Subject:

“it is outrageous that solar energy option continue to be restricted and even heavy obstacles are imposed by FP&L as it happened to me. It took me 5 months to get the system connected just by your inspector arrogance and disdain for our interest to contribute to a green planet.

“They're asking for money to resolve – to get more profit for people that are out – for their shareholders that are out of state. Now we have seniors that cannot afford to buy their medication, and now with this rate increase and everything else, as everyone has spoken about, that will – it's not only a 23 percent, everything that comes with it that they're going to have to pay for, they may have to – they may have to serve – they may have to not eat to be able to pay for their bills.” –

“When you're considering this rate increase in order to generate higher profits for FP&L, please keep in mind that those profits come at our expense, and that includes the senior community, many of whom are having a very hard time of it.” –

Sincerely,

--
Manuel Montes de Oca B, MD
