2 (1) A change to a utility's rate structure must meet one of the following criteria: (a) is cost  
3 based; (b) has historical precedent; (c) embodies pricing concepts previously approved by the  
4 Commission; or (d) is not unduly discriminatory. Each letter transmitting a utility's proposed

appropriate proceedings by the Commission to consider the rate structure shall prohibit a  
utility's proposed rate structure from going into effect as determined by the utility, unless  
and until the Commission directs the utility to file a different rate structure pursuant to  
subsection (3). If the utility does not submit such supporting information the Commission

19 shall evaluate the proposed change in rate structure on the basis of cost and operating data  
20 from one or more comparably situated public electric utilities which the Commission  
21 determines to be most similar to the filing utility. Data from the comparable utilities shall be

2 (1) A change to a utility's rate structure must meet one of the following criteria: (a) is cost  
3 based; (b) has historical precedent; (c) embodies pricing concepts previously approved by the  
4 Commission; or (d) is not unduly discriminatory. Each letter transmitting a utility's proposed  
5 documentation in which any change in rate structure is proposed shall be accompanied by  
6 supporting information in sufficient detail as to allow the Commission to determine the  
7 derivation of all rate structure modifications. The supporting information shall consist of either

18 determination, staff may request the Commission to consider the proposed rate  
19 structure as filed. Regardless of staff's determination or the initiation of appropriate  
20 proceedings by the Commission to consider the rate structure, a utility's proposed rate  
21 structure may go into effect as provided for in the utility's filing. If the utility does not submit  
22 such supporting information the Commission  
23 shall evaluate the proposed change in rate structure on the basis of cost and operating data  
from one or more comparably situated public electric utilities which the Commission  
determines to be most similar to the filing utility. Data from the comparable utilities shall be  
considered in conjunction with all submitted information which is specific to the filing utility.  
(3) If the Commission finds the proposed rate structure inconsistent with subsection (1), the
