Your \$1.3 billion rate increase is criminal.
There are thousands of elderly residents
here living on fixed incomes. Please show
some mercy.

Subject: Stop the Electric Rate Increase

Public Service Commissioners:

I ask that you do not let FL P&L make this increase.
Floridians are already burdened with excessively high rates.

Sincerely,
J.A. Brady
Osprey Fl 34229

Subject: F P L

Florida Public Service Commission,

In my opinion F P L does not deserve any increase unless and until a satisfactory service is provided for the charges we are currently paying.

We are constantly having power outages and surges, which has previously been reported, but we have not seen any improvement. At times it is necessary to reset our electric clocks two to three times in one day.

On one occasion our air conditioning was not operating and when the service man came out. I asked him what happened, and his prompt reply was “you can thank dear old FPL for all the power surges”.

It would be wonderful if a efficient electrical service company could provide our electricity.

We are senior citizens and have lived in this current location for fourteen years, but have not ever experienced such unsatisfactory electrical service as we have for this period..

I do not object to paying a reasonable price for a reasonable service.

Subject: FPL's request for rate increase

As a taxpaying and electric using citizen, I find it absurd that FPL is asking for a 23% rate increase from consumers. Why doesn't FPL ask for additional resources to encourage homeowners to invest in solar systems? Oh, I know why, it would cut into their profits and THEY would need to recoup/purchase back any electricity produced by consumers' solar systems.

I believe Florida is considered the Sunshine State, why not encourage the usage of a natural resource (the sun) rather than digging into the earth to find resources not readily available-we do have daily access to the sun! I am not against "big business" making a profit, but as a consumer there are few choices for consumers other than FPL for electrical power users in South Florida.

I encourage the PSC to deny the request of the rate increase from FPL. I also encourage the PSC to require FPL to invest their already made profits into solar power for home owners.

Sincerely,
Diane Horodowich

Subject: Rate Increase

Dear PSC,

Re: FPL Rate Increase request

I am against the rate increase. Improvement costs should be on shareholders/investors of FPL for capital improvements etc.

This increase burdens seniors the most. Please consider seniors who are on Social Security and fixed income that have not had increases to pay higher costs of living.

Thank You

Respectfully,

Frank Curcillo (age 83)

COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company

Details:

Once again I am writing the the Commission regarding another proposed rate hike from Florida Power and Light. This proposed rate hike is opposed not only by residential customers but corporations, retail industries and AARP. I continue to wonder why FPL refuses to reinvest it's profits in capital improvement and opts instead to foist it's costs on it's customers.
