How unconscionable and unwarranted is it for FPL to request a rate increase on the backs of its customers (many of whom are senior citizens on a fixed income) especially when their anticipated revenue for next year is over \$1.5 billion dollars. There is a monopoly and residents have virtually no other alternatives for energy resources. Having recently left New York State (where Con Edison routinely holds sway over the Legislature and State Commissions at the literal expense of its customers) we had hoped we left behind a culture where the powerful and privileged interests dictate lock-step compliance. Hopefully the private citizens interests can and will prevail in Florida.
