sewer line owned by North Peninsula Utilities.

I want to assure you that Oceanaire Condominium of Ormond by the Sea, Inc, continues to work with engineering personnel to connect to your services.

At this time the Association has been approved for their loan at Reunion Bank and we are only waiting on the final authorization to begin drawing funds against the Association's loan.

I will contact Ms. K. Buck, P-Eng of this information so that we may shortly begin working together.

Sincerely

RE: Possible sewer connection for Oceanaire Condominium 3390 Ocean Shore Blvd.

Dear Bob,

I enjoyed talking with you the other day concerning the possibility of connecting the 17 units at Oceanaire Condominium to your sewer system at North Peninsula Utilities.

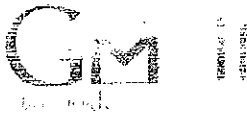

As I mentioned on the phone, we currently have an onsite treatment facility that is thirty plus years old and is continually in need of maintenance. I am very much in favor of connecting to your central system if you have adequate capacity available, and the costs are not excessive.

Please let me know if this is a possibility, and what the costs and timeline might be. Feel free to call me if you need anything further.

Sincerely,

Douglas Piatt, President

Mr. Hillman,

Thank you for your time earlier this afternoon. Again my name is Keith Woodbury with the Potomac Land Company and we represent the seller of the +/- 8 acre property on A1A between Sandpiper Ridge and Beau Rivage Drives. I'd like to request information on your capacity to serve our sewer needs as we are in your territory. We'd appreciate, if possible, a map showing the area your company services as well as the likely connection fees associated with developing the 29 lot project. We'd like to tie into the manhole on the East side of Sandpiper Ridge Drive and would appreciate any information you may be able to provide. Attached is my business card but if you are unable to see it my best contacts are this email address, which is keithawoodbury@gmail.com, or by phone at (786)514-3155. Thank you in advance and I look forward to hearing back from you in the near future.

Best regards,

Keith Woodbury

Hello,

Rick here with Vanacore homes, I have a question for you regarding the time frame of the sewer installation. I heard that the first of March you may get approval to install a gravity sewer system for this street. The question is if you get the go ahead, what is the time frame the system will be fully operational? I have a problem if the system will not be complete in 5 months or sooner. I will have to put a septic system in now, and it will be piped to the back of home because the only place we have on the lot to fit in septic is the back yard. Please advise, so I can proceed with this home.

