**Subject:** 25% rate increase for new plant construction

As a citizen of Florida and homeowner, I vehemently oppose the proposed increase unless the entire proceeds are dedicated to the construction of more renewable power plants like solar, wind, or wave. This would help to ensure our bills will decrease over time once these plants are built. Natural gas power plants pose a huge risk because it is not unlikely that natural gas will become more expensive over time the way gasoline has.

Why are we the Sunshine State if we can't take advantage of Mr. Sun to generate our energy needs?

Thank you.
