**Subject:** re: Docket #160021 FPL rate increase question

Good morning, Mr. Osborne:

Thank you for your inquiry, and I hope this information is helpful.

FPL has identified 3 solar projects total 224 MW (74.5 MW each) and are identified by their site location--Babcock Ranch, Citrus, and Manatee. More information is available in FPL Witness Barrett's direct testimony, available at the Commission's website from the following link:

<http://www.psc.state.fl.us/library/filings/16/01385-16/01385-16.pdf>.

Additional information about these units is available in the company's 2016 Ten-Year Site Plan, which can be found at the following link:

<http://www.psc.state.fl.us/Files/PDF/Utilities/Electricgas/TenYearSitePlans/2016/Florida%20Power%20and%20Light.pdf>.

If you need more information, please let me know.

Thank you,

Bev DeMello  
Assistant Director  
Office of Consumer Assistance & Outreach

**Subject:** Docket #160021 FPL rate increase question

Regarding the recent news of a rate increase I read an article that said, "The utility asserts that its proposed increases would cover the costs of strengthening power lines, three **large solar energy centers**, and completion of a natural gas plant in Okeechobee County, according to its filing."

I'd like to hear more about these 3 major solar energy centers. Where are they to be located? What are their sizes in terms of megawatts? How many jobs will they bring to the area?

I am a FPL customer, do you need my address?

-Ray
