Re: FPL Propose Rates Adjustment: Docket No. 160021-EI

Months ago FPL stated they were upgrading their equipment to improve the quality of service and decrease rates. I received a document on the 26th July 2016 with my electric bill stating their intent to increase the rates.

Electricity is an essential commodity and FPL has the monopoly with this commodity. May I invite you to take a broader look at the financial picture. Many people are on a fixed income; whether they are senior citizens, like myself or the hard working people, who have not received a raise in salary or received a minimal raise because of the state of the economy. In addition, other commodities are also increasing, such as automobile insurance, cable and internet, food items, just to name a few. With this milking away of money, part of the middle class will most definitely slip into poverty.

The middle class is considered the backbone of the economy. Global Studies have shown when there is a shrunken middle class, there is greater polarization between rich and poor and the entire country suffers. Please do not contribute to such atrocity.

I therefore employ you to do all in your power to keep the same rates of this essential commodity.

Thank you

Sincerely

Ula Cobham
