Subject: FPL Increase

It is so disappointing and yet so common in today's corporate arena that requested FPL rate increase will not be used to the betterment of it's Floridian customers. Florida could be the first in the union in the use and sale of solar energy. We are sacrificing our future for profits today. How do you justify such a high rate increase that has no basis other than increased profitability and which is built on the back of consumers with no other options?
