**Subject:** Price Increase for Gulf Power

We live in Bay County Florida and we are writing today to let you know that we are against the price increase and see no need for it. You raised prices when gas went up, yet you did not lower them when the prices went back down. Your company makes enough money from us to pay for whatever you need to do. That is what businesses do. They reinvest in their company and not just worry about what the stockholders and CEOs are going to make.

It is time for you to serve the very people who keep you in business and do not raise any rates. You make enough money to do this already. Maybe it is time for some competition for electricity service!

Thank you!

**Subject:** Oppose Gulf Power Rate Increase

Good afternoon,

My name is Hannah McLeaish, of Pensacola. I am contacting you to express my opposition to the proposed Gulf Power rate increase. I would like to endorse the comments made by Shannon Baker-Branstetter from the January 26th public service commission. It is unreasonable to consider that such a steep rate increase could ever be assumed by the public in this fashion. As a young family with hopes for children in the near future, an increase like this would change the course of our budget and push back our financial ability to responsibly have children until later. I urge Gulf Power to consider those like myself in the community before imposing this fee.

Respectfully,

Hannah McLeaish
