Fla. Public Utilities Comm.

I wish to state my opinion on the proposed rate increase for residential users.

I wonder why (when I conscientiously reduce my electric power consumption) I still have equal or Higher power bills.

also - Example: my mobile home (unoccupied & with only refrigerator and partial month stove plugged in, but not used) had a "spike" (as explained by local office) around 7 hours - giving when no one was in the mobile physically at all - even walked in!! What is the explanation for such irresponsible billing.

The increased residence cost each month seems to have no rhyme or reason. I see no explanation. and of course, I DO NOT support any increase in electricity costs.

Enough is Enough. We, the consumer, cannot continue to stand for such increases. Especially those of us on fixed incomes.

Find some other avenue of getting your increased income. That should be your main interest and not on our Backs!

A Very frustrated customer who wishes for alternative options for power sources - which you should be exploring.
