Subject: FPL proposed rate increases - Docket #160021-E1

Dear Ms. Carlotta Stauffer, I will be 65 years old on September 16 of this year. I am still working and making mortgage payments. Medical insurance rates and cost of medical care along with a host of other costs have increased while our incomes are decreasing. We do not believe that it is just to permit increases to FPL rates simply because they desire to give shareholder's a greater profit. Most seniors have a difficult time to maintain

their standard of living, even though they worked for so many years and have contributed to this great nation of ours.

It is time for those in authority to stand up for us, and remember that one day they too will be in our position. Please do what is right and do not allow FPL to increase their rates without any service enhancements, improved disaster preparedness or energy innovation. Their projected profit of \$1.6B for 2017 without a rate increase is more than enough as is. Thanks, for your kind attention to this matter.

Sincerely,
Earl Wade