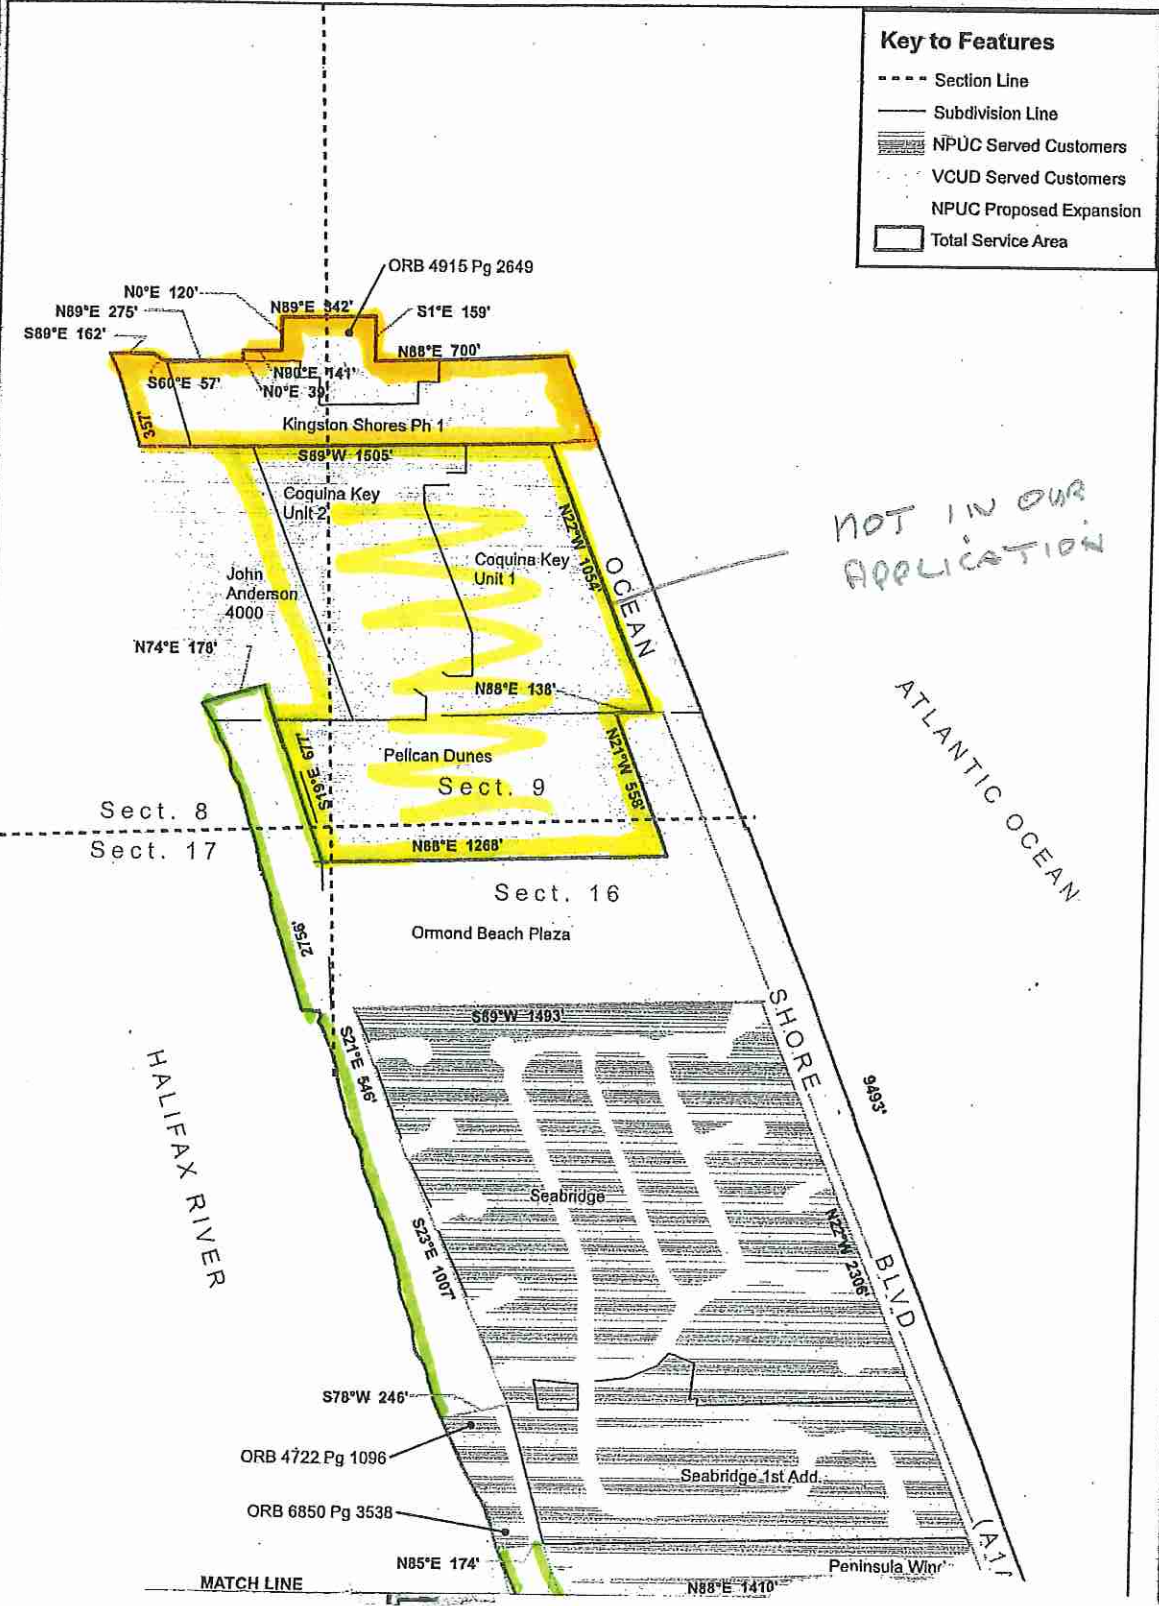

Thanks Rick Daniels/ Vanacore Homes.
