Re: Docket No. 140217-WU - Application for increase in water rates in Sumter County by Cedar Acres, Inc.

Dear Ms. Dombroski:

Thank you for your letter expressing your concerns about the rate increase petition filed by Cedar Acres, Inc. (Cedar Acres or Utility). To ensure that the Commission staff and the Commissioners have knowledge of your concerns, your letter has been placed on the correspondence side of the docket file for all to review.

With regard to the first billing example in your letter, to calculate a 3,000 gallon bill is \$13.12, as shown on the top of page 3 of the Special Report. That would make the total bill for your example \$27.25 (\$13.21 + \$14.04). The reference to \$27.25 at the bottom of page 3 of the Special Report is an example of a bill amount if a customer used 3000 gallons.

With respect to the development of rates, the Commission is required to set rates that are just, reasonable, compensatory, and not unfairly discriminatory. To determine the appropriate rates for service, the Commission uses a rate of return methodology as set forth in Chapter 367, Florida Statutes. There is no defined percentage limit for a rate increase contained in this statute. Under the rate of return methodology, a utility is allowed to earn a reasonable return on its prudently invested property that is used and useful in serving the public, less accrued depreciation, plus an allowance for operating capital. This ratemaking process is used for all water and wastewater companies and is also used in the electric and gas industry. It is the same approach used throughout the country by various state and federal utility regulatory bodies.

There are many factors that affect the cost of providing service and hence, the rate charged to customers. Some factors affecting the cost of providing service include: the size and age of the utility system, the quality of the water at its source, the number of customers, and the geographic spread of the service area. During a rate case, the Commission's accountants, engineers, and economists examine the financial and engineering information filed by the Utility as part of its rate increase application. The Commission's auditors also examine this information and publish the results of their findings in an audit report. All costs found to be imprudent or unreasonable are disallowed.

Ms. Camilla Dombroski

We appreciate your letter and understand your concerns regarding the Utility's proposed rate increase. I hope the above information has been helpful. If you have any additional questions, or require further assistance, please call me at (850) 413-7003 or email me at lsmith@psc.state.fl.us.

Sincerely,

A handwritten signature in black ink that reads "Lee Smith". The signature is written in a cursive style with a large initial "L" and "S".
