RE: Docket No. 160101-WS Application for increase in water and wastewater rates in Charlotte, Highlands, Lake, Lee, Marion, Orange, Pasco, Pinellas, Polk, and Seminole Counties by Utilities, Inc. of Florida.

Today in the mail we received a cover letter from Ann Marie Ryan with 382 resident letters attached to it.

Please place the attached documents in Docket Correspondence - Consumers and their Representatives, in Docket No. 150269 and 160101.

Thank you.

COMMISSION
CLERK

**COVER LETTER for 382 attached Summertree Resident Letters
to Florida Public Service Commission
from Summertree Water Alliance
Docket No. 150269-WS and Docket No. 160101-WS**

December 16, 2016

Honorable Chairwoman Julie Brown
Florida Public Service Commission
2450 Shumard Oak Blvd.
Tallahassee, FL 32399-0850

Dear Commissioner Brown:

We are submitting **382 resident letters** on behalf of the Summertree community residents in New Port Richey, Florida. We are very concerned about Utilities, Inc. of Florida's proposed consolidated rate increase due to UIF's historical failure for customer service, lack of investment in our infrastructure and relentless rate increases yet provided poor quality water. As you are aware, our community has had issues working with this utility provider for nearly 25 years, and have been subjected to rate increases in 2007, 2010, 2013, 2015, 2016 and now 2017 is pending.

Letters Dated	Letter Packet	From:
November 6, 2016	38	Summertree Resident Letters
November 7, 2016	108	Summertree Resident Letters
November 8, 2016	42	Summertree Resident Letters

November 17, 2016	6	Summertree Resident Letters
November 18, 2016	6	Summertree Resident Letters
November 21, 2016	6	Summertree Resident Letters
November 28, 2016	2	Summertree Resident Letters
382		TOTAL Summertree Resident Letters

In October 2015, Summertree was given an indexing rate increase; in December 2015 UIF filed for Docket No. 150269, limited rate case and were granted their rate request on October 11, 2016 contingent on completion of the Pasco/Summertree Interconnect and the passing DEP testing. Additionally, in June 2016, UIF filed plans for a consolidated rate case Docket No. 160101 and we are anticipating more rate changes for 2017. Our residents are looking forward to this opportunity to express our concerns at the PSC/Summertree Community Hearing on January 10, 2017.

Sincerely,

Ann Marie Ryan, Leader

Summertree Water Alliance

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested Interim Rate increases for a total of 27.68% which means that Summertree residents will pay \$82.61/3,000 gallons/month. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested Interim Rate increases for a total of 27.68% which means that Summertree residents will pay \$82.61/3,000 gallons/month. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested Interim Rate increases for a total of 27.68% which means that Summertree residents will pay \$82.61/3,000 gallons/month. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested Interim Rate increases for a total of 27.68% which means that Summertree residents will pay \$82.61/3,000 gallons/month. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

Signature:

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate Increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

Sincerely,

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested **Interim Rate increases** for a total of 27.68% which means that Summertree residents will pay **\$82.61/3,000 gallons/month**. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.

RE: Docket No. 150269 and Docket No. 160101

Dear Madam Chairwoman Julie Brown,

I am a Summertree resident asking you to support our cause to work the Governor and our Florida State Legislators to review and modify outdated statutes related to Water/Wastewater Utilities.

The Pasco/UIF Summertree Bulk Water Agreement was signed on August 9, 2016. Our Task-force needed to take two trips to Tallahassee for two PSC Conference Agendas (September 13 and October 11) to address the Commission regarding UIF's rate demands in paragraph G, Page 10 of the Bulk Water Agreement (Docket No. 150269). UIF stated they would not purchase water services from Pasco until the PSC set rates that they requested, basically holding our interconnect process hostage.

Just 30 days later, under Docket No. 160101, Summertree was facing yet another rate increase. When Pasco Utilities confirmed that there were no planned increases in bulk wastewater rates, our Task-force returned to Tallahassee for the PSC Conference Agenda on November 1, 2016. The PSC Commissioners approved UIF's requested Interim Rate Increases for a total of 27.68% which means that Summertree residents will pay ~~\$95.27~~ \$82.61 / 3,000 gallons/month. The Florida statutes allow UTILITIES to reap a 10% Return on Equity regardless of their product or service quality. Once the interconnect is completed, Summertree will be a pass-through for water and wastewater; basically, UIF will be our landlord.

I am outraged that outdated statutes allow UTILITIES to function under state Return on Equity guarantees resulting in unearned profits. This oversight has evolved into a serious problem for Florida residents across the state. UIF is consolidating 10 counties, 44 systems and 66,000 consumers. I believe that Summertree's problem is just the tip of the iceberg. UIF should not be subsidized by their customers and pay ever increasing rates for water/wastewater services they do not receive!

Please be aware that we plan to raise awareness to help end the injustices to consumers under the outdated Florida statutes regulating Water/Wastewater Utilities. Without legislative intervention Utilities, Inc. of Florida will continue to take advantage of antiquated utility statutes (creating a utility welfare system) which will financially cripple me and the other 65,999 residents under your watch. We believe that legislative changes will help the Commission and Staff to expand your discretionary authority to further protect the Florida residents.
