Financial Trigger

- Southern Company EPS must exceed prior year dividend to provide any PPP opportunity (dividend funding mechanism). The intent of the dividend funding mechanism is to ensure adequate coverage of the dividend payments and to eliminate PPP payouts only under circumstances that prevent or threaten continuation of the dividend at the prior year's level. It is not intended to activate when non-recurring, non-cash items occur. Thus, in situations where EPS does not exceed the prior year dividend but Southern Company's earnings are sufficient to fund the dividend, PPP will not be affected by this provision.
