Subject: Re: California Self Defense ...

Thanks Evelyn,

Obviously this person would also be a big supporter of the "**Spy and Fry, Do and Die**" smart meter grid.

Would you consider supporting a class action lawsuit **against FPL** for installing a grid of smart meters that can be hacked by terrorist and shut down with a single computer click whenever the terrorist chooses?

This happened in the Ukraine last December when 225,000 homes were suddenly plunged into darkness. As a retired FL Professional Engineer, I presented this information at the FPSC hearing on June 6, 2016 who dismissed it as irrelevant.

What if they're wrong?

Can you imagine plunging the FPL power grid into darkness except those homes and businesses that now pay an extortion fee every month to keep their original safe analog meters. How many people do you think could die in the chaos? Or worst, what if terrorist decided to shut down the '**smart meter grid**' throughout the whole country and everything stopped dead still in its tracks?

Warmly,

Bill and Ann Cummins
Port Orange, Florida
386-383-5198

PS: I tried to copy FPL, but their email has been disconnected.
A copy of my FPSC testimony is available upon request.

This has been around before...just a reminder of the stupidity out there!!!
E.J.

California Self Defense ..

A liberal acquaintance from California asked me what I thought he might need in order to defend his home and family from home invasion, and the like.

I suggested a 9mm, a couple of clips, and a box of shells.

A few days later he sent me this picture and asked me how to make it all work. He did vote for Obama...twice.
